2025.9月大作文预测 公开版

在看预测之前大家要有一个认知：雅思写作的题库特别广，在不断增加新题的同时还会进行老题重考，所以完全无法统计出题库的完整内容，因此雅思写作可以视为“没有题库”。所以预测是基于近期高频考题做的整理，可以作为类似于“观点库”的辅助内容，但不要寄很大希望于预测到原题

一个比较偷懒的逻辑链思路（容易延伸）

提出观点——扩展延伸——举例——结果分析——【继续延伸】（可选）

无论是什么观点。都可以在观点的基础上进行详细解释。在这个解释的基础上假设一个情境进一步佐证xx会产生xx影响。然后就这个影响进行结果分析，就可以用很顺的逻辑完成一段论述，这个思路我同样觉得非常顺手。

并且只要加一句 “此外” （In addition）等词，就可以对观点做第二个延伸，然后继续举例或结果分析。

就以“父母对儿童成长的影响”这一话题为例，一道是小范围（家庭教育）；一道是大范围（社会、国际），说一下怎么一个观点做2个延伸

父母对儿童的成长有重要影响。那么这个影响有多角度的触点，我们只需要思考父母对儿童的成长，都可以从哪些方面去起作用，就可以得出多个延伸思路。

例如父母为儿童提供情感支持、价值观和行为规范，是孩子最早的榜样。

还可以写 “父母对孩子的具体教导” 、“父母的个人行为的潜在影响” 、"父母对事情的看法影响孩子三观" 、“个人行为还可以分类为 为人处世、面对困难、处理矛盾.....” ，只要打开思路就有无数条线供我们延伸。

> 但是注意，一段最多给观点做2个延伸，不然就是罗列观点，会低分。并且一篇文章最多一段做2个延伸，不然也有罗列观点的嫌疑。总之，**必须保证每一个观点和延伸有足够的内容佐证，不能纯罗列**

有些人认为艺术画廊和博物馆应该展示更多本国的传统文化艺术作品。

那我们要集中思考 “展示更多本国的传统文化艺术作品” 的影响

对社会，弘扬传统文化

对年轻人，加强教育

对文化，表现保护传统的态度

对国家，民族自信心和自豪感

……

这只是粗略的思考，每一个都可以当做一个延伸方向。

1、有钱与幸福

Some experts suppose that when a country is already rich, any additional increase in economic wealth does not make its citizens happier. To what extent do you agree or disagree?(社会)

有专家认为，当一个国家已经富裕时，经济财富的任何额外增长都不会使其公民更加幸福。你在多大程度上同意或反对？（社会）

🍊 写作立场：同意

对于已经富裕的国家来说，继续追求经济增长未必能显著提升幸福感，因为幸福的决定因素更多转向社会公平、心理满足和生活质量，而不是财富的积累。

逻辑链分析：

主体段1

提出观点：在已富裕的国家，继续增加财富对公民幸福的边际效应很低。

举例：北欧国家在高人均收入与完善福利下，主观幸福稳定，未随 GDP 上升而同步跃升。

扩展延伸：当基本需求被满足，新增收入更易转化为社会比较与焦虑，幸福感转而依赖信任、平等与社会连接。

结果分析：因此单纯追求更高 GDP 难以显著提升生活满意度，甚至可能因压力与内卷而被抵消。

主体段2

提出观点：但经济增长并非毫无意义——只要被用于公共福祉，仍可促进幸福。

反面假设：如果只强调 GDP 而忽视医疗、教育与社保，社会竞争与压力会攀升，幸福感反降。

扩展延伸：将增量资源投入全民医疗、优质教育与环境治理，可直接改善安全感、获得感与生活质量。

合理性推断：当财富被有效转化为公共品与机会公平时，幸福感虽不由“收入”直接驱动，却会被制度性改进稳定、持续地抬升。

It is true that when a nation has reached a certain level of prosperity, the relationship between additional wealth and happiness becomes less straightforward. While further growth may not automatically create joy for every citizen, I believe it can still play a supporting role in enhancing well-being if managed wisely.

诚然，当一个国家发展到一定繁荣程度后，额外财富与幸福感之间的关联会变得不再直接。尽管经济进一步增长未必能为每位公民自动带来喜悦，但我认为，若能合理管理，额外财富仍可为提升民众福祉发挥辅助作用。

On the one hand, wealth in rich countries often shows diminishing returns in terms of happiness. Once people’ s basic needs are met and they enjoy stable living conditions, extra income no longer guarantees satisfaction. For instance, surveys in Nordic countries reveal that despite very high GDP per capita, reported happiness levels have remained relatively stable for decades. This suggests that factors such as trust, equality, and social connection contribute more to long-term happiness than money alone. In fact, excessive emphasis on material success can even create stress, social comparison, and environmental harm, undermining people’ s sense of fulfillment.

一方面，在富裕国家，财富对幸福感的提升往往会呈现边际递减效应。当人们的基本需求得到满足、生活稳定后，额外收入便不再是满足感的可靠保障。例如，针对北欧国家的调查显示，尽管其人均国内生产总值（GDP）极高，但数十年来民众报告的幸福水平却相对稳定。这表明，信任、公平以及社会联结等因素，比单纯的金钱更能影响长期幸福感。事实上，过分强调物质成功甚至可能引发压力、催生社会攀比，并造成环境破坏，进而损害人们的满足感。

On the other hand, economic growth can still matter if used strategically. Governments can channel additional resources into public goods like healthcare, education, and environmental protection, which directly affect citizens’ quality of life. Japan and Germany, for example, invest heavily in universal health systems and green technologies, ensuring that prosperity benefits society broadly. In such cases, wealth does not simply accumulate in private hands but is transformed into opportunities for cultural enrichment, cleaner cities, and better social safety nets. This kind of investment shows that money can indirectly nurture happiness by building sustainable communities.

另一方面，若能战略性地利用经济增长，其价值依然不可忽视。政府可将额外资源投入医疗、教育、环境保护等公共产品领域，这些领域直接关系到公民的生活质量。以日本和德国为例，两国在全民医疗体系和绿色技术方面投入巨大，确保了经济繁荣的成果能广泛惠及社会。在这类情况下，财富并非简单地集中在私人手中，而是转化为丰富文化生活、打造更清洁城市以及完善社会保障体系的契机。这类投资表明，金钱可通过建设可持续发展的社区，间接培育幸福感。

In conclusion, while personal happiness in rich nations is less tied to higher income, dismissing economic growth as irrelevant is misleading. What matters is not the mere existence of wealth, but how effectively it is redistributed and invested to improve collective well-being.

总之，尽管在富裕国家，个人幸福感与更高收入的关联度有所降低，但将经济增长视为无关紧要则是一种误解。关键不在于财富本身是否存在，而在于如何有效分配和利用财富，以提升整体福祉。

2、财政花费

Some people say government should give health care the first priorities, some others believe there are more important priorities to spend the tax payers' money. Discuss both views and give your opinion.(政府)

有人认为政府应优先保障医疗保健支出，另一些人则认为存在更重要的财政优先事项。请讨论双方观点并给出自己的意见。（政府）

🍊 写作立场：兼顾

我认为政府在公共财政分配中，不应当偏向单一方向。医疗固然重要，但其他领域如教育、基础设施和社会保障同样关键，因此政府应当在优先保障医疗的同时，合理兼顾其他方面。

逻辑链分析：

主体段1

提出观点：有人认为医疗应是政府的首要投入。

举例：例如在新冠疫情期间，大量国家加大医疗投入才避免了更大规模的公共危机。

扩展延伸：如果医疗资源不足，公民的健康无法保障，就会导致劳动力下降，经济发展也会受到制约。

结果分析：因此，把医疗放在首位不仅是人道主义的要求，也是国家长远发展的基础。

主体段2

提出观点：然而，也有人主张税收资金应优先用于其他领域。

反面假设：假如政府忽视教育投入，即便人民身体健康，也可能缺乏创新能力和竞争力。

合理性推断：事实上，一个国家的幸福感和发展质量依赖于综合条件，单一的医疗投入不足以保证社会进步。

举例：例如一些石油富国，医疗体系完善，但因忽视教育和多元产业，整体发展仍显脆弱。

People often debate how governments should prioritize the use of taxpayers' money. While some argue that health care should always come first, others believe there are equally pressing areas to fund. In my view, the government should not favor one side exclusively but rather adopt a balanced approach.

