2026.8月大作文重点

在看预测之前大家要有一个认知：雅思写作的题库特别广，在不断增加新题的同时还会进行老题重考，所以完全无法统计出题库的完整内容，因此雅思写作可以视为“没有题库”。所以预测是基于近期高频考题做的整理，可以作为类似于“观点库”的辅助内容，但不要寄很大希望于预测到原题

- 一个比较偷懒的逻辑链思路（容易延伸）

提出观点——扩展延伸——举例——结果分析——【继续延伸】（可选）

无论是什么观点。都可以在观点的基础上进行详细解释。在这个解释的基础上假设一个情境进一步佐证xx会产生xx影响。然后就这个影响进行结果分析，就可以用很顺的逻辑完成一段论述，这个思路我同样觉得非常顺手。

并且只要加一句 “此外” （In addition）等词，就可以对观点做第二个延伸，然后继续举例或结果分析。

就以“父母对儿童成长的影响”这一话题为例，一道是小范围（家庭教育）；一道是大范围（社会、国际），说一下怎么一个观点做2个延伸

父母对儿童的成长有重要影响。那么这个影响有多角度的触点，我们只需要思考父母对儿童的成长，都可以从哪些方面去起作用，就可以得出多个延伸思路。

例如父母为儿童提供情感支持、价值观和行为规范，是孩子最早的榜样。

还可以写 “父母对孩子的具体教导” 、“父母的个人行为的潜在影响” 、"父母对事情的看法影响孩子三观"、“个人行为还可以分类为 为人处世、面对困难、处理矛盾.....” ，只要打开思路就有无数条线供我们延伸。

> 但是注意，一段最多给观点做2个延伸，不然就是罗列观点，会低分。并且一篇文章最多一段做2个延伸，不然也有罗列观点的嫌疑。总之，**必须保证每一个观点和延伸有足够的内容佐证，不能纯罗列**

有些人认为艺术画廊和博物馆应该展示更多本国的传统文化艺术作品。

那我们要集中思考 “展示更多本国的传统文化艺术作品” 的影响

对社会，弘扬传统文化

对年轻人，加强教育

对文化，表现保护传统的态度

对国家，民族自信心和自豪感

……

这只是粗略的思考，每一个都可以当做一个延伸方向。

1、现代教育

The study of ancient culture is not relevant to modern education.To what extent do you agree or disagree?

古代文化研究与现代教育无关。你在多大程度上同意或不同意？

🍊 写作立场：不同意

我**不同意**这一观点。虽然现代教育更强调实用技能，但研究古代文化仍然具有重要价值，它不仅帮助人们理解历史发展，还能增强文化认同与批判性思维能力。

逻辑链分析：

主体段 1

提出观点：研究古代文化在现代教育中仍然具有重要意义。

扩展延伸：历史文化研究能够帮助学生理解现代社会制度和价值观的形成过程。

举例：例如，学习中国古代秦汉时期的历史，可以帮助理解社会制度，这些制度对现代国家治理仍有影响。

结果分析：因此，古代文化研究为现代知识体系提供了基础支持。

主体段 2

提出观点：认为古代文化不相关的观点过于片面。

合理性推断：教育的目的不仅是职业技能，还包括思维能力和文化素养的培养。

反面假设：如果完全忽视历史文化，学生将难以理解社会发展的连续性。

结果分析：因此，这种知识缺失会削弱整体教育质量。

Some people argue that the study of ancient cultures is no longer a relevant subject in modern education. However, I completely disagree with this view, as I believe that learning about ancient civilizations remains highly valuable for understanding modern society and developing essential intellectual skills.

一些人认为，古代文化研究在现代教育中已不再是相关学科。然而，我完全不同意这一观点，因为我相信学习古代文明对于理解现代社会和培养重要的智力技能仍然极具价值。

The study of ancient cultures plays an important role in helping students understand the foundations of the modern world. Historical knowledge allows learners to see how current political systems, laws and social values have developed over time. For example, studying ancient Chinese history, such as the Qin and Han dynasties, helps students understand the origins of centralized governance and administrative systems that still influence China today. Without this historical perspective, it would be difficult to fully understand why modern societies are structured in the way they are. Therefore, ancient cultural studies contribute significantly to a deeper and more meaningful understanding of contemporary life.

