2026.2月大作文重点

在看预测之前大家要有一个认知：雅思写作的题库特别广，在不断增加新题的同时还会进行老题重考，所以完全无法统计出题库的完整内容，因此雅思写作可以视为“没有题库”。所以预测是基于近期高频考题做的整理，可以作为类似于“观点库”的辅助内容，但不要寄很大希望于预测到原题

- 一个比较偷懒的逻辑链思路（容易延伸）

提出观点——扩展延伸——举例——结果分析——【继续延伸】（可选）

无论是什么观点。都可以在观点的基础上进行详细解释。在这个解释的基础上假设一个情境进一步佐证xx会产生xx影响。然后就这个影响进行结果分析，就可以用很顺的逻辑完成一段论述，这个思路我同样觉得非常顺手。

并且只要加一句 “此外” （In addition）等词，就可以对观点做第二个延伸，然后继续举例或结果分析。

就以“父母对儿童成长的影响”这一话题为例，一道是小范围（家庭教育）；一道是大范围（社会、国际），说一下怎么一个观点做2个延伸

父母对儿童的成长有重要影响。那么这个影响有多角度的触点，我们只需要思考父母对儿童的成长，都可以从哪些方面去起作用，就可以得出多个延伸思路。

例如父母为儿童提供情感支持、价值观和行为规范，是孩子最早的榜样。

还可以写 “父母对孩子的具体教导” 、“父母的个人行为的潜在影响” 、"父母对事情的看法影响孩子三观" 、“个人行为还可以分类为 为人处世、面对困难、处理矛盾.....” ，只要打开思路就有无数条线供我们延伸。

> 但是注意，一段最多给观点做2个延伸，不然就是罗列观点，会低分。并且一篇文章最多一段做2个延伸，不然也有罗列观点的嫌疑。总之，**必须保证每一个观点和延伸有足够的内容佐证，不能纯罗列**

有些人认为艺术画廊和博物馆应该展示更多本国的传统文化艺术作品。

那我们要集中思考 “展示更多本国的传统文化艺术作品” 的影响

对社会，弘扬传统文化

对年轻人，加强教育

对文化，表现保护传统的态度

对国家，民族自信心和自豪感

……

这只是粗略的思考，每一个都可以当做一个延伸方向。

1、教育和监狱

In many countries, prison is the most common solution to the problem of crime. However, another effective way is to provide people with better education so that they can not become criminals. To what extent do you agree or disagree?（教育）

🍊 写作立场：完全同意

我完全同意教育比监狱更能有效解决犯罪问题。监狱确实能在短期内保障安全，但无法从根源上减少犯罪；相反，教育能帮助人们掌握技能、改变思维，从而防止重犯。相比之下，建更多监狱既昂贵又治标不治本。

逻辑链分析：

主体段1

- **观点**：教育是从根源减少犯罪的更有效方式。
- **扩展延伸**：许多罪犯之所以违法，是因为缺乏受教育机会、就业技能或正确的价值观。
- **举例**：例如，接受职业培训和心理辅导的服刑人员在释放后更容易找到工作、重建生活，从而降低再犯率。
- **结果分析**：这说明教育不仅能帮助罪犯重新融入社会，还能让他们成为对社会有贡献的成员，实现长期的社会稳定。

主体段2

- **观点**：诚然，监狱在短期内可以起到惩戒和威慑作用，对严重罪犯而言仍然必要。
- **扩展延伸**：但事实是，许多囚犯在出狱后仍会再次犯罪，因为他们没有真正改变思维或掌握谋生能力。此外，建设和维持监狱的成本极高，却未必能带来更安全的社会。
- **合理性推断**：这说明单靠惩罚无法从根源上消除犯罪，反而可能造成资源浪费与恶性循环。

- **结果分析**：因此，政府应把更多资金投入教育与再培训，而非不断扩建监狱，以实现更具长期效益的治安改善。

In most countries, imprisonment is regarded as the main solution to crime. However, I firmly believe that providing better education is a more effective and sustainable way to reduce criminal behavior in the long run.

在大多数国家，监禁被视为解决犯罪问题的主要手段。然而我坚信，从长远来看提供更优质的教育才是减少犯罪行为的更有效且可持续的方式。

Education tackles the root causes of crime by addressing ignorance, poverty, and lack of opportunity. Many offenders turn to illegal activities because they lack education, employable skills, or moral guidance. For instance, inmates who receive vocational training and psychological counseling during their sentence are far less likely to reoffend after release. Education allows them to find legitimate jobs and rebuild their self-esteem, transforming them from social burdens into productive citizens. In this sense, education prevents crime before it happens and creates long-term benefits for both individuals and society.

教育通过消除无知、贫困和机会匮乏，直指犯罪根源。许多违法者走上犯罪道路正是由于缺乏教育、就业技能或道德引导。例如，在服刑期间接受职业培训和心理辅导的囚犯，获释后再次犯罪的可能性显著降低。教育使他们能够找到正当工作、重建自尊，从而从社会负担转变为有贡献的公民。从这个意义上说，教育能从源头上预防犯罪，为个人和社会创造长期效益。

Admittedly, prisons still serve an essential purpose in punishing and isolating dangerous criminals. They help maintain order and reassure the public that justice is being upheld. Nevertheless, relying solely on imprisonment is costly and often ineffective. Many released prisoners end up committing crimes again because their attitudes and life circumstances remain unchanged. Moreover, constructing and maintaining prisons require huge financial resources that could instead be used for preventive measures such as education and rehabilitation programs. Punishment alone can control crime temporarily, but only education can truly eliminate its causes.

应当承认，监狱在惩罚和隔离危险罪犯方面仍具有不可替代的作用。它有助于维护秩序，并让公众确信正义得到伸张。然而，仅依靠监禁手段不仅成本高昂，且往往收效甚微。许多获释囚犯因思想观念和生活环境未有改变而重蹈覆辙。此外，监狱建设和维护所需的巨额资金，本可用于教育和矫治等预防性措施。单靠惩罚只能暂时控制犯罪，唯有教育才能真正根除犯罪诱因。

In conclusion, while prisons play a limited role in protecting society, education is the key to achieving lasting crime reduction. By investing in knowledge and rehabilitation rather than expansion of prisons, governments can build safer and more equitable communities for the future.

综上所述，尽管监狱在保护社会方面作用有限，教育才是实现持久降低犯罪率的关键。通过投资知识与矫治而非扩建监狱，政府才能为未来构建更安全、更公平的社会。

2、政府年轻化

Some people think that younger people are not suitable for important positions in government. Others think that it will be a good idea for younger people to take on these positions. Discuss both these viewsand give your own opinion. (政府)

🍊 写作立场：年长者更适合

我会选择**年长者适合担任政府要职**的立场。虽然年轻人有创新力和活力，但年长者因长期积累的经验和政治智慧，通常更能胜任国家层面的决策与管理。

逻辑链分析：

主体段1

- **观点**：年长者更适合担任政府要职，因为他们拥有丰富的经验和深刻的政治理解。
- **扩展延伸**：政府的工作不仅仅涉及日常管理，还涉及复杂的决策。
- **合理性推断**：年长者在长时间的政治生涯中，往往经历过多次关键决策，积累了丰富的危机处理经验。
- **举例**：许多国家的历史和现状表明，许多经验丰富的领导人，比如美国的奥巴马，都是在逐步积累经验后才担任关键职位的。
- **结果分析**：经验能够帮助年长者在面对重大挑战时做出更理智和冷静的决策。

主体段2

- **观点**：年轻人虽然充满活力，但缺乏足够的经验和政治阅历，因此难以应对复杂的政府事务。
- **扩展延伸**：年轻人在面对突发事件或历史性决策时，可能缺乏应对的深度与耐心，容易受到情绪或个人判断的影响。
- **扩展延伸**：与其依赖年轻人的新颖思想，不如依赖那些已经通过实践积累过智慧的年长者。
- **举例**：例如，在应对国家安全、经济危机等重大问题时，年长者可以依靠自己的经验做出更稳妥的决策，避免轻率的决策可能带来的不良后果。

- **结果分析**：从长远来看，年长者能够更稳定地推动国家发展，并确保政策的可持续性与连贯性。

Some people believe that younger individuals are not suited for important positions in government, arguing that they lack the experience and maturity required for such roles. Others, however, feel that it would be beneficial for younger people to take on these positions, as they bring fresh ideas and perspectives. I believe that while young people bring enthusiasm and innovation, older individuals are more suitable for key government positions due to their experience and wisdom.

