2025.6月大作文预测

1、教育的重要性

In the past, teachers were the main source of information, but today students have a wide source of information, so teachers are no longer important in the modern education. Do you agree or disagree?(教育)

在过去，教师是信息的主要来源，但如今学生拥有广泛的信息来源，因此教师在现代教育中不再重要。你是否同意？

🍊 写作立场：Disagree（不同意老师不重要）

尽管现在信息来源很多（网络、视频等），但老师依然在现代教育中发挥着**不可替代的作用**

逻辑链分析：

主体段1

提出观点：信息虽多，但老师的引导作用仍然不可替代

扩展延伸：面对庞杂信息，学生容易迷失，老师能帮助梳理重点与逻辑

举例：比如学习历史或文学时，教师能串联知识点、提供背景与思辨

结果分析：这能让学生不仅“知道”，还“理解”，提升认知深度

主体段2

提出观点：教育不只是传授信息，还包括习惯、思维和人格培养

合理性推断：老师的反馈、鼓励和课堂互动对学习动力影响巨大

举例：许多学生在老师启发下建立目标、坚持学习，网络难以提供这种个性化激励

反面假设：如果教育完全依赖信息工具，学生可能失去方向、动力下降

In today’s digital era, students indeed have access to a vast amount of information beyond traditional classrooms. However, I do not believe this makes teachers any less important. On the contrary, the role of teachers has evolved, but remains crucial in helping students make sense of information, develop learning habits, and grow intellectually and emotionally.

在当今数字时代，学生确实可以在传统课堂之外获取海量信息。然而，我认为这并未削弱教师的重要性。相反，教师的角色虽已演变，但在帮助学生理解信息、养成学习习惯以及实现智力与情感成长方面依然至关重要。

Firstly, while information is widely available online, teachers play a key role in helping students interpret and organize it effectively. In a world overloaded with data, it is easy for learners to become overwhelmed or distracted. Teachers provide structure and highlight essential concepts, making learning more focused and meaningful. For instance, in subjects like history or literature, a teacher can weave together facts, context, and critical viewpoints that students may miss when studying alone. This guidance transforms scattered information into deep understanding and analytical thinking.

首先，尽管网络信息触手可及，教师在帮助学生有效解读和组织信息方面仍发挥关键作用。在数据过载的时代，学习者很容易感到无所适从或分心。教师提供知识框架并梳理核心概念，使学习更具针对性和意义。例如，在历史或文学课程中，教师能够将史实、背景和批判性观点串联起来，而这些可能是学生独自学习时会忽略的内容。这种引导将零散的信息转化为深刻的理解和分析性思维。

Secondly, education is not just about information; it is also about shaping behavior, motivation, and character—areas where teachers have a unique influence. Through classroom interaction, encouragement, and feedback, teachers inspire students to stay engaged and take responsibility for their learning. For example, many students find their academic direction or motivation through a teacher’ s advice or mentorship, something that videos or search engines cannot replicate. If education were reduced to self-guided information consumption, many learners might lack discipline, lose interest, or struggle emotionally.

其次，教育不仅关乎知识传授，还涉及行为塑造、动力激发和品格培养 —— 这些领域正是教师具有独特影响力的地方。通过课堂互动、鼓励和反馈，教师激励学生保持学习投入并对自己的学习负责。例如，许多学生通过教师的建议或指导找到学业方向或动力，而这是视频或搜索引擎无法替代的。如果教育沦为自主式的信息消费，许多学习者可能会缺乏自律、失去兴趣或在情感上陷入困境。

In conclusion, although the sources of knowledge have diversified, teachers remain an essential part of modern education. Their role has shifted from being the sole providers of information to becoming mentors, facilitators, and motivators—functions that are more necessary than ever in today’ s complex learning environment.

总之，尽管知识来源日益多元化，教师仍是现代教育中不可或缺的一部分。他们的角色已从单一的信息提供者转变为导师、引导者和激励者 —— 在当今复杂的学习环境中，这些职能比以往任何时候都更为必要。

2、计算机

Computers are often argued to be themost important invention of the lasthundred years. To what extent do you agree or disagree with this statement?(利技)

人们经常认为计算机是过去一百年里最重要的发明。你在多大程度上同意或不同意这一说法?

🍊 ✅ 立场：部分同意

电脑确实是近百年改变最大的发明之一，但称之为“最重要”则略显绝对。**它的重要性依赖于其他基础发明的支持，比如电力、疫苗、网络等。**

逻辑链分析：

主体段1

提出观点：电脑的确在许多关键领域引发了革命性的改变

结果分析：它极大提升了生产效率、知识传播速度和社会运转模式

扩展延伸：现代办公、科研、交通管理、通信几乎都离不开计算机系统

举例：像医院使用电脑做手术导航、公司依赖系统处理客户订单，都是典型例子

主体段2

提出观点：但即使如此，也不能将电脑视为“最重要的发明”

举例：比如没有电力，电脑根本无法运行；没有疫苗，人类社会甚至可能无法正常维持

反面假设：如果只保留电脑而失去这些基础性科技，现代文明也将很快瘫痪

合理性推断：这说明电脑的作用再大，也依赖于其他更底层的科技基础

Computers have undoubtedly brought revolutionary changes to the modern world. From workplaces to hospitals, their influence is visible in almost every aspect of daily life. In this sense, they are certainly one of the most significant inventions in recent history. However, calling them the *most* important may ignore the foundational role of other essential inventions.

毫无疑问，计算机给现代世界带来了革命性的变革。从工作场所到医院，它们的影响几乎可见于日常生活的方方面面。从这个意义上说，计算机无疑是近代史上最重要的发明之一。然而，将其称为 “最重要的发明” 可能忽略了其他关键发明的基础性作用。

To begin with, computers have transformed how societies function. They have greatly improved productivity, sped up access to knowledge, and reshaped industries such as education, healthcare, and communication. Today’ s workplaces, scientific research labs, and public transportation systems rely heavily on computers to operate efficiently. For instance, hospitals use computer-assisted technologies for surgical navigation, and businesses manage logistics

and customer relations using digital systems. Such examples show how computers have become deeply integrated into our modern infrastructure.

首先，计算机彻底改变了社会的运行方式。它们极大地提高了生产力，加速了知识获取，并重塑了教育、医疗和通信等行业。如今的工作场所、科研实验室和公共交通系统都高度依赖计算机来实现高效运作。例如，医院使用计算机辅助技术进行手术导航，企业通过数字系统管理物流和客户关系。这些实例表明，计算机已深度融入现代社会的基础设施。

That said, computers do not exist in a vacuum. Without electricity, computers would not even turn on; without vaccines and basic public health systems, the people who benefit from computers might not survive to use them. Imagine a world with high-powered machines but no way to power them or keep the population healthy—modern civilization would collapse in such a scenario. This shows that while computers are highly influential, their effectiveness and importance are dependent on more fundamental technologies that support human survival and system functionality.