人们经常争论政府应如何优先分配纳税人的资金。有人认为医疗保健应始终排在首位，也有人认为还有其他同样紧迫的领域需要投入资金。在我看来，政府不应完全偏袒某一方，而应采取均衡的策略。

On the one hand, health care is undeniably a vital priority. Without sufficient medical resources, citizens' basic right to life and safety would be undermined. For instance, during the COVID-19 pandemic, countries that rapidly expanded medical funding were able to reduce death rates and prevent social collapse. Beyond emergencies, ensuring good health also strengthens the labor force, which is essential for sustaining economic growth. In this sense, investing in health care safeguards both individuals and the long-term stability of the nation.

一方面，医疗保健无疑是至关重要的优先事项。若缺乏充足的医疗资源，公民基本的生命安全权将难以保障。例如，在新冠疫情期间，那些迅速增加医疗投入的国家，得以降低死亡率并避免社会秩序崩溃。除应对紧急情况外，保障民众健康还能增强劳动力素质 —— 这对维持经济增长至关重要。从这个角度而言，投资医疗保健既是在保护个体，也是在维护国家的长期稳定。

On the other hand, exclusive focus on health care can be shortsighted. If education is neglected, people may be physically healthy yet lack the knowledge and creativity to drive innovation. Moreover, countries that prioritize only hospitals and clinics while ignoring infrastructure or social welfare may find their overall development unbalanced. For example, certain oil-rich states boast advanced medical systems but still struggle due to weak educational and economic diversification. This shows that other fields deserve significant attention as well.

另一方面，一味偏重医疗保健的做法可能目光短浅。若忽视教育，民众即便身体健康，也可能因缺乏知识与创造力而无法推动创新。此外，那些只优先发展医院与诊所，却忽视基础设施或社会福利的国家，往往会面临整体发展失衡的问题。比如，某些石油资源丰富的国家虽拥有先进的医疗体系，却因教育薄弱、经济结构单一而发展受阻。这一现象表明，其他领域同样值得重点关注。

In conclusion, health care deserves high priority because it protects the very foundation of human well-being. However, it should not monopolize government spending. A wise administration should combine strong investment in medical services with balanced support for education, infrastructure, and social welfare. Only through such integration can taxpayers' money generate the maximum benefit for both individuals and society as a whole.

总之，医疗保健因关乎人类福祉的根本基础，理应获得高度重视，但不应独占政府开支。明智的政府应当在大力投资医疗服务的同时，为教育、基础设施和社会福利提供均衡支持。只有通过这样的统筹兼顾，纳税人的资金才能为个体与整个社会带来最大效益。

3、社交媒体

Nowadays, many people use social media every day to keep in touch with others and news events. Do you think the advantages outweigh the disadvantages?

如今许多人每天使用社交媒体与他人保持联系并获取新闻资讯。你认为利大于弊吗?

🍊 写作立场：利大于弊

我认为社交媒体的优势更大，它不仅能促进人际联系，还能帮助人们即时获取信息，虽然存在隐私泄露和信息过载等问题，但这些弊端是可以通过管理和教育来缓解的。

逻辑链分析：

主体段1

提出观点：社交媒体极大地便利了沟通和信息交流。

扩展延伸：它使得人们跨越地理界限保持联系，也能即时获取全球新闻。

举例：例如在疫情期间，社交媒体成为家庭与朋友联系的重要渠道，同时也让人们快速获取防疫信息。

结果分析：因此，它提升了社会的连通性与信息透明度，对个人和社会都有积极作用。

主体段2

提出观点：的确，社交媒体也伴随着隐私泄露和信息过载的风险。

反面假设：有人认为这些风险会削弱社交媒体的价值，甚至导致心理健康问题。

合理性推断：然而，通过数据保护法规、使用者教育和个人信息管理，很多风险是可以被有效缓解的。

总结回扣：所以，尽管存在弊端，但这些问题并不足以掩盖其带来的整体优势。

In today’s digital era, social media has become an integral part of people’s daily lives. While some argue that its disadvantages, such as privacy issues and information overload, outweigh the benefits, I firmly believe that its advantages are more significant. Social media has fundamentally transformed communication and access to information in ways that were unimaginable in the past.

在当今数字时代，社交媒体已成为人们日常生活中不可或缺的一部分。尽管有人认为，其存在的隐私问题、信息过载等弊端超过了益处，但我坚信，社交媒体的优势更为显著。它从根本上改变了人们的沟通方式与信息获取途径，这种改变在过去是难以想象的。

Firstly, social media has greatly improved human interaction and the dissemination of news. It allows individuals to stay connected across geographical barriers and strengthens social ties. People can now maintain close relationships with family and friends despite physical distance, which enhances emotional well-being. For instance, during the COVID-19 pandemic, social media platforms provided essential means for virtual gatherings and rapid updates about health guidelines. As a result, society became more connected and informed, helping people cope with uncertainties in difficult times.

首先，社交媒体极大地改善了人际互动与新闻传播。它让人们能够跨越地理障碍保持联系，同时强化社会纽带。如今，即便与家人朋友相隔千里，人们也能维系亲密关系，这对提升情感幸福感大有裨益。例如，在新冠疫情期间，社交媒体平台成为举办线上聚会、快速发布健康指南的重要渠道。正因如此，社会成员之间的联系更为紧密、信息获取更为及时，帮助人们在困境中应对各种不确定性。

Admittedly, there are undeniable drawbacks such as risks of privacy leaks and the overwhelming flood of information. Some critics argue that these problems can undermine trust and even harm users' mental health. Nevertheless, such issues can be alleviated through stronger data protection laws, media literacy education, and individuals' careful management of their online presence. With proper regulation and awareness, the negative impact can be significantly reduced, making the overall effect of social media beneficial.

诚然，社交媒体也存在不可忽视的弊端，比如隐私泄露风险与海量信息带来的困扰。一些批评者认为，这些问题会削弱人与人之间的信任，甚至损害用户的心理健康。然而，此类问题可通过加强数据保护立法、开展媒介素养教育，以及个人谨慎管理线上足迹来缓解。只要监管得当、公众具备相应意识，社交媒体的负面影响就能大幅降低，使其整体效用呈现积极态势。

In conclusion, the advantages of social media clearly outweigh its disadvantages. Its unparalleled convenience in communication and access to information has reshaped modern life, while the problems it causes can be mitigated through effective management. Therefore, social media should be regarded as a powerful tool that, when used wisely, contributes more to progress than to harm.

总之，社交媒体的优势明显大于劣势。它在沟通与信息获取方面所具备的独特便利性，重塑了现代生活；而其引发的问题，也能通过有效管理得到缓解。因此，我们应将社交媒体视为一种强大的工具——若能合理使用，它对社会进步的贡献将远大于其可能造成的危害。

4、国际合作

Some people think the main benefit of international cooperation is in the protection of the environment, while others think that the main benefits are in the world of business. Discuss both views andgive your own opinion.(国际)

有人认为国际合作的主要益处在于环境保护，另一些人则认为主要优势体现在商业领域。请讨论双方观点并给出自己的意见。（国际）

🍊 写作立场：都有显著益处

我认为国际合作在环境保护和商业领域都取得了显著成果，两者都不可忽视。环境合作帮助人类应对跨国挑战，商业合作则推动全球经济繁荣，因此它们共同构成了国际合作的主要价值。

逻辑链分析：

主体段1

提出观点：国际合作在环境保护上成果显著。

扩展延伸：许多环境问题跨越国界，必须通过合作解决。

举例：例如《巴黎协定》要求各国共同承诺减排，应对气候变化。

结果分析：这种合作不仅改善了生态环境，也为人类可持续发展奠定了基础。

主体段2

提出观点：国际合作同样在商业领域发挥巨大作用。

合理性推断：通过自由贸易与技术交流，企业和消费者都能从中获益。

举例：例如欧盟内部的统一市场促进了成员国之间的商品流通和经济增长。

结果分析：这使各国经济更加紧密相连，互利共赢，并增强了全球稳定性。

In an interconnected world, international cooperation has become essential for tackling common challenges and fostering development. Some argue that its main benefits lie in environmental protection, while others emphasize its economic value. In my opinion, both views are correct because cooperation has brought remarkable achievements in both areas.