有人认为年轻人不适合担任政府要职，称他们缺乏此类职位所需的经验和成熟度；但也有人认为年轻人担任这些职位大有益处，因为他们能带来新想法和新视角。我认为，尽管年轻人充满热情与创新精神，但年长者凭借经验和智慧更适合担任政府关键职位。

One of the main reasons older individuals are better suited for government roles is their vast experience. Government decisions often require an understanding of history, culture, and complex political dynamics—knowledge that is typically acquired over years of experience. Older politicians have lived through many changes, crises, and political challenges, which have shaped their decision-making skills. In fact, the vast majority of political leaders, such as Obama of the United States, ascended to key positions after serving in multiple government roles for many years. This helped them develop the necessary skills to navigate national and international affairs. As a result, older politicians are often better equipped to handle major crises with a steady hand and avoid making impulsive decisions that could harm national stability.

年长者更适合政府职位的主要原因之一在于其丰富的经验。政府决策往往需要理解历史、文化和复杂的政治动态 —— 这些知识通常需要多年经验积累。年长的政治家经历过诸多变革、危机和政治挑战，这些经历塑造了他们的决策能力。事实上，绝大多数政治领导人（如美国的奥巴马）都是在政府多个岗位任职多年后才登上关键职位，这帮助他们培养了处理国家和国际事务的必要技能。因此，年长的政治家往往更能以稳健的手段应对重大危机，避免做出可能损害国家稳定的冲动决策。

On the other hand, while young people may bring fresh perspectives, they often lack the deep understanding required to make informed decisions in complex situations. Their lack of experience can lead to a more impulsive or idealistic approach, which may not always be appropriate for the nuanced realities of governance. For example, in matters such as national security or economic policy, young leaders might be more prone to take risky or untested approaches, which could have long-term negative consequences. Older leaders, with their greater wealth of experience, are more likely to make pragmatic decisions based on careful consideration and past lessons learned.

另一方面，尽管年轻人可能带来新视角，但他们往往缺乏在复杂局面中做出明智决策所需的深刻认知。经验的缺失可能导致他们的处事方式更冲动或理想化，而这未必适合治理中的微妙现实。例如，

在国家安全或经济政策等事务上，年轻领导人可能更倾向于采取冒险或未经检验的措施，这可能产生长期负面影响。而年长领导人凭借更丰富的经验，更可能基于审慎考量和过往教训做出务实决策。

In conclusion, while younger individuals can offer innovation and new ideas, older individuals are more suited for key government positions due to their experience, wisdom, and ability to navigate complex political landscapes. Their leadership helps ensure stability and continuity in governance, which is crucial for the long-term success of a nation.

总之，尽管年轻人能带来创新与新想法，但年长者因经验、智慧和驾驭复杂政治格局的能力，更适合担任政府关键职位。他们的领导有助于确保治理的稳定性和连续性，这对国家的长远发展至关重要。

3、跨国旅行

Many countries believe that international tourism has harmful effects.Why do they think so? What can be done to change their views?(国际)

🍊 ✅立场：解释现象 + 正向引导

我认为一些国家把国际旅游视为负面力量，主要是因为环境破坏、文化被稀释以及利益分配不均等现实问题。但这些问题并非无法解决；通过合理规划与强监管，国际旅游可以逐步走向更可持续、更受尊重的发展路径。

逻辑链分析：

主体段1

- **观点**：一些国家将国际旅游视为负面力量，主要源于其带来的环境与社会文化压力。
- **扩展延伸**：大量游客会造成污染，并过度消耗水电等自然资源，甚至破坏脆弱生态与历史遗迹。
- **扩展延伸**：此外，游客不尊重当地文化或把传统当作表演消费，会让当地人感到文化被商品化。
- **结果分析**：久而久之，这种“被利用”的感受会引发反感情绪，削弱文化自豪感。

主体段2

- **观点**：要扭转这种看法，政府和旅游企业需要推动更负责任、更包容的旅游模式。

- **扩展延伸**：政府应限制脆弱地区的游客数量，并引导绿色交通与可再生能源，以降低环境压力。
- **举例**：例如，推广社区参与型旅游，让当地人参与规划并共享收益，有助于减少利益分配不均。
- **合理性推断**：同时，通过旅行前后的游客教育提升尊重与环保意识，旅游活动就更可能实现长期可持续，从而改善各方态度。

Some countries perceive international tourism as a negative force, despite its potential economic and cultural benefits. This viewpoint is often rooted in environmental concerns, cultural disruption, and the unequal distribution of profits. However, with thoughtful planning, strong regulation, and better management, many of these problems can be alleviated, and tourism can become a more sustainable and respected industry over time.

尽管国际旅游具有潜在的经济和文化效益，但一些国家仍将其视为负面力量。这种观点通常源于环境担忧、文化冲击和利润分配不均等问题。然而，通过周密规划、严格监管和优化管理，许多此类问题可以得到缓解，旅游业也能逐渐成为更具可持续性和受人尊重的产业。

A key reason why some governments view tourism negatively is its environmental impact. High volumes of tourists can result in pollution, traffic congestion, and the excessive use of natural resources such as water and energy. In some fragile destinations, irresponsible behavior has led to long-term damage to local ecosystems and historical landmarks. Another concern is cultural dilution. When tourists behave disrespectfully or treat traditions as mere performances, locals may feel their identity is being commercialized. Such patterns of exploitation often create resentment and reduce cultural pride.

一些政府对旅游业持负面看法的一个关键原因是其环境影响。大量游客可能导致污染、交通拥堵以及水资源和能源等自然资源的过度消耗。在某些生态脆弱的旅游地，不负责任的行为已对当地生态系统和历史地标造成长期破坏。另一个担忧是文化稀释 —— 当游客举止失当或将当地传统视为纯粹的表演时，当地人可能会觉得自己的文化身份被商业化。这种剥削模式往往会引发不满，削弱文化自豪感。

To shift this perception, both policymakers and tourism companies must commit to more ethical and inclusive practices. Governments should implement regulations that limit tourist numbers in vulnerable areas and encourage green transportation and renewable energy solutions. Promoting community-based tourism, where locals are actively involved in planning and profit-sharing, is another effective strategy. Furthermore, educating tourists before and during their trips can foster more respectful and environmentally conscious behavior.

要改变这种看法，政策制定者和旅游企业必须致力于更具道德和包容性的实践。政府应实施法规，限制脆弱地区的游客数量，并鼓励绿色交通和可再生能源解决方案。推广以社区为基础的旅游业（让当地人积极参与规划和利润分配）是另一种有效策略。此外，在游客行程前后开展教育，可培养更具尊重意识和环保意识的行为。

In conclusion, although international tourism has caused valid concerns in many parts of the world, these issues are not beyond repair. Through responsible policy design, global cooperation, and long-term investment in local communities, tourism can evolve into a powerful tool for cultural exchange, environmental awareness, and shared prosperity.

总之，尽管国际旅游在世界许多地区引发了合理担忧，但这些问题并非无法解决。通过负责任的政策设计、全球合作以及对当地社区的长期投资，旅游业能够发展成为促进文化交流、环境意识和共享繁荣的强大工具。

4、育儿课

Caring for children is probably the most important thing of the society. It is suggested that all mothers and fathers should be required to take childcare training courses. To what extent do you agree or disagree with the statement? (教育)

🍊 ✅ 写作立场：部分同意（建议而非强制）

我认为儿童照护确实是社会极为重要的问题，父母参加相关培训能有效提高育儿技能。然而，我不认为政府应强制所有父母参加，而是鼓励和提供资源更为合适。

逻辑链分析：

主体段1

- **提出观点**：父母接受育儿培训课程能有效提高照顾儿童的能力
- **扩展延伸**：很多新手父母缺乏基础育儿知识，可能导致孩子成长出现问题
- **举例**：例如，许多年轻父母不了解儿童饮食和心理发展规律，容易引发健康问题
- **合理性推断**：通过适当培训，父母能更科学地进行育儿，显著提高儿童成长的质量

主体段2

- **提出观点**：尽管育儿培训有益，但强制所有父母参与并不现实
- **扩展延伸**：每个家庭的实际情况差异很大，强制培训可能引发抵触或不满
- **举例**：例如，部分父母已有丰富经验或工作繁忙，强制参加课程可能对他们是一种负担
- **反面假设**：如果政府以鼓励或提供免费课程取代强制措施，会取得更好的效果

It is commonly argued that caring for children is one of society’ s most crucial responsibilities, leading to suggestions that all parents should be required to attend childcare training courses. While I strongly support the idea of parents attending such courses, I believe it is more effective and practical to encourage rather than enforce participation.