但需要指出的是，计算机并非孤立存在。没有电力，计算机甚至无法启动；没有疫苗和基础公共卫生体系，受益于计算机的人群可能难以存活并使用它们。试想一个拥有高性能机器却无法供电、或无法保障人口健康的世界 —— 现代文明在这种场景下将崩溃。这说明，尽管计算机影响力巨大，但其有效性和重要性依赖于支撑人类生存和系统运行的更基础技术。

In conclusion, while computers are among the most influential inventions of the last century, they should not be considered the single most important one. Their impact is undeniable, but they function within a larger network of innovations that make modern life possible.

总之，虽然计算机是上世纪最具影响力的发明之一，但不应将其视为 “唯一最重要的发明”。其影响力毋庸置疑，但它是在一个支撑现代生活的庞大创新网络中发挥作用的。

3、养老问题

Nowadays some older people choose to live in retirement communities with other older people, rather than living with their adult children. Is it a positive or negative development?（社会）

如今，一些老年人选择与其他老年人一起居住在养老社区，而不是与成年子女同住。这是积极的还是消极的发展？

🍊 ✅ 立场：正面发展（positive）

支持老年人选择住养老社区：这更符合他们的**身心需求**，也减轻了子女压力，是一种更**独立和现代化的养老方式**。

逻辑链分析：

主体段1

提出观点：与同龄人生活让老人更独立更充实

举例：养老社区配套设施完善，鼓励社交

合理性推断：同龄人之间更易共鸣，减少孤独感

结果分析：促进心理健康，提升生活质量

主体段2

提出观点：这也有助于减轻子女的现实压力

扩展延伸：现代年轻人已面临职场和育儿多重负担

反面假设：强行同住可能引发代际矛盾与精神压力

举例：亚洲国家家庭冲突上升与多代同住有关

In recent years, a growing number of elderly individuals have chosen to live in retirement communities instead of staying with their adult children. I believe this trend represents a positive development, both for the seniors themselves and for their families.

近年来，越来越多的老年人选择入住养老社区而非与成年子女同住。我认为这一趋势无论对老年人自身还是其家庭而言都是积极的发展。

To begin with, living among peers offers older people greater independence and a more socially active lifestyle. Retirement communities typically provide recreational facilities, professional staff, and healthcare services tailored to their needs. These communities also foster communication among people of similar ages and backgrounds, making it easier for residents to form meaningful friendships. This sense of companionship reduces feelings of isolation and promotes emotional well-being, which is often a concern for those who remain at home with little social interaction.

首先，与同龄人共同生活为老年人提供了更大的独立性和更活跃的社交生活。养老社区通常配备休闲设施、专业服务人员及针对老年人需求的医疗保健服务。这些社区还促进相似年龄和背景的人群交流，使居民更易建立有意义的友谊。这种陪伴感减少了孤独感，促进了情感健康 —— 这正是许多独自居家、社交有限的老年人面临的主要问题。

Furthermore, this arrangement can ease the burden on younger family members. In many modern societies, adult children face intense work pressure and must also raise children of their own. Having to care for elderly parents full-time can be emotionally and financially overwhelming. If older people choose to live independently in well-equipped retirement homes, it allows the younger generation to focus on their careers and personal responsibilities without guilt or conflict. In contrast, forcing multiple generations to live under the same roof often leads

to tension, especially when lifestyles or parenting philosophies differ. In countries like Japan or China, this has even contributed to rising family disputes and psychological strain.

其次，这种居住模式可减轻年轻家庭成员的负担。在许多现代社会中，成年子女面临巨大工作压力，同时还需抚养自己的孩子。全职照顾老年父母可能在情感和经济上让人不堪重负。若老年人选择在设施完善的养老社区独立生活，年轻一代便能无负罪感或冲突地专注于自己的事业和个人责任。相反，强迫多代同堂往往导致矛盾，尤其是在生活方式或育儿观念存在差异时。在日本或中国等国家，这甚至加剧了家庭纠纷和心理压力。

In conclusion, the shift toward retirement community living should be viewed as a positive and progressive step. It benefits the elderly by providing comfort and companionship while helping families maintain healthier and more respectful relationships across generations.

总之，转向养老社区生活应被视为积极且进步的举措。它通过为老年人提供舒适与陪伴使其受益，同时帮助家庭维持更健康、更具尊重的代际关系。

4、疾病预防

Some people say that governmentsshould focus on reducing environmentalpollution and housing problems to helppeople prevent illness and disease. To what extent do you agree or disagree?(政府)

有人说，政府应专注于减少环境污染和住房问题，以帮助人们预防疾病。你在多大程度上同意或不同意?

🍊 ✅ 立场：同意为主，部分让步

我会采取**基本同意 + 合理让步**的立场：

- **同意**：污染和住房直接关系到大众健康，是政府最应优先处理的问题之一。
- **让步**：但不能忽视医疗系统本身、健康教育等其他防病措施的重要性。

逻辑链分析：

主体段1

提出观点：政府将资源集中在改善环境与住房是防病的有效方式

合理性推断：空气、水质污染会导致呼吸、消化系统疾病；拥挤、不洁住房更易传染疾病

举例：比如在很多发展中国家，空气污染与哮喘、肺癌病例增加直接相关

结果分析：从源头减少风险，比事后治疗更经济、也更高效

主体段2

提出观点：然而，污染和住房并非导致疾病的唯一根源

反面假设：如果政府忽略公共医疗系统建设，病人得不到及时救治，问题仍无法解决

扩展延伸：营养不良、缺乏运动、心理问题等同样影响健康，需政策支持

举例：比如许多发达国家虽有良好居住条件，但生活方式病如糖尿病、抑郁症依然高发

It is often argued that the government should prioritize solving pollution and housing issues in order to improve public health. I mostly agree with this view, as both areas have a direct and measurable impact on human well-being. However, other public health measures should not be overlooked in the process.

人们常认为政府应优先解决污染和住房问题以改善公共健康。我基本认同这一观点，因为这两大领域对人类福祉有着直接且可衡量的影响。不过，在此过程中其他公共卫生措施也不应被忽视。

To begin with, tackling environmental pollution and poor housing conditions is one of the most effective ways to prevent disease on a large scale. Polluted air and water contribute to respiratory and gastrointestinal illnesses, while overcrowded or unsanitary housing increases the risk of infectious disease transmission. For instance, in many developing countries, high rates of asthma and lung cancer have been linked to prolonged exposure to poor air quality. By addressing these root causes, governments can reduce illness before it happens, which is more cost-effective and socially beneficial than relying solely on treatment.

首先，治理环境污染与恶劣住房条件是大规模预防疾病最有效的途径之一。污染的空气和水源会引发呼吸道及肠胃疾病，而过度拥挤或不卫生的居住环境则会增加传染病传播风险。例如，在许多发展中国家，哮喘和肺癌的高发率与长期暴露于恶劣空气质量密切相关。通过解决这些根源问题，政府能够从源头减少疾病发生，这比单纯依赖医疗救治更具成本效益和社会价值。

That said, focusing only on pollution and housing would be short-sighted. If public hospitals remain underfunded or inaccessible, many people will still suffer due to lack of timely medical care. Moreover, factors such as poor diet, sedentary lifestyles, and mental health issues also play a growing role in disease patterns. For example, in developed nations with clean environments and good housing, chronic conditions like diabetes and depression are still widespread. These problems require investments in education, healthcare services, and social support—not just infrastructure.