古代文化研究在帮助学生理解现代世界的基础方面发挥着重要作用。历史知识能让学习者看到当前的政治制度、法律和社会价值观是如何随着时间发展而来的。例如，学习中国古代历史，如秦汉两朝，有助于学生理解中央集权治理和行政体系的起源，而这些至今仍影响着中国。如果没有这种历史视角，就很难完全理解现代社会为何以现在的方式构建。因此，古代文化研究对加深和丰富对当代生活的理解做出了重要贡献。

Moreover, the idea that ancient history is irrelevant is based on a narrow understanding of education. Education is not only about preparing students for specific careers, but also about developing critical thinking, analytical ability and cultural awareness. If ancient cultures were removed from the curriculum, students would lose the opportunity to explore how human societies have evolved over centuries. This would weaken their ability to connect past events with present realities and limit their overall intellectual development. As a result, excluding such subjects would reduce the quality and completeness of modern education.

此外，认为古代历史无关紧要的观点是基于对教育的狭隘理解。教育不仅是为了帮助学生为特定职业做准备，也是为了培养批判性思维、分析能力和文化意识。如果古代文化从课程中删除，学生将失去探索人类社会数千年演化历程的机会。这将削弱他们将过去事件与当前现实联系起来的能力，并限制他们的整体智力发展。因此，排除这些科目会降低现代教育的质量和完整性。

In conclusion, although modern education increasingly focuses on practical and technical skills, the study of ancient cultures remains essential. It helps students understand the roots of modern society and develop important cognitive abilities. For these reasons, I strongly disagree with the view that ancient cultures are no longer relevant in modern education.

总之，尽管现代教育越来越侧重于实用性和技术性技能，但古代文化研究仍然至关重要。它帮助学生理解现代社会的根源，并培养重要的认知能力。基于这些原因，我强烈反对古代文化在现代教育中不再相关的观点。

2、继续工作

Some people believe that it is a good idea to continue to work at their old age. Do you agree or disagree?

有些人认为在老年时继续工作是个好主意。你同意还是不同意？

🍊 写作立场：不同意

我**不同意**老年人继续工作是一个好主意。虽然继续工作能够带来一定收入并保持社会联系，但退休后更应该关注健康和家庭生活，而且继续工作还可能影响年轻人的就业机会。

逻辑链分析：

主体段 1

提出观点：老年人不应该继续工作，因为退休后更应该关注身体健康。

反面假设：如果他们仍然承担正常工作压力，身体负担可能不断增加。

扩展延伸：随着年龄增长，恢复能力下降，工作会占用休息、运动和陪伴家人的时间。

结果分析：因此，继续工作反而可能降低他们晚年的生活质量。

主体段 2

提出观点：继续工作也不利于劳动力市场的发展。

举例：例如，如果许多资深员工长期留在岗位上，新毕业生能够获得的职位就会减少。

合理性推断：年轻人缺少工作经验后，将更难提升自己的职业能力。

结果分析：因此，适时退休能够促进劳动力更新，并提高整体就业效率。

Some people believe that it is a good idea for people to continue working in old age. However, I disagree with this opinion because retirement allows older people to enjoy a healthier life, and leaving the workforce at the right time also creates more opportunities for younger employees.

有些人认为，老年时继续工作是个好主意。然而，我不同意这种观点，因为退休能让老年人享受更健康的生活，而在适当的时候离开职场也能为年轻员工创造更多机会。

To begin with, elderly people should give priority to their health rather than their careers. If they continue working in demanding jobs after reaching old age, they are more likely to experience physical fatigue and mental stress. Unlike younger workers, older people usually recover more slowly and may already suffer from age-related health problems. In addition, full-time work often leaves less time for exercise, medical care and spending time with family members. As a result, remaining in employment for too long may reduce their quality of life instead of improving it.