人们普遍认为，照顾孩子是社会最关键的责任之一，因此有人建议所有父母都必须参加育儿培训课程。虽然我坚决支持父母参加这类课程，但我认为，鼓励而非强制父母参与会更有效、更切实可行。

On the one hand, providing childcare training for parents can significantly improve their ability to raise children. Many first-time parents, in particular, lack essential childcare knowledge, which may cause problems in children's physical health and psychological development. For example, young parents often have limited understanding of child nutrition and emotional needs, leading to health issues or behavioral problems in their children. Through well-designed training courses, parents can learn valuable childcare techniques, gain confidence in their parenting abilities, and consequently ensure better overall growth and development for their children.

一方面，为父母提供育儿培训能显著提升他们的育儿能力。尤其是许多初次为人父母的人，缺乏基本的育儿知识，这可能会给孩子的身体健康和心理发展带来问题。例如，年轻父母往往对儿童营养和情感需求了解有限，进而导致孩子出现健康问题或行为偏差。通过精心设计的培训课程，父母可以学习宝贵的育儿技巧，增强育儿信心，从而确保孩子获得更好的全面成长与发展。

On the other hand, although childcare courses have obvious benefits, making them mandatory for all parents would be impractical. Family situations differ widely, and mandatory courses might generate resentment or be burdensome for some families. For instance, experienced parents or those with demanding jobs might view compulsory courses as unnecessary or intrusive, creating resistance rather than cooperation. A more effective approach would be for the government to encourage attendance by offering flexible, accessible, and free training sessions. If such resources were made readily available and optional, parents would likely become more receptive, participating willingly and benefiting fully from the guidance provided.

另一方面，尽管育儿课程有着明显的益处，但强制所有父母参加并不现实。家庭情况千差万别，强制课程可能会引发部分家庭的不满，或给他们带来负担。比如，有经验的父母或工作繁忙的父母可能会认为强制课程毫无必要，甚至是一种侵扰，从而产生抵触情绪而非配合态度。如果采用更有效的方式，政府可以通过提供灵活、便捷且免费的培训课程来鼓励父母参与。若这些资源触手可及且参与自愿，父母可能会更愿意接受，主动参与并充分受益于所提供的指导。

In conclusion, while childcare training is beneficial and important, enforcing mandatory attendance for all parents is not the best approach. Instead, encouraging participation through supportive policies and accessible resources would lead to better outcomes, allowing parents to engage positively in enhancing their childcare skills.

总之，当育儿培训用于传授通用的育儿知识和技巧时，确实能对父母有所助益。然而，由于家庭背景和个人情况存在差异，强制所有父母参与并非最佳选择。通过鼓励性政策和便捷资源引导父母主动参与，才能更好地帮助他们提升育儿能力。

5、孩子犯错

Some people think children have the freedom to make mistakes, while other people believe that adults should prevent children from making mistakes. Discuss both sides and give your opinion.（教育）

✅ 写作立场：支持让孩子犯错

我更支持**让孩子通过犯错来学习**。相比成年人直接阻止错误，这种方式在培养独立判断力和长期成长方面更具说服力。

逻辑链分析：

主体段 1

- **观点**：允许孩子犯错有助于他们的长期成长。
- **扩展延伸**：通过真实经历错误，孩子可以提升解决问题的能力，并为个人发展奠定基础。
- **结果分析**：这种方式不仅带来短期学习效果，还能产生可持续的长期收益。
- **扩展延伸**：此外，从根本上看，让孩子自行面对错误可以增强自信和判断力，避免同类问题反复出现。

主体段 2

- **观点**：反对者认为，成年人阻止孩子犯错可以立刻改善当前问题。
- **扩展延伸**：这种做法能够在短时间内减少错误、维持秩序，并让家长获得即时的稳定感。
- **让步**：但这种稳定是短暂的，一旦孩子遇到新情境，缺乏经验的问题就会暴露出来。
- **结果分析**：更严重的是，这种方式可能导致孩子过度依赖成人，从而阻碍真正的独立成长。

The debate surrounding children making mistakes has engaged a broad audience recently. While some people argue that adults should stop them, others believe that kids should learn through mistakes. From my perspective, I am more convinced by the latter, as it rests not only on more ample theory but also on stronger evidence.

近年来，关于儿童犯错问题的讨论引发了广泛关注。尽管有人认为成年人应及时制止孩子犯错，但更多人主张儿童应从错误中学习。我更倾向于后一种观点，这不仅因其具有更充分的理论依据，更因其得到了强有力的实践印证。

First of all, letting children make mistakes undoubtedly brings substantial benefits. One key strength is its ability to improve their problem-solving skills, thereby building a firm basis for personal growth. As a result, this practice not only generates short-term benefits by helping children learn from real experiences but also contributes to sustainable long-term outcomes.Another significant advantage of this freedom is that it addresses problems from the ground up. Unlike approaches that only manage surface-level issues, this method works by removing poor confidence. By tackling these root causes directly, it prevents the same mistakes from recurring and ensures that children develop stronger judgment. In the long run, this creates deeper improvements that make learning from mistakes a far more sustainable and effective approach.

首先，允许儿童犯错无疑能带来显著益处。其关键优势在于能有效提升儿童解决问题的能力，从而为个人成长奠定坚实基础。这种实践不仅通过帮助儿童从真实经历中学习产生短期效益，更有助于实现可持续的长期发展。这种自由度的另一重要优势在于能从根源上解决问题。与仅处理表面问题的方式不同，这种方法通过消除自信心不足等根本症结发挥作用。通过直接应对这些深层原因，它能防止相同错误反复发生，并确保儿童培养出更敏锐的判断力。长远来看，这种方法能带来更深刻的进步，使得从错误中学习成为更可持续且有效的成长途径。

However, opponents may argue that stopping children from mistakes can directly optimize the current problem. The main reason is that it provides immediate and targeted improvements in reducing mistakes and keeping order, allowing parents to see visible stability without delay. Nevertheless, this advantage is short-lived, as the initial stability quickly fades once they face new challenges. The ability to judge is unlikely to be sustained in the absence of real experience, which makes the supposed benefits appear superficial. More importantly, these temporary gains often conceal deeper problems, such as dependence on adults. As these issues accumulate, they not only offset the initial benefits but also generate new obstacles that hinder genuine personal growth.

然而，反对者可能主张制止儿童犯错能直接优化当前问题。主要理由在于这种方式能立竿见影地减少错误、维持秩序，让家长即刻看到明显成效。但这种优势转瞬即逝——当儿童面对新挑战时，最初的稳定状态很快会消失。缺乏真实体验的判断能力很难持续，这使得所谓的好处显得流于表面。更重要的是，这些暂时收益往往掩盖了更深层的问题，比如对成年人的依赖。随着这些问题不断累积，它们不仅会抵消最初的收益，还会产生阻碍真正个人成长的新障碍。

In conclusion, although both perspectives have their own merits, I am more convinced by letting children make mistakes, because independence and resilience. By contrast, learning through mistakes not only avoids this shortcoming but also offers a more comprehensive and convincing foundation for their long-term growth.