但需要指出的是，仅关注污染和住房问题可能具有局限性。如果公立医院长期资金不足或医疗资源匮乏，许多人仍会因缺乏及时救治而承受病痛。此外，饮食习惯不良、久坐的生活方式以及心理健康问题在疾病谱中的影响也日益显著。例如，在环境清洁、住房条件良好的发达国家，糖尿病和抑郁症等慢性病依然普遍。这些问题需要通过教育、医疗服务和社会支持体系的投入来解决，而非仅靠基础设施建设。

In conclusion, I agree that reducing pollution and improving housing should be key government priorities for disease prevention. But these efforts must be part of a broader strategy that includes health services, education, and lifestyle support.

总之，我认为减少污染和改善住房条件应成为政府预防疾病的核心要务，但这些举措必须纳入涵盖医疗服务、教育和生活方式支持的更广泛战略之中。

5、热门爆品

Today, the high sales of popularconsumer goods reflect the power ofadvertising and not the real needs of thesociety in which they are sold. To what extent do you agree or disagree?(媒体)

如今，热门消费品的高销量反映了广告的力量，而非其销售所在社会的真实需求。你在多大程度上同意或不同意？

🍊 ✅ 立场：部分同意（中间立场）

我会主张：**广告确实极大影响了消费者选择，尤其在非必需品中尤为明显**，但也不能完全忽视消费中**真实需求**的存在，尤其是功能性商品。

逻辑链分析：

主体段1

提出观点：很多商品的热销更多是被广告塑造出来的，而非出于真实生活所需

举例：比如许多时尚单品、保健品、新款数码产品，往往通过社交媒体营销迅速走红

结果分析：消费者被塑造出“跟风购买”的心理，即使并不真正需要该产品

合理性推断：广告以情绪化、稀缺性等手法影响判断，使人把“想要”误以为是“需要”

主体段2

提出观点：尽管广告强大，但消费者并非完全没有判断力

合理性推断：在功能型商品如家用设备、教育产品等领域，销量往往与实际用途强相关

反面假设：如果人们买的东西都不实用，那产品质量差、口碑差，很快会被市场淘汰

举例：如智能家电、在线学习平台等之所以畅销，是因为真正提升了生活效率或满足刚需

The popularity of many consumer products today is often attributed more to the power of advertising than to genuine societal needs. While I agree that advertising has a strong influence

on consumer behavior, I do not believe that it fully overrides practical demand, especially in areas where utility matters.

如今，许多消费品的流行往往更多归因于广告的力量，而非社会的真实需求。尽管我认同广告对消费者行为有强大影响，但我认为它并未完全掩盖实际需求，尤其是在实用性至关重要的领域。

It is undeniable that advertising plays a key role in driving the success of many products. Through persuasive techniques and emotional appeal, advertisements often create a sense of urgency or status that encourages people to buy items they may not actually need. For example, fashionable clothing, health supplements, or the latest smartphones are frequently promoted on social media platforms, making them appear essential to modern life. As a result, many consumers develop a desire to purchase such products mainly because of their perceived social value, not because of a functional necessity. This demonstrates how marketing can blur the line between “wants” and “needs.”

不可否认，广告在推动许多产品成功方面发挥关键作用。通过说服技巧和情感共鸣，广告常营造出紧迫感或身份象征，促使人们购买可能并非真正需要的商品。例如，时尚服饰、健康保健品或最新款智能手机频繁在社交媒体平台推广，使其看似现代生活的必需品。因此，许多消费者产生购买欲望主要源于产品的社交价值感知，而非功能必需。这表明营销如何模糊了 “想要” 与 “需要” 的界限。

That said, it would be unfair to say that all consumer demand is artificial. In many cases, popular products reflect real-life needs and provide practical solutions. Items like kitchen appliances, educational tools, or digital services often become bestsellers not due to flashy advertising but because they genuinely improve people’s quality of life. If consumers consistently bought things they didn’t actually use or benefit from, negative reviews and poor word of mouth would quickly erode those products' market share. Therefore, sales figures also reflect informed decisions, especially when it comes to long-term or high-value purchases.

但需要指出，断言所有消费需求都是人为制造的有失公允。在许多情况下，流行产品反映了现实生活需求并提供实用解决方案。厨房电器、教育工具或数字服务等商品成为畅销品，往往不是因为华而不实的广告，而是因为它们真正提升了人们的生活质量。如果消费者持续购买实际用不上或无益处的商品，负面评价和口碑很快会削弱这些产品的市场份额。因此，销售数据也反映了理性决策，尤其是在长期或高价值购买中。

In conclusion, while advertising does shape many purchasing decisions, real consumer needs still play a major role, particularly in essential and functional products.

总之，尽管广告确实塑造了许多购买决策，但真实的消费者需求仍占重要地位，尤其是在必需性和功能性产品领域。

6、国际援助

Some people believe that rich countries should provide poorer countries with other types of help rather than financial aid. To what extent do you agree or disagree?(国际)

有人认为富裕国家应该向贫困国家提供其他类型的帮助，而非经济援助。你在多大程度上同意或不同意？

🍊 ✅立场：部分同意（中间立场）

我会写成*“赞成提供多样化援助，但不是完全取代金钱援助”*，理由是：

- **单纯给钱**可能引发依赖、腐败等问题；
- **但在应急场景或基础建设初期，金钱仍是不可或缺的支持方式**。

逻辑链分析：

主体段1

提出观点：相比直接给钱，提供技术、教育和管理经验更有助于穷国自立

扩展延伸：金钱援助常被滥用或流入腐败体系，反而形成依赖

举例：比如中国在非洲推广农业技术，使当地粮食自给率大幅提升

结果分析：这种“授人以渔”的方式更可持续，也更能改善根本问题

主体段2

提出观点：然而，完全摒弃金钱援助是不现实的

反面假设：如果发生自然灾害或紧急公共卫生危机，只靠技术远远不够

合理性推断：资金在应急物资采购、灾后重建中具有不可替代的作用

举例：如新冠疫情暴发初期，很多发展中国家靠国际金援采购疫苗和呼吸机

There is ongoing debate over whether wealthy nations should prioritize forms of assistance other than financial aid when supporting poorer countries. I believe that non-financial support—such as education, technology, and governance training—can be more effective in the long term. However, financial aid still plays a crucial role in certain situations.

关于富裕国家在支持贫困国家时是否应优先提供非经济援助形式的问题，目前存在持续争论。我认为，教育、技术和治理培训等非财政支持从长远来看可能更有效，但经济援助在某些情况下仍发挥关键作用。

To begin with, offering knowledge and technical assistance can foster self-reliance and long-term development. While direct financial aid may offer short-term relief, it often risks being mismanaged or misappropriated due to corruption and poor oversight. In contrast, support in the form of agricultural training, public health strategies, or infrastructure planning helps poorer countries build the capacity to address their own challenges. For example, China’ s investment

in agricultural technology in parts of Africa has led to significant improvements in local food security. Such skill-based support empowers communities and reduces long-term dependency.