在这个相互关联的世界中，国际合作对于应对共同挑战、促进发展而言已不可或缺。有人认为，国际合作的主要益处体现在环境保护领域，也有人强调其经济价值。在我看来，这两种观点均有道理 —— 因为国际合作已在这两个领域都取得了显著成就。

To begin with, global cooperation is indispensable in protecting the environment. Many ecological challenges, such as climate change, deforestation, and ocean pollution, extend beyond national borders and cannot be solved by one country alone. The Paris Agreement provides a strong example, as nations collectively pledged to reduce carbon emissions to curb global warming. Such initiatives have raised global awareness and mobilized resources on an

unprecedented scale. As a result, international cooperation in the environmental field not only preserves ecosystems but also ensures the long-term sustainability of human society.

首先，全球合作在环境保护方面必不可少。气候变化、森林砍伐、海洋污染等诸多生态挑战均跨越国界，无法仅凭单个国家之力解决。《巴黎协定》便是典型例证：各国共同承诺减少碳排放，以遏制全球变暖。此类倡议不仅提升了全球环保意识，还以前所未有的规模调动资源。由此可见，环境领域的国际合作不仅能保护生态系统，更能保障人类社会的长期可持续发展。

On the other hand, business and trade also benefit significantly from international collaboration. Cross-border agreements and partnerships facilitate free trade, lower tariffs, and allow technology sharing. The European Union’ s single market illustrates this clearly, enabling member states to exchange goods and services more efficiently and to enjoy greater economic prosperity. These benefits are not confined to governments or corporations but extend to ordinary consumers, who gain access to cheaper and more diverse products. Thus, economic cooperation strengthens interdependence among countries and contributes to peace and stability.

另一方面，商业与贸易领域也从国际合作中受益匪浅。跨境协议与合作伙伴关系推动了自由贸易发展、降低了关税，并促进了技术共享。欧盟单一市场的案例便清晰地证明了这一点：它让成员国能更高效地开展商品与服务贸易，进而实现更高水平的经济繁荣。这些益处并非仅由政府或企业独享，普通消费者也能从中获益 —— 他们得以接触到更廉价、更多样的产品。因此，经济领域的合作加强了各国间的相互依存，为和平与稳定作出了贡献。

In conclusion, it is unnecessary to frame environmental and business cooperation as competing priorities. Both represent crucial benefits of international collaboration, addressing immediate human needs while also safeguarding the planet for future generations. Therefore, the greatest value of international cooperation lies in its ability to generate progress in multiple areas simultaneously.

总之，无需将环境合作与商业合作视为相互竞争的优先事项。二者都是国际合作的重要益处，既满足了人类当下的需求，也为子孙后代守护了地球家园。因此，国际合作的最大价值在于，它能够同时推动多个领域取得进步。

5、教育与监狱

In most countries, prison is an effectivesolution for the problem of crime. Some people think a more effective solution is to provide a better education. To what extent do you agree or disagree?(犯罪)

在大多数国家，监狱是解决犯罪问题的有效手段。部分人认为提供更优质的教育是更有效的解决方案。你在多大程度上同意或反对？（犯罪）

🍊 写作立场：教育更有效

我同意教育比监禁更有效。监狱在某些情况下必要，但教育能够从根源上预防犯罪，因此在长期来看更具价值。

逻辑链分析：

主体段1

提出观点：教育能有效降低犯罪率，因为它解决了犯罪的根源。

扩展延伸：许多犯罪行为源自贫困、缺乏机会和社会边缘化，教育能提供技能和就业途径。

举例：例如在一些欧洲国家，职业培训计划帮助青少年远离犯罪道路。

结果分析：通过改善社会流动性，教育减少了人们依赖非法手段谋生的可能性。

主体段2

提出观点：监狱在短期内维持社会秩序，但其效果有限。

举例：很多罪犯在刑满释放后因缺乏技能和支持而再次犯罪。

反面假设：如果只依赖监禁而忽视教育，社会将陷入“抓人—释放—再犯罪”的恶性循环。

合理性推断：因此，监狱应与教育结合，但教育在减少再犯率和长期治本方面更有效。

In most countries, prison remains the primary response to crime. However, some people argue that education offers a more effective solution. I agree to a large extent, as while prisons are necessary for maintaining order, education tackles the deeper causes of crime.

在大多数国家，监禁仍是应对犯罪的主要手段。然而，有人认为教育能提供更有效的解决方案。我在很大程度上认同这一观点 —— 尽管监禁对维护社会秩序而言必不可少，但教育才是解决犯罪深层根源的关键。

To begin with, education plays a crucial role in preventing criminal behavior. Many crimes originate from poverty, unemployment, or lack of social integration. By equipping people with knowledge and skills, education creates opportunities that reduce the appeal of illegal activities. For example, several European countries have introduced vocational training and rehabilitation programs for at-risk youth, which successfully lower juvenile crime rates. In this way, education promotes upward mobility and reduces reliance on unlawful means, making it a more sustainable way to address crime.

首先，教育在预防犯罪行为方面发挥着至关重要的作用。许多犯罪的根源在于贫困、失业或社会融入困难。通过为人们提供知识与技能，教育创造了更多发展机会，从而降低非法活动的吸引力。例如，

一些欧洲国家为高危青少年推出了职业培训与改造项目，成功降低了青少年犯罪率。从这个角度看，教育能促进社会阶层向上流动，减少人们对非法手段的依赖，是应对犯罪更具可持续性的方式。

Nevertheless, prisons cannot be entirely dismissed. They serve as a deterrent and protect society from dangerous individuals in the short term. Yet their effectiveness is limited when used alone. Many former inmates reoffend after release because they lack employable skills or community support. If governments rely solely on incarceration while neglecting education, societies risk falling into a cycle where offenders are repeatedly imprisoned without real change. Therefore, prisons should coexist with educational initiatives, but education must take precedence for reducing crime in the long run.

不过，我们也不能完全否定监禁的作用。短期内，监禁既能起到震慑作用，也能保护社会免受危险分子的危害。但仅靠监禁，其效果十分有限。许多刑满释放人员在出狱后会再次犯罪，原因在于他们缺乏就业技能或社区支持。若政府一味依赖监禁，却忽视教育的作用，社会可能陷入 “罪犯反复入狱却毫无实质改变” 的循环。因此，监禁应与教育举措并行，但从长期减少犯罪的角度来看，教育必须占据优先地位。

In conclusion, prisons are useful for immediate security, but they do not address the root causes of crime. Education, by contrast, empowers individuals and prevents reoffending. For this reason, investment in education is a more effective and sustainable solution to crime, while prisons should function only as a complementary measure.

总之，监禁对保障即时安全有一定作用，却无法解决犯罪的根源问题。与之相反，教育能赋能个体，预防再犯罪行为的发生。正因如此，投资教育是应对犯罪更有效、更可持续的方案，而监禁应仅作为辅助手段发挥作用。

6、跨国公司与全球化

The spread of multinational companiesand the increase of globalization producespositive effects for everyone. To what extent do you agree or disagree?(文化)

跨国公司的扩张和全球化的加剧为每个人带来了积极影响。你在多大程度上同意这一观点？（文化）

🍊 写作立场：部分同意

我部分同意。跨国公司和全球化的确给每个人都带来了切实的便利。但与此同时，它也产生了不平等和消极影响，使部分群体或小企业受到冲击。因此，说它“对所有人”都有积极效果并不完全准确。

逻辑链分析：

主体段1

提出观点：跨国公司和全球化确实带来一些好处。

扩展延伸：它们促进国际贸易，创造就业机会，丰富消费者选择。

举例：例如，快餐品牌和服装品牌的全球扩张，使普通人也能以相对低价购买国际产品。

结果分析：这些便利确实改善了部分人的生活，但并不能代表所有人。

主体段2

提出观点：然而，全球化的影响并不公平，部分人甚至受到损害。

举例：例如，当跨国零售企业进入市场时，本地小商店往往难以生存，工人也可能面临低工资和恶劣劳动条件。

反面假设：如果全球化持续只让少数大公司获利，普通劳动者可能更加边缘化。

合理性推断：因此，全球化带来的“积极影响”并不是普遍存在的，而是高度不均衡的。

The spread of multinational companies and the rise of globalization are often presented as beneficial to everyone. While it is true that these trends bring certain advantages, I disagree with the claim that the positive effects are shared equally. The reality is that while some groups benefit significantly, others are left behind or even harmed.