综上所述，尽管两种观点各有道理，但我更认同允许儿童犯错的观点，因其能培养独立性与抗挫折能力。相比之下，通过犯错学习不仅能避免短期干预的缺陷，更能为儿童的长期发展提供更全面、更令人信服的成长基石。

6、食品工业

The increase in food production owes much to fertilizers and better machinery.Some people think that it has a negative impact on human health and community.To what extent do you agree or disagree?(健康)

🌞 ✅ 写作立场

我认为，尽管化肥和农业机械的使用确实带来健康和社会层面的风险，但在合理监管和可持续管理的前提下，其在提升粮食产量和改善生活水平方面的优势**明显大于其弊端**。

逻辑链分析：

主体段 1

- **观点**：化肥和农业机械的过度使用可能对人类健康和农村社区造成负面影响。
- **扩展延伸**：化学肥料残留会污染土壤和水源，并通过食物链影响人体健康。
- **扩展延伸**：与此同时，大规模机械化减少了对人工劳动力的需求，导致失业和农村人口外流。
- **举例**：例如，在中国部分地区，过量施肥不仅污染了水源，还迫使传统农民离开农业生产。

主体段 2

- **观点**：尽管存在风险，化肥和农业机械在保障粮食安全方面具有不可替代的作用。
- **扩展延伸**：化肥提高土壤肥力，使有限土地能够生产更多粮食，而机械化显著提升生产效率。
- **举例**：例如，中国通过推广可持续农业政策，减少化肥使用并引入环保型机械，保障了食品安全。
- **合理性推断**：因此，在合理监管和科学管理下，这些技术可以在控制风险的同时，为社会带来更大整体收益。

The significant increase in food production over recent decades has largely depended on the use of fertilizers and advanced machinery. While these advancements have undoubtedly improved agricultural productivity, concerns about their negative impact on human health and rural communities cannot be ignored. I believe that although some risks exist, they can be mitigated through proper management, and the benefits outweigh the drawbacks.

近年来粮食产量的大幅增长很大程度上依赖于化肥和先进机械的使用。尽管这些进步无疑提高了农业生产力，但它们对人类健康和农村社区可能带来的负面影响也不容忽视。我认为，尽管存在一些风险，但通过适当管理可以减轻这些问题，其带来的好处仍然大于弊端。

The overuse of fertilizers in agriculture poses potential health risks to humans and can disrupt rural communities.Chemical fertilizers, while boosting crop yields, often leave harmful residues in soil and water. These residues can enter the food chain, leading to health problems such as cancer or hormone imbalances. Additionally, the large-scale adoption of machinery reduces the need for manual labor, resulting in unemployment and rural-to-urban migration, which weakens farming communities.For instance, in some regions of China, excessive fertilizer use has polluted water supplies and displaced traditional farmers.Thus, the unregulated use of fertilizers and machinery not only endangers human health but also disrupts the stability of rural communities.

化肥在农业中的过度使用对人类健康构成潜在风险，同时可能破坏农村社区。化学肥料在提高作物产量的同时，往往在土壤和水中留下有害残留物，这些残留物进入食物链后可能导致癌症或激素失调等健康问题。此外，大规模机械化减少了对人工劳动力的需求，导致失业和农村向城市的人口迁移，从而削弱了农业社区的结构。例如，在中国的一些地区，化肥的过度使用污染了水源，同时小规模农民也因机械化而失去生计。因此，化肥和机械的不规范使用不仅威胁人类健康，还破坏了农村社区的稳定。

However, fertilizers and machinery have been instrumental in solving food shortages and improving overall living standards.Fertilizers enhance soil fertility, allowing farmers to grow more crops on less land. Likewise, modern machinery improves efficiency and enables large-scale food production to meet the demands of growing populations. Proper regulations can ensure the responsible use of these tools, minimizing their risks.In China, policies promoting sustainable farming have reduced chemical fertilizers and introduced eco-friendly machinery, ensuring safe food supplies.Therefore, with appropriate policies and practices, fertilizers and machinery can greatly benefit society by addressing food security challenges and improving quality of life.

然而，化肥和机械在解决粮食短缺和提高整体生活水平方面发挥了重要作用。化肥通过提高土壤肥力，使农民能够在更少的土地上种植更多作物。同样，现代机械提高了效率，使得大规模粮食生产能够满足日益增长的人口需求。适当的管理可以确保这些工具的负责任使用，将其风险降到最低。例如，在中国，推动可持续农业的政策减少了化学肥料的使用，并引入了环保型机械，从而确保了安全的粮食供应。因此，通过适当的政策和实践，化肥和机械可以通过解决粮食安全问题和改善生活质量，为社会带来益处。

In conclusion, while the use of fertilizers and machinery in agriculture has raised concerns about health risks and community stability, their benefits in increasing food production and addressing global hunger are undeniable. With proper regulation and sustainable practices, these tools can continue to support human development while minimizing their drawbacks.

总之，尽管化肥和机械在农业中的使用引发了对健康风险和社区稳定的担忧，但它们在增加粮食产量和应对全球饥饿问题方面的益处是不可否认的。通过适当的监管和可持续实践，这些工具可以在支持人类发展的同时，将其负面影响降至最低。

7、广告与个性

Advertising discourages people from being different individuals by making us all want to do the same and look the same.To what extent do you agree or disagree?(媒体)

✅ 写作立场：同意

我**在很大程度上同意**这一观点：广告确实会通过塑造统一的审美和生活方式，削弱个体差异性。不过，这种影响并非绝对，个人判断力仍然起到一定缓冲作用。

逻辑链分析：

主体段 1

- **观点**：广告在很大程度上会让人们追求相同的外表与生活方式，从而削弱个体差异。
- **扩展延伸**：它通常塑造“理想模板”，并把某种审美/身份与成功、受欢迎强绑定。
- **举例**：例如，美妆与时尚广告反复强调同一类身材标准、肤色焦虑或穿搭风格，鼓励大众模仿。
- **结果分析**：长期接触这种信息会强化从众心理，让人更不愿意与众不同。

主体段 2

- **观点**：尽管广告有同质化倾向，但它并不能彻底“消灭差异”。
- **合理性推断**：人们会基于个人价值观、文化背景与自我认同筛选信息，而不是照单全收。
- **反面假设**：如果广告真的能把所有人都变得一样，那不同圈层的审美与小众品牌就不可能长期存在。

- **结果分析**：因此，广告更多是在施加压力而非强制同化，最终仍取决于个人选择与社会环境。

Advertising is often criticised for discouraging individuality by encouraging people to behave and look the same. I largely agree with this view, as advertising does promote conformity through repeated images and messages. However, its influence is not absolute, and individual choice still plays an important role.

广告常因鼓励人们行为趋同、外貌相似而受到批评，认为其阻碍了个性发展。我基本同意这一观点，因为广告确实通过重复的形象和信息推动趋同行为。然而，它的影响并非绝对，个人选择仍然起着重要作用。

To begin with, advertising clearly pushes people toward uniform lifestyles and appearances. Many advertisements present a narrow definition of beauty, success or happiness and repeatedly associate it with specific products. As a result, consumers are encouraged to imitate the same looks and behaviours in order to feel accepted. For example, fashion and cosmetic advertisements frequently promote similar body shapes, clothing styles and skin ideals across different brands. Over time, constant exposure to these messages strengthens herd mentality and reduces people’ s willingness to express their individuality.

首先，广告显然将人们推向统一的生活方式与外貌标准。许多广告对美、成功或幸福给出狭隘定义，并不断将其与特定产品关联。结果，消费者为了获得认同感，往往会模仿相同的外貌与行为模式。例如，时尚和化妆品广告在不同品牌间反复推广相似的身材标准、服装风格和肌肤理想状态。久而久之，持续接触这些信息会强化从众心理，削弱人们表达个性的意愿。

That said, advertising does not completely eliminate personal differences. In reality, individuals interpret advertising messages through their own values, experiences and cultural backgrounds. People are not passive recipients of information and often make selective choices rather than blindly following trends. If advertising truly forced everyone to become the same, niche fashion styles, alternative lifestyles and independent brands would not be able to survive or gain loyal followers. This indicates that while advertising applies pressure to conform, it cannot fully control how people think or behave.

尽管如此，广告并不能完全消除个人差异。现实中，个体会根据自身价值观、经历和文化背景来解读广告信息。人们并非信息的被动接收者，常常会做出选择性判断而非盲目追随潮流。如果广告真能迫使所有人变得雷同，小众时尚风格、另类生活方式和独立品牌就不可能存续或获得忠实追随者。这表明，尽管广告施加了趋同压力，却无法完全控制人们的思想与行为。

In conclusion, advertising does play a significant role in promoting similarity by shaping shared ideals and social expectations. Nevertheless, its impact is limited by personal judgement and social diversity. Therefore, although advertising encourages conformity to a large extent, it does not entirely suppress individuality.