首先，提供知识和技术援助能够培养自力更生能力与长期发展动力。尽管直接经济援助可能带来短期救济，但由于腐败和监管不善，这类援助往往面临被滥用或挪用的风险。相比之下，农业培训、公共卫生策略或基础设施规划等形式的支持，有助于贫困国家构建应对自身挑战的能力。例如，中国在非洲部分地区投入农业技术，显著改善了当地粮食安全。这种基于技能的支持能够赋予社区力量，并减少长期依赖。

That said, completely eliminating financial aid would be impractical, especially during times of crisis. In the event of a natural disaster or a pandemic, countries may need immediate funding to purchase essential supplies or rebuild critical infrastructure. Without financial resources, even the most well-planned technical strategies would be difficult to implement. For instance, during the early stages of the COVID-19 pandemic, many developing countries relied on donations and loans from richer nations to secure vaccines and medical equipment. In such cases, financial aid proved to be indispensable.

但需要指出的是，完全取消经济援助并不现实，尤其是在危机时期。遭遇自然灾害或疫情时，各国可能需要即时资金来采购必要物资或重建关键基础设施。没有资金支持，即便规划最完善的技术方案也难以落地。例如，在新冠疫情初期，许多发展中国家依赖富裕国家的捐赠和贷款来获取疫苗和医疗设备。在此类情况下，经济援助被证明是不可或缺的。

In conclusion, I agree that wealthier nations should place greater emphasis on sustainable, non-financial assistance. Nevertheless, financial aid still serves as a necessary and valuable tool in emergency situations and should not be entirely discarded.

总之，我认同富裕国家应更重视可持续的非财政援助，但经济援助在紧急状况下仍是必要且有价值的工具，不应被完全摒弃。

7、减少犯罪

In many countries, prison is the most common solution to the problem of crime. However, another effective way is to provide people with better education so that they can not become criminals. To what extent do you agree or disagree?（犯罪类）

在许多国家，监禁是解决犯罪问题最常见的方式。然而，另一种有效方法是为人们提供更好的教育，使其避免成为罪犯。你在多大程度上同意或不同意？

🍊 ✅立场：部分同意（中间立场）

观点：**教育确实是从根源上减少犯罪的有效方式，应该受到重视**，但也必须承认**监禁在震慑和惩戒严重罪犯方面仍有必要**。

逻辑链分析：

主体段1

提出观点：教育能从源头降低犯罪风险

扩展延伸：提供技能、规范情绪、培养判断力

结果分析：减少因无知、压力或坏影响导致的违法行为

举例：公共教育完善的国家青少年犯罪率更低

合理性推断：教育缩小社会差距，是根本性防御机制

主体段2

提出观点：监禁依然是处理严重犯罪的核心方式

合理性推断：对蓄意或暴力行为，教育无能为力

扩展延伸：监禁同时承担惩戒与威慑双重功能

举例：像谋杀或惯犯等高危人群，必须隔离改造

结果分析：失去法律威慑会动摇公众对司法体系的信任

Governments around the world often rely on imprisonment as the primary response to crime, but many argue that education is a more effective and sustainable method of prevention. I agree that better education can reduce crime rates over the long term, though prison still plays a necessary role in dealing with serious offenders.

世界各国政府常常将监禁作为应对犯罪的主要手段，但许多人认为，教育是一种更有效且可持续的预防方法。我认同更好的教育从长远来看能降低犯罪率，但监狱在处理严重罪犯方面仍扮演着必要角色。

To begin with, education helps address many of the root causes of criminal behavior. It equips individuals with skills to find legal employment, fosters critical thinking, and promotes emotional self-regulation. These qualities reduce the likelihood of people resorting to illegal actions out of desperation, ignorance, or peer pressure. In addition, educational institutions provide a stable environment and positive social influence, especially for youth at risk. For instance, countries with strong public education systems often report lower levels of petty crime and juvenile delinquency. By reducing social inequality and giving people better life chances, education naturally discourages criminal behavior before it begins.

首先，教育有助于解决犯罪行为的许多根本原因。它使个人具备找到合法工作的技能，培养批判性思维，并促进情绪自我调节。这些特质降低了人们因绝望、无知或同伴压力而诉诸非法行为的可能性。此外，教育机构为高危青少年提供了稳定的环境和积极的社会影响。例如，拥有强大公共教育体系的

国家往往 reported 较低的轻微犯罪和青少年犯罪率。通过减少社会不平等并为人们提供更好的生活机会，教育从根源上自然抑制了犯罪行为的发生。

That said, prison remains essential for maintaining justice and protecting the public. Education cannot prevent all types of crime, particularly those that are violent or intentional. In such cases, imprisonment serves as both punishment and deterrence. Moreover, prisons can offer structured rehabilitation programs that help offenders reintegrate into society. Without a functioning penal system, serious criminals—such as murderers or repeat offenders—would pose ongoing risks, and the public’ s trust in the justice system could be severely damaged.

但需要指出的是，监狱对于维护正义和保护公众仍然至关重要。教育无法预防所有类型的犯罪，尤其是暴力或蓄意犯罪。在这些情况下，监禁既是惩罚也是威慑。此外，监狱可以提供有组织的改造项目，帮助罪犯重新融入社会。如果没有有效的刑罚体系，诸如杀人犯或屡教不改的罪犯等严重犯罪分子将持续构成威胁，公众对司法系统的信任也会严重受损。

In conclusion, while education is a powerful tool for crime prevention, it cannot completely replace the role of prisons. A balanced approach that includes both long-term education policies and firm legal enforcement is the most effective way forward.

总之，尽管教育是预防犯罪的有力工具，但它无法完全取代监狱的作用。将长期教育政策与坚定的法律执行相结合的平衡方式，才是最有效的前进方向。

8、语言创造

Some people say it is necessary tocreate a new language that improvesinternational communication. Do you think the benefits outweigh the drawbacks?(文化)

有人说有必要创造一种新语言以促进国际交流。你认为其益处是否大于弊端?

🍊 ✅立场：反方为主（劣大于益）

我会选择立场：**虽然创造新语言有一定好处，但弊端更多，特别是对文化多样性、现实可行性和语言情感的冲击。**

逻辑链分析：

主体段1

提出观点：统一语言可提升沟通效率

扩展延伸：减少误解、节省翻译成本

举例：科技、外交、贸易等领域沟通更顺畅

结果分析：加快国际协作与知识传播，增进全球联系

主体段2

提出观点：统一语言将带来文化和实践上的损失

扩展延伸：语言承载文化传统和认同，难以替代

合理性推断：全球推广一门新语言难以实现

举例：许多小语种已被边缘化，统一语言可能加剧这一趋势

结果分析：语言情感缺失、文化消解，削弱社会多样性

The idea of inventing a new language to improve international communication has gained attention in our increasingly interconnected world. Although such a proposal may offer certain advantages in theory, I believe the potential disadvantages far outweigh the benefits.

在日益互联的世界中，发明一种新语言以促进国际交流的想法已引起关注。尽管这一提议在理论上可能具有某些优势，但我认为其潜在弊端远大于益处。

To begin with, a universal language could make global communication more efficient. If people around the world shared the same language, misunderstandings would decrease, and translation costs could be reduced significantly. This would particularly benefit areas like international trade, diplomacy, and science, where precise communication is essential. Moreover, it could promote a stronger sense of global unity by allowing individuals from different countries to connect more directly. In fields such as education and technology, knowledge could be shared more easily, speeding up global collaboration and progress.