跨国公司的扩张与全球化的兴起，常被认为能让所有人受益。尽管这些趋势确实带来了某些好处，但我并不认同 “其积极影响能被平等分享” 这一说法。实际情况是，部分群体能显著获益，而另一些群体则被甩在身后，甚至遭受损害。

On the positive side, globalization and multinational corporations create opportunities that cannot be denied. They expand international trade, generate employment, and enrich consumer choices. For example, global fast-food chains and clothing brands allow ordinary people to access international products at relatively low prices. In addition, multinational companies often introduce advanced technologies and management practices to host countries, which can improve efficiency and modernize industries. These outcomes show that globalization has the potential to raise living standards for many.

从积极层面来看，全球化与跨国公司所创造的机遇不容忽视。它们推动国际贸易扩张、创造就业岗位，并丰富消费者的选择。例如，全球连锁快餐品牌与服装品牌，让普通人能以相对低廉的价格接触到国际产品。此外，跨国公司往往会将先进技术与管理经验引入东道国，助力当地提升生产效率、实现产业现代化。这些成果表明，全球化具备提升多数人生活水平的潜力。

However, the benefits are far from universal. In many regions, the expansion of global companies has undermined local businesses that cannot compete with their scale and pricing. Small family-owned shops often close when retail giants enter the market, leaving workers unemployed. Moreover, jobs created by multinational corporations are not always secure or well-paid, as companies frequently seek to minimize costs by offering low wages and poor working conditions. If this trend continues, the gap between corporate profits and workers’

welfare will only widen, with ordinary people bearing the costs of globalization rather than reaping its rewards.

然而，这些益处远未实现全民共享。在许多地区，跨国公司的扩张对本土企业造成了冲击 —— 后者在规模与定价上无法与之竞争。当零售巨头进入市场时，小型家族商铺往往难逃倒闭命运，导致员工失业。不仅如此，跨国公司创造的岗位未必稳定或薪资优厚：为降低成本，企业常以低薪与恶劣的工作条件雇佣员工。若这一趋势持续，企业利润与员工福祉之间的差距只会不断扩大，普通人将承担全球化的成本，而非享受其红利。

In conclusion, globalization and multinational corporations undoubtedly provide some advantages, but it is misleading to suggest that everyone benefits equally. Their influence is uneven, and unless measures are taken to distribute the gains more fairly, many people will continue to be disadvantaged by the process.

总之，全球化与跨国公司无疑带来了一些优势，但声称 “所有人都能平等受益” 是具有误导性的。它们的影响呈现不均衡态势，除非采取措施更公平地分配收益，否则仍会有大量人群在这一进程中处于不利地位。

7、男女偏科

In schools and universities, girls tend to choose arts subjects, while boys choose science subjects. What is the reason for this trend? Should the trend be changed?

在中学和大学中，女生倾向于选择文科专业，而男生多选择理科专业。这一趋势的成因是什么？是否应该改变这种趋势？

🍊 写作立场：应该改变

我认为这种趋势的原因与社会刻板印象和教育环境密切相关。虽然女生倾向于艺术、男生倾向于科学的现象由来已久，但它限制了学生的自由选择和潜力发展，因此这种趋势应当逐步改变。

逻辑链分析：

主体段1

提出观点：女生选择艺术、男生选择科学，主要受社会和文化刻板印象的影响。

扩展延伸：传统观念认为女生更适合感性和创造类学科，而男生更擅长逻辑和技术。

举例：例如在很多家庭和学校里，家长更鼓励男孩参加编程比赛，而鼓励女孩学习音乐或绘画。

结果分析：这种长期的分化导致学生在选专业时受到潜移默化的影响，延续了性别差异。

主体段2

提出观点：这一趋势应当改变，因为它限制了学生的自由选择和社会进步。

合理性推断：如果女生在科学上有兴趣或天赋，却因刻板印象被劝退，社会将失去宝贵的人才；反之亦然。

举例：例如一些著名的女性科学家，如居里夫人，证明了女性同样能够在科学领域取得卓越成就。

反面假设：如果继续维持这种性别分化，社会可能错失人才多样化带来的创新机会。

In many schools and universities, girls are more likely to choose arts subjects while boys tend to select science. This pattern has existed for decades, but it raises the question of why such a division persists and whether it should be changed.

在许多中小学及大学里，女生更倾向于选择文科类科目，而男生则往往选择理科类科目。这种模式已存在数十年，但它引发了一个问题：为何这种分科现象会持续存在？又是否应当改变这种状况？

One main reason behind this trend is the influence of social and cultural stereotypes. Traditionally, people assume that girls are more suited to creative and emotional fields such as literature, music, or art, while boys are believed to excel in logical and technical areas like mathematics and physics. This perception often shapes the way parents and teachers guide their children. For instance, in many families, boys are encouraged to join coding competitions or science clubs, whereas girls are more often pushed toward painting classes or music lessons. Over time, these expectations create a self-fulfilling cycle where students' choices reflect not only their interests but also the social pressures they experience.

这一趋势背后的主要原因之一，是社会与文化刻板印象的影响。传统观念中，人们认为女生更适合文学、音乐、艺术等偏创造性与情感表达的领域，而男生则被认为在数学、物理等侧重逻辑与技术的学科上更具优势。这种认知常常左右家长与教师对孩子的引导方式。例如，在不少家庭中，家长更鼓励男孩参加编程竞赛或科学社团，却更倾向于推动女孩参与绘画课程或音乐培训。长此以往，这些期望便形成了一种 “自我实现的循环” —— 学生的选择不仅反映了个人兴趣，更体现了他们所承受的社会压力。

However, I believe this trend should be changed. Restricting subject choices based on gender stereotypes wastes individual potential and harms social progress. If a girl shows strong interest in physics but is discouraged due to prejudice, society may lose a talented scientist; the same applies to boys who might excel in literature or design but are dissuaded from pursuing these fields. History has already proven that gender should not define ability, with figures such as Marie Curie demonstrating women's excellence in science. If the current pattern continues, societies risk missing out on diverse perspectives and innovative breakthroughs.

然而，我认为这种趋势应当改变。基于性别刻板印象限制学科选择，既浪费个人潜力，也不利于社会发展。若一名女生对物理抱有浓厚兴趣，却因偏见而被劝阻，社会可能会错失一位极具天赋的科学家；同理，那些本可在文学或设计领域大放异彩的男生，若被阻止追求此类方向，也会造成人才流

失。历史早已证明，性别不应成为能力的界定标准 —— 玛丽・居里等人物的成就，便充分展现了女性在科学领域的卓越能力。若当前这种分科模式持续下去，社会或将错失多元视角与创新性突破的可能。

In conclusion, the gendered division in subject choice is largely driven by outdated stereotypes. It is important to encourage students to explore fields freely according to their interests and abilities, so that education systems can nurture talent without limitations.

总之，学科选择中的性别分化，很大程度上是由落后的刻板印象驱动的。重要的是，应鼓励学生根据自身兴趣与能力自由探索不同领域，让教育体系能够无拘无束地培养各类人才。

8、机器

Nowadays, more and more jobs and tasks which involve hard physical work are done by machines. Do the positive effects of this trend outweigh the negative effects?(科技)

如今，越来越多涉及高强度体力劳动的工作和任务由机器完成。这一趋势的积极影响是否大于负面影响？（科技）

🍊 写作立场：积极影响更大

我认为体力劳动由机器替代的积极影响更大。虽然会带来就业流失等问题，但机器提升了效率与安全，让人们能投入到更有创造性的工作中，整体利大于弊。

逻辑链分析：

主体段1

提出观点：机器取代体力劳动带来了效率和安全的提升。

扩展延伸：机器能长时间高强度运作，减少工伤风险，提升生产力。

举例：例如在建筑工地，机械设备能完成重物搬运，降低工人受伤概率。

结果分析：因此，人类能从繁重危险的工作中解放出来，享受更安全的工作环境。

主体段2

提出观点：有人担心机器会导致就业机会减少，特别是低技能劳动岗位。

举例：例如，在制造业和物流行业，自动化导致部分工人失业。

反面假设：如果社会完全依赖机器却忽视教育培训，可能造成社会不平等加剧。

合理性推断：然而，机器也创造了新的岗位，如维护、设计与管理，这些岗位往往更稳定、更有发展前景。

In modern society, an increasing number of physically demanding jobs are now performed by machines. Although some people fear this change may bring negative consequences, I believe the positive effects outweigh the drawbacks.