总而言之，广告通过塑造共同理想和社会期待，确实在推动趋同方面发挥了显著作用。然而，其影响力仍受限于个人判断力与社会多样性。因此，尽管广告在很大程度上鼓励趋同，但并未完全压制个性发展。

8、艺术与科技

Today, advanced science and technology have made great changes to people's life, but artists such as musicians, painters and writers are still highly valued. What can arts tell us about life that science and technology cannot?(科技)

🍊 写作立场：扣题即可

我会选择**艺术与科学互补**的立场。科技为人类带来了巨大的便利，但艺术能传达科技无法表达的情感和人类的深层次思想。艺术和科技是互补的，两者共同影响着我们的生活。

逻辑链分析：

主体段1

- **观点**：艺术能揭示人类内心深处的情感和思想，科技无法替代这一点。
- **扩展延伸**：科学与技术通常侧重于理性和功能性，而艺术则更能触及人的情感和精神层面。
- **举例**：如音乐能够传达复杂的情感，而文学作品则能够揭示人类生活的复杂性和矛盾。
- **结果分析**：艺术作品不仅丰富了我们的内心世界，也能够帮助我们更好地理解他人和社会。

主体段2

- **观点**：艺术能够突破语言和文化的界限，传递普遍的价值观和情感。
- **扩展延伸**：尽管科技具有普遍性和实用性，但艺术常常能超越这些界限，以独特的方式连接人类的共性。
- **举例**：世界各地的绘画、音乐、电影等形式，不同文化的人们都能产生共鸣，艺术帮助人们跨越国界、种族，建立更深的情感联系。
- **让步**：虽然科技也能促进全球化和跨文化交流，但艺术的力量在情感连接和价值观传播上依然具有独特优势。

In today’ s world, the rapid advancements in science and technology have undoubtedly transformed our lives in countless ways. From medicine to communication, technology has revolutionized the way we live. However, despite these advancements, art forms such as music, painting, and literature continue to hold immense value. While science and technology offer practical solutions, art provides unique insights into the human experience that science cannot replicate.

在当今世界，科学技术的飞速发展无疑从无数方面改变了我们的生活。从医学到通信，科技彻底革新了我们的生存方式。然而，尽管科技进步日新月异，音乐、绘画和文学等艺术形式依然具有巨大价值。科技提供实用的解决方案，而艺术则能给予人类体验中独一无二的洞见，这是科技无法复制的。

One of the key aspects that art offers, which science and technology cannot, is the ability to convey deep emotions and human experiences. While technology excels at providing factual knowledge and improving the material aspects of our lives, art taps into our emotions, exploring the complexities of human nature. For example, music can evoke powerful feelings of joy, sadness, or nostalgia, often expressing emotions that cannot be easily put into words. Similarly, literature allows us to reflect on human struggles, relationships, and philosophical questions, helping us understand not only ourselves but also others. Thus, art enriches our inner world by allowing us to connect with the emotional and intellectual aspects of life that science cannot address.

艺术能做到而科技无法企及的核心一点，在于其传递深层情感与人类经验的能力。科技擅长提供事实性知识并改善生活的物质层面，而艺术则触及我们的情感，探索人性的复杂之处。例如，音乐能唤起喜悦、悲伤或怀旧等强烈情感，常常表达出难以用语言形容的情绪；文学则让我们反思人类的挣扎、关系与哲学命题，帮助我们不仅理解自身，也理解他人。因此，艺术通过让我们与生活中科技无法触及的情感和思想层面相连，丰富了我们的内心世界。

Furthermore, art transcends linguistic and cultural boundaries, offering universal messages and emotional connections. Although science and technology are vital for global communication and innovation, art possesses a unique ability to unite people from diverse backgrounds through shared experiences and emotions. For instance, a piece of music or a painting can resonate with people from different cultures, speaking directly to universal human experiences, such as love, loss, or hope. Art brings people together in ways that technology alone cannot, fostering empathy and understanding between different communities. While technology certainly aids in bridging cultural gaps, art has the power to connect us on a much deeper, emotional level.

此外，艺术超越语言和文化的界限，传递普世的信息与情感联结。尽管科技对全球沟通与创新至关重要，但艺术拥有独特的能力，能通过共享的经历和情感将不同背景的人凝聚在一起。比如，一首乐曲或一幅画作能让不同文化的人产生共鸣，直接诉说爱、失去或希望等人类共通的体验。艺术以单靠科技无法实现的方式将人们团结起来，促进不同群体间的共情与理解。虽然科技确实有助于弥合文化差异，但艺术能在更深的情感层面将我们相连。

In conclusion, while science and technology have profoundly changed the world, art provides insights and emotional depth that technology cannot replicate. By helping us explore our inner worlds and fostering universal connections, art continues to be an indispensable part of human life. Rather than seeing art and technology as competing forces, it is more productive to view them as complementary, each playing a vital role in enhancing our lives.

总之，尽管科学技术深刻改变了世界，但艺术提供了科技无法复制的洞见与情感深度。通过帮助我们探索内心世界并促成普世联结，艺术始终是人类生活中不可或缺的部分。与其将艺术与科技视为对立力量，更有意义的是将它们看作互补的存在 —— 二者在提升生活品质方面都扮演着关键角色。

9、文化学习

It is not necessary for people to travel to other places to learn about the culture.We can learn as much as from books,films and the Internet. To what extent do you agree or disagree?(文化)

🍊 写作立场：不同意

我**总体不同意**这个观点。
书籍、电影和互联网当然能帮助我们了解文化，**但它们更多是在“认识文化”，而不是“理解文化”**。真正的文化理解，仍然很大程度上依赖亲身经历。

逻辑链分析：

主体段1

- **观点**：认为“不旅行也能学到同样多文化”的前提本身就值得怀疑。
- **扩展延伸**：书籍、电影和网络呈现的文化往往是被剪辑、选择和叙述过的版本。
- **合理性推断**：当文化被转化为内容时，它更容易服务于传播效果，而非真实复杂性。
- **结果分析**：因此，人们通过这些渠道获得的往往是“文化印象”，而不是文化本身。

主体段2

- **观点**：旅行的意义不在于获取更多信息，而在于改变理解方式。
- **扩展延伸**：身处当地环境，人们会被迫面对语言障碍、社会规则和价值差异。
- **举例**：例如，很多人在实际生活中才意识到，书中描述的“文化规则”在现实中往往是灵活甚至矛盾的。

- **结果分析**：这种不适感和反差本身，就是文化学习中最关键的一部分。

Some people believe that it is unnecessary to travel to other places to learn about culture, arguing that books, films and the Internet can provide the same knowledge. I largely disagree with this view, because learning about culture and truly understanding it are not the same thing.

有人认为无需亲自前往其他地区也能了解当地文化，理由是书籍、影视和网络能够提供同等知识。我对此观点基本持反对态度，因为认知文化与真正理解文化本质上是两回事。

The idea that indirect sources can offer an equally deep understanding of culture is questionable. Although books, films and online content are informative, they usually present culture in a selective and simplified way. Cultural practices are often edited into stories, images or narratives that are easy to consume and appealing to outsiders. As a result, what people learn is often an impression of culture rather than its full complexity. This means that relying solely on these sources can give people confidence without genuine understanding.

间接资料能否带来同样深度的文化理解值得商榷。尽管书籍影视和网络资讯具有知识性，但它们呈现的文化往往经过选择性简化处理。文化习俗常被剪辑成便于外部消费者理解的叙事片段或影像符号，导致人们接触的多为文化表象而非完整脉络。这意味着仅依赖间接信息可能让人产生虚假的文化自信。

More importantly, travelling changes the way people engage with culture. Instead of observing from a distance, travellers must interact with local systems, habits and expectations. Everyday situations such as ordering food, using public transport or following social etiquette force people to confront differences directly. For example, many travellers realise that cultural “rules” described in books are far more flexible and context-dependent in real life. These moments of confusion or discomfort often lead to deeper reflection and learning.

更关键的是，旅行彻底改变了人们接触文化的方式。旅行者必须亲身体验当地的生活体系、行为习惯与社会期待，而非保持距离观察。无论是点餐就餐、乘坐公交还是遵循社交礼仪，这些日常场景都迫使人们直面文化差异。例如许多旅行者发现，书中描述的文化"规则"在实际生活中往往更具弹性且需结合具体情境。正是这些令人困惑或不适的时刻，往往能引发更深层的文化思考。

In conclusion, while books, films and the Internet are useful starting points for cultural learning, they cannot replace firsthand experience. Travel allows people to encounter culture in an unfiltered and sometimes challenging way. For this reason, I believe that travelling remains an essential part of truly understanding other cultures.