首先，通用语言可能使全球沟通更高效。如果世界各地的人们使用同一语言，误解会减少，翻译成本也能显著降低。这对国际贸易、外交和科学等领域尤其有益 —— 这些领域中精准沟通至关重要。此外，它还能通过让不同国家的人更直接地交流，增强全球团结意识。在教育和科技领域，知识可以更便捷地共享，加速全球合作与进步。

However, despite these benefits, the drawbacks are more serious. Language is not only a communication tool but also a key part of cultural identity. Replacing native languages with a newly created one would risk eroding traditions, values, and history that are deeply embedded in local languages. Additionally, implementing a new language on a global scale would be extremely difficult, as most people would be reluctant to abandon their mother tongues. Many minority languages are already dying due to globalization; a universal language could accelerate this trend. Furthermore, artificial languages often lack the emotional richness of natural languages, making them harder to adopt in everyday life.

然而，尽管有这些好处，弊端更为显著。语言不仅是交流工具，更是文化身份的核心组成部分。用新创语言取代母语可能会侵蚀深深植根于当地语言中的传统、价值观和历史。此外，在全球范围内推广新语言极为困难，因为大多数人不愿放弃母语。许多少数民族语言已因全球化濒临消亡，通用语言可能加速这一趋势。再者，人造语言往往缺乏自然语言的情感丰富性，使其在日常生活中更难被接受。

In conclusion, while creating a new language might seem helpful for international communication, the loss of cultural diversity and the challenges of global adoption would make it more harmful than beneficial. Therefore, I believe the drawbacks outweigh the potential advantages.

总之，虽然创造新语言看似有助于国际交流，但文化多样性的丧失和全球推广的挑战使其弊大于利。因此，我认为弊端超过了潜在优势。

9、环境问题

There are many environmenta!problems, such as the greenhouse effectand climate change, and people havehardly found any solutions. Why is this the case? And what measures can be taken? (环境)

当前存在许多环境问题（如温室效应和气候变化），而人们几乎尚未找到任何解决方案。为何会出现这种情况？可以采取哪些措施？

🍊 ✅立场：问题复杂多元，但仍有可行解决路径

尽管环境问题久拖不决，背后牵涉政治、经济与认知多重阻力，但只要政府、公众与技术系统联动，依然有希望实现长期改善。

逻辑链分析：

主体段1

提出观点：环境问题难解，背后有多重阻碍

扩展延伸：国家利益冲突、发展优先于环保

合理性推断：问题长期化、隐形化导致公众不重视

举例：能源行业制造信息混乱、拖延政策落地

结果分析：政府顾虑经济与民意，不敢采取强硬措施

主体段2

提出观点：尽管挑战重重，但仍有多项应对策略

扩展延伸：财政激励可推动绿色能源取代化石能源

举例：国际协议 + 法律机制促成国家履约

合理性推断：环境教育有助于调动公众行动力

结果分析：配合科技进步与法规监管，可实现系统性改善

Environmental issues such as the greenhouse effect and climate change remain largely unresolved, despite decades of global concern. This is primarily due to political, economic, and behavioral obstacles. However, there are still practical steps that can be taken to address the problem more effectively.

尽管全球对温室效应和气候变化等环境问题的关注已持续数十年，但这些问题仍基本未得到解决。这主要是由于政治、经济和行为层面的障碍所致。不过，仍有切实可行的措施可更有效地应对这一难题。

One major reason these issues are so difficult to tackle is that they require international cooperation, which is often hindered by conflicting national interests. Countries may prioritize economic growth over environmental protection, especially developing nations that rely on fossil fuels. Additionally, many environmental problems are long-term and invisible in daily life, making the public less motivated to change their habits. Scientific uncertainty and misinformation also create confusion, allowing industries to delay regulation. For example, oil companies have historically lobbied against climate policies by questioning climate science. As a result, governments hesitate to take bold actions that may face public resistance or harm short-term economic goals.

这些问题难以解决的一个主要原因在于，它们需要国际合作，而这往往因国家利益冲突而受阻。各国可能将经济增长优先于环境保护，尤其是依赖化石燃料的发展中国家。此外，许多环境问题具有长期性且在日常生活中不易察觉，导致公众缺乏改变习惯的动力。科学不确定性和错误信息也引发混淆，使相关行业得以拖延监管进程。例如，石油公司历来通过质疑气候科学来游说反对气候政策。因此，政府往往不愿采取可能面临公众阻力或损害短期经济目标的大胆行动。

That said, there are several measures that could help. First, governments can offer subsidies and tax incentives to support green energy, making it more affordable than fossil fuels. Second, stricter international agreements—backed by enforcement mechanisms—can hold countries accountable. Public education is also essential: when people understand the personal impact of environmental damage, they are more likely to act. Moreover, technological innovation should be encouraged, as advancements in energy storage, carbon capture, and sustainable agriculture can significantly reduce emissions. Lastly, environmental regulations must be enforced consistently to avoid loopholes and ensure long-term compliance.

不过，仍有几项措施可起到帮助作用。首先，政府可提供补贴和税收优惠以支持绿色能源，使其价格低于化石燃料。其次，需制定更严格的、有执行机制支撑的国际协议，以确保各国履行责任。公众教育也至关重要：当人们了解环境破坏对个人的影响时，更可能采取行动。此外，应鼓励技术创新，因为储能、碳捕获和可持续农业等领域的进步可显著减少排放。最后，必须持续执行环境法规，避免漏洞并确保长期合规。

In conclusion, although environmental problems are challenging due to global complexity and human behavior, coordinated policy efforts, public engagement, and technological solutions can offer a realistic path forward.

总之，尽管环境问题因全球复杂性和人类行为而颇具挑战性，但协调一致的政策努力、公众参与和技术解决方案仍能为我们提供一条现实的前进路径。

10、年轻人就业

Some people think young peopleshould be free to choose their job, whileothers believe that they should be realisticand think about their future. Discuss bothviews and give your opinion.(工作)

有人认为年轻人应自由选择职业，而另一些人则认为他们应务实并考虑未来。讨论双方观点并给出你的看法。

🍊 ✅立场：两者结合，但倾向务实优先

我认为年轻人应拥有职业选择的自由，但在现实社会中，**理性分析前景、发展与收入仍是更可取的决策方式**，理想与现实需要平衡，不能脱节。

逻辑链分析：

主体段1

提出观点：热爱能带来动力与坚持

扩展延伸：做喜欢的事更容易全身心投入、提升创意

举例：许多创业者和艺术家因追梦取得成功

结果分析：获得成就感，避免职业倦怠或后悔

主体段2

提出观点：现实考虑有助于保障基本生活

扩展延伸：盲目追梦易陷入失业或收入不稳定

举例：如诗人、运动员等职业入行难、回报低

合理性推断：权衡市场趋势与发展空间能降低风险

When it comes to career planning, some people argue that young individuals should freely follow their passions, while others believe they should make more pragmatic choices based on job security and income. In my opinion, while freedom is important, being realistic is often more beneficial in the long run.