在现代社会，越来越多体力要求高的工作正由机器完成。尽管有人担忧这一变化可能引发负面后果，但我认为其积极影响大于弊端。

To begin with, machines have greatly improved both efficiency and workplace safety. Unlike humans, they can operate continuously and complete tasks that would otherwise require significant physical strength. For example, on construction sites, heavy lifting and repetitive tasks are often handled by cranes and other machinery, which significantly reduces the risk of accidents. As a result, workers are freed from hazardous duties and can focus on supervision or skilled tasks, leading to higher productivity and safer environments.

首先，机器大幅提升了工作效率与职场安全性。与人类不同，机器能持续运转，还可完成那些需耗费大量体力的任务。例如，在建筑工地上，起重机等机械常用来处理重物搬运和重复性作业，这极大降低了事故风险。由此，工人得以从危险工作中解脱，转而专注于监督或技术性任务，最终实现更高的生产效率与更安全的工作环境。

Nevertheless, critics argue that automation reduces employment opportunities, particularly for low-skilled workers. In sectors such as manufacturing and logistics, machines have indeed replaced human labor in areas like assembly lines and packaging. However, this concern, while valid, overlooks the fact that technological progress also creates new jobs. Workers are increasingly needed in fields such as machine maintenance, programming, and system management. These positions often provide better pay and career prospects compared to traditional manual labor. Therefore, while some jobs disappear, the overall labor market evolves rather than simply contracts.

不过，批评者认为自动化会减少就业机会，对低技能工人的影响尤为显著。在制造业、物流等行业，机器确实已在流水线组装、包装等环节取代了人力。但这种担忧虽有道理，却忽略了一个事实：技术进步也会创造新的就业岗位。机器维护、编程、系统管理等领域对工人的需求正日益增长，且这些岗位通常比传统体力劳动提供更高的薪资和更好的职业前景。因此，尽管部分工作会消失，但整体劳动力市场并非单纯萎缩，而是会发生结构性演变。

In conclusion, the replacement of physically demanding work by machines does carry certain risks, especially regarding employment. Yet its benefits in terms of efficiency, safety, and the creation of new opportunities outweigh the disadvantages. Societies that adapt through education and retraining can ensure that automation becomes a driver of progress rather than a source of inequality.

总之，机器取代体力工作确实存在一定风险，尤其是在就业方面。但它在效率、安全以及创造新机遇上的优势，远超过其弊端。通过教育与再培训帮助社会适应这一变化，就能确保自动化成为推动进步的动力，而非加剧不平等的根源。

9、体育赛事

Some people think sports games areimportant for society, while others believethey should be taken as leisure activities.Discuss both views and give your opinion(健康)

有人认为体育赛事对社会至关重要，另一些人则认为应将其视为休闲活动。请讨论双方观点并给出自己的意见。（健康）

🍊 写作立场：对社会至关重要

我认为体育比赛对社会整体发展有积极作用，不仅仅是休闲娱乐。它们能增强社会凝聚力、激发民族自豪感，并推动经济发展。不过，把体育作为个人的休闲活动也有其合理性，因此两者结合才是更平衡的态度。

逻辑链分析：

主体段1

提出观点：体育比赛在增强社会凝聚力和文化交流方面意义重大。

扩展延伸：它们打破地域、阶层和文化的隔阂，把人们团结在一起。

举例：例如，奥运会和世界杯吸引全球观众，不仅展示运动员的实力，也提升了民族自豪感和国际理解。

结果分析：这种社会情感的共鸣是其他娱乐形式难以替代的，使体育成为社会认同的重要部分。

主体段2

提出观点：体育赛事还能推动经济发展和社会建设。

举例：主办大型赛事往往促进旅游、带动消费，并推动城市基础设施升级。

反面假设：如果社会忽视体育，把它仅视为娱乐，就会错失经济发展和国际影响力提升的机会。

合理性推断：因此，体育不仅是娱乐，更是促进社会繁荣和国家软实力的关键因素。

Sports games are sometimes regarded as leisure activities, but I firmly believe they are far more significant. They play a crucial role in strengthening social bonds, enhancing national pride, and contributing to economic growth, making them essential for modern society.

体育赛事有时被视为休闲活动，但我坚信其意义远不止于此。体育在增强社会联结、提升民族自豪感以及推动经济增长方面发挥着关键作用，是现代社会不可或缺的一部分。

First of all, sports foster unity and cultural exchange on an unmatched scale. Major events such as the Olympics or the World Cup attract millions of viewers and bring people together regardless of age, social class, or nationality. Spectators share the same emotions when cheering for their teams, creating a strong sense of solidarity. At the same time, these competitions promote cultural understanding by allowing countries to showcase not only their athletic talent but also their traditions and values. For example, the Olympics often include cultural ceremonies that highlight the host nation’s history, offering audiences worldwide a chance to learn and appreciate diversity. This unique form of social connection demonstrates that sports are an indispensable part of collective identity.

首先，体育能以无可比拟的规模促进团结与文化交流。奥运会、世界杯等重大赛事吸引数百万观众，无论年龄、社会阶层或国籍如何，都能将人们凝聚在一起。观众为支持的队伍欢呼时，会产生强烈的归属感，共享同一份情感。与此同时，这类赛事还为各国提供了展示平台 —— 不仅能展现体育竞技实力，更能传递本国的传统与价值观，从而增进文化理解。例如，奥运会常会举办文化仪式，彰显主办国的历史底蕴，让全球观众有机会了解并欣赏文化多样性。这种独特的社会联结方式，足以证明体育是构建集体认同感的重要一环。

Furthermore, sports events stimulate economic growth and long-term development. Hosting international tournaments generates tourism revenue, creates jobs, and encourages investment in infrastructure. For instance, cities that prepare for the Olympics often upgrade transportation systems and public facilities, leaving a lasting legacy for residents. Beyond financial benefits, the popularity of sports can also inspire young people to participate in physical activities, promoting public health. If societies dismissed sports as mere entertainment, they would lose valuable opportunities to boost their economies, improve their international reputation, and inspire the next generation. Clearly, the benefits extend far beyond the stadium.

此外，体育赛事还能刺激经济增长，推动长期发展。举办国际赛事不仅能带来旅游收入、创造就业岗位，还能吸引对基础设施的投资。以奥运会为例，主办城市通常会升级交通系统与公共设施，为当地居民留下长远的发展遗产。除经济收益外，体育的广泛影响力还能激励年轻人参与体育活动，进而促进公众健康。若社会将体育仅仅视为娱乐消遣，便会错失推动经济发展、提升国际声誉以及激励下一代的宝贵机遇。显然，体育的益处早已超越赛场本身。

In conclusion, sports should not be underestimated as simple leisure activities. They are vital for fostering unity, strengthening cultural ties, promoting economic prosperity, and encouraging healthier lifestyles. For these reasons, sports games are not optional pastimes but key elements that shape and sustain modern societies.