总而言之，书籍影视和网络作为文化认知的起点固然有益，却无法替代亲身体验。旅行让人以未经滤化的方式接触文化本质，这个过程往往伴随着认知挑战。正因如此，我认为深度理解异域文化始终离不开实地探访。

10、污染费

Some people think that companies and individuals should pay to clear up the pollution they produced and that the government should not pay for it. To what extent do you agree or disagree? (环境)

🍊 写作立场：完全同意

我完全同意应由企业和个人承担环境清理费用。毕竟，他们是污染的直接制造者，让他们为自己的行为买单不仅公平，而且能从源头减少污染。政府应当负责制定规则与监管，而不是替污染者埋单。

逻辑链分析：

主体段1

- **观点**：让污染者承担环境清理成本是最公平、最具责任意识的做法。
- **扩展延伸**：若污染的代价由纳税人承担，就意味着守法者为违法者买单，这不仅不公正，还会削弱公众环保积极性。
- **举例**：例如，一些制造业企业长期排放废水，却依靠政府财政清理河流污染，这等于鼓励了不负责任的生产方式。
- **结果分析**：只有让污染者为环境损害付出经济代价，才能让他们在生产决策中真正考虑生态成本。

主体段2

- **观点**：更重要的是，这种做法能有效激励企业与个人减少污染，从源头解决问题。
- **举例**：征收碳排放税迫使高污染企业投资清洁能源；塑料垃圾收费政策促使个人减少一次性制品的使用。
- **合理性推断**：当污染者需要承担清理费用时，他们会主动寻求更环保的生产与消费方式，以降低经济负担。
- **结果分析**：这不仅能改善环境质量，还能促进绿色创新与可持续经济增长，从长远看比政府单独治理更高效、更具激励性。

I completely agree that companies and individuals should bear the cost of cleaning up pollution in proportion to the amount they produce. Since they are the direct creators of environmental damage, it is both fair and practical to make them financially responsible for its consequences.

我完全赞同企业和个人应当根据其制造污染的数量按比例承担治理费用。作为环境破坏的直接制造者，让他们为污染后果承担经济责任既符合公平原则，也具有现实可行性。

First of all, requiring polluters to pay for cleanup is a matter of justice and accountability. If governments or taxpayers shoulder these costs, it means that law-abiding citizens are paying for the irresponsibility of others. This not only undermines fairness but also weakens the public’s motivation to protect the environment. For instance, many factories discharge toxic waste into rivers while relying on public funds for restoration projects. Such practices encourage careless production and allow companies to externalize their environmental costs. Only when polluters are forced to pay for their actions will they truly consider the ecological impact of their business decisions.

首先，要求污染者支付治理费用关乎社会正义与责任担当。若由政府或纳税人承担这些成本，意味着守法公民在为不负责任的行为买单。这不仅有损公平，更会削弱公众环保积极性。以许多工厂向河流排放有毒废水却依赖公共资金进行治理为例，这种做法纵容了粗放式生产，使企业得以将环境成本转嫁给社会。唯有让污染者为自身行为付出代价，他们才会真正考量经营决策对生态的影响。

Moreover, this approach provides a strong incentive to reduce pollution at its source. For example, carbon taxes push high-emission industries to invest in cleaner energy, while plastic bag fees have successfully reduced waste by changing consumer behavior. When people and businesses know they must cover cleanup expenses, they naturally adopt more sustainable practices to minimize costs. This system not only improves environmental quality but also promotes green innovation and sustainable economic growth.

此外，这一原则能为源头治污提供强劲动力。碳税政策推动高排放行业投资清洁能源，塑料袋收费机制通过改变消费习惯有效减少白色污染——当企业和民众明确知晓必须承担治理费用时，自然会采取更可持续的做法以控制成本。这种制度不仅提升环境质量，更将催生绿色创新，推动经济可持续发展。

In conclusion, shifting the financial burden of pollution to those who cause it is both fair and effective. Governments should focus on setting strict regulations and enforcing transparency, while companies and individuals take full responsibility for their environmental footprint. Only through this approach can real progress be achieved toward a cleaner and more responsible world.

总之，将污染的经济负担转移给责任主体既公平又高效。政府应着力制定严格法规并强化监管透明度，而企业与个人则需对自身环境足迹全面负责。唯有通过这种方式，我们才能在建设更清洁、更负责任世界的道路上取得实质进展。

11、离乡

In many countries, people need to leave their family and friends to find work or study elsewhere.Do the advantages of this development outweigh the disadvantages?（教育）

🍊 ✅ 写作立场：利大于弊

我认为，在很多国家，人们为了工作或学习而离开家人和朋友**总体上是利大于弊的**。虽然这种变化会带来情感压力和短期适应问题，但它在个人能力成长和长期发展方面的价值更为深远。

逻辑链分析：

主体段1

- **观点**：反对者通常认为，离开家人和朋友会削弱情感支持，带来孤独感。
- **扩展延伸**：尤其是在陌生环境中，缺乏熟悉的人际网络，初期适应压力较大。
- **合理性推断**：但这种情感成本往往是阶段性的，而非长期不可逆的损失。
- **结果分析**：随着社交能力提升和新关系建立，这一弊端会逐渐减弱，其影响被高估了。

主体段2

- **观点**：更重要的是，离开熟悉环境有助于个人能力和独立性的快速成长。
- **扩展延伸**：在新城市或新国家，人们必须独立解决学习、工作和生活问题。
- **举例**：例如，许多学生在外地学习后，更擅长时间管理、跨文化沟通和职业规划。
- **结果分析**：这些能力不仅提升个人竞争力，也为长期职业发展和社会流动创造条件。

In many countries, people are increasingly required to leave their family and friends in order to work or study elsewhere. While this trend can be emotionally challenging, I believe that its advantages outweigh the disadvantages in the long run.

在许多国家，人们为了工作或学习而离开家人和朋友的情况日益普遍。尽管这种趋势可能带来情感上的挑战，但我认为从长远来看，其利大于弊。

A common concern is that moving away from loved ones weakens emotional support and may lead to loneliness. For those entering a new city or country, the lack of familiar relationships can make the adjustment period stressful. However, this disadvantage is often temporary rather than permanent. As people adapt to their new environment, they gradually build new social networks and develop stronger communication skills. Over time, the sense of isolation usually fades, which suggests that the emotional cost of relocation is often overstated.

一个普遍的担忧是，远离亲人会削弱情感支持，并可能导致孤独感。对于那些进入新城市或国家的人来说，缺乏熟悉的人际关系会使适应期变得充满压力。然而，这种不利因素往往是暂时的，而非永久

性的。随着人们逐渐适应新环境，他们会建立起新的社交网络，并发展出更强的沟通技巧。随着时间的推移，孤独感通常会逐渐消退，这表明搬迁的情感代价往往被高估了。

More importantly, leaving one’ s comfort zone plays a crucial role in personal growth. Living and studying elsewhere forces individuals to become more independent and self-reliant. They must manage daily life, solve unexpected problems and make important decisions on their own. For example, many students who study away from home report improvements in time management, adaptability and cross-cultural communication. These skills are difficult to develop when people remain in familiar surroundings. In the long term, such experiences enhance employability and open up broader career opportunities.

更重要的是，离开舒适区对个人成长起着至关重要的作用。在异地生活和学习迫使个体变得更加独立和自立。他们必须独自管理日常生活、解决意外问题并做出重要决策。例如，许多离家求学的学生表示，他们在时间管理、适应能力和跨文化沟通方面有所提升。这些技能在人们停留在熟悉环境中时很难得到发展。从长远来看，这样的经历会增强就业能力，并打开更广阔的职业机会。

In conclusion, although relocating for work or study may cause short-term emotional discomfort, its long-term benefits are more significant. By promoting independence, resilience and personal development, this trend provides valuable opportunities that outweigh the disadvantages. For these reasons, I believe that leaving family and friends to pursue education or employment elsewhere is ultimately a positive development.