在职业规划方面，有人认为年轻人应自由追逐自己的热爱，而另一些人则认为他们应基于工作稳定性和收入做出更务实的选择。在我看来，虽然自由选择很重要，但从长远来看，务实往往更有益处。

Supporters of free choice believe that passion leads to motivation and long-term success. If young people pursue careers they genuinely enjoy, they are more likely to work hard and persist through difficulties. This can result in higher job satisfaction and even innovation in their field. For example, many successful entrepreneurs and artists achieved greatness precisely because they followed their dreams rather than conforming to societal expectations. Additionally, doing what one truly loves often gives people a deeper sense of identity and personal meaning, which a purely practical job may not provide even if it offers stability.

支持自由选择的人认为，热爱能激发动力并带来长期成功。如果年轻人从事真正喜欢的职业，他们更可能努力工作并在困难中坚持，这可能带来更高的职业满意度，甚至在所属领域实现创新。例如，许多成功的企业家和艺术家正是因为追随梦想而非屈服于社会期待才成就卓越。此外，做真正热爱的事往往能赋予人们更深的身份认同感和个人意义，而单纯实用的工作即便能提供稳定，也可能无法给予这种体验。

On the other hand, practical concerns such as financial security and job availability cannot be ignored. The job market is increasingly competitive, and pursuing unrealistic or oversaturated fields may lead to long-term instability. For instance, someone who insists on becoming a poet or athlete without clear prospects might struggle to earn a living. Therefore, young people are encouraged to consider future demand, income potential, and career progression when making decisions. Balancing ideals with economic reality can prevent disappointment and allow individuals to pursue passions later under more secure conditions.

另一方面，经济保障和就业机会等现实因素不容忽视。就业市场竞争日益激烈，追求不切实际或过度饱和的领域可能导致长期不稳定。例如，坚持成为诗人或运动员却缺乏明确前景的人，可能难以维持生计。因此，鼓励年轻人在做决定时考虑未来需求、收入潜力和职业发展空间。将理想与经济现实平衡，既能避免失望，也能让个人在更稳定的条件下追逐热爱。

In conclusion, while following one’ s passion can be fulfilling, I believe that realistic planning should take precedence. A career that blends purpose with practicality is most likely to offer lasting satisfaction.

总之，尽管追随热爱可能令人充实，但我认为务实规划应占优先地位。融合目标感与实用性的职业，最有可能带来持久的满足感。

11、负责任的游客

In recent years, “responsible tourists” have paid attention to preserving both culture and environment of the places they visit. However, some people say that it is impossible to be a “responsible tourist”. To what extent do you agree or disagree?

近年来，“负责任的游客” 注重保护所游览地的文化和环境。然而，有人认为成为 “负责任的游客” 是不可能的。你在多大程度上同意或不同意？

🍊 ✅立场：部分不同意

虽然旅游活动不可避免带来一些负面影响，但我认为“负责任的游客”是完全可能实现的，只要人们具备意识并做出明智选择。

逻辑链分析：

主体段1

提出观点：旅游行为常伴随环境与文化上的破坏

扩展延伸：如碳排放、资源压力、文化不尊重等行为广泛存在

举例：拍照不当、参与动物表演、穿着不合礼节等情况普遍

合理性推断：这种普遍性让人认为“完全负责任”是不现实的理想

主体段2

提出观点：通过有意识的选择，旅游可以带来正向影响

扩展延伸：如选用本地服务、参与环保项目、减少浪费

举例：社区旅游、环保志愿活动、非盈利文化项目越来越多

结果分析：责任感正在塑造更健康、更可持续的旅游方式

With the rise of global tourism, the idea of being a “responsible tourist” has attracted growing interest. While some argue that it is impossible to travel without causing harm, I believe that with the right mindset and behaviors, responsible tourism is not only possible but increasingly common.

随着全球旅游业的兴起，“负责任的游客” 这一理念引发了越来越多的关注。尽管有人认为旅行必然会造成伤害，但我相信，只要有正确的心态和行为，负责任的旅游不仅是可能的，而且正变得日益普遍。

Admittedly, travel often involves certain unavoidable impacts. Flights contribute to carbon emissions, and overcrowded destinations may suffer from overuse of natural resources. Additionally, tourists sometimes disrespect local customs—whether by dressing inappropriately, photographing locals without consent, or supporting unethical activities like animal shows. These behaviors understandably raise doubts about whether any tourism can truly be called “responsible.” However, this view ignores the efforts of travelers who actively work to minimize harm. Being responsible does not mean being perfect; it means being aware, respectful, and intentional in every choice.

不可否认，旅行往往伴随着某些不可避免的影响。航班会产生碳排放，过度拥挤的旅游目的地可能面临自然资源过度使用的问题。此外，游客有时会做出不尊重当地习俗的行为 —— 无论是穿着不当、未经允许拍摄当地人，还是支持动物表演等不道德活动。这些行为难免让人怀疑是否存在真正 “负责任” 的旅游。然而，这种观点忽视了那些积极努力将伤害降至最低的旅行者所做的努力。负责任并不意味着完美无缺，而是意味着在每一个选择中保持清醒、尊重和自觉。

More importantly, tourism can also contribute positively to local communities and the environment. For example, many travelers now choose locally owned guesthouses, use public transportation, and buy handicrafts directly from artisans. These decisions not only reduce environmental damage but also help preserve cultural traditions and support the local economy. Programs like beach clean-ups, wildlife protection tours, or heritage conservation volunteering show how tourism can be used to protect, not just consume. In fact, this growing trend of ethical travel reflects how people are becoming more conscious of their footprint and willing to take responsibility.

更重要的是，旅游业也能对当地社区和环境产生积极影响。例如，如今许多旅行者选择入住当地民宿、使用公共交通工具，并直接从手工艺人手中购买手工艺品。这些决定不仅减少了环境破坏，还有助于保护文化传统和支持当地经济。海滩清理、野生动物保护之旅或遗产保护志愿活动等项目表明，旅游业可以成为保护资源的工具，而不仅仅是消耗资源。事实上，这种日益增长的道德旅游趋势反映出人们正越来越意识到自己的行为影响，并愿意承担责任。

In conclusion, I disagree with the claim that being a responsible tourist is impossible. Although challenges exist, education, awareness, and deliberate action make it entirely feasible to travel in a way that respects both nature and culture.

总之，我不认同 “成为负责任的游客是不可能的” 这一说法。尽管挑战存在，但通过教育、意识提升和有意识的行动，以尊重自然和文化的方式旅行是完全可行的。

12、社交技能

Some people think that social skills are as important as academic qualifications.To what extent do you agree or disagree?(教育)

有人认为社交技能与学历同等重要。你在多大程度上同意或不同意？

🍊 ✅立场：完全同意

我认为**社交能力和学术能力同等重要**。在现代社会，**知识决定你能做什么，社交能力决定你能走多远**。两者缺一不可。

逻辑链分析：

主体段1

提出观点：学历决定你掌握什么，社交能力决定你能否转化

扩展延伸：表达能力、情绪管理、协作意识是基本职场软实力

举例：工程学霸无法带人沟通就难以胜任领导角色

结果分析：技术专长无法独立支撑职场表现

主体段2

提出观点：社交能力更强者通常更容易在职场中晋升和适应变化

扩展延伸：高情商能解决人际冲突，建立持久关系

举例：许多升职靠人脉和信任，而非考试分数

结果分析：软技能决定长期发展空间，尤其在管理或服务领域

In today's fast-changing and interconnected world, both academic qualifications and social skills are widely recognized as essential components of individual success. I fully agree with the view that social skills are just as important as academic credentials, as they significantly affect how knowledge is applied, how teams function, and how careers progress over time.

