2026.7月大作文重点

在看预测之前大家要有一个认知：雅思写作的题库特别广，在不断增加新题的同时还会进行老题重考，所以完全无法统计出题库的完整内容，因此雅思写作可以视为“没有题库”。所以预测是基于近期高频考题做的整理，可以作为类似于“观点库”的辅助内容，但不要寄很大希望于预测到原题

- 一个比较偷懒的逻辑链思路（容易延伸）

提出观点——扩展延伸——举例——结果分析——【继续延伸】（可选）

无论是什么观点。都可以在观点的基础上进行详细解释。在这个解释的基础上假设一个情境进一步佐证xx会产生xx影响。然后就这个影响进行结果分析，就可以用很顺的逻辑完成一段论述，这个思路我同样觉得非常顺手。

并且只要加一句 “此外” （In addition）等词，就可以对观点做第二个延伸，然后继续举例或结果分析。

就以“父母对儿童成长的影响”这一话题为例，一道是小范围（家庭教育）；一道是大范围（社会、国际），说一下怎么一个观点做2个延伸

父母对儿童的成长有重要影响。那么这个影响有多角度的触点，我们只需要思考父母对儿童的成长，都可以从哪些方面去起作用，就可以得出多个延伸思路。

例如父母为儿童提供情感支持、价值观和行为规范，是孩子最早的榜样。

还可以写 “父母对孩子的具体教导” 、“父母的个人行为的潜在影响” 、"父母对事情的看法影响孩子三观"、“个人行为还可以分类为 为人处世、面对困难、处理矛盾.....” ，只要打开思路就有无数条线供我们延伸。

> 但是注意，一段最多给观点做2个延伸，不然就是罗列观点，会低分。并且一篇文章最多一段做2个延伸，不然也有罗列观点的嫌疑。总之，**必须保证每一个观点和延伸有足够的内容佐证，不能纯罗列**

有些人认为艺术画廊和博物馆应该展示更多本国的传统文化艺术作品。

那我们要集中思考 “展示更多本国的传统文化艺术作品” 的影响

对社会，弘扬传统文化

对年轻人，加强教育

对文化，表现保护传统的态度

对国家，民族自信心和自豪感

……

这只是粗略的思考，每一个都可以当做一个延伸方向。

1、开车用手机

Many countries have laws banning phoneuse while driving, yet many drivers still usetheir phones while driving, even though it isagainst the law. Why is that? How can this problem be solved?

许多国家都有法律禁止开车时使用手机，然而许多司机仍然在开车时使用手机，尽管这是违法的。为什么会这样？如何解决这个问题？

🍊 写作立场：正常分析

我认为，驾驶过程中仍然使用手机主要是由于驾驶员安全意识不足以及违法成本较低。要解决这一问题，**政府应加强执法力度，同时提高公众的交通安全意识**。

逻辑链分析：

主体段 1

提出观点：许多司机违法使用手机主要是因为缺乏足够的安全意识。

合理性推断：他们往往低估了短时间使用手机所带来的事故风险。

举例：例如，有些司机认为回复一条信息只需要几秒钟，因此不会造成危险。

结果分析：因此，即使法律已经禁止，他们仍然选择冒险使用手机。

主体段 2

提出观点：解决这一问题需要提高违法成本并改变驾驶习惯。

反面假设：如果处罚力度仍然较弱，许多人将继续违反规定，因为他们认为被发现的可能性很低。

扩展延伸：政府应增加电子监控、提高罚款金额，并开展交通安全宣传，同时推广驾驶模式等技术来减少手机干扰。

结果分析：因此，当违法代价提高且公众认识到潜在风险时，违法行为将明显减少。

Many countries have introduced laws that prohibit drivers from using mobile phones while driving. Nevertheless, many people continue to ignore these regulations. In my opinion, this problem is mainly caused by poor safety awareness and weak deterrence, and it can be addressed through stricter enforcement and better public education.

许多国家已经出台了法律，禁止驾驶员在开车时使用手机。然而，许多人仍然无视这些规定。在我看来，这个问题主要是由安全意识淡薄和威慑力不足造成的，可以通过更严格的执法和更好的公众教育来解决。

One of the main reasons why drivers continue to use their phones is that they underestimate the dangers involved. Many people believe that checking a message or answering a quick call only takes a few seconds and is therefore harmless. It is reasonable to assume that this false sense of confidence encourages risky behaviour behind the wheel. For example, some drivers glance at their phones while waiting at traffic lights or driving in slow-moving traffic, believing that the chances of causing an accident are minimal. As a result, they continue to break the law despite knowing that mobile phone use while driving is prohibited.

驾驶员继续使用手机的主要原因之一是，他们低估了其中的危险性。许多人认为，查看信息或快速接听电话只需要几秒钟，因此是无害的。可以合理推测，这种虚假的安全感助长了驾驶中的危险行为。例如，一些驾驶员在等红灯或在缓慢车流中行驶时会瞥一眼手机，认为造成事故的可能性极小。因此，尽管他们知道开车时使用手机是违法的，却仍然继续违法。

To solve this problem, governments need to increase both the likelihood and the consequences of being caught. If penalties remain relatively light and enforcement is inconsistent, many drivers will continue to take the risk because they believe they are unlikely to face punishment. Therefore, more traffic cameras and roadside monitoring systems should be introduced, and fines or licence penalties should be increased for repeat offenders. In addition, governments should launch public awareness campaigns to educate drivers about the real dangers of distracted driving. Car manufacturers and mobile phone companies can also promote driving-mode functions that automatically block notifications while a vehicle is moving. Consequently, stronger enforcement together with greater public awareness can significantly reduce illegal phone use behind the wheel.

要解决这个问题，政府需要同时提高被抓获的可能性和违法后果。如果处罚仍然相对较轻，执法又不一致，许多驾驶员就会继续冒险，因为他们认为自己不太可能受到惩罚。因此，应该引入更多的交通摄像头和路边监控系统，并应对屡犯者加大罚款力度或吊销驾照。此外，政府应开展公众宣传活动，教育驾驶员认识分心驾驶的真正危险。汽车制造商和手机公司也可以推广驾驶模式功能，在车辆行驶时自动屏蔽通知。因此，更强有力的执法和更高的公众意识相结合，可以显著减少违法使用手机的行为。

In conclusion, the continued use of mobile phones while driving is mainly caused by inadequate safety awareness and insufficient deterrence. By combining stricter law enforcement with effective education and technological support, governments can greatly improve road safety and reduce this dangerous behaviour.

总之，开车时继续使用手机主要是由安全意识不足和威慑力不够造成的。通过将更严格的执法与有效的教育和技术支持相结合，政府可以大大改善道路安全，减少这种危险行为。

2、文化研究

The study of ancient cultures is not a relevant subject in modern education. To what extent do you agree or disagree?

古代文化研究在现代教育中并非相关学科。你在多大程度上同意或不同意？

🍊 写作立场：不同意

我**不同意**这一观点。虽然现代教育更强调实用技能，但研究古代文化仍然具有重要价值，它不仅帮助人们理解历史发展，还能增强文化认同与批判性思维能力。

逻辑链分析：

主体段 1

提出观点：研究古代文化在现代教育中仍然具有重要意义。

扩展延伸：历史文化研究能够帮助学生理解现代社会制度和价值观的形成过程。

举例：例如，学习中国古代秦汉时期的历史，可以帮助理解社会制度，这些制度对现代国家治理仍有影响。

结果分析：因此，古代文化研究为现代知识体系提供了基础支持。

主体段 2

提出观点：认为古代文化不相关的观点过于片面。

合理性推断：教育的目的不仅是职业技能，还包括思维能力和文化素养的培养。

反面假设：如果完全忽视历史文化，学生将难以理解社会发展的连续性。

结果分析：因此，这种知识缺失会削弱整体教育质量。

Some people argue that the study of ancient cultures is no longer a relevant subject in modern education. However, I completely disagree with this view, as I believe that learning about ancient civilizations remains highly valuable for understanding modern society and developing essential intellectual skills.