总之，尽管因工作或学习而搬迁可能会带来短期的情感不适，但其长期益处更为显著。通过促进独立性、韧性和个人发展，这种趋势提供了宝贵的机会，其价值远超过不利因素。基于这些原因，我认为离开家人和朋友去异地追求教育或就业最终是一种积极的发展。

12、飞机旅行

Air travel can only benefit the richest people in the world. Ordinary people have little to gain from the development of air travel. To what extent do you agree or disagree?(旅游)

🍊 ✅ 写作立场：反对

我**不同意**“航空旅行只惠及最富有人群”这一观点。虽然航空业中的某些高端服务确实主要面向富人，但航空旅行的发展已经在价格、可达性和社会功能层面为普通人带来了实质性收益。

逻辑链分析：

主体段1

- **观点**：航空旅行主要惠及富人，因为高端服务价格昂贵，普通人难以承担。
- **扩展延伸**：头等舱、商务舱以及灵活的国际航班安排通常服务于高收入人群。
- **让步**：然而，这些高端服务只是航空业的一小部分，并不能代表航空发展的整体影响。
- **合理性推断**：因此，用少数奢侈化服务来否定航空旅行对普通人的价值，本身就是以偏概全。

主体段2

- **观点**：航空旅行的发展在现实中显著提升了普通人的出行机会和生活质量。
- **扩展延伸**：廉价航空和市场竞争大幅降低了机票价格，使长距离出行更可负担。
- **举例**：例如，许多工薪阶层如今可以通过折扣机票进行跨国旅游、异地求学或探亲。
- **结果分析**：这种可达性的提升不仅扩大了个人选择空间，也加强了社会与经济联系。

Some people argue that air travel only benefits the richest people in the world and that ordinary individuals gain little from its development. I disagree with this view, because it overlooks the broader changes that have made air travel increasingly accessible to the general public.

有些人认为航空旅行只惠及世界上最富裕的人群，普通民众从其发展中获益甚微。我不同意这种观点，因为它忽略了更广泛的变化趋势——航空旅行正日益成为普通大众能够享用的交通工具。

It is true that certain aspects of air travel appear to favour wealthy individuals. Premium services such as first-class cabins, flexible flight schedules and private aviation are clearly designed for those with high incomes. However, these features represent only a small segment of the aviation industry. Focusing solely on luxury services ignores the fact that the majority of flights are economy-class and aimed at mass transportation. Therefore, using elite travel options as evidence that air travel benefits only the rich is an oversimplification.

诚然，航空旅行的某些方面似乎确实更利于富裕人群。头等舱服务、灵活航班时刻及私人航空等高端服务显然是为高收入群体设计的。然而这些仅代表航空业的微小组成部分。若只聚焦奢侈服务，就会忽略绝大多数航班实际属于经济舱、面向大众运输的事实。因此，仅用高端旅行选项来证明航空旅行只惠及富人是一种过于简化的论断。

In reality, the development of air travel has brought substantial advantages to ordinary people. Increased competition and the rise of low-cost airlines have significantly reduced ticket prices, making long-distance travel more affordable. As a result, people from middle- and lower-income backgrounds can now travel for education, employment, tourism or family visits. For example, many workers are able to visit relatives in distant cities or countries within a few hours, something that was once expensive and time-consuming. This improved accessibility has not only saved time but also expanded social and economic opportunities for ordinary citizens.

事实上，航空业的发展给普通人带来了切实利益。日益激烈的市场竞争与廉价航空的兴起显著降低了机票价格，使长途旅行变得更加经济可行。如今中低收入群体也能为求学、就业、旅游或探亲而乘坐飞机。例如许多务工者仅需数小时就能探望远在异乡甚至异国的亲人，这在过去不仅费用高昂且耗时漫长。这种出行便利性的提升不仅节约了时间，更为普通民众拓展了社会与经济机遇。

In conclusion, although some luxury elements of air travel mainly serve the wealthy, the overall development of the aviation industry has greatly benefited ordinary people. By improving affordability and connectivity, air travel has become a practical and valuable mode of transport for a wide range of society.

总而言之，尽管航空旅行中的某些奢华元素主要服务于富人，但航空业的整体发展已使普通民众广泛受益。通过提升经济可及性与交通连接性，航空旅行已成为社会各阶层实用而宝贵的出行方式。

13、幸福感

Some experts suppose that when a country is already rich, any additional increase in economic wealth does not make its citizens happier. To what extent do you agree or disagree?（社会）

🍊 ✅ 写作立场：同意

我基本同意这一观点：在富裕国家，进一步的经济增长对提升公众幸福感的作用十分有限。随着物质条件达到一定水平，财富的边际效用下降，而过度强调经济增长反而可能削弱社会公平和整体福祉。

逻辑链分析：

主体段1

- **观点**：在富裕国家，经济增长对幸福感的促进作用会逐渐减弱。
- **扩展延伸**：当住房、医疗和教育等基本需求得到满足后，新增财富主要用于奢侈消费。
- **结果分析**：这类消费往往只能带来短暂满足，难以持续提升生活满意度。
- **举例**：例如，挪威和日本等高收入国家人均 GDP 持续增长，但居民的自报幸福水平却趋于停滞。

主体段2

- **观点**：在富裕国家，经济增长往往伴随着收入不平等的扩大。

- **扩展延伸**：经济扩张创造的财富常集中于少数群体，使中低收入人群产生被排除感。
- **结果分析**：这种不平等会引发不满和社会紧张，从而降低整体社会幸福感。
- **举例**：例如，美国在经济持续增长的同时，贫富差距扩大，弱势群体的幸福感明显下降。

It is often argued that in affluent nations, further economic growth fails to enhance citizens' happiness. I largely agree with this view, as the benefits of wealth accumulation diminish over time. Additionally, an excessive focus on economic growth may exacerbate social inequality and undermine essential aspects of well-being such as mental health and work-life balance.

人们常说，在富裕国家，进一步的经济增长无法提升公民的幸福感。我基本同意这一观点，因为财富积累的益处会随着时间逐渐递减。此外，对经济增长的过度关注可能加剧社会不平等，并削弱幸福感的关键要素，例如心理健康和工作与生活平衡。

In wealthy countries, the impact of economic growth on happiness becomes limited due to the concept of diminishing returns. Once basic needs such as housing, healthcare, and education are met, additional wealth primarily caters to luxury consumption, which provides only short-term satisfaction. For instance, research from high-income nations like Norway and Japan shows that while their GDP per capita has grown significantly over the years, their citizens' self-reported happiness levels have plateaued. This suggests that beyond a certain point, economic growth ceases to play a major role in improving life satisfaction.

在富裕国家，经济增长对幸福感的影响因递减效用而有限。当人们的基本需求，例如住房、医疗和教育，已经得到满足后，额外的财富主要用于奢侈消费，这只能带来短暂的满足感。例如，在像挪威和日本这样的高收入国家，研究表明，尽管他们的人均GDP多年来显著增长，但公民的自我报告幸福感水平却已趋于平稳。这表明，超出一定程度后，经济增长不再是提升生活满意度的主要因素。

Furthermore, economic growth in affluent nations often leads to greater income disparity, which negatively affects overall happiness. Wealth generated by economic expansion is frequently concentrated in the hands of a minority, leaving low- and middle-income groups feeling excluded and dissatisfied. This growing inequality not only fosters resentment but also creates societal tensions, further reducing collective well-being. For example, in the United States, despite continuous economic growth, the widening wealth gap has contributed to a decline in happiness among disadvantaged populations.This demonstrates that when economic growth fails to ensure equitable distribution, it may do more harm than good to overall well-being.

此外，富裕国家的经济增长往往导致更大的收入差距，这对整体幸福感产生负面影响。经济扩张所带来的财富经常集中在少数人手中，而低收入和中等收入群体则感到被排斥和不满。这种日益加剧的不平等不仅会引发怨恨情绪，还会导致社会矛盾，进一步削弱集体幸福感。例如，在美国，尽管经济持续增长，但日益扩大的财富差距却使弱势群体的幸福感下降。这表明，当经济增长未能确保公平分配时，它可能对整体幸福感造成的危害多于益处。

In conclusion, I firmly believe that in rich nations, additional economic growth has a minimal effect on happiness. The diminishing returns of wealth and the exacerbation of social inequality

highlight the limitations of focusing solely on economic metrics. Governments should instead prioritize policies that address mental health, social cohesion, and work-life balance to achieve sustainable well-being.

