the social and economic impact of ageing

THE SOCIAL AND ECONOMIC IMPACT OF AGEING

In the next instalment of our series on **demographic** changes, we interview Professor Robert Huffenheimer, an expert on the phenomenon of ageing.

1 What exactly does ageing mean?

It means the population in many countries is, on average, getting older. According to a United Nations report, in 2050, there will be more people over the age of 60 than children under 16 for the first time in history.

2 What impact is this ageing process likely to have globally?

Well, obviously it is a good thing that people are living longer, but as a result of this, there are a number of issues which have to be dealt with.

3 For example?

In certain countries, an increasing number of older people are living by themselves, often without any relatives living nearby. The UN reports that 40% of the world's older population lives independently. Some older people are simply unable to take care of themselves, and others can only do so if their houses are specially **adapted**. Likewise, they may be unable to go shopping or wash themselves. Consequently, they need someone, perhaps a professional, to help. And, of course, older people need social activities as well.

4 And how are societies adapting to this?

Supermarkets, for example, have introduced more home-delivery services, which have been particularly beneficial for older people. In addition, there has been significant growth in companies providing services which would traditionally have been **undertaken** by relatives. These include private nursing care and 'Meals on Wheels' services, which deliver food to your door. In the USA, for example, Meals on Wheels serves nearly 2.2 million elderly people across the country, many of whom are living alone or isolated, according to the Urban Institute.

5 Are there any other areas where the impact of ageing can be clearly seen?

Although it is not a problem yet, many governments are worried about the economic impact of an ageing population. Fewer citizens working and paying taxes obviously results in less money for the government to pay for things like health and education. NBC World News recently reported that in Italy, which has Europe's oldest population, people are now living 30 to 40 years beyond retirement. This means that the number of needy pensioners[1] is rising.

6 What advantages can an older population bring?

Countries with a high percentage of young people need to spend a lot of money on education. In contrast, countries with a lower percentage of children have fewer education costs. In more developed countries, older people tend to have more savings and more **leisure** time. In Japan, for example, according to Bloomberg News, the popularity of luxury train travel among older Japanese people has exploded. Consequently, luxury routes are often sold out. Other elderly people may spend more time online or even go back to studying. Of course, older people do have a lot of experience, and if they can, some continue working in a **voluntary capacity** after they retire[2]. This kind of activity adds a lot to society.

[1]**pensioner** (n) a retired person who receives government money for living expenses
[2]**retire** (v) to leave your job or stop working because of having reached a particular age

背诵考核	英语	中文
	instalment	n. 一期
	demographic	adj. 人口统计的
	deal with	处理
	adapt	v. 对房屋进行老化改造 在浴室安装扶手

		在浴室安装防滑垫 拆除门槛， 方便轮椅通行 浴缸改造为淋浴间 加装家用电梯 降低厨房操作台的高度
	likewise	adv. 同样地 = similarly
	explode	v. 爆炸
	voluntary	adj. 志愿者的

definition:
population in many countries is getting older.
there will be more people over the age of 60 than children under 16.

problems
同样的逻辑链条可以得到不一样的结论
负面论证 1
独居 an increasing number of older people live by themselves\ live independently -- 无亲戚在附近 without any relatives living nearby - 无法照顾自己 some older people are simply unable to take care of themselves ---举例：不能购物、不能自己洗澡： they may be unable to go shopping or wash themselves -- 需要人照顾： need someone to help --- 他们的孩子： children -- 吓人的任务 daunting tasks ---- 很大的负担：huge burden on 。。。。。。
正面论证 1
独居 an increasing number of older people live by themselves\ live independently -- 无亲戚在附近 without any relatives living nearby - 无法照顾自己 some older people are simply unable to take care of themselves ---举例：不能购物、不能自己洗澡： they may be unable to go shopping or wash themselves -- 需要人照顾： need someone to help --- 专业人士： professionals \ nurses -- 产业结构和就业。。。。Changing sectors within the economy. -------和老年人相关的商品服务 An increase in the number of retired people will create a bigger market for goods and services linked to old people, e.g. retirement homes.