一些人认为，古代文化研究在现代教育中已不再是相关学科。然而，我完全不同意这一观点，因为我相信学习古代文明对于理解现代社会和培养重要的智力技能仍然极具价值。

The study of ancient cultures plays an important role in helping students understand the foundations of the modern world. Historical knowledge allows learners to see how current political systems, laws and social values have developed over time. For example, studying ancient Chinese history, such as the Qin and Han dynasties, helps students understand the origins of centralized governance and administrative systems that still influence China today. Without this historical perspective, it would be difficult to fully understand why modern societies are structured in the way they are. Therefore, ancient cultural studies contribute significantly to a deeper and more meaningful understanding of contemporary life.

古代文化研究在帮助学生理解现代世界的基础方面发挥着重要作用。历史知识能让学习者看到当前的政治制度、法律和社会价值观是如何随着时间发展而来的。例如，学习中国古代历史，如秦汉两朝，有助于学生理解中央集权治理和行政体系的起源，而这些至今仍影响着中国。如果没有这种历史视角，就很难完全理解现代社会为何以现在的方式构建。因此，古代文化研究对加深和丰富对当代生活的理解做出了重要贡献。

Moreover, the idea that ancient history is irrelevant is based on a narrow understanding of education. Education is not only about preparing students for specific careers, but also about developing critical thinking, analytical ability and cultural awareness. If ancient cultures were removed from the curriculum, students would lose the opportunity to explore how human societies have evolved over centuries. This would weaken their ability to connect past events with present realities and limit their overall intellectual development. As a result, excluding such subjects would reduce the quality and completeness of modern education.

此外，认为古代历史无关紧要的观点是基于对教育的狭隘理解。教育不仅是为了帮助学生为特定职业做准备，也是为了培养批判性思维、分析能力和文化意识。如果古代文化从课程中删除，学生将失去探索人类社会数千年演化历程的机会。这将削弱他们将过去事件与当前现实联系起来的能力，并限制他们的整体智力发展。因此，排除这些科目会降低现代教育的质量和完整性。

In conclusion, although modern education increasingly focuses on practical and technical skills, the study of ancient cultures remains essential. It helps students understand the roots of modern society and develop important cognitive abilities. For these reasons, I strongly disagree with the view that ancient cultures are no longer relevant in modern education.

总之，尽管现代教育越来越侧重于实用性和技术性技能，但古代文化研究仍然至关重要。它帮助学生理解现代社会的根源，并培养重要的认知能力。基于这些原因，我强烈反对古代文化在现代教育中不再相关的观点。

3、习俗

Many customs and traditional ways of behavior are not relevant to modern life and are not worthy keeping. To what extent do you agree or disagree?

许多习俗和传统行为方式已与现代生活无关，不值得保留。你在多大程度上同意或不同意？

🍊 写作立场：不同意

我**不同意**这一观点。虽然部分传统习俗已经不再适应现代社会，但许多习俗仍然具有文化、教育和社会价值，因此值得保留和传承。

逻辑链分析：

主体段 1

提出观点：确实，一些传统习俗已经不再适应现代社会。

举例：例如，某些限制女性教育或职业发展的传统观念已经明显落后。

让步反驳：然而，这类例子仅代表少数过时习俗，不能代表所有传统。

合理性推断：因此，仅根据部分落后的传统就否定全部传统文化是不合理的。

主体段 2

提出观点：许多传统习俗在现代社会仍然发挥重要作用。

扩展延伸：它们帮助人们了解历史，并增强家庭和社区之间的联系。

举例：例如，传统节日和家庭聚会至今仍受到广泛重视。

结果分析：因此，这些习俗能够维持文化认同并丰富现代社会生活。

Many people argue that customs and traditional forms of behaviour are no longer relevant in modern society and therefore are not worth preserving. While I accept that some traditions have become outdated, I disagree with the view that traditional customs in general should be abandoned.

许多人认为，习俗和传统行为方式已不再适应现代社会，因此不值得保留。虽然我承认有些传统已经过时，但我不同意那种认为传统习俗总体上应该被抛弃的观点。

Admittedly, certain traditional practices are no longer suitable for contemporary life. Some customs were created in historical circumstances that differ greatly from those of today. For example, traditions that discourage women from pursuing higher education or professional careers are clearly inconsistent with modern values of equality and personal freedom. However, such examples represent only a limited number of outdated practices rather than traditional culture as a whole. If society were to reject all customs simply because some of them are no

longer appropriate, it would be making an unfair generalization. Therefore, outdated traditions should be modified or discarded, but this does not justify abandoning all traditional ways of behaviour.

诚然，某些传统做法已不再适合当代生活。一些习俗是在与当今社会差异巨大的历史背景下形成的。例如，那些阻碍女性接受高等教育或从事职业发展的传统，显然与现代的平等和个人自由价值观不符。然而，这样的例子只代表少数过时的做法，而非整个传统文化。如果社会仅仅因为部分习俗不再合适就拒绝所有习俗，那将是一种不公平的以偏概全。因此，过时的传统应该被修改或摒弃，但这并不能成为抛弃所有传统行为方式的理由。

In fact, many customs continue to play an important role in modern society. Traditional practices help people understand their cultural roots and maintain connections with previous generations. Furthermore, they often strengthen family relationships and community cohesion by bringing people together on important occasions. For instance, traditional festivals, cultural celebrations and family gatherings remain highly valued in many countries despite rapid modernization. These events provide opportunities for people to share experiences and reinforce a sense of belonging. As a result, traditional customs continue to contribute to both cultural identity and social stability.

事实上，许多习俗在现代社会中仍然发挥着重要作用。传统习俗帮助人们了解自己的文化根源，并保持与前辈的联系。此外，它们常常通过在重要的场合将人们聚集在一起，来加强家庭关系和社区凝聚力。例如，尽管现代化进程迅速，传统节日、文化庆典和家庭聚会在许多国家仍然备受珍视。这些活动为人们提供了分享经历和增强归属感的机会。因此，传统习俗仍然对文化认同和社会稳定做出贡献。

In conclusion, although some traditions have lost their relevance in the modern world, it would be wrong to dismiss traditional customs altogether. Many of them still serve valuable cultural and social functions. Therefore, I believe that societies should preserve meaningful traditions while allowing outdated practices to disappear naturally over time.

总之，尽管有些传统已在现代世界中失去了其相关性，但完全摒弃传统习俗是错误的。其中许多传统仍然具有宝贵的文化和社会功能。因此，我认为社会应该保留有意义的传统，同时允许过时的做法随着时间的推移自然消失。

4、太空资金

Some people think the money spent developing technology for space is not justified.There are more beneficial ways to spend this money. To what extent do you agree or disagree?

一些人认为用于太空技术开发的资金是不合理的，这些钱有更有益的用途。你在多大程度上同意或不同意？

🍊 写作立场：部分同意

我**部分同意但总体不同意**这一观点。虽然在一些情况下，社会确实存在更紧迫的投资需求，但空间技术研发并非浪费资金，它在科学进步、技术创新和长期社会发展方面具有重要价值。

逻辑链分析：

主体段 1

提出观点：空间技术研发具有重要的长期价值，不应被忽视。

扩展延伸：太空研究推动了基础科学发展，并促进多种技术的创新应用。

举例：例如，卫星技术已广泛应用于通信、天气预测和导航系统中。

结果分析：因此，空间投资不仅用于探索宇宙，也直接改善了日常生活质量。

主体段 2

提出观点：确实，一些人认为这些资金可以用于更紧迫的社会问题。

举例：例如，医疗、教育或贫困问题在许多国家仍然需要大量资金支持。

让步反驳：然而，空间技术带来的创新往往能够反向促进这些领域的发展。

结果分析：因此，将空间研发视为“非必要支出”过于片面。

Some people believe that the money spent on developing space technology is not justified and that there are more important areas where this money could be used. While I agree that urgent social problems deserve attention, I do not believe that investment in space research is wasteful, as it brings significant long-term benefits to society.