首先，老年人应该优先考虑自己的健康，而不是事业。如果他们在进入老年后继续从事要求高的工作，就更容易出现身体疲劳和精神压力。与年轻员工不同，老年人通常恢复得更慢，而且可能已经患有与年龄相关的健康问题。此外，全职工作往往留给锻炼、医疗护理和陪伴家人的时间更少。因此，过长时间地留在工作岗位上可能会降低而不是提高他们的生活质量。

Another reason why I disagree is that delaying retirement can have a negative influence on the labour market. For example, in many companies, senior employees occupy management or technical positions for many years, which means fewer vacancies are available for recent graduates. Young people need these opportunities to gain practical experience and develop professional skills at the beginning of their careers. If older workers continue to stay in the same positions, the transfer of knowledge and responsibilities to the next generation may also become slower. Therefore, retiring at an appropriate age can encourage workforce renewal, provide more career opportunities for younger employees and maintain a healthier balance in the job market.

我不同意的另一个原因是，延迟退休可能对劳动力市场产生负面影响。例如，在许多公司中，资深员工长期占据管理或技术职位，这意味着应届毕业生的职位空缺更少。年轻人需要这些机会，以便在职业生涯初期获得实践经验和培养专业技能。如果老年员工继续留在同样的岗位上，知识和职责向下一代的转移也可能变得更慢。因此，在适当的年龄退休可以促进劳动力更新，为年轻员工提供更多职业机会，并保持就业市场更健康的平衡。

In conclusion, although some elderly people may still enjoy working, I believe that continuing to work in old age is generally not a good idea. Retiring at the appropriate time benefits older people's health while also supporting the long-term development of the labour market.

总之，尽管有些老年人可能仍然喜欢工作，但我认为老年时继续工作通常不是一个好主意。在适当的时候退休既有利于老年人的健康，也有助于劳动力市场的长期发展。

3、动物保护

Some people think that only those animals that are useful to humans should be protected. Others believe that all animals should be protected. Discuss both views and give your own opinion.

有些人认为只有对人类有用的动物才应该受到保护。另一些人则认为所有动物都应该受到保护。讨论这两种观点并给出你自己的看法。

🍊 写作立场：保护所有动物

我认为**所有动物都应该受到保护**，因为人类无法准确判断一种动物未来的价值，而且所有物种都对生态系统具有重要作用。

逻辑链分析：

主体段 1

提出观点：有人认为只有对人类有直接用途的动物才应该受到保护。

让步：这样做确实能够把有限的资金集中用于保护少数重要物种。

反面假设：但是如果许多目前看似没有价值的动物因此消失，人类未来可能失去潜在的资源和生态功能。

结果分析：因此，仅按照当前用途决定保护对象是一种短视的做法。

主体段 2

提出观点：我认为所有动物都应该受到保护。

扩展延伸：每一种动物都是生态系统的一部分，它们之间相互依赖，共同维持自然平衡。

举例：例如，一些昆虫虽然没有直接经济价值，却能够分解有机物或成为其他动物的重要食物来源。

结果分析：因此，保护所有动物能够维护生物多样性，并创造更加稳定的自然环境。

Some people believe that only animals that are useful to humans should be protected, while others argue that all animals deserve protection. Although focusing on useful species may seem practical, I believe that every animal should be protected because humans cannot accurately predict the future value of different species and every animal contributes to the natural environment.

有些人认为，只有对人类有用的动物才应该受到保护，而另一些人则认为，所有动物都应得到保护。虽然重点关注有用的物种似乎很实际，但我认为，每一种动物都应该受到保护，因为人类无法准确预测不同物种未来的价值，而且每一种动物都对自然环境有所贡献。

Those who support protecting only useful animals argue that conservation resources are limited and should be spent where they can bring the greatest benefits to humans. Admittedly, this approach allows governments to concentrate funding on species that provide food, medicine or other direct economic value. However, if animals that appear to be useless today are ignored, many of them may disappear before their ecological or scientific importance is discovered. Some species that seem unimportant now could become valuable for medical research or environmental protection in the future. Therefore, deciding which animals deserve protection based only on their current usefulness is a short-sighted strategy.