总之，我坚信，在富裕国家，额外的经济增长对幸福感的提升作用微乎其微。财富递减效用和社会不平等的加剧，都突显了仅关注经济指标的局限性。各国政府应优先制定改善心理健康、社会凝聚力和工作与生活平衡的政策，以实现可持续的幸福感。

14、广告的好坏

People are surrounded by many kinds of advertising which can influence their lives. Do the positive effects of this trend outweigh negative effects? (媒体)

🍊 ✅ 写作立场：弊大于利

我认为，人们被大量广告包围这一趋势**明显是弊大于利**。虽然广告在信息传播方面具有一定积极作用，但这一优势被严重高估，而广告带来的心理和社会层面的负面影响更加深远。

逻辑链分析：

主体段1

观点：广告可以帮助消费者了解产品和服务，提高信息透明度。

扩展延伸：在理论上，广告能帮助人们比较选择，从而做出更理性的消费决定。

让步：然而，大多数广告并非客观提供信息，而是通过夸张和情绪操控来影响判断。

合理性推断：因此，这种“信息功能”往往被营销目的所取代，其实际价值远低于表面看起来的作用。

主体段2

观点：大量广告对人们的心理状态和价值观造成持续负面影响。

扩展延伸：广告不断制造理想化形象和“缺乏感”，诱导攀比和过度消费。

举例：例如，时尚和社交媒体广告常暗示幸福与成功取决于外表或物质拥有。

结果分析：长期暴露在这种环境中，人们更容易产生焦虑、自我怀疑，并削弱独立判断能力。

People today are surrounded by advertising in almost every aspect of daily life, from social media to public spaces. Although advertising may offer certain benefits, I believe that the negative effects of this trend outweigh the positive ones.

如今，几乎从社交媒体到公共空间，日常生活的方方面面人们都置身于广告的包围之中。尽管广告可能带来某些好处，但我认为这种趋势的负面影响大于正面影响。

It is often argued that advertising plays a useful role by providing consumers with information about products and services. In theory, this allows people to compare options and make informed decisions. However, this advantage is frequently overstated. Most advertisements are designed to persuade rather than inform, using emotional appeals, exaggerated claims and selective presentation of facts. As a result, instead of improving consumer awareness, advertising often distorts judgement and encourages impulsive decision-making. Therefore, its supposed informational benefit is far less significant than it appears.

有人认为广告通过提供产品和服务信息而发挥着有益作用。理论上，这能让人们比较不同选项并做出明智决定。然而，这一优势常常被夸大。大多数广告的设计初衷在于说服而非告知，它们运用情感诉求、夸大宣传和选择性呈现事实等手段。因此，广告非但没有提升消费者的认知水平，反而常常扭曲判断力，助长冲动决策。可见，其所谓的信息传播价值远不如表面看来那么重要。

More importantly, constant exposure to advertising has a deeper and more harmful impact on people’s psychology and values. Advertisements regularly promote idealised lifestyles, appearances and standards of success, creating a sense of inadequacy among audiences. For example, fashion and social media advertisements often suggest that happiness and self-worth depend on purchasing certain products. Over time, this pressure leads to anxiety, unhealthy comparison and excessive consumption. In addition, such materialistic values weaken independent thinking and contribute to long-term dissatisfaction.

更重要的是，持续暴露在广告中对人们的心理和价值观会产生更深层次且更为有害的影响。广告不断宣扬理想化的生活方式、外表形象和成功标准，使受众产生自我不足感。例如，时尚和社交媒体广告常暗示，幸福感和自我价值取决于购买特定产品。久而久之，这种压力会导致焦虑、病态攀比和过度消费。此外，这种物质主义价值观削弱了独立思考能力，并助长了长期的心理失衡。

In conclusion, although advertising is sometimes seen as beneficial because it spreads information, this advantage is largely undermined by its persuasive nature. Meanwhile, its negative effects on mental well-being and social values are far more serious. For these reasons, the negative effects of being surrounded by advertising clearly outweigh the positive ones.

总而言之，虽然广告因传播信息有时被视为有益，但其说服性本质很大程度上削弱了这一优势。与此同时，广告对心理健康和社会价值观的负面影响要严重得多。基于这些原因，广告围城现象的负面影响显然超过了其正面作用。

15、政府关注点

Some people say that governments should focus on reducing environmental pollution and housing problems to help people prevent illness and disease. To what extent do you agree or disagree? （政府）

🍊 ✅ 写作立场：同意

我认为政府优先解决环境污染和住房问题，能有效预防疾病、改善公众健康，是更有针对性且具有长远意义的措施。

这道题如果大家想不同意或者部分同意，需要自己提出题干以外的，认为政府应该关注的要点。

逻辑链分析：

主体段1

- **提出观点**：政府解决环境污染能有效改善公众健康状况
- **扩展延伸**：环境污染直接导致许多慢性疾病和呼吸道疾病增加
- **举例**：许多工业城市因空气污染导致居民肺病和癌症发病率上升
- **结果分析**：减少污染后，人们健康水平显著提高，医疗负担明显减轻

主体段2

- **提出观点**：政府致力于解决住房问题同样能明显提高公众健康水平
- **扩展延伸**：不良的居住条件，如潮湿、拥挤和卫生条件差，会直接引发传染病和心理健康问题
- **举例**：印度很多低收入家庭居住的“笼屋”和极端拥挤环境导致疾病快速传播，健康问题严重
- **反面假设**：如果政府忽视住房问题，即使提供更多医疗资源，疾病预防的效果仍然有限

It is often argued that governments should prioritize tackling environmental pollution and housing issues as a primary way to improve public health. I strongly agree with this viewpoint, believing that addressing these two fundamental issues can greatly reduce illness and enhance overall well-being.

人们常说，政府应将解决环境污染和住房问题作为改善公众健康的首要任务。我坚决同意这一观点，认为解决这两个根本性问题能极大地减少疾病发生，提升整体福祉。

Firstly, reducing environmental pollution is one of the most direct and effective ways for governments to protect public health. Pollution, particularly air and water pollution, significantly contributes to chronic illnesses, respiratory diseases, and even cancer. For instance, in many industrial cities, severe air pollution has led to increased rates of lung disease and cancers among residents. When governments actively implement measures to reduce pollution—such as enforcing strict emission standards and promoting clean energy—public health improves remarkably, thereby lowering healthcare costs and alleviating pressure on medical systems.

首先，治理环境污染是政府保护公众健康最直接、最有效的方式之一。污染，尤其是空气和水污染，是导致慢性病、呼吸道疾病乃至癌症的重要因素。例如，在许多工业城市，严重的空气污染导致居民的肺部疾病和癌症发病率上升。当政府积极采取措施减少污染（如执行严格的排放标准、推广清洁能源）时，公众健康状况会显著改善，进而降低医疗成本，减轻医疗系统的压力。

Secondly, addressing housing problems can also substantially improve people's health conditions. Poor housing, characterized by overcrowding, dampness, and inadequate sanitation, is directly linked to higher incidence of infectious diseases and mental health disorders. For example, in some crowded cities like India, many low-income families live in extremely crowded conditions such as cage homes, which create ideal environments for rapid disease transmission and negatively affect mental well-being. Conversely, when housing conditions improve, people are less likely to fall ill and more likely to maintain good mental health. If governments neglect housing issues, even substantial investments in healthcare services will have limited impact, as people will continue to suffer due to unhealthy living environments.

其次，解决住房问题也能大幅改善人们的健康状况。住房条件恶劣 —— 表现为拥挤不堪、潮湿阴冷以及卫生设施不足 —— 直接导致传染病发病率升高和心理健康问题频发。例如，在印度，许多低收入家庭居住在 “笼屋” 等极度拥挤的环境中，这为疾病的快速传播提供了温床，同时也对心理健康产生负面影响。相反，住房条件改善后，人们生病的可能性会降低，心理健康也更易维持。如果政府忽视住房问题，那么即便在医疗服务上投入巨额资金，其效果也会十分有限，因为人们仍会因不健康的居住环境而深受其害。

In conclusion, governments can most effectively protect citizens from illness and disease by concentrating their efforts on reducing environmental pollution and improving housing conditions. These targeted measures will bring tangible long-term benefits to public health, significantly reducing the burden on healthcare systems.

总之，政府将精力集中在治理环境污染和改善住房条件上，就能最有效地保护公民免受疾病侵害。这些有针对性的措施将为公众健康带来切实的长期益处，显著减轻医疗系统的负担。