一些人认为，花在太空技术开发上的钱是不合理的，这些钱本可以用在更重要的领域。虽然我同意紧迫的社会问题确实需要关注，但我不认为太空研究方面的投资是浪费，因为它能给社会带来显著的长期利益。

Space technology plays a crucial role in scientific progress and technological innovation. Research in this field often leads to discoveries and inventions that have practical applications on Earth. For example, satellite technology, which was originally developed for space exploration, is now widely used in communication systems, weather forecasting and navigation services such as GPS. These applications have greatly improved daily life, making communication faster, travel more efficient and disaster prediction more accurate. Therefore, space exploration contributes not only to scientific knowledge but also to practical improvements in modern society.

太空技术在科学进步和技术创新中发挥着至关重要的作用。该领域的研究常常催生在地球上有实际应用的发现和发明。例如，最初为太空探索而开发的卫星技术，如今广泛应用于通信系统、天气预报和GPS等导航服务中。这些应用极大地改善了日常生活，使通信更快捷、出行更高效、灾害预测更精准。因此，太空探索不仅有助于科学知识的积累，也为现代社会带来了实际的改善。

Admittedly, some people argue that the money spent on space programs could be better used to address urgent issues such as healthcare, education and poverty reduction. These are indeed serious problems that require substantial government funding. However, this view overlooks the fact that space-related technologies often generate indirect benefits that support these very areas. For instance, satellite imaging can improve agricultural planning, while communication technologies developed through space research can enhance access to education and healthcare services in remote regions. As a result, space investment should not be seen as competing with social development but rather as contributing to it in different ways.

诚然，有些人认为花在太空项目上的钱可以更好地用于解决医疗、教育和减贫等紧迫问题。这些问题确实是需要大量政府资金的严峻挑战。然而，这种观点忽略了一个事实，即太空相关技术往往会产生间接效益，反过来支持这些领域。例如，卫星成像可以改善农业规划，而通过太空研究发展起来的通信技术可以提升偏远地区的教育和医疗服务可及性。因此，太空投资不应被视为与社会发展相竞争，而应被视为以不同方式为社会发展做出贡献。

In conclusion, although there are many important social issues that require funding, investment in space technology is still justified due to its long-term scientific and practical benefits. For this reason, I do not fully agree that such spending is unnecessary.

总之，尽管有许多重要的社会问题需要资金支持，但太空技术投资因其长期的科学和实际效益仍然是有理由的。因此，我并不完全同意这种开支是不必要的观点。

5、语言教学

Some people say that it’ s better to teach language students in small classes, others think the number of people does not matter. Discuss and give your own opinion.

一些人认为语言教学最好采用小班授课，而另一些人则认为学生人数并不重要。讨论双方观点并给出你自己的看法。

🍊 写作立场：支持前者

我认为，**语言学习更适合在小班教学中进行**。虽然大班教学在成本上更有优势，但小班能够提供更高质量的互动与个性化反馈，对语言能力提升更有效。

逻辑链分析：

主体段 1

提出观点：小班教学更有利于语言学习效果的提升。

扩展延伸：语言学习需要大量口语练习和即时反馈。

举例：例如，在小班课堂中，每个学生都有更多机会进行口语表达并获得教师纠正。

结果分析：因此，小班环境能够显著提高语言学习的效率和准确性。

主体段 2

提出观点：一些人认为班级规模对语言学习效果影响不大。

合理性推断：他们认为学习成果主要取决于学生的努力程度，而非课堂人数。

让步：确实，自律性强的学生即使在大班中也能取得良好成绩。

结果分析：然而，大班普遍缺乏互动机会，因此整体学习效果仍然较弱。

Some people believe that language students learn better in small classes, while others argue that the number of students in a class does not significantly affect learning outcomes. In my opinion, small classes are more effective for language learning because they provide more interaction and personalized feedback.

一些人认为语言学生在小班中学习效果更好，而另一些人则认为班级人数对学习效果没有显著影响。在我看来，小班教学对语言学习更有效，因为它能提供更多的互动和个性化的反馈。

Small classes are particularly beneficial for language acquisition because they allow for greater student participation. Language learning requires frequent speaking practice and immediate correction of mistakes, which is difficult to achieve in large classrooms. In smaller groups, each student has more opportunities to speak, ask questions and receive feedback from the teacher. For example, a teacher in a small language class can correct pronunciation errors on the spot and guide students more closely during speaking activities. As a result, students can improve their fluency and accuracy more quickly than in larger classes.

小班教学对语言习得尤为有利，因为它能促进学生的更多参与。语言学习需要频繁的口语练习和即时纠错，这在人数众多的大班中难以实现。在人数较少的班级中，每个学生有更多机会发言、提问和获得老师的反馈。例如，在小班语言课上，老师可以当场纠正发音错误，并在口语活动中更细致地指导学生。因此，学生比在大班中能更快地提高流利度和准确性。

Some people argue that class size does not play an important role in language learning outcomes. They believe that a student’ s success depends mainly on individual effort, motivation and study habits rather than the number of classmates. It is true that highly motivated students may still perform well in large classes by studying independently and practicing outside the classroom. However, in reality, large classes often limit opportunities for

meaningful interaction between teachers and students. This lack of direct communication can slow down progress, especially for learners who need more guidance and support. Therefore, although individual effort is important, smaller class sizes generally create a more effective learning environment.

有些人认为班级规模对语言学习效果并不重要。他们认为学生的成功主要取决于个人努力、学习动机和学习习惯，而非同学人数。确实，积极主动的学生在大班中仍然可能通过自主学习和课外练习取得好成绩。然而，实际上，大班往往限制了师生之间进行有意义互动的机会。这种直接沟通的缺乏可能会减缓学习进度，尤其是对那些需要更多指导和帮助的学习者而言。因此，尽管个人努力很重要，但较小的班级规模通常能创造更有效的学习环境。

In conclusion, while some students can succeed in larger classes through strong self-discipline, small classes provide more interaction and feedback, making them more suitable for language learning overall.

总之，虽然一些学生可以通过高度的自律在大班中取得成功，但小班能提供更多的互动和反馈，因此总体上更适合语言学习。

6、慈善

Some people think charity organizations should help people in great need wherever they live. However, others think they should help people in their own country. Discuss both views and give your own opinion

一些人认为慈善组织应该帮助那些身处困境的人，无论他们住在哪里。然而，另一些人认为他们应该帮助本国的人。讨论双方观点并给出你自己的看法。

🍊 写作立场：支持后者

我认为，慈善组织在原则上应优先帮助本国最需要的人，因为资源有限且责任体系更直接，但在紧急国际灾难中，也应适度进行跨国援助。

逻辑链分析：

主体段 1

提出观点：一些人认为慈善应不分国界，帮助全球有需要的人。

扩展延伸：贫困与灾难是全球性问题，受影响人群分布广泛。

举例：例如，自然灾害发生时，国际援助可以迅速提供食物和医疗支持。

结果分析：因此，跨国慈善有助于减轻全球范围内的严重人道危机。

主体段 2

提出观点：然而，慈善组织应优先帮助本国有需要的人。

合理性推断：本国机构对本地问题更了解，执行效率更高。

让步：当然，在国际重大灾难中，跨国援助仍然是必要的。

结果分析：但在资源有限的情况下，优先满足本国需求更符合现实责任。

Some people believe that charity organizations should help people in great need regardless of where they live, while others argue that they should focus on supporting people in their own country. I believe that although international assistance is important in certain situations, charity organizations should generally prioritize helping people within their own country.