支持只保护有用动物的人认为，保护资源有限，应该投入到能为人类带来最大利益的地方。诚然，这种思路使政府能够将资金集中用于提供食物、药物或其他直接经济价值的物种。然而，如果忽视那些今天看似无用的动物，其中许多可能会在它们的生态或科学重要性被发现之前就消失。一些现在看起来不重要的物种，将来可能在医学研究或环境保护方面具有重要价值。因此，仅根据当前的用途来决定哪些动物值得保护，是一种短视的策略。

In my opinion, all animals should be protected because every species plays a role in maintaining the balance of ecosystems. Different animals depend on one another through food chains and other ecological relationships, meaning that the loss of one species can affect many others. For example, some insects may not generate direct economic benefits, but they help break down organic matter or serve as an important food source for birds and other wildlife. If these animals disappear, the balance of the ecosystem may gradually be damaged, eventually affecting human life as well. Therefore, protecting all animals is the most effective way to preserve biodiversity and ensure a healthy environment for future generations.

在我看来，所有动物都应受到保护，因为每个物种都在维持生态系统平衡中发挥着作用。不同的动物通过食物链和其他生态关系相互依存，这意味着一个物种的消失可能会影响许多其他物种。例如，有些昆虫可能不会产生直接的经济效益，但它们有助于分解有机物，或是鸟类和其他野生动物的重要食物来源。如果这些动物消失，生态系统的平衡可能会逐渐被破坏，最终也会影响人类的生活。因此，保护所有动物是维护生物多样性、为子孙后代确保健康环境的最有效方式。

In conclusion, although giving priority to useful animals may appear to make better use of limited resources, I believe that every species should be protected because all animals have ecological value and may also provide unexpected benefits in the future.

总之，虽然优先保护有用的动物似乎能更有效地利用有限的资源，但我认为每个物种都应受到保护，因为所有动物都具有生态价值，而且未来还可能带来意想不到的益处。

4、历史学习

It is more important for school children to learn about local history than world history. Do you agree or disagree?

对学龄儿童来说，学习本国或本地历史比世界历史更重要。你同意还是不同意？

🍊 写作立场：不同意

我**不同意**学校儿童学习地方历史比学习世界历史更重要。我认为地方历史固然有助于培养文化认同，但世界历史能够帮助学生建立更广阔的视野，并从不同国家的发展经验中学习，因此应受到同等甚至更多的重视。

逻辑链分析：

主体段 1

提出观点：地方历史虽然重要，但不应该比世界历史更加重要。

扩展延伸：地方历史主要帮助学生了解本地区的发展，而现代社会需要学生面对更广泛的国际环境。

合理性推断：仅学习地方历史难以满足未来学习、工作和国际交流的需要。

结果分析：因此，把地方历史放在比世界历史更重要的位置并不合理。

主体段 2

提出观点：学校应更加重视世界历史的学习。

举例：例如，学习工业革命或第二次世界大战能够帮助学生理解现代社会的发展。

扩展延伸：这些历史事件影响了今天的经济、科技和国际关系。

合理性推断：因此，世界历史能够培养学生更加全面的思维方式，并提高他们适应全球化社会的能力。

Some people believe that it is more important for school children to learn about local history than world history. I disagree with this opinion because, although local history helps students understand their own communities, world history is more valuable in preparing them for today's interconnected world.

有些人认为，对在校学生而言，学习本国或本地历史比学习世界历史更重要。我不同意这种观点，因为尽管本地历史有助于学生了解自己所在的社区，但世界历史在为他们应对当今相互关联的世界做准备方面更具价值。

Supporters of local history often argue that children should first understand the history of the places where they live. While this knowledge helps students appreciate local traditions and cultural heritage, it mainly focuses on a relatively small part of human civilisation. Modern society is becoming increasingly connected through international trade, technology and cultural exchange, which means students need knowledge that goes beyond their local communities. If schools place greater importance on local history alone, children may not develop a broad understanding of how different countries have influenced one another throughout history. Consequently, giving local history a higher priority cannot fully prepare students for future challenges.