在当今快速变化且互联互通的世界中，学历和社交技能均被广泛视为个人成功的重要组成部分。我完全认同 “社交技能与学历同等重要” 这一观点，因为社交技能深刻影响着知识的应用方式、团队的协作效率以及职业的长期发展。

Firstly, academic qualifications represent a person’s knowledge and intellectual capacity, but social skills determine how effectively that knowledge is used in real-world scenarios. In most modern workplaces, communication, cooperation, and emotional awareness are vital. Even a technically brilliant employee may struggle if they cannot express ideas clearly, accept feedback, or work well with others. For instance, a top engineering graduate may fail in project

leadership if they lack the ability to guide and connect with their team members in a meaningful way.

首先，学历代表着一个人的知识水平和智力能力，但社交技能决定了这些知识在现实场景中的运用效果。在大多数现代职场中，沟通能力、团队协作和情感认知至关重要。即使是技术卓越的员工，若无法清晰表达观点、接受反馈或与他人良好合作，也可能举步维艰。例如，一名顶尖的工程专业毕业生若缺乏引导团队成员并与之建立有效连接的能力，可能在项目领导岗位上遭遇失败。

Secondly, social skills are directly connected to career development and long-term success. Traits such as empathy, adaptability, and confidence allow individuals to manage teams, solve interpersonal problems, and build lasting relationships. These skills are especially valuable in leadership and customer-facing roles, where human interaction plays a major part. Furthermore, networking—one of the most effective tools for discovering new opportunities—relies almost entirely on strong interpersonal communication.

其次，社交技能直接关系到职业发展和长期成就。同理心、适应力和自信等特质使个人能够管理团队、解决人际问题并建立持久的人际关系。这些技能在领导力岗位和面向客户的角色中尤为重要，因为此类工作高度依赖人际互动。此外，拓展人脉 —— 这一发现新机会的最有效途径之一 —— 几乎完全依赖强大的人际沟通能力。

In conclusion, while academic qualifications provide the foundation of expertise, social skills are equally crucial for turning that expertise into meaningful outcomes. A person who can both think critically and interact confidently with others is far more likely to reach their full potential. Therefore, schools, universities, and employers should all actively support the development of both academic knowledge and interpersonal ability.

总之，尽管学历为专业知识奠定了基础，但社交技能对于将知识转化为有意义的成果同样不可或缺。既能批判性思考又能自信与人交往的人，更有可能充分发挥自身潜力。因此，学校、大学和雇主均应积极支持学术知识与人际交往能力的共同培养。

13、居住习惯

With growing population in cities, more and more people live in a home with small or no outdoor areas. Is it a positive or negative development?(社会)

随着城市人口增长，越来越多的人居住在户外空间狭小或无户外空间的住所中。这是积极的还是消极的发展？

🍊 ✅立场：负面为主（不利发展）

尽管城市扩张需要节省空间，但缺乏户外区域会损害居民的身体健康、心理状态与社会联系，长远来看弊大于利。

逻辑链分析：

主体段1

提出观点：户外空间缺失损害居民健康

扩展延伸：人们更难锻炼、放松，久而久之心理压力上升

举例：研究表明拥有阳台或公园的居民心理状态更积极

结果分析：缺乏绿地使人患上慢性病与精神疾病的风险上升

主体段2

提出观点：缺少公共空间削弱邻里交流

扩展延伸：公共空间原本是人们自然互动的场所

举例：缺乏这些区域后，人们更难建立信任和情感联系

结果分析：导致社交孤立、社区疏离和城市内部的不信任感增强

As urban populations continue to grow, many people are forced to live in apartments with limited or no outdoor space. Although this trend may help accommodate more residents in high-density cities, I believe it is generally a negative development due to its long-term impact on personal well-being, public health, and community life.

随着城市人口持续增长，许多人被迫居住在户外空间有限或全无户外空间的公寓里。尽管这一趋势可能有助于在高密度城市容纳更多居民，但我认为从总体上来说这是一种消极的发展，因其对个人福祉、公共健康和社区生活具有长期影响。

One major concern is its impact on physical and mental health. Green spaces and open areas provide people with opportunities to exercise, get fresh air, and relax away from screens or artificial environments. Without such spaces, urban dwellers are more likely to suffer from sedentary lifestyles, which increases the risk of obesity, heart disease, and depression. For example, many studies show that access to parks or balconies is associated with better mental health, greater life satisfaction, and lower stress levels.

一个主要担忧是其对身心健康的影响。绿色空间和开阔区域为人们提供了锻炼、呼吸新鲜空气以及远离屏幕或人造环境放松身心的机会。若缺乏此类空间，城市居民更易形成久坐的生活方式，进而增加肥胖、心脏病和抑郁症的风险。例如，许多研究表明，拥有公园或阳台的居住环境与更良好的心理健康、更高的生活满意度和更低的压力水平相关。

Another issue is the decline in social interaction and a growing sense of disconnection. Shared gardens, courtyards, and front yards often serve as informal gathering spaces where neighbors can meet and interact naturally. When these spaces are removed, people become more isolated, which can weaken community ties and even increase feelings of loneliness and alienation. Over

time, this may lead to less social cohesion, reduced mutual support, and more mistrust among urban residents, particularly in larger cities.

另一个问题是社交互动的减少和日益强烈的疏离感。共享花园、庭院和前院通常是邻里自然相遇和互动的非正式聚会场所。当这些空间消失时，人们变得更加孤立，这可能会削弱社区纽带，甚至加剧孤独感和陌生感。随着时间的推移，这可能导致城市居民之间的社会凝聚力下降、相互支持减少以及信任度降低，在较大城市中尤为如此。

In conclusion, while small or no outdoor areas may help accommodate rising urban populations in the short term, the long-term disadvantages for individual health and community interaction clearly outweigh these benefits. Therefore, urban planning should prioritize the creation of living environments that not only maximize space but also provide meaningful access to outdoor areas that support both personal and social well-being.

总之，尽管户外空间狭小或缺失可能在短期内帮助容纳不断增长的城市人口，但其对个人健康和社区互动的长期弊端显然超过了这些好处。因此，城市规划应优先创造不仅能最大化利用空间，还能为居民提供 meaningful 户外空间接触的生活环境，以支持个人和社会福祉。

14、国际旅游

Many countries believe thatinternational tourism has harmful effects.Why do they think so? What can be done to change their views?(国际)

许多国家认为国际旅游具有负面影响。他们为何这么认为？如何改变他们的看法？

🍊 ✅立场：解释现象 + 正向引导

本题要求解释“为何一些国家认为国际旅游有害”，并提出解决办法。文章应保持客观中立的分析立场，**在承认问题存在的基础上，引导至积极的解决方向**，逻辑清晰，立场合理。

逻辑链分析：

主体段1

提出观点：旅游引发环境压力、文化冲击和收益不平衡

扩展延伸：游客数量激增破坏生态、造成资源紧张

举例：历史遗迹或生态区被游客破坏

合理性推断：文化被简化为表演，导致身份认同感受损

结果分析：这类经历容易加剧本地人的反感情绪

主体段2

提出观点：政策制定者和行业应推进更道德和包容的模式

扩展延伸：如限流、绿色交通、社区参与等手段

举例：社区旅游可以让当地人真正参与和获利

合理性推断：游客教育有助于增强尊重与环保意识

结果分析：多方合作可转变看法，带来长期益处

Some countries perceive international tourism as a negative force, despite its potential economic and cultural benefits. This viewpoint is often rooted in environmental concerns, cultural disruption, and the unequal distribution of profits. However, with thoughtful planning, strong regulation, and better management, many of these problems can be alleviated, and tourism can become a more sustainable and respected industry over time.