如何应对老龄化
超市： supermarkets -- 上门服务： introduced more home - delivery services
以前是亲戚帮忙， 现在出现专业公司 there has been significant growth in companies in providing services which would traditionally have been undertaken by relatives -- 举例论证：养老 -private nursing care ， 送餐上门： meals on wheels service --- deliver food to the door

负面影响 2:
老龄化 aging population --- the economic impact \ have a profound effect on economic growth 经济影响： 展开 ---- fewer citizens working and paying taxes 更少的人工作和纳

税 --- result in less money for the government 政府的钱就少了 --- 更少投入和人们生活息息相关的社会板块 fundamental social sectors are highly related to the daily life of every citizen: -- 比如说； 教育 education，医疗： healthcare ----影响生活质量 affect the living quality \ living standard

负面影响 3
人们活得久 live longer --- 超过退休 30 年以上： living 30 to 40 years beyond retirement --- 领养老金的人数在上升 the number of needy pensioners is rising - 养老金压力：rising pension costs ---- 巨大的财政压力 huge financial burden

负面影响 4
老年人多 with the ageing of the global population - 疾病多： disease in the later age --- 健康开支大 the costs of health care are higher -- 财政压力大 place intense pressure on government budget
负面影响的 3、4 可以合并，主题句就变成财政压力大， 中间的展开就围绕健康开支和养老金进行

详细论证： 对医疗服务施加压力 put a strain on medical services, elderly care facilities and the pension scheme of country ---晚年对医疗需求大 medical needs normally appear in later years \senior citizens are prone to health problems----病多 ailment (ail v.) \ illness\ disease\ age-related diseases: Alzheimer\ stroke\ diabetes\ heart disease ---- 精心照顾 intensive care required – 福利代价大 a huge cost on social welfare\ well being ---医疗和社会服务的费用增加 their consumption of medical and social services increases – 社会负担重—governments have to pour more funds into medical facilities ---- 养老院 nursing homes should be built to serve the elderly who experience difficulties in their daily lives -- 税更多 more tax revenue should be allocated to pensions – 纳税人的负担重 add a burden on taxpayers --- 社会经济负担 consider the aged as a burden to society,

负面影响 5
储蓄率会上升 the rate of savings and investment decline –经济迟钝 stagnant economy
论证：储蓄率上升 rates of savings --- 投资率下滑 the rates of investment decline --- 厌恶风险 growing risk aversion -- 目光短浅 shorter time horizons -- 削弱经济 weaken the economy

负面影响 6
推后退休年龄 the old people may postpone retirement. --------继续活跃在职场 In order to stay in the workforce, -----不期待高薪酬 they may not ask for higher pay.---- 抢夺了年轻人的就业机会 take away jobs of young people --- 年轻人的失业率会上升 youth unemployment rate

正面影响 2-- 可以用在驳斥段
老龄人口增多 an older population --- 年轻人口下降 a lower percentage of children --- 较少的教育支出： have fewer education cots -- 比较论证： countries with a high

percentage of young people need to spend a lot of money on education -----offset 抵消 - 政府的压力没有增大

正面影响 3:
老年人有更多的储蓄和时间 older people tend to have more savings and more leisure time --- 旅行： travel， 特别是老年旅行团： luxury train travel ---- 刺激经济的发展 contribute to the economic growth

正面影响 4
老年人有时间 older people tend to have more leisure time --- 学习： go back to studying --- 打造终身学习的社会 life - long learning society

正面影响 5
老年人有经验 older people have a lot of experience ----- 持续工作 continue working -- 瓶颈： bottleneck -- 突破 breakthrough 技术革新 technological innovation
经验老道， 沉稳 rich experience \ expert\ substantial life experience – be capable of 决策 -- making well – informed decisions – 传授给年轻人 impart experience to young generation

补充材料：The improvement of life expectancy also allows people to advance knowledge, which is of benefit to society. They may continue their research projects and gain new knowledge in their positions. It is also possible for them to increase knowledge and build expertise as they have a longer working life. Knowledge is a source of innovation, as they apply new technology to solving some problems or develop some innovative products or services with new discoveries.

正面影响 6
志愿者工作 continue working in a voluntary capacity after they retire --- 给小区做贡献 contribute to the community --- 小区有活力 active community -- 社区意识： the sense of community
退休老人健康、活跃、有时间 Several areas in the community will benefit from the surge in numbers of retirees who are active and healthy, independent and with time on their hands. --- 志愿者工作 Voluntary work – 社区意识就会上升 the sense of community – 老年人 old people: 很高的满意度 a high level of satisfaction with their volunteer work

正面影响 7
老年人推动经济 Elderly people may be an asset to a country in economic terms. ------退后退休年龄 They may postpone retirement. 继续活跃在职场 In order to stay in the workforce, -----不期待高薪酬 they may not ask for higher pay.----------公司的运营成本会下降 This means that it can reduce the labor cost of many companies.----------帮助公司处理很多的问题 Meanwhile, their experience can help employers deal with problems.