支持本地历史的人往往主张，孩子们首先应该了解自己生活之地的历史。虽然这类知识有助于学生欣赏本地传统和文化遗产，但它主要关注的是人类文明中相对较小的一部分。现代社会正通过国际贸

易、技术和文化交流日益紧密地联系在一起，这意味着学生需要超越本地社区的知识。如果学校只偏重本地历史，孩子们可能无法广泛理解不同国家在历史上是如何相互影响的。因此，将本地历史置于更高优先级，无法让学生为未来的挑战做好充分准备。

In my opinion, world history deserves greater attention because it enables students to understand the development of modern society from a global perspective. For example, learning about the Industrial Revolution or the Second World War helps children understand the origins of modern technology, economic systems and international cooperation. These historical events continue to shape the way countries interact today, making such knowledge highly relevant to students' future education and careers. By comparing the experiences of different nations, students can also learn valuable lessons about social development and avoid repeating mistakes made in the past. Therefore, studying world history encourages broader thinking and equips young people with the knowledge needed to live and work successfully in a globalised society.

在我看来，世界历史更值得重视，因为它能使学生从全球视角理解现代社会的发展。例如，学习工业革命或第二次世界大战，有助于孩子们理解现代技术、经济体系和国际合作的起源。这些历史事件至今仍在塑造各国之间的交往方式，因此这类知识与学生未来的学业和职业高度相关。通过比较不同国家的经历，学生还可以吸取社会发展的宝贵经验教训，避免重蹈覆辙。因此，学习世界历史能鼓励更开阔的思维，并使年轻人具备在全球化社会中成功生活和工作所需的知识。

In conclusion, although local history is useful for helping children understand their own cultural background, I believe that world history is even more important because it broadens students' perspectives and prepares them for an increasingly connected world.

总之，尽管本地历史有助于孩子们了解自己的文化背景，但我认为世界历史更为重要，因为它能拓宽学生的视野，为他们应对日益紧密联系的世界做好准备。

5、增设艺术品

Towns and cities are attractive places. Some people suggest that the government should spend money putting in more works of art like paintings and statues to make them better to live in. To what extent do you agree or disagree?

城镇和城市是有吸引力的地方。有些人建议政府应该花钱增设更多的艺术作品，如绘画和雕塑，使它们更适合居住。你在多大程度上同意或不同意？

🍊 写作立场：不同意

我**不同意**政府应该投入更多资金建设绘画、雕塑等艺术作品来改善城市。虽然公共艺术能够美化城市环境，但政府有限的预算更应该优先用于改善公共服务和基础设施，这些措施能够

给居民带来更直接、更长期的好处。

逻辑链分析：

主体段 1

提出观点：政府不应该把更多资金投入公共艺术。

举例：例如，一些城市仍然缺乏完善的公共交通、医院或学校。

结果分析：如果大量预算用于建设雕塑和壁画，这些公共服务可能得不到及时改善。

合理性推断：因此，把资金优先用于基础设施能够更有效地提高居民的生活质量。

主体段 2

提出观点：公共艺术确实能够提升城市环境。

让步：我承认绘画和雕塑可以让城市更加美观，并吸引游客。

扩展延伸：然而，这种改善主要体现在视觉体验，而不能解决居民每天面对的实际问题。

结果分析：因此，相比于艺术项目，公共服务更值得政府优先投资。

Some people believe that governments should spend more money on public works of art such as paintings and statues to make towns and cities better places to live. I disagree with this view because public money should first be used to improve essential public services and infrastructure, which provide greater benefits to residents.

有些人认为，政府应该在公共艺术作品（如绘画和雕塑）上投入更多资金，以使城镇和城市成为更宜居的地方。我不同意这种观点，因为公共资金首先应该用于改善基本的公共服务和基础设施，这些能为居民带来更大的益处。

In my opinion, government funding should be directed towards projects that improve people's daily lives rather than additional public artworks. For example, many cities still face problems such as overcrowded public transport, insufficient hospitals and a lack of educational facilities. If a large proportion of public money is spent on paintings, statues and similar projects, these important services may not receive the investment they urgently need. As a result, residents may continue to experience inconvenience and lower living standards despite living in a more attractive environment. Therefore, giving priority to infrastructure and public services is a more effective way to improve the quality of urban life.