一些人认为慈善组织应该帮助身处困境的人，无论他们住在哪里，而另一些人则认为它们应该专注于帮助本国的人。我认为，尽管国际援助在某些情况下很重要，但慈善组织总体上应该优先帮助本国的人。

Those who support international charity argue that human suffering should not be limited by national borders. Poverty, disease and natural disasters affect people all over the world, and in many cases, victims urgently require external assistance. For example, when earthquakes, floods or other natural disasters occur, international charities can provide essential support such as food, medical supplies and temporary shelter. In such cases, global cooperation plays a vital role in reducing human suffering and saving lives. Therefore, helping people internationally can be seen as a moral responsibility in times of crisis.

支持国际慈善的人认为，人类的苦难不应受国界限制。贫困、疾病和自然灾害影响着世界各地的人们，在许多情况下，受害者迫切需要外部援助。例如，当地震、洪水或其他自然灾害发生时，国际慈善机构可以提供食品、医疗用品和临时住所等基本支持。在这种情况下，全球合作在减少人类苦难和拯救生命方面发挥着至关重要的作用。因此，在国际援助可以被视为危机时期的一种道德责任。

However, I believe that charity organizations should mainly focus on helping people within their own country. National charities are usually more familiar with local conditions and social needs, which allows them to distribute resources more efficiently and effectively. In addition, domestic poverty, homelessness and healthcare issues are often ongoing problems that require continuous support. Although international aid is important, especially during large-scale emergencies, resources are usually limited, and it is more practical to prioritize those who are geographically closer and more directly under the organization’ s responsibility. Therefore, while global assistance should not be ignored, it should not replace domestic priorities.

然而，我认为慈善组织应该主要关注帮助本国的人。本国慈善机构通常更熟悉当地条件和社会需求，这使它们能够更高效、更有效地分配资源。此外，国内的贫困、无家可归和医疗问题往往是需要持续支持的长期问题。尽管国际援助很重要，尤其是在大规模紧急情况下，但资源通常是有限的，更务实的做法是优先考虑地理上更接近、更直接属于该组织责任范围内的人群。因此，虽然不应忽视全球援助，但也不应让它取代国内优先事项。

In conclusion, although helping people in need around the world is morally important, I believe that charity organizations should primarily focus on their own country. At the same time, they should still contribute to international aid in exceptional circumstances where urgent global disasters occur.

总之，尽管帮助世界各地的困难群体在道义上很重要，但我认为慈善组织应主要关注本国。同时，在发生紧急全球灾难的特殊情况下，它们仍应为国际援助做出贡献。

7、城市结构

Some people think the vertical city is the best, where people live and work in tall buildings. Others think that"horizontal" city is better, where there are few tall buildings. Discuss both views and give your own opinion.

一些人认为垂直城市是最好的，即人们在高楼中生活和工作。另一些人则认为水平城市更好，即几乎没有高层建筑。讨论双方观点并给出你自己的看法。

🍊 写作立场：支持前者

我认为，“垂直城市”在现代城市发展中更具优势，因为它能够更高效利用土地并适应人口增长，但“水平城市”在居住舒适度方面仍有一定价值。

逻辑链分析：

主体段 1

提出观点：垂直城市更适合现代高密度人口城市的发展。

合理性推断：高层建筑能够在有限土地上容纳更多人口与功能。

扩展延伸：这种模式有助于减少城市扩张并提高基础设施效率。

结果分析：因此，垂直城市更符合现代城市化发展的需求。

主体段 2

提出观点：相比之下，水平城市模式存在明显局限。

反面假设：如果城市持续向外扩张，将会导致土地浪费和交通成本上升。

扩展延伸：低密度城市需要更长通勤距离和更高基础设施维护成本。

结果分析：因此，水平城市在现代人口密集环境中并不现实。

Some people believe that the vertical city, where people live and work in tall buildings, is the best urban model, while others prefer a horizontal city with few high-rise buildings. I strongly believe that vertical cities are a more effective solution for modern urban development because they make better use of limited land and improve urban efficiency.

一些人认为垂直城市是最好的城市模式，而另一些人则更喜欢几乎没有高层建筑的水平城市。我坚信，垂直城市是更有效的现代城市发展解决方案，因为它能更好地利用有限的土地并提高城市效率。

Vertical cities are highly suitable for today’ s rapidly growing urban populations. As more people move into cities, available land becomes increasingly scarce and expensive. In this context, building upward rather than outward allows cities to accommodate a large number of residents and workplaces within a limited area. This significantly improves land-use efficiency and reduces pressure on urban expansion. In addition, vertical development enables governments to concentrate public services such as transportation, healthcare and education in a more compact space, which improves accessibility and reduces infrastructure costs. As a result, vertical cities provide a practical and efficient solution to the challenges of modern urbanization.

垂直城市非常适合当今快速增长的城市人口。随着越来越多的人涌入城市，可用土地变得越来越稀缺和昂贵。在这种背景下，向上而非向外建设，可以使城市在有限的区域内容纳大量居民和工作场所。这大大提高了土地利用效率，并减轻了城市扩张的压力。此外，垂直发展使政府能够在更紧凑的空间内集中交通、医疗和教育等公共服务，从而提高了可达性并降低了基础设施成本。因此，垂直城市为现代城市化挑战提供了切实有效的解决方案。

By contrast, horizontal cities have significant structural disadvantages in the modern world. If cities continue to expand outward with low-rise buildings, urban areas will spread over a much larger geographic space. This leads to longer commuting distances, higher transportation costs and greater dependence on private vehicles. Moreover, maintaining infrastructure such as roads, electricity and public services becomes more expensive and less efficient in low-density environments. Therefore, although horizontal cities may appear more comfortable in terms of living space, they are not realistic for large, densely populated cities where efficiency is essential.

相比之下，水平城市在现代世界中存在显著的结构性劣势。如果城市继续以低层建筑向外扩展，城市面积将占据更大的地理空间。这会导致通勤距离更长、交通成本更高以及对私家车的更大依赖。此外，在低密度环境中，维护道路、电力和公共服务等基础设施变得更加昂贵且效率更低。因此，尽管水平城市在居住空间上可能显得更舒适，但对于人口密集、效率至关重要的大城市来说，它们并不现实。

In conclusion, I strongly believe that vertical cities are the superior urban model. They maximize land use efficiency, reduce infrastructure pressure and better support growing populations. For these reasons, vertical development is a more sustainable and practical approach for future urban planning.

总之，我坚信垂直城市是更优越的城市模式。它们能最大化土地利用效率，减少基础设施压力，并更好地支持人口增长。基于这些原因，垂直发展是未来城市规划中更可持续、更务实的方式。

8、机器人

Some people think that robots are very important for humans' future development. Others, however, think that robots are dangerous inventions that could have negative effects on society. Discuss both views and give your opinion.

一些人认为机器人对人类未来发展非常重要。然而，另一些人认为机器人是危险的发明，可能对社会产生负面影响。讨论双方观点并给出你的看法。

🍊 写作立场：支持前者

我认为机器人技术总体上对人类未来发展是**有益的**，尽管它确实带来一定风险，但这些问题可以通过合理监管加以控制，而其带来的生产力提升和社会进步更为重要。

逻辑链分析：

主体段 1

提出观点：机器人技术对人类未来发展具有重要积极作用。

扩展延伸：机器人可以替代人类完成重复性或高风险工作，提高生产效率。

举例：例如，在制造业和医疗领域，机器人已被用于精密手术和危险环境作业。

结果分析：因此，机器人技术能够提高社会整体效率并改善人类生活质量。

主体段 2

提出观点：一些人认为机器人可能对社会造成威胁。

合理性推断：他们担心机器人取代人类工作并带来失业问题。

让步：确实，部分低技能岗位可能受到自动化影响。

结果分析：然而，通过再培训和政策调节，这些负面影响可以被缓解，因此风险并非不可控制。

Some people believe that robots are extremely important for the future development of human society, while others argue that they are dangerous inventions that may bring serious negative consequences. In my opinion, although robots do pose certain challenges, their overall impact on society is positive and should be encouraged under proper regulation.