补充说明：
负面影响 7：思维固化 be less likely to accept new things\ be not sensitive to new things --

精力不够 less energetic \ vigorous (vigor) \ loss of energy - 创造力低下 produce less\ less productive – have difficulties in tackling the demanding jobs

负面影响 8: 回避科技产品 shy away from new technologies -- 不能与时俱进 cannot keep pace with the times 年轻人 Young: 拥抱新想法 embrace new ideas – 采用新科技 adopt new technologies – 拥抱新变化 stay abreast of changes.

负面影响 9: 尤其是子女有很多的赡养责任 rely on their single child to take care of them financially and often physically – 无法独立居住，需要照料 be difficult to take care of themselves and live independently – 需要支持 they need support of their children ---吓人的工作 this is a daunting task for young people – 更高的收入才能支撑家庭 have to earn high salaries to feed the whole family – 争吵 result in quarrels – 家庭关系 damage the family relationship as well as mental health of the elderly people.

正面影响 8: 保守的态度 Have a conservative attitudes towards new ideas – risk aversion 规避风险----- 遵守社会规则 elderly people tend to abide by the rules and the laws --- 犯罪率低 decreasing the overall crime rate\ low crime rates ---年轻人 young generation: be willing to take risks – put ideas into practice – failure – adventure
Version 2:
It is likely that older communities will be more law abiding communities since older people are less inclined to commit crimes against property and people. – there is likely to be less crime altogether resulting in substantial savings in prison and policing costs in the future

正面影响 9: 孩子老人带， 经济上的贡献 child care and domestic support \ provide the younger generation financial, emotional and career support as well as child caring

正面影响 10: retirees: 节俭的生活方式 lead a frugal life ----年轻人 young generation: 购物、追逐时尚 like shopping and follow fashion -- 价值观 outlook

What are the impacts of a young population on a society?

1 There is a well-**documented** problem with the ageing of the global population, but there are also areas of the world where the demographics are very different. In many parts of the Middle East and North Africa, there is a much higher **proportion** of young people. The Kingdom of Saudi Arabia, a country of over 35 million people, is one such place. This reality has brought special challenges to the Kingdom in a number of different areas such as education, housing and the economy.

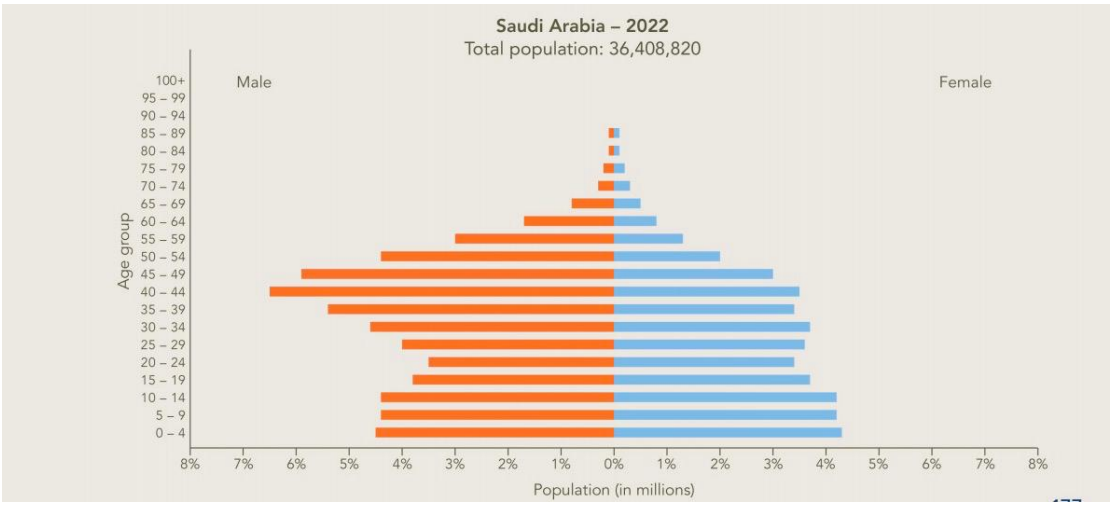

2 The population graph shows the population of men and women in Saudi Arabia and their age **ranges** in 2023. The graph shows Saudi Arabia has a very young population. Upon close analysis, it can be seen that about 24% of the population is aged 14 and under, and approximately 13% of the total population is between the ages of 15 and 24. The number of Saudis in their mid-twenties to mid-fifties is particularly high, with almost 52% of the total population falling within this age range. In the United States the **median** age is 38, in the United Kingdom it is 40, in Italy it is 47 and in Japan it is 49. In contrast, Saudi Arabia is more youthful, as the median age is 30.5.