总之，不应将体育简单视为休闲活动而低估其价值。它对促进团结、加强文化联结、推动经济繁荣以及倡导健康生活方式都至关重要。正因如此，体育赛事并非可有可无的消遣，而是塑造并维系现代社会的核心要素。

10、新技术与就业

Some people think the increasing use of technology in the workplace is good for young people's prospects of gaining a job and harder for old people. To what extent do you agree or disagree?(工作)

有人认为工作场所日益增长的技术应用有利于年轻人就业，但对老年人再就业造成困难。你在多大程度上同意这一观点？（工作）

🍊 写作立场：完全同意

我同意科技在职场中的广泛应用有利于年轻人，却让老年人面临更大挑战。年轻人更容易掌握新技能，而老年人的经验优势因快速更新的技术被削弱，他们在学习新工具时也更加吃力。

逻辑链分析：

主体段1

提出观点：年轻人因掌握新技术而在就业中获得优势。

扩展延伸：他们自小接触电脑、互联网和移动设备，对新工具更敏感。

举例：例如，许多年轻人熟悉人工智能和大数据平台，这些技能在现代职场极受欢迎。

结果分析：因此，他们更容易获得职位并在未来职业发展中占据先机。

主体段2

提出观点：相比之下，老年人在技术主导的职场面临更多困难。

举例：例如，许多中年或年长员工在使用复杂的软件更新或在线管理系统时感到吃力。

扩展延伸：更关键的是，随着技术不断更新换代，他们引以为傲的经验优势逐渐被淡化。

合理性推断：这导致老年人既要克服学习困难，又要面对自身价值被低估的局面，从而在就业市场处于明显劣势。

The increasing use of technology in the workplace has changed the nature of employment opportunities. While opinions differ, I agree with the view that this trend benefits young people more while making it harder for older workers to remain competitive.

职场中技术应用的日益广泛，改变了就业机会的本质。尽管人们对此看法不一，但我认同这样一种观点：这一趋势让年轻人受益更多，却使年长员工更难保持竞争力。

On the one hand, younger generations clearly enjoy advantages in a technology-driven workplace. Having grown up with computers, smartphones, and digital platforms, they are more comfortable adapting to new tools. Employers in modern industries demand skills such as programming, data analysis, or the use of artificial intelligence software, which younger people often possess. For instance, graduates familiar with cloud-based collaboration systems or big data platforms are highly valued by companies seeking innovation and efficiency. As a result, technology gives young workers greater access to job opportunities and provides them with better long-term career prospects.

一方面，在技术驱动的职场环境中，年轻一代显然具备优势。他们成长于电脑、智能手机与数字平台普及的时代，对适应新工具更为得心应手。现代行业的雇主往往要求员工掌握编程、数据分析或人工智能软件操作等技能，而这些技能正是年轻人常具备的。例如，熟悉云协作系统或大数据平台的毕业生，深受追求创新与效率的企业重视。由此可见，技术为年轻劳动者提供了更多就业机会，也为他们带来了更广阔的长期职业前景。

On the other hand, older employees often face significant challenges when workplaces adopt new technologies. Many struggle with mastering advanced software or online management systems, making them less competitive compared to their younger colleagues. More importantly, as industries evolve rapidly, the traditional experience and knowledge that older workers once relied on lose some of their value. This situation places them under double pressure: not only do they find it harder to learn new skills, but they also see their professional experience gradually overshadowed by emerging technologies. Consequently, older workers are often marginalized in a job market that prioritizes technological proficiency.

另一方面，当职场引入新技术时，年长员工往往面临巨大挑战。许多人难以熟练掌握先进软件或在线管理系统，与年轻同事相比竞争力较弱。更重要的是，随着行业快速变革，年长员工曾赖以立足的传统经验与知识，其价值有所下降。这种局面让他们承受双重压力：不仅学习新技能的难度更大，自身的专业经验也逐渐被新兴技术所掩盖。因此，在这个优先看重技术能力的就业市场中，年长员工常处于边缘化地位。

In conclusion, technology in the workplace strengthens young people’s prospects but increases the difficulties for older generations. While training programs may offer some support, the reality is that the pace of technological change inevitably favors the young and challenges the old.

总之，职场技术的发展为年轻人的职业前景注入了动力，却给年长群体增添了困难。尽管培训项目或许能提供一定支持，但现实是，技术变革的速度不可避免地更青睐年轻人，同时给年长者带来了挑战。

11、环境问题

Damage to the environment is an inevitable consequence of worldwide improvements in the standard of living.To what extent do you agree or disagree?

环境破坏是全球生活水平提高不可避免的后果。你在多大程度上同意或反对?

🍊 写作立场：部分同意

我部分同意。随着生活水平提升，人类活动不可避免地对环境造成一定破坏，但这种破坏并不是绝对无法避免的。通过可持续技术和绿色政策，我们可以在享受更好生活的同时减少对环境的伤害。

逻辑链分析：

主体段1

提出观点：生活水平提高往往伴随环境损害。

扩展延伸：人们对住房、交通和能源的需求增加，会导致更多的资源开采与能源消耗。

举例：例如，快速工业化的国家在改善人民收入的同时，空气污染和碳排放显著上升。

结果分析：这种趋势说明，经济增长与环境损害在短期内常常是同步出现的。

主体段2

提出观点：然而，环境损害并不是生活改善的必然代价。

举例：许多国家通过可再生能源和绿色建筑技术，实现了经济发展与环保并行，例如丹麦在发展风能的同时保持了较高的生活质量。

反面假设：如果社会只追求短期的物质提升而忽视环保，才会导致环境被过度破坏。

合理性推断：因此，通过政策引导与技术创新，环境保护和生活水平提升完全可以兼得。

The relationship between rising living standards and environmental damage has been widely debated. Some argue that harming the environment is an inevitable consequence of progress, while others believe development can coexist with sustainability. I partly agree with this statement, as environmental harm often accompanies growth, but it is not an unavoidable outcome.

生活水平提高与环境破坏之间的关系一直备受争议。有人认为，牺牲环境是发展过程中不可避免的代价，也有人认为发展与可持续性可以共存。我在一定程度上认同后一种观点：环境破坏往往伴随发展

而来，但并非必然结果。

On the one hand, improvements in living standards typically place heavy demands on natural resources. As people earn more, they consume more energy, require larger homes, and purchase more goods, all of which contribute to pollution and waste. For example, countries that have industrialized rapidly, such as those in Asia, have lifted millions out of poverty but at the cost of increased carbon emissions and deteriorating air quality. This shows that economic growth and environmental damage often go hand in hand, especially in the early stages of development.

一方面，生活水平的提升通常会对自然资源造成巨大消耗。随着收入增加，人们消耗的能源更多、对住房面积的需求更大、购买的商品也更丰富，这些都会加剧污染与资源浪费。例如，亚洲部分快速工业化的国家，虽让数百万民众摆脱了贫困，却也付出了碳排放增加、空气质量恶化的代价。这表明，经济增长与环境破坏往往相伴相生，在发展初期尤为明显。

On the other hand, environmental damage does not have to be an unavoidable by-product of better living standards. With advances in renewable energy, green construction, and efficient transportation systems, societies can improve people’ s lives without exhausting the planet. Denmark, for instance, has invested heavily in wind power, allowing citizens to enjoy a high quality of life while keeping emissions relatively low. If nations continue to prioritize sustainability, they can avoid repeating the mistakes of past industrial revolutions. This indicates that damage occurs not because it is inevitable, but because governments and societies sometimes fail to balance growth with responsibility.

另一方面，环境破坏并非生活水平提高的必然副产品。随着可再生能源、绿色建筑与高效交通系统的发展，社会完全可以在不耗尽地球资源的前提下改善民生。以丹麦为例，该国大力投资风能，既让民众享受高质量生活，又将碳排放控制在较低水平。若各国持续将可持续发展置于优先地位，就能避免重蹈以往工业革命的覆辙。这说明，环境破坏的发生并非出于 “必然”，而是因为政府与社会有时未能在发展与责任之间找到平衡。

In conclusion, while economic growth has historically harmed the environment, it does not have to remain this way. With the right policies and technologies, it is possible to improve living standards and protect the environment simultaneously.