一些人认为机器人对人类社会的未来发展极其重要，而另一些人则认为它们是危险的发明，可能带来严重的负面后果。在我看来，尽管机器人确实带来了一定的挑战，但它们对社会的总体影响是积极的，应该在适当的监管下予以鼓励。

Robots play a significant role in improving efficiency and safety in modern society. They are capable of performing repetitive, complex and dangerous tasks that are difficult or risky for humans. As a result, industries such as manufacturing and healthcare have benefited greatly from robotic technology. For example, robots are now widely used in automobile production to increase precision and productivity, while in the medical field they assist doctors in performing highly accurate surgical procedures. These applications not only reduce human error but also improve overall service quality and safety. Therefore, robots contribute significantly to economic development and improve living standards.

机器人在提高现代社会效率和安全性方面发挥着重要作用。它们能够执行对人类来说困难或危险的重复性、复杂性和高风险任务。因此，制造业和医疗保健等行业已从机器人技术中受益匪浅。例如，机器人现广泛用于汽车生产，以提高精度和生产率，而在医疗领域，它们协助医生进行高度精确的外科手术。这些应用不仅减少了人为错误，还提高了整体服务质量和安全性。因此，机器人对经济发展和生活水平的提高做出了重大贡献。

However, some people are concerned that robots may create serious social problems. One major concern is that automation could replace human workers, particularly in low-skilled jobs, leading to unemployment and social inequality. Admittedly, certain jobs will be affected as machines become more advanced. Nevertheless, this issue can be managed through effective policies such as worker retraining and the creation of new employment opportunities in emerging industries. History shows that technological progress often changes the job market rather than eliminating it entirely. Therefore, while risks exist, they are not sufficient to outweigh the overall benefits of robotics.

然而，一些人担心机器人可能引发严重的社会问题。一个主要的担忧是自动化可能取代人类工人，尤其是在低技能工作中，导致失业和社会不平等。诚然，随着机器变得更加先进，某些工作岗位将受到影响。尽管如此，这一问题可以通过有效的政策来管理，例如工人再培训和在新兴产业中创造新的就业机会。历史表明，技术进步往往改变就业市场，而非完全消除它。因此，尽管存在风险，但不足以抵消机器人技术的总体益处。

In conclusion, although robots may bring challenges such as job displacement, their advantages in improving productivity, safety and quality of life are far more significant. With appropriate regulation and adaptation measures, robots should be viewed as a positive force for future human development.

总之，尽管机器人可能带来诸如岗位替代等挑战，但它们在提高生产力、安全性和生活质量方面的优势要重要得多。在适当的监管和调整措施下，机器人应被视为人类未来发展的积极力量。

9、科技

Mobile phone and the internet could have many benefits for old people. However, this age group uses technology the least. What are the benefits for old people of using mobile phones and the internet?How can we encourage them to use this new technology?

手机和互联网能为老年人带来诸多好处。然而，这一年龄群体使用技术的频率最低。老年人使用手机和互联网有哪些好处？我们如何才能鼓励他们使用这种新技术？

🍊 写作立场：正常分析

我认为，手机和互联网能够显著改善老年人的生活质量，尤其是在社交联系与日常服务获取方面。然而，由于技术门槛与习惯问题，老年人使用率仍然较低，因此需要通过教育支持与简化设计来提高他们的接受度。

逻辑链分析：

主体段 1

提出观点：手机和互联网能够显著改善老年人的生活。

扩展延伸：它们可以帮助老年人保持社会联系并获取生活服务。

举例：例如，通过视频通话与家人沟通，或使用手机支付和在线医疗服务。

结果分析：因此，这些技术能够减少孤独感并提高生活便利性。

主体段 2

提出观点：应采取措施鼓励老年人使用现代科技。

合理性推断：如果缺乏指导与适配设计，老年人很难独立使用复杂设备。

扩展延伸：可以通过社区培训、家庭帮助以及简化应用界面来降低使用难度。

结果分析：因此，技术包容性提升将有助于老年人更积极地融入数字社会。

Mobile phones and the internet have become an essential part of modern life and can bring many benefits to elderly people. However, this age group tends to use these technologies less frequently than younger generations. In my view, digital technology can significantly improve the quality of life for older people, and more efforts should be made to encourage their usage.

手机和互联网已成为现代生活不可或缺的一部分，可以为老年人带来诸多益处。然而，这一年龄群体使用这些技术的频率往往低于年轻一代。在我看来，数字技术能显著提高老年人的生活质量，应当付出更多努力来鼓励他们使用。

One of the main benefits of mobile phones and the internet for elderly people is improved communication and access to services. These technologies allow older individuals to stay in regular contact with their families and friends, which can reduce feelings of loneliness and isolation. In addition, online services make daily life more convenient, especially for those with limited mobility. For example, elderly people can use video calls to communicate with relatives, or use mobile applications to access healthcare services and make online payments without leaving their homes. As a result, digital technology can enhance both emotional well-being and practical convenience for older adults.

手机和互联网对老年人的主要好处之一是改善沟通和获取服务的途径。这些技术让老年人能够与家人和朋友保持经常联系，这可以减少孤独感和被隔离感。此外，在线服务使日常生活更加便利，尤其是对那些行动不便的人。例如，老年人可以使用视频通话与亲属交流，或者使用移动应用获取医疗保健服务和足不出户地完成在线支付。因此，数字技术可以同时提升老年人的情感福祉和实际生活便利性。

However, despite these advantages, many elderly people still avoid using modern technology. One reason is that digital devices and applications can be difficult to learn and may feel overwhelming for those who did not grow up with them. To address this issue, governments and communities can provide training courses specifically designed for older users, helping them understand basic functions such as messaging and online services. In addition, technology companies can design simpler interfaces with larger text and clearer instructions. Family members can also play an important role by offering regular guidance and support. Consequently, with better education and more user-friendly design, elderly people are more likely to adopt and benefit from digital tools.

然而，尽管有这些优势，许多老年人仍然避免使用现代技术。原因之一是数字设备和应用程序可能难以学习，对于那些并非伴随它们长大的人来说可能会感到不知所措。为了解决这个问题，政府和社区可以提供专门为老年用户设计的培训课程，帮助他们理解信息发送和在线服务等基本功能。此外，科技公司可以设计更简单的界面，配上更大的文字和更清晰的说明。家庭成员也可以通过提供定期指导和支持发挥重要作用。因此，通过更好的教育和更人性化的设计，老年人更有可能接受数字工具并从中受益。

In conclusion, mobile phones and the internet offer significant advantages for older people in terms of communication and convenience. By improving accessibility and providing adequate support, society can help elderly individuals become more confident users of modern technology.

总之，手机和互联网在沟通和便利性方面为老年人提供了显著优势。通过提高可及性并提供充分的支持，社会可以帮助老年人成为更自信的现代技术使用者。

10、重复犯罪

Some ex-prisoners commit crimes after being released from the prison. What do you think is the cause? How can it be solved?