3 The high percentage of children and young people leads to high education costs in Saudi Arabia. The focus on education is a high priority for Saudi society. A recent report showed that education receives 17% of the government's annual budget, making the country's education spending one of the highest in the world. As a result of its demographic profile, the government has been leading a university expansion programme to **cope** with the large number of college-aged students moving through the school system every year.

4 This also has an impact on employment opportunities for young people. Youth unemployment could well become the Kingdom's biggest social challenge in the coming years. These days, the unemployment rate for Saudis between the ages of 15 and 24 is 33% Unless Saudi Arabia's government can provide enough public-sector jobs, or attract more private-sector employers, more budget expenditure will be needed for unemployment benefits.

5 There is a similar challenge in terms of housing, with more demand than supply. This is a particular problem in places such as Jeddah, Saudi Arabia's second-largest city. Jeddah is on the coast, with a mountain range to the east. Because of this, outward expansion is geographically impossible. As a consequence, houses have become more expensive, and young people may be unable to buy their own homes.

6 Although Saudi Arabia faces several challenges in terms of education, employment and housing as a result of its young population, it does not have to cope with the demands of an ageing population. Because the country has relatively fewer old people than the places mentioned earlier, the costs of healthcare and **pensions** are lower. This will allow more funds to be allocated to improving the lives of young people.

考核频率	默写	中文	英文
2		中间的	median
	profile	资料、人物简介	profile

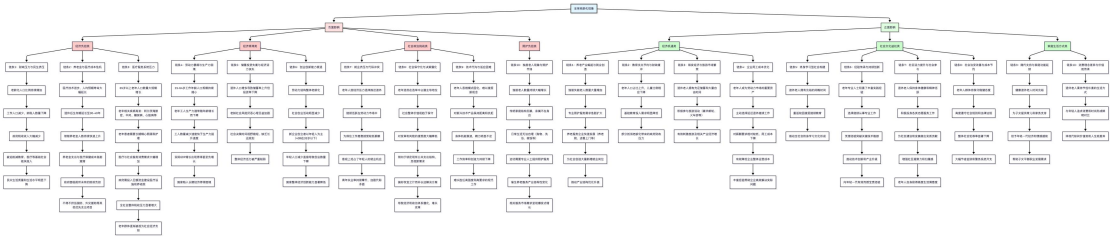

年轻人多 there is a much higher proportion of young people ----对社会有很多的影响 has brought special challenges in a number of different areas such as education, housing and the economy

年轻人多 the high percentage of children and young people --- 导致了更高的教育成本 lead to high education costs - 高度注重教育 the focus on education -- 占据政府的开支 government's annual budget: a large share -- education spending: high --- 大学扩招 a university expansion programme to cope with the large number of college - aged students moving through the school system

年轻人多 - 就业机会不足： Employment opportunities ---年轻人找不到工作 youth unemployment: Social challenge ---失业率久高不下 high unemployment rate -----除非政府提供工作 -- provide public - sector jobs 或者吸引私企进来 attract more private-sector employers ---- 失业救济压力： more budget expenditure will be needed for unemployment benefits

年轻人多 -- 住房问题 housing problem --- 供大于求 more demand than supply --某些城市位置有限，难以扩展， outward expansion is demographically impossible -- 房价高：expensive -- 买不起房子： young people may be unable to buy their won homes

有用的话摘录

once again threaten widespread disruption. We are talking about global aging, which is likely to have a profound effect on economic growth, living standards, and the shape of the world order.

aging populations - 原因： falling birthrates and rising life expectancy

Rising pension and health care costs will place intense pressure on government budgets, potentially crowding out spending on other priorities, including national defense and foreign assistance. Economic performance may suffer as workforces gray and rates of savings and investment decline. As societies and electorates age, growing risk aversion and shorter time horizons may weaken not just the ability of the developed countries to play a major geopolitical role, but also their will.