尽管国际旅游具有潜在的经济和文化效益，但一些国家仍将其视为负面力量。这种观点通常源于环境担忧、文化冲击和利润分配不均等问题。然而，通过周密规划、严格监管和优化管理，许多此类问题可以得到缓解，旅游业也能逐渐成为更具可持续性和受人尊重的产业。

A key reason why some governments view tourism negatively is its environmental impact. High volumes of tourists can result in pollution, traffic congestion, and the excessive use of natural resources such as water and energy. In some fragile destinations, irresponsible behavior has led to long-term damage to local ecosystems and historical landmarks. Another concern is cultural dilution. When tourists behave disrespectfully or treat traditions as mere performances, locals may feel their identity is being commercialized. Such patterns of exploitation often create resentment and reduce cultural pride.

一些政府对旅游业持负面看法的一个关键原因是其环境影响。大量游客可能导致污染、交通拥堵以及水资源和能源等自然资源的过度消耗。在某些生态脆弱的旅游地，不负责任的行为已对当地生态系统和历史地标造成长期破坏。另一个担忧是文化稀释 —— 当游客举止失当或将当地传统视为纯粹的表演时，当地人可能会觉得自己的文化身份被商业化。这种剥削模式往往会引发不满，削弱文化自豪感。

To shift this perception, both policymakers and tourism companies must commit to more ethical and inclusive practices. Governments should implement regulations that limit tourist numbers in vulnerable areas and encourage green transportation and renewable energy solutions. Promoting community-based tourism, where locals are actively involved in planning and profit-sharing, is another effective strategy. Furthermore, educating tourists before and during their trips can foster more respectful and environmentally conscious behavior.

要改变这种看法，政策制定者和旅游企业必须致力于更具道德和包容性的实践。政府应实施法规，限制脆弱地区的游客数量，并鼓励绿色交通和可再生能源解决方案。推广以社区为基础的旅游业（让当地人积极参与规划和利润分配）是另一种有效策略。此外，在游客行程前后开展教育，可培养更具尊重意识和环保意识的行为。

In conclusion, although international tourism has caused valid concerns in many parts of the world, these issues are not beyond repair. Through responsible policy design, global cooperation, and long-term investment in local communities, tourism can evolve into a powerful tool for cultural exchange, environmental awareness, and shared prosperity.

总之，尽管国际旅游在世界许多地区引发了合理担忧，但这些问题并非无法解决。通过负责任的政策设计、全球合作以及对当地社区的长期投资，旅游业能够发展成为促进文化交流、环境意识和共享繁荣的强大工具。

15、食品

Today, some food travels thousands ofmiles from farms to consumers. Some people think that it would be better to our environment and economy if people only eat locally produced food. To what extent do the disadvantages outweigh the advantages?(健康)

如今，一些食品从农场到消费者手中要经过数千英里的运输。有人认为，若人们只食用本地生产的食品，将更有利于环境和经济。其弊端在多大程度上超过优势？

🍊 ✅立场：劣大于益（反方为主）

本题探讨是否应只吃本地食品。虽然本地饮食有环保和经济优势，但在全球化背景下，**完全依赖本地食物会带来多样性不足、成本上升和营养风险等问题**，因此我认为弊大于利，主张采用“本地 + 全球”结合的方式。

逻辑链分析：

主体段1

提出观点：本地食品被认为更环保、更健康

扩展延伸：运输距离短，有助减排，应对气候问题

举例：本地农民受益，增强农业地区的经济稳定性

结果分析：更新鲜、更少添加剂，对健康更有利

主体段2

提出观点：完全依赖本地食物存在重大限制

合理性推断：很多地区自然条件不足，难以全年供给多样食材

举例：寒冷国家难以冬季产出热带水果，依赖能源密集型温室

结果分析：全球贸易可提高效率、降低成本、减少浪费

The increasing globalization of food has sparked debate about whether people should rely solely on locally produced goods. While eating local food can benefit the environment and regional economies, I believe that the disadvantages of limiting food sources in this way clearly outweigh the advantages, especially in terms of nutrition, practicality, and global efficiency.

食品日益全球化引发了关于人们是否应仅依赖本地生产食品的争论。尽管食用本地食品对环境和区域经济有益，但我认为以这种方式限制食物来源的弊端明显超过优势，尤其是在营养、实用性和全球效率方面。

On the one hand, local food is often praised for being more sustainable. Reducing the distance food travels cuts down on transport emissions, which helps fight climate change. Buying from nearby farms also supports local economies and strengthens community resilience, especially in rural regions where agriculture is a key livelihood. Additionally, local produce tends to be fresher, more seasonal, and often requires fewer preservatives, which may contribute to a healthier diet. These factors make the consumption of local food attractive to many.

一方面，本地食品常因更具可持续性而受到赞誉。缩短食品运输距离可减少交通排放，有助于应对气候变化。从附近农场采购还能支持地方经济，增强社区韧性，尤其是在农业为主要生计的农村地区。此外，本地农产品往往更新鲜、更应季，且通常需要更少防腐剂，这可能有助于形成更健康的饮食。这些因素使食用本地食品对许多人具有吸引力。

However, depending entirely on local food introduces serious limitations. Many regions lack the natural conditions to grow a wide variety of food all year. For instance, colder countries cannot produce tropical fruits or fresh vegetables during winter without artificial systems that consume large amounts of energy. This affects nutritional balance and limits people’s access to diverse ingredients. Furthermore, global trade allows food to be grown where it is most suitable, maximizing output while minimizing cost and waste.

然而，完全依赖本地食品会带来严重限制。许多地区缺乏全年种植多种食物的自然条件。例如，较寒冷的国家若没有消耗大量能源的人工系统，就无法在冬季生产热带水果或新鲜蔬菜。这会影响营养平衡，并限制人们获取多样化食材的机会。此外，全球贸易使食品能在最适宜的地区种植，最大限度地提高产量，同时降低成本和浪费。

In conclusion, although eating local food brings certain environmental and community-level benefits, the drawbacks—particularly related to food variety, affordability, and feasibility—make it impractical to rely solely on local sources. A balanced approach that includes both local and international options is far more realistic and beneficial in the long term.

总之，尽管食用本地食品带来某些环境和社区层面的益处，但其弊端 —— 尤其是与食物多样性、可负担性和可行性相关的问题 —— 使得完全依赖本地资源不切实际。从长远来看，包含本地和国际食品选择的平衡方式更为现实和有益。