在我看来，政府资金应投向改善人们日常生活的项目，而不是增加公共艺术作品。例如，许多城市仍然面临公共交通拥挤、医院不足和教育设施缺乏等问题。如果大部分公共资金被用于绘画、雕塑等类似项目，这些重要的服务可能就得不到急需的投资。结果，居民可能继续面临不便和生活质量较低的

问题，尽管他们居住的环境变得更加美观。因此，优先投资基础设施和公共服务，是提高城市生活质量的更有效方式。

Admittedly, public art can make cities more attractive and create a pleasant atmosphere. Beautiful sculptures, murals and other artistic works may also encourage tourism and help build a city's cultural identity. However, these advantages are mainly aesthetic and cannot solve the practical difficulties that many citizens experience every day. A well-designed statue cannot reduce traffic congestion, improve healthcare or provide better education. Consequently, although public art has its value, it should not receive greater financial support than essential public projects.

诚然，公共艺术可以让城市更具吸引力，营造愉悦的氛围。美丽的雕塑、壁画和其他艺术作品也可能促进旅游业发展，并帮助塑造城市的文化认同。然而，这些优势主要在于审美层面，并不能解决许多市民每天面临的实际困难。一座精心设计的雕像无法缓解交通拥堵、改善医疗条件或提供更好的教育。因此，尽管公共艺术有其价值，但它不应获得比基本公共项目更大的财政支持。

In conclusion, while public artworks can make towns and cities look more appealing, I believe governments should prioritise spending on infrastructure and public services because these investments produce more meaningful and lasting improvements to people's lives. Public art should be supported only after the most important needs of residents have been met.

总之，虽然公共艺术作品能让城镇和城市看起来更有吸引力，但我认为政府应优先将资金用于基础设施和公共服务，因为这些投资能对人们的生活产生更有意义和持久的改善。只有在居民最重要的需求得到满足之后，才应支持公共艺术。

6、食品广告

Research shows that overeating is as harmful as smoking. Therefore, advertising for certain food products should be banned,in the same way as cigarette advertising is banned in many countries. To what extent do you agree or disagree?

研究表明，暴饮暴食和吸烟一样有害。因此，应该像许多国家禁止香烟广告那样，禁止某些食品的广告。你在多大程度上同意或不同意？

🍊 写作立场：同意

我**同意**应该禁止宣传某些不健康食品，就像许多国家禁止香烟广告一样。虽然广告本身不能完全决定人们的饮食习惯，但它会增加高糖、高脂和高盐食品的吸引力，尤其容易影响儿童和青少年。同时，限制广告还能鼓励食品企业开发更健康的产品。

逻辑链分析：

主体段 1

提出观点：不健康食品广告会鼓励人们形成不健康的饮食习惯。

扩展延伸：广告通常强调食品的味道和快乐，而很少提醒消费者其中含有大量糖分、脂肪或盐分。

举例：例如，儿童经常受到薯片、糖果和含糖饮料广告的吸引。

合理性推断：因此，禁止这类广告能够减少消费者，尤其是青少年的不健康消费冲动。

主体段 2

提出观点：广告禁令还能推动食品行业提供更健康的产品。

举例：例如，当企业无法依靠大量广告销售垃圾食品时，就需要开发更健康的产品来吸引消费者。

结果分析：这将增加健康食品在市场上的比例，并改善整体饮食环境。

合理性推断：因此，广告禁令不仅影响消费者，也能够促进整个食品行业朝着更健康的方向发展。

Research has shown that overeating can be as harmful as smoking. Therefore, some people argue that advertisements for certain unhealthy food products should be banned in the same way as cigarette advertisements. I agree with this opinion because food advertising encourages unhealthy eating habits and restricting it can also promote healthier products.

研究表明，暴饮暴食的危害可与吸烟相提并论。因此，一些人主张，应像禁止香烟广告那样，禁止某些不健康食品的广告。我同意这一观点，因为食品广告助长了不健康的饮食习惯，而限制这类广告也能促进更健康产品的推广。

One reason why I support banning advertisements for unhealthy food is that they influence people's eating habits, especially those of children and teenagers. Food advertisements usually highlight attractive flavours, colourful packaging and the enjoyment of eating, while paying little attention to the high levels of sugar, fat or salt contained in these products. As a result, consumers may develop a stronger desire to buy these foods without fully understanding their health risks. For example, many children are attracted by advertisements for crisps, sweets and sugary drinks and often ask their parents to buy them. Therefore, limiting such advertisements can reduce unnecessary consumption and encourage healthier eating choices.