rising pension and health care costs - place intense pressure on government budgets -- crowd out spending on other priorities: national defense and foreign assistance --经济不好： economic performance will suffer -- 职场老龄化 workforce gray --- 储蓄率上升 rates of savings --- 投资率下滑 the rates of investment decline --- 厌恶风险 growing risk aversion -- 目光短浅 shorter time horizons -- 削弱经济 weaken the economy

读完这段话， 就去修改前面的负面影响 3、4
人们活得久 live longer --- 超过退休 30 年以上： living 30 to 40 years beyond retirement --- 领养老金的人数在上升 the number of needy pensioners is rising - 养老压力在上升 rising pensions ,in addition ---- 老年人多 with the ageing of the global population - 疾病多： disease in the later age --- 健康开支大 the costs of health care are higher -- huge financial costs ----more for nursing homes for the frail elderly 财政压力大 place intense pressure on government budget -- 挤压其他板块的开支 crowd out spending on other priorities , including national defence -- 经济表现 economic performance may suffer 、 slow economic growth

The expectation that global aging will diminish the geopolitical stature of the developed world is thus based in part on simple arithmetic. By the 2020s and 2030s, the working-age population of Japan and many European countries will be contracting by between 0.5 and 1.5 percent per year. Even at full employment, growth in real GDP could stagnate or decline, since the number of workers may be falling faster than productivity is rising. Unless economic performance improves, some countries could face a future of secular economic stagnation—in other words, of zero real GDP growth from peak to peak of the business cycle.

老龄化 global aging population - 工作人口的缩小 the working -age population will be contracting --- 生产率下滑：worker productivity typically decline at older ages ---- 工作人口下滑的比生产率要高 the number of workers may be falling faster than productivity is rising ---- GDP 增长停滞 growth in real GDP could stagnate or decline -- 经济停滞 secular economic stagnation

Economies with graying workforces are also likely to be less entrepreneurial. According to the Global Entrepreneurship Monitor's 2007 survey of 53 countries, new business start-ups in high-income countries are heavily tilted toward the young. Of all "new entrepreneurs" in the survey (defined as owners of a business founded within the past three and one-half years), 40 percent were under age 35 and 69 percent under age 45. Only 9 percent were 55 or older.

老龄化 graying workforces -- 更少的创业 less entrepreneurial -- 对比论证：新企业- 年轻人 new business start-ups in high - income countries are heavily tilted toward the young

At the same time, savings rates in the developed world will decline as a larger share of the population moves into the retirement years. If savings fall more than investment demand, as much macroeconomic modeling suggests is likely, either businesses will starve for investment funds or the developed economies' dependence on capital from higher-saving emerging markets will grow. In the first case, the penalty will be lower output. In the second, it will be higher debt service costs and the loss of political leverage, which history teaches is always ceded to creditor nations.

更多的老年人步入退休年龄 a large share of the population moves into the retirement years -- 储蓄率下降 saving rate will decline ---储蓄下降超越了投资去求 if savings fall more than investment demand -- 企业缺乏投资资金 business will starve for investment funds ---发达国家对于来自于高储蓄率市场的资本的依赖会急剧上升 the developed economies' dependence on capital from higher -saving emerging markets will grow --- 坏结果 bad consequence:低产能 lower output

This shift in business psychology could be mirrored by a broader shift in social mood. Psychologically, older societies are likely to become more conservative in outlook and possibly more risk-averse in electoral and leadership behavior. Elder-dominated electorates may tend to lock in current public spending commitments at the expense of new priorities and shun decisive confrontations in favor of ad hoc settlements. Smaller families may be less willing to risk scarce youth in war.

老龄化 aging population -- 老人主导的社会 older societies -- 价值观偏向保守 conservative in outlook --- 更多的风险厌恶 more risk - averse -- 倾向于锁定现在的开支项目， 忽略其他的重要事项 tend to lock in current public spending commitments at the expense of new priorities ---- 喜欢临时性的解决方法 shun decisive confrontations in favor of ad hoc settlement 临时安排的

作业 1: 老龄化的逻辑链条 - 好处、 坏处

作业 2:

Old generations often hold some traditional ideas on the correct way of life, thinking and behaviour. However, some people think that it is not helpful for the young generations to prepare for modern life in the future. What's your opinion?

Survey shows that in many countries people are living longer, but increased life expectancy has many implications for the aging individuals and for society as a whole. What are the possible effects of living longer for individuals and society?

In the future, there will be a higher proportion of older people than younger people. Is it a positive or negative development?