一些刑满释放人员在出狱后再次犯罪。你认为原因是什么？如何解决？

🍊 写作立场：正常分析

我认为，前罪犯再次犯罪主要是由于**社会排斥与缺乏再融入支持体系**，以及出狱后就业困难所导致的生存压力。要解决这一问题，需要政府、社会和企业共同建立更完善的再融入机制。

逻辑链分析：

主体段 1

提出观点：前罪犯再次犯罪的主要原因在于社会再融入困难。

合理性推断：刑满释放人员往往面临严重的社会信任缺失。

扩展延伸：许多雇主不愿雇佣有犯罪记录的人，导致他们难以获得稳定收入。

结果分析：因此，缺乏社会支持会增加他们再次犯罪的可能性。

主体段 2

提出观点：解决再犯罪问题需要建立系统性的支持措施。

反面假设：如果缺乏干预，这些人可能长期陷入贫困与社会边缘状态。

扩展延伸：政府可以提供职业培训、心理辅导，并鼓励企业雇佣前罪犯。

结果分析：因此，这些措施有助于降低再犯罪率并促进社会稳定。

Some former prisoners commit crimes again after being released from prison. I believe that the main causes of this problem are social exclusion and the lack of support for reintegration into society. To solve this issue, governments and communities need to provide better rehabilitation systems and employment opportunities.

一些刑满释放人员在出狱后会再次犯罪。我认为这个问题的主要原因是社会排斥和缺乏重返社会的支持。要解决这一问题，政府和社区需要提供更好的改造体系和就业机会。

One of the main reasons for reoffending is the difficulty ex-prisoners face when trying to re-enter society. It is reasonable to assume that individuals with a criminal record often experience strong social stigma, which makes it hard for them to rebuild their lives. Many employers are unwilling to hire former prisoners due to concerns about trust and reliability. As a result, these individuals may struggle to find stable employment and income. Without financial security or social acceptance, some may feel they have no alternative but to return to illegal activities in order to survive. Therefore, social exclusion plays a major role in increasing the likelihood of repeat offences.

再次犯罪的主要原因之一是刑满释放人员在尝试重新融入社会时面临的困难。可以合理推测，有犯罪记录的人往往会遭受严重的社会污名，这使得他们难以重建生活。许多雇主因对信任和可靠性的担忧而不愿雇用刑满释放人员。因此，这些人可能难以找到稳定的工作和收入。在没有经济保障或社会接纳的情况下，一些人可能觉得自己别无选择，只能为了生存而重操旧业（指再次犯罪）。因此，社会排斥在增加再次犯罪的可能性方面起着重要作用。

To address this issue, comprehensive support systems should be established to help former prisoners reintegrate into society. If no assistance is provided after release, many of them may remain trapped in poverty and social isolation, which increases the risk of reoffending. Governments should therefore introduce vocational training programs, psychological counselling services and employment assistance schemes for ex-prisoners. In addition, businesses should be encouraged or incentivised to offer job opportunities to individuals with criminal records. With proper support, former prisoners are more likely to rebuild their lives and become productive members of society, which ultimately reduces crime rates and improves social stability.

为了解决这一问题，应建立全面的支持体系，帮助刑满释放人员重新融入社会。如果出狱后不提供任何帮助，他们中的许多人可能仍陷于贫困和社会孤立的境地，从而增加再犯罪的风险。因此，政府应为刑满释放人员推出职业培训项目、心理咨询服务和就业援助计划。此外，应鼓励或激励企业为有犯罪记录的人提供就业机会。有了适当的支持，刑满释放人员更有可能重建生活，成为对社会有贡献的成员，这最终能降低犯罪率并促进社会稳定。

In conclusion, reoffending is largely caused by social exclusion and a lack of reintegration support. However, through targeted policies and employment opportunities, this problem can be significantly reduced, benefiting both individuals and society as a whole.

总之，再次犯罪很大程度上是由社会排斥和缺乏重返社会支持造成的。然而，通过有针对性的政策和就业机会，这一问题可以得到显著改善，使个人和整个社会都受益。

11、科学研究

Some people think that too much money and time have been allocated in scientific research. To what extent do you agree or disagree with this statement?

有些人认为，在科学研究上投入了过多的资金和时间。你在多大程度上同意或不同意这一说法？

🍊 写作立场：不同意

我不同意“科学研究投入过多”的观点，因为科研不仅是社会发展的基础，而且其投入具有长期回报性和不可替代性。

逻辑链分析：

主体段 1

提出观点：科学研究本质上是现代社会发展的基础性投入。

扩展延伸：许多社会进步依赖长期、持续的科学积累，而非短期成果。

反面假设：如果减少科研投入，许多关键技术突破将会停滞甚至消失。

结果分析：因此，将科研视为“过度投入”是不符合发展规律的。

主体段 2

提出观点：科学研究的投入会带来广泛的连锁收益。

举例：例如，基础科学研究推动了医疗技术、通信技术和新能源的发展。

合理性推断：这些技术进步进一步提升了生产效率与生活质量。

结果分析：因此，科研投入并非消耗，而是一种高回报的长期投资。

Some people believe that too much money and time are being spent on scientific research. However, I disagree with this view because scientific research is a fundamental driver of long-term development and generates substantial returns for society.

一些人认为，在科学研究上花费了过多的资金和时间。然而，我不同意这种观点，因为科学研究是长期发展的基本驱动力，并为社会带来巨大的回报。

Scientific research should be regarded as a foundational investment for modern society. Almost all major technological and medical breakthroughs are the result of long-term scientific accumulation rather than short-term efforts. It is reasonable to assume that without continuous investment in research, many important innovations would either slow down significantly or fail to emerge at all. If governments and institutions reduced funding for science, progress in key fields such as medicine, engineering and environmental protection would be severely limited.

Therefore, it is misleading to describe scientific research as excessive spending, as it is in fact essential for sustained development.

科学研究应被视为现代社会的一项基础性投资。几乎所有重大的技术和医学突破都是长期科学积累的结果，而非短期努力的产物。可以合理推测，如果没有对研究的持续投入，许多重要创新要么会显著放缓，要么根本无法实现。如果政府和机构减少对科学的资助，医学、工程和环境保护等关键领域的进展将受到严重限制。因此，将科学研究描述为过度支出是有误导性的，因为它实际上对持续发展至关重要。

Moreover, scientific research produces extensive indirect benefits that extend far beyond laboratories. Many real-world technologies that people rely on today are built upon years of basic scientific exploration. For example, advances in medical science have led to improved vaccines and treatments, while research in physics and engineering has contributed to the development of modern communication systems and renewable energy technologies. These innovations not only solve practical problems but also enhance productivity and improve quality of life. In this way, investment in scientific research generates a chain of positive outcomes that benefit both individuals and society as a whole. As a result, scientific funding should be seen as a long-term investment rather than a cost burden.

此外，科学研究产生的广泛间接效益远远超出了实验室范围。人们今天依赖的许多现实世界技术都建立在多年基础科学探索之上。例如，医学科学的进步带来了改进的疫苗和治疗方法，而物理学和工程学的研究则促进了现代通信系统和可再生能源技术的发展。这些创新不仅解决了实际问题，还提高了生产力并改善了生活质量。通过这种方式，科学研究投资产生了一系列积极的成果，使个人和社会整体都受益。因此，科学资助应被视为长期投资，而非成本负担。

In conclusion, although scientific research requires significant time and financial resources, it is far from excessive. Instead, it plays a crucial role in driving innovation and improving human life. For these reasons, I strongly disagree with the view that too much investment is being allocated to scientific research.

总之，尽管科学研究需要大量的时间和资金，但它远非过度。相反，它在推动创新和改善人类生活方面发挥着至关重要的作用。基于这些原因，我强烈反对认为科学研究投入过多的观点。

12、搬迁

Traffic and housing problems in major cities could be solved by moving large companies and factories and their employees to the countryside. To what extent do you agree with this opinion?