总之，尽管从历史来看，经济增长确实曾对环境造成损害，但这种局面并非无法改变。通过合理的政策与技术支持，实现生活水平提升与环境保护的并行不悖是完全可能的。

12、航空获益者

Air travel can only benefit the richestpeople in the world. Ordinary people have little to gain from the development of air travel. To what extent do you agree or disagree?(旅游)

航空旅行只能让全球最富裕的群体受益，普通民众从航空业发展中几乎无所获益。你在多大程度上同意这一观点？（旅游）

🍊 写作立场：不同意

虽然机票价格曾经昂贵，使得一部分人认为航空是富人的专属，但随着廉价航空和竞争的加剧，普通人已经能从中获得许多实实在在的便利。

逻辑链分析：

主体段1

提出观点：反对者认为航空旅行主要惠及富人，因为头等舱和远途旅行成本高昂。

举例：例如，商务舱的机票常常高得令人望而却步，普通人无法承担。

扩展延伸：但这种情况正在改变，低成本航空公司和折扣票让航空出行不再是少数人的特权。

结果分析：因此，航空旅行虽然最初昂贵，但如今对普通人来说已经变得可及。

主体段2

提出观点：事实上，普通人已经在多方面从航空发展中获益。

举例：比如，欧洲的廉价航空公司让学生、工薪家庭也能以低价去其他国家度假或探亲。

扩展延伸：对普通人而言，这不仅意味着休闲机会增加，也能更容易与远方亲友保持联系。

合理性推断：因此，航空出行给普通人带来的好处是真实而普遍的，远远超过“仅富人受益”的说法。

Air travel is often criticized as a luxury that only benefits the richest people, with ordinary citizens said to gain very little. While this perception may have been true in the past, I believe the situation has changed significantly, and aviation now brings substantial benefits to ordinary people.

航空旅行常被诟病为 “仅惠及富人的奢侈品”，而普通人则被认为从中获益甚少。尽管这种看法在过去或许成立，但我认为如今情况已发生显著改变 —— 航空业如今正为普通人带来实实在在的益处。

Admittedly, air travel was once seen as the privilege of the wealthy. Business and first-class tickets remain extremely expensive, and long-haul international trips can be unaffordable for many families. For example, a round-trip flight in business class between Europe and Asia can cost several times the monthly income of an average worker. However, this reality does not mean ordinary people are excluded from flying. With the rise of budget airlines and competitive ticket pricing, flying has become far more accessible. Today, millions of people can purchase affordable tickets, meaning air travel is no longer confined to the rich.

不可否认，航空旅行曾一度是富人的专属特权。商务舱与头等舱机票价格依旧高得惊人，长途国际航班对许多家庭而言更是难以负担。例如，欧洲与亚洲之间的商务舱往返机票费用，可能是普通劳动者月收入的数倍。但这一现实并不意味着普通人被排除在航空旅行之外。随着廉价航空公司兴起与机票

价格竞争加剧，乘飞机出行已变得远比以往更易实现。如今，数百万普通人都能买到价格亲民的机票，这意味着航空旅行不再是富人的 “专利”。

In fact, ordinary people have gained considerable advantages from aviation development. Affordable airlines in regions like Europe and Asia allow students, young professionals, and working families to travel abroad for leisure, education, or family visits at reasonable prices. A student in Spain, for instance, can book a low-cost flight to Italy to enjoy a weekend trip, while families can afford holidays that were once unimaginable. Beyond leisure, ordinary people also benefit from the ability to stay connected with distant relatives, strengthening family ties across borders. These examples show that the advantages of air travel are not limited to the elite but extend to everyday individuals in meaningful ways.

事实上，普通人从航空业发展中获得了诸多重要益处。在欧洲、亚洲等地区，廉价航空公司的存在让学生、年轻职场人及工薪家庭，能以合理价格出国休闲度假、求学或探亲。比如，西班牙的学生可以预订廉价机票前往意大利度过周末，而普通家庭也能负担起曾经遥不可及的假期。除休闲之外，普通人还能借助航空旅行与远方亲友保持联系，加固跨越国界的亲情纽带。这些例子都表明，航空旅行的益处并非仅局限于精英阶层，而是以切实的方式惠及了普通大众。

In conclusion, while luxury cabins remain the domain of the wealthy, the broader development of aviation has made flying affordable and beneficial for ordinary people. It is therefore misleading to claim that only the rich gain from air travel.

总之，尽管豪华客舱仍为富人专属，但航空业的整体发展已让乘飞机变得经济实惠且对普通人有益。因此，声称 “只有富人能从航空旅行中获益” 的说法是具有误导性的。

13、教师

In the past, teachers were the main source of information, but today students have a wide source of information, so teachers are no longer important in modern education. Do you agree or disagree?(教育)

过去教师是信息的主要来源，但如今学生拥有广泛的信息渠道，因此教师在现代教育中不再重要。你是否同意这种观点？（教育）

🍊 写作立场：不同意

虽然今天信息来源更加多样，但教师在教育中仍然不可替代。他们不仅帮助学生筛选和理解信息，还在思维培养、人格塑造和学习动力方面发挥着关键作用。

逻辑链分析：

主体段1

提出观点：教师在海量信息时代依然不可或缺。

扩展延伸：网络和书籍能提供信息，但学生常常缺乏判断力，容易被误导。

举例：例如，在历史课上，教师能把零散的史实组织成逻辑清晰的框架，而不是让学生陷入信息碎片化。

结果分析：这使学生不仅“知道事实”，还理解其背后的逻辑与意义。

主体段2

提出观点：教育并不仅是传递信息，教师在引导思维与人格培养上不可替代。

举例：例如，许多学生在老师的鼓励下建立学习目标，坚持完成原本困难的任务。

反面假设：如果教育完全依赖信息工具而没有教师，学生可能缺乏方向，动力下降。

合理性推断：因此，教师的作用远远超越了单纯的信息传递，他们是学生成长道路上的引路人。

In the past, teachers were regarded as the main source of information, but today students can easily access knowledge from the internet, television, and other media. Some therefore argue that teachers are no longer important in modern education. I strongly disagree with this view, as teachers play a role that goes far beyond simply transmitting facts.

在过去，教师被视为信息的主要来源，但如今学生能轻松从互联网、电视及其他媒体获取知识。因此，有人认为在现代教育中，教师已不再重要。我对此观点深表反对，因为教师所扮演的角色远不止单纯传递事实那么简单。

To begin with, teachers remain essential for guiding students through the overwhelming amount of information available today. Although online resources and books provide vast amounts of knowledge, young learners often lack the ability to evaluate the reliability and relevance of such material. For instance, in history classes, a teacher can help students organize scattered facts into a coherent framework and explain the causes and consequences of key events. This enables learners not just to memorize information, but to gain a deeper understanding of its meaning and significance.

首先，面对如今海量的可获取信息，教师在引导学生方面依然不可或缺。尽管网络资源与书籍提供了丰富的知识，但年轻学习者往往缺乏判断这些信息可靠性与相关性的能力。例如，在历史课堂上，教师能帮助学生将零散的史实梳理成条理清晰的知识框架，并讲解关键事件的前因后果。这不仅能让学生记住信息，更能让他们深入理解信息背后的意义与价值。

Furthermore, education is not only about acquiring knowledge but also about cultivating critical thinking, values, and motivation. Teachers provide encouragement, feedback, and personal interaction that digital resources cannot replicate. For example, many students are inspired by their teachers’ guidance to set ambitious goals and persist with difficult tasks. Without such mentorship, education would risk becoming a mechanical process, with students losing both

direction and enthusiasm. Thus, teachers are not just information providers but role models and motivators who influence a student’ s overall development.

此外，教育并非仅关乎知识获取，更在于培养批判性思维、价值观与学习动力。教师所能提供的鼓励、反馈与人际互动，是数字资源无法替代的。比如，许多学生正是在教师的引导下树立远大目标，并在面对困难任务时坚持下去。若缺少这样的指导，教育可能会沦为机械的知识灌输过程，学生也会失去方向感与学习热情。由此可见，教师不仅是信息传递者，更是影响学生全面发展的榜样与激励者。

In conclusion, while modern technology has expanded access to information, it has not replaced the importance of teachers. Their guidance, support, and inspiration remain crucial for helping students grow into knowledgeable and responsible individuals.