将大公司和工厂及其员工迁往农村可以解决大城市的交通和住房问题。你在多大程度上同意这一观点?

🍊 写作立场：不同意

我**不同意**通过把大型公司、工厂及其员工搬到农村来解决城市交通和住房问题。这种方法不仅不现实，还可能在农村地区引发新的基础设施和就业压力问题。

逻辑链分析：

主体段 1

提出观点：将企业和人口转移到农村并不能从根本上解决城市问题。

合理性推断：交通和住房问题往往与城市资源集中和人口结构有关，而不仅仅是企业位置。

反面假设：如果企业外迁但城市仍保留大量服务业人口，拥堵和住房压力依然存在。

结果分析：因此，这种迁移方案难以真正缓解城市问题。

主体段 2

提出观点：这种做法可能会把问题从城市转移到农村。

扩展延伸：农村地区基础设施通常较弱，难以承受大规模人口和工业迁入。

举例：例如，交通系统、医疗和住房供应在许多乡村地区仍然有限。

结果分析：因此，这种政策可能造成新的发展不平衡，而不是整体改善。

Some people believe that traffic and housing problems in major cities could be solved by relocating large companies, factories and their employees to the countryside. However, I disagree with this view because it does not address the root causes of urban problems and may create new difficulties in rural areas.

一些人认为，将大公司、工厂及其员工迁往农村可以解决大城市的交通和住房问题。然而，我不同意这种观点，因为它没有解决城市问题的根源，并可能在农村地区制造新的困难。

Relocating businesses and workers to rural areas is unlikely to fundamentally solve urban traffic and housing issues. These problems are closely linked to the concentration of services, education, healthcare and economic opportunities in major cities. Even if factories and large companies were moved out, cities would still attract a large number of people working in service industries and other urban sectors. It is reasonable to assume that housing demand and traffic congestion would therefore remain high. In other words, the core drivers of urban pressure would still exist, meaning that relocation alone would not significantly reduce congestion or housing shortages.

将企业和工人迁往农村地区不太可能从根本上解决城市交通和住房问题。这些问题与大城市集中的服务业、教育、医疗和经济机会密切相关。即使工厂和大公司迁出，城市仍会吸引大量从事服务业和其

他城市部门的人口。可以合理推测，住房需求和交通拥堵因此仍将居高不下。换言之，城市压力的核心驱动因素仍然存在，这意味着仅靠搬迁并不能显著缓解拥堵或住房短缺。

Moreover, such a policy could simply transfer problems from cities to rural areas. Most countryside regions do not currently have the infrastructure required to support large-scale industrial and population growth. Roads, hospitals, schools and housing systems in many rural areas are relatively underdeveloped. For example, if a large number of factories and employees were suddenly moved to these areas, local services would struggle to cope with increased demand. As a result, rural regions might face overcrowding, environmental pressure and resource shortages, creating new imbalances rather than solving existing ones.

此外，这样的政策可能只是将问题从城市转移到农村地区。大多数农村地区目前并不具备支持大规模工业和人口增长所需的基础设施。许多农村地区的道路、医院、学校和住房系统相对不发达。例如，如果大量工厂和员工突然迁入这些地区，当地服务将难以应对增长的需求。因此，农村地区可能面临过度拥挤、环境压力和资源短缺，从而产生新的不平衡，而非解决现有问题。

In conclusion, although moving companies and workers to the countryside may appear to be a simple solution, it does not effectively address the root causes of urban traffic and housing problems. Instead, it risks creating new challenges in rural areas. Therefore, I do not agree with this proposal.

总之，尽管将公司和工人迁往农村看似是一个简单的解决方案，但它并未有效解决城市交通和住房问题的根源。相反，它可能在农村地区带来新的挑战。因此，我不同意这一提议。

13、自然资源

The natural resources such as oil, forests andfresh water are being consumed at an alarming rate. What problems does it cause? How can we solve these problems?

石油、森林和淡水等自然资源正在以惊人的速度被消耗。这会带来哪些问题？我们该如何解决这些问题？

🍊 写作立场：正常分析

我认为，自然资源（石油、森林和淡水）的过度消耗会带来严重的环境破坏与社会经济问题，因此必须通过政府监管与个人行为改变来加以控制。

逻辑链分析：

主体段 1

提出观点：自然资源的过度消耗会引发严重的连锁问题。

合理性推断：资源减少会直接破坏生态系统的平衡。

扩展延伸：例如森林减少会导致生物多样性下降，同时加剧气候变化。

结果分析：因此，资源过度使用会对环境造成长期且不可逆的损害。

主体段 2

提出观点：解决资源危机需要政府与个人共同努力。

反面假设：如果继续无节制消耗，未来资源短缺将更加严重并引发社会冲突。

扩展延伸：政府可以加强环保法规并推动可再生能源发展，个人则应减少浪费并提高节约意识。

结果分析：因此，通过多层面干预可以有效缓解资源压力。

The rapid consumption of natural resources such as oil, forests and fresh water has become a serious global concern. I believe that this trend leads to significant environmental and social problems, and that it can only be addressed through combined efforts from governments and individuals.

石油、森林和淡水等自然资源的快速消耗已成为一个严重的全球性问题。我认为，这一趋势会导致重大的环境和社会问题，而且只有通过政府和个人共同努力才能加以解决。

The overuse of natural resources can create severe and long-lasting environmental consequences. It is reasonable to assume that when essential resources are depleted too quickly, ecosystems become destabilised. For example, large-scale deforestation not only reduces biodiversity but also contributes to climate change, as fewer trees are available to absorb carbon dioxide from the atmosphere. Similarly, excessive use of fresh water resources can lead to water shortages in many regions, affecting agriculture and human survival. As a result, the continuous depletion of natural resources poses a direct threat to environmental stability and long-term sustainability.

自然资源的过度使用会造成严重而持久的环境后果。可以合理推测，当重要资源被过快耗尽时，生态系统就会变得不稳定。例如，大规模砍伐森林不仅减少了生物多样性，还加剧了气候变化，因为可吸收大气中二氧化碳的树木减少了。同样，淡水资源的过度使用会导致许多地区出现水资源短缺，影响农业和人类生存。因此，自然资源的持续枯竭对环境稳定性和长期可持续性构成了直接威胁。

To tackle these problems, coordinated action from both governments and individuals is necessary. If resource consumption continues without restriction, future shortages could become far more severe and may even lead to economic instability and social conflict. Governments should therefore introduce stricter environmental regulations, invest in renewable energy and promote sustainable resource management policies. At the same time, individuals can contribute by reducing waste, recycling materials and adopting more environmentally

friendly lifestyles. Through these combined efforts, it is possible to slow down resource depletion and reduce environmental pressure.

要解决这些问题，政府和个人的协同行动是必要的。如果资源消耗不加限制地持续下去，未来的短缺可能会变得更加严重，甚至可能导致经济不稳定和社会冲突。因此，政府应出台更严格的环境法规，投资可再生能源，并推行可持续的资源管理政策。同时，个人可以通过减少浪费、回收利用材料和采用更环保的生活方式来做出贡献。通过这些共同努力，减缓资源枯竭和减轻环境压力是可能的。

In conclusion, the excessive consumption of natural resources leads to serious ecological and social risks. However, these problems are not irreversible. With effective government policies and responsible individual behaviour, resource use can be managed more sustainably, ensuring long-term environmental protection and social stability.

总之，自然资源的过度消耗会导致严重的生态和社会风险。然而，这些问题并非不可逆转。通过有效的政府政策和负责任的个人行为，资源使用可以得到更可持续的管理，从而确保长期的环境保护和社会稳定。

14、薪水问题

Directors in organizations receive higher salaries than ordinary workers. Some people think it is necessary but others think it is unfair.Discuss both views and give your opinion.

组织中的高管比普通员工获得更高的薪水。一些人认为这是必要的，而另一些人则认为这不公平。讨论双方观点并给出你的看法。

🍊 写作立场：平衡

我认为，管理层获得更高薪资在一定程度上是合理的，因为他们承担更大的责任并影响企业整体决策，但**如果差距过大则是不公平的**，可能损害组织内部的稳定性。

逻辑链分析：

主体段 1

提出观点：管理者获得更高薪资是有一定合理性的。

合理性推断：高级管理者承担的决策风险和压力远高于普通员工。

扩展延伸：他们的决策往往直接影响公司利润和发展方向。

结果分析：因此，更高薪资可以被视为对责任和能力的补偿。

主体段 2

提出观点：然而，过大的薪资差距是不合理的。

扩展延伸：企业的成功依赖所有员工的共同努力，而不仅仅是管理层。

反面假设：如果收入差距过大，普通员工可能感到不公平并降低工作积极性。

结果分析：因此，过度的薪资差异会影响企业凝聚力和长期发展。

Some people believe that directors in organizations should receive much higher salaries than ordinary workers, while others consider this arrangement unfair. In my opinion, paying managers more is justified to some extent, but excessively large pay gaps are unreasonable and may harm organizational stability.

一些人认为组织中的高管应该比普通员工获得高得多的薪水，而另一些人则认为这种安排不公平。在我看来，给予管理者更高的薪资在一定程度上是合理的，但过大的薪资差距是不合理的，并可能损害组织的稳定性。

There are several reasons why higher salaries for directors can be considered fair. It is reasonable to argue that senior managers carry a much greater level of responsibility compared to ordinary employees. Their decisions often determine the overall direction, profitability and long-term success of a company. In addition, they are required to handle complex problems, manage large teams and take responsibility for significant financial risks. As a result, higher salaries can be seen as appropriate compensation for their skills, experience and the pressure associated with leadership roles. Without such incentives, it would be difficult to attract and retain capable individuals for senior positions.

高管获得更高薪水的理由有几方面。可以合理地认为，高级管理者承担的责任远大于普通员工。他们的决策往往决定着公司的整体方向、盈利能力和长期成功。此外，他们需要处理复杂问题、管理大型团队并为重大财务风险承担责任。因此，更高的薪水可以被视为对他们技能、经验以及领导角色所伴随的压力的合理补偿。如果没有这样的激励，将很难吸引和留住有能力的优秀人才担任高级职位。

However, an excessive gap between directors’ and workers’ salaries can create serious problems. The success of an organization does not depend solely on its leaders but also on the collective efforts of ordinary employees who carry out daily operations. If the pay difference becomes too large, workers may feel undervalued and perceive the system as unfair. This can lead to lower motivation, reduced productivity and even higher staff turnover. Moreover, a significant income gap may weaken teamwork and create tension within the workplace. Therefore, while some difference in pay is necessary, an extreme disparity can damage the overall efficiency and long-term stability of an organization.

然而，高管与员工之间的薪资差距过大则会引发严重问题。一个组织的成功不仅取决于其领导者，还取决于执行日常运营的普通员工的集体努力。如果薪酬差距过大，员工可能会觉得自己被低估，并认为制度不公平。这可能导致积极性下降、生产效率降低，甚至人员流动率升高。此外，巨大的收入差距可能削弱团队合作，并在工作场所制造紧张气氛。因此，虽然一定程度的薪酬差异是必要的，但极端的不平等会损害组织的整体效率和长期稳定。

In conclusion, although higher salaries for directors are justified due to their greater responsibilities, the gap between managers and ordinary workers should remain reasonable. A balanced pay structure is more likely to ensure fairness, motivation and sustainable organizational development.

总之，尽管高管因承担更大责任而获得更高薪酬是合理的，但管理者与普通员工之间的差距应保持在合理范围内。平衡的薪酬结构更有可能确保公平、积极性和可持续的组织发展。

15、离家

In many countries, people need to leavetheir families and friends to find jobs inother places. Do you think the advantages outweigh the disadvantages? (科技)

在许多国家，人们为了找工作不得不离开家人和朋友。你认为这种做法的利大于弊吗?

🍊 写作立场：正面立场

我认为离乡发展可能会带来情感上的牺牲，但从长远看他给个人和家庭带来的好处远超弊端

逻辑链分析：

主体段 1

提出观点：很多人担心离家打工会造成亲情疏远

扩展延伸：离开父母、伴侣或孩子，意味着无法日常陪伴和照顾

让步反驳：然而现代通讯工具可以维系情感，现代交通也缩短了距离

扩展延伸 2：更重要的是，提高的收入反过来能改善家庭生活

主体段 2

提出观点：相比情感损失，外出打工带来的发展机会更为关键

扩展延伸：经济发达地区提供更高薪资与上升通道

举例：许多农村青年在城市打工后改善了家庭住房与孩子教育

合理性推断：留在家乡反而可能限制个人潜力与经济贡献

In today’ s globalized economy, it is increasingly common for individuals to leave their families and hometowns in pursuit of better employment opportunities. While this choice can bring emotional sacrifices, I believe that the long-term advantages for both individuals and their families often outweigh the drawbacks.

在当今全球化的经济环境中，人们为了追求更好的就业机会而离开家人和家乡的情况越来越普遍。虽然这一选择可能会带来情感上的牺牲，但我认为，从长远来看，它给个人和家庭带来的好处往往超过其弊端。

Many people worry that working far from home may lead to weakened family ties. Indeed, being away from parents, children, or a spouse can mean missing out on daily support and shared experiences. However, modern communication tools such as video calls and instant messaging allow families to stay emotionally connected despite the distance. Furthermore, improvements in transportation have made returning home during holidays or weekends far more convenient. More importantly, the income earned by working in more developed areas can significantly improve the living conditions of one's family, such as better housing, education, and healthcare.

许多人担心在离家很远的地方工作可能会导致家庭关系变淡。的确，远离父母、孩子或配偶可能意味着无法获得日常的支持，也会错过共同的生活经历。然而，视频通话和即时通讯等现代通讯工具让家人即便相隔遥远，也能保持情感上的联系。此外，交通条件的改善也让人们在节假日或周末回家变得方便多了。更重要的是，在更发达的地区工作所赚取的收入能显著改善家人的生活条件，比如更好的住房、教育和医疗。

More importantly, the opportunities brought by working away from home often outweigh the emotional costs.Developed cities typically offer higher salaries, broader job markets, and clearer promotion paths, enabling individuals to build better careers and achieve financial independence.For instance, many young workers from rural areas move to cities like Shanghai or Shenzhen, where they not only earn more but also save enough to improve their family’ s housing conditions and provide better education for their children.In contrast, if they remained in their hometowns, they might be stuck in low-paying and unstable jobs, limiting both their personal growth and the financial support they can offer their families.

更重要的是，离家工作带来的机会往往超过了情感上的代价。发达城市通常能提供更高的薪资、更广阔的就业市场和更清晰的晋升路径，使人们能够打造更出色的职业生涯并实现经济独立。例如，许多来自农村地区的年轻劳动者搬到上海、深圳等城市，他们在那里不仅能赚更多的钱，还能攒下足够的钱来改善家人的住房条件，为孩子提供更好的教育。相反，如果他们留在老家，可能会被困在低收入且不稳定的工作中，这既会限制个人发展，也会影响他们能为家人提供的经济支持。

In conclusion, although leaving one’ s family for work brings emotional challenges, the financial rewards and personal growth it provides often make it a worthwhile and even necessary decision for many individuals.

总之，尽管为了工作离开家人会带来情感上的挑战，但它所带来的经济回报和个人成长往往使这一决定对许多人来说是值得的，甚至是必要的。