总之，尽管现代科技拓宽了信息获取渠道，但并未取代教师的重要性。教师的引导、支持与启发，对于帮助学生成长为兼具学识与责任感的个体而言，依然至关重要。

14、手机与电脑的普及

Some people think that with theincreasing use of mobile phones andcomputers, people lose the ability tocommunicate face to face. To what extent do you agree or disagree?(科技)

有人认为随着手机和电脑的日益普及，人们逐渐丧失面对面交流的能力。你在多大程度上同意或反对？（科技）

🍊 写作立场：部分同意

我部分同意。手机和电脑的广泛使用确实让人们的面对面交流机会减少，一些人甚至变得更依赖虚拟沟通。但与此同时，这些工具也提升了沟通效率，并且在某些情况下反而能促进面对面关系的发展。

逻辑链分析：

主体段1

提出观点：频繁依赖电子设备会降低人们面对面交流的能力。

扩展延伸：很多人习惯通过信息或社交软件沟通，而避免直接交流。

举例：例如，年轻人常常更愿意发消息而不是打电话或当面沟通，导致他们在公共场合表达时更紧张。

结果分析：长此以往，人们的口头表达与倾听能力可能下降。

主体段2

提出观点：然而，手机和电脑并没有彻底削弱面对面交流，反而有助于建立和维护关系。

举例：例如，很多人通过视频通话与远方的家人保持联系，这往往促成他们在见面时交流更自然。

反面假设：如果没有这些技术，人们可能会因距离而失去联系，导致面对面沟通机会更少。

合理性推断：因此，问题不在于工具本身，而在于人们如何使用它们。

The rapid spread of mobile phones and computers has transformed the way people communicate. Some argue that these devices reduce our ability to engage in face-to-face interaction. I partly agree with this view: while digital communication can weaken traditional skills, it also creates opportunities for stronger connections.

手机与电脑的快速普及，彻底改变了人们的沟通方式。有人认为，这些设备削弱了我们进行面对面交流的能力。我在一定程度上认同这一观点：尽管数字沟通可能会弱化传统交流技能，但它也为建立更紧密的人际联结创造了机遇。

On the one hand, excessive reliance on electronic devices can diminish people’ s ability to communicate effectively in person. Many individuals now prefer sending text messages or chatting online rather than meeting or speaking directly. Young people, for example, often feel more comfortable expressing themselves through social media posts than through face-to-face conversations. As a result, they may become nervous in public discussions or struggle with active listening. Over time, this dependence on technology can erode confidence and reduce the subtle social skills that are best developed through personal encounters.

一方面，过度依赖电子设备确实可能降低人们面对面高效沟通的能力。如今，许多人更倾向于发送短信或在线聊天，而非直接见面或通话。例如，年轻人往往觉得通过社交媒体发帖表达想法比面对面交谈更自在。长此以往，他们可能在公开讨论中感到紧张，或难以掌握积极倾听的技巧。这种对技术的依赖会逐渐削弱人的沟通自信，也会让那些需通过亲身接触才能充分培养的细微社交技能（如肢体语言解读、语气感知等）逐渐退化。

On the other hand, modern technology has also enabled people to maintain and even strengthen their relationships. Mobile phones and computers allow individuals to stay in touch with family members and friends who live far away. For instance, video calls help parents regularly see their children studying abroad, making their eventual face-to-face meetings warmer and more meaningful. If such technology did not exist, distance could easily weaken bonds and reduce the chances of in-person interaction altogether. Thus, the negative impact depends largely on how people use these tools rather than on the tools themselves.

另一方面，现代科技也让人们得以维系甚至深化人际关系。手机与电脑让人们能与远方的亲友保持联系。比如，视频通话让父母能定期看到在国外求学的孩子，这不仅拉近了心理距离，也让他们日后的面对面相聚更显温暖、更具意义。若没有这类技术，距离很可能会逐渐淡化情感联结，甚至完全剥夺面对面交流的机会。由此可见，科技对人际沟通的负面影响，很大程度上取决于人们如何使用这些工具，而非工具本身。

In conclusion, while the use of phones and computers can reduce face-to-face communication skills in some cases, it is not accurate to say they destroy such abilities. With balanced use, technology can complement rather than replace direct human interaction.

总之，尽管手机与电脑的使用在某些情况下可能会削弱面对面沟通技能，但断言它们会彻底摧毁这种能力并不准确。只要合理平衡使用，科技完全可以成为直接人际互动的补充，而非替代品。

15、户外空间

With growing population in cities, more and more people live in homes with small or no outdoor areas. Do you think it is a positive or negative development?

随着城市人口增长，越来越多居民居住在户外空间狭小或完全没有户外区域的住宅中。你认为这是积极还是消极的发展趋势?

🍊 写作立场：负面影响

我认为这是一个负面发展。虽然小户型和无户外空间的住房满足了城市人口增长的需求，但它牺牲了居民的生活质量和身心健康，对长期社会发展并不利。

逻辑链分析：

主体段1

提出观点：住在没有户外空间的房屋会降低居民的生活质量。

扩展延伸：缺乏花园、阳台或公共绿地，意味着人们缺少接触自然和放松的机会。

举例：例如，许多城市居民只能被迫在狭小的客厅活动，导致缺乏运动空间。

结果分析：长此以往，容易引发压力、焦虑以及健康问题。

主体段2

提出观点：这一趋势对社会的整体发展也有负面作用。

举例：例如，儿童失去安全的户外活动场所，更依赖电子设备，可能影响社交能力。

反面假设：如果这种情况继续下去，未来城市居民可能普遍缺乏锻炼机会，增加公共健康负担。

合理性推断：因此，政府应优先规划更多公共绿地和户外活动区域，以抵消小户型住房带来的弊端。

As urban populations continue to rise, many people are now living in homes with limited or even no outdoor space. While this development may address the immediate housing shortage, I believe it represents a largely negative trend due to its impact on individual well-being and broader social development.

随着城市人口持续增长，如今许多人居住的房屋户外空间有限，甚至完全没有户外空间。尽管这种住房模式或许能缓解当下的住房短缺问题，但我认为这本质上是一种负面趋势 —— 它会对个人福祉与社会整体发展产生不利影响。

Firstly, living without outdoor areas directly reduces people’s quality of life. Small apartments with no gardens, balconies, or shared green spaces deprive residents of opportunities to relax in nature or enjoy fresh air. This lack of access often forces people to remain indoors in confined living rooms, which can limit exercise and create feelings of isolation. For example, many office workers in crowded cities return to cramped apartments after long commutes, leaving them little chance to relieve stress. Over time, such conditions can contribute to anxiety, poor physical health, and lower overall happiness.

首先，缺乏户外空间会直接降低人们的生活质量。没有花园、阳台或共享绿地的小户型公寓，剥夺了居民在自然中放松、呼吸新鲜空气的机会。这种条件往往迫使人们长时间待在室内狭窄的客厅里，既限制了日常活动量，也容易滋生孤独感。例如，在人口密集的城市中，许多上班族经过漫长通勤后回到拥挤的公寓，几乎没有机会缓解压力。长此以往，这样的居住环境可能引发焦虑情绪、损害身体健康，最终导致整体幸福感下降。

Furthermore, the absence of outdoor spaces also has wider consequences for society. Children who grow up in apartments without safe outdoor areas may rely heavily on screens for entertainment, reducing their physical activity and weakening social skills. If this trend continues, cities could face a future where citizens are less healthy and more prone to lifestyle-related diseases, placing a heavy burden on public healthcare systems. By contrast, urban planning that incorporates parks and recreational facilities allows people to compensate for small living spaces and supports healthier lifestyles.

此外，户外空间的缺失还会对社会造成更广泛的影响。在没有安全户外区域的公寓中长大的孩子，可能会过度依赖电子屏幕娱乐，这不仅减少了他们的身体活动量，还会削弱其社交能力。若这种趋势持续下去，未来的城市可能面临居民健康水平下降、生活方式相关疾病高发的问题，进而给公共医疗体系带来沉重负担。相反，若城市规划中融入公园与休闲设施，人们便能弥补居住空间狭小的不足，从而更易保持健康的生活方式。

In conclusion, although small homes without outdoor areas help accommodate rising urban populations, they negatively affect both individual and social well-being. To ensure sustainable urban living, governments and city planners should prioritize creating more accessible outdoor spaces for all residents.

总之，尽管没有户外空间的小户型住房有助于容纳不断增长的城市人口，但它对个人与社会福祉均会产生负面影响。为实现可持续的城市居住模式，政府与城市规划者应优先为所有居民创造更易获取的户外空间。