我支持禁止不健康食品广告的一个原因是，它们会影响人们的饮食习惯，尤其是儿童和青少年的饮食习惯。食品广告通常突出诱人的口味、色彩鲜艳的包装和进食的愉悦感，却很少提及这些产品中高含量的糖、脂肪或盐分。结果，消费者可能在不完全了解健康风险的情况下，对这些食品产生更强的购

买欲望。例如，许多儿童被薯片、糖果和含糖饮料的广告所吸引，并经常要求父母购买。因此，限制此类广告可以减少不必要的消费，并鼓励更健康的饮食选择。

Another reason is that advertising restrictions may encourage food companies to improve the quality of their products. For example, if manufacturers are no longer able to rely on intensive marketing campaigns to increase sales of unhealthy food, they will need to compete by producing healthier alternatives that better satisfy consumer demand. As a result, more nutritious products are likely to become available in supermarkets and restaurants, creating a healthier food environment for the public. Therefore, banning advertisements for unhealthy food can benefit not only consumers but also improve the long-term direction of the food industry.

另一个原因是，广告限制可能促使食品公司改进产品质量。例如，如果制造商不再能依靠密集的营销活动来增加不健康食品的销量，他们将需要通过生产更健康的替代品来竞争，以更好地满足消费者的需求。这样一来，超市和餐厅中可能会供应更多营养更丰富的产品，为公众创造更健康的食品环境。因此，禁止不健康食品广告不仅有利于消费者，也有助于改善食品行业的长期发展方向。

In conclusion, my agreement with banning advertisements for certain unhealthy food products is based on the fact that these advertisements encourage unhealthy eating habits and that the policy can motivate companies to provide healthier food. Such a measure would contribute to improving public health over time.

总之，我同意禁止某些不健康食品广告，是基于以下事实：这些广告鼓励了不健康的饮食习惯，而且这项政策可以激励企业提供更健康的食品。从长远来看，这样的措施将有助于改善公众健康。

7、资源开采

With the increasing demand for energy such as oil and gas, people start to look for their sources in remote and untouched places. Do the advantages outweigh the disadvantages?

随着对石油和天然气等能源需求的增加，人们开始在偏远和未开发的地方寻找能源来源。这样做利大于弊吗?

🍊 写作立场：弊大于利

我认为，**开发偏远、未受破坏地区的石油和天然气资源弊大于利**。虽然这样做能够缓解能源短缺，但对生态环境造成的破坏往往是长期甚至不可逆的，而且这种做法还会延缓清洁能源的发展。

逻辑链分析：

主体段 1

提出观点：开发偏远地区的能源资源确实能够带来一定好处。

让步：它可以在短时间内增加石油和天然气供应，缓解能源需求。

扩展延伸：然而，这种收益通常只是暂时的，因为这些资源本身不可再生。

合理性推断：因此，仅依赖开发新的化石能源并不能从根本上解决能源问题。

主体段 2

提出观点：开发未受破坏地区最大的缺点是破坏自然环境。

扩展延伸：修建道路、钻井和运输设施会影响野生动物栖息地，并增加污染风险。

反面假设：如果越来越多的偏远地区被开发，许多珍贵生态系统将难以恢复。

结果分析：因此，从长期来看，环境损失远远超过短期获得的能源利益。

As the demand for energy continues to increase, more people suggest searching for oil and gas in remote and untouched areas. Although this approach may provide additional energy supplies in the short term, I believe that its disadvantages outweigh its advantages because it damages the environment and delays the transition to more sustainable energy sources.

随着能源需求持续增长，越来越多人提议在偏远和未开发地区勘探石油和天然气。尽管这种做法短期内可能提供额外的能源供应，但我认为其弊端大于好处，因为它会破坏环境，并延缓向更可持续能源的转型。

Admittedly, exploring remote areas for oil and gas can temporarily reduce pressure on energy supplies. New energy reserves may help meet the growing demand from industries and households, especially in countries that rely heavily on fossil fuels. However, this benefit is unlikely to last because oil and gas are non-renewable resources and will eventually be exhausted regardless of where they are found. Relying on newly discovered reserves only postpones the problem instead of solving it. Therefore, expanding fossil fuel exploration cannot provide a long-term solution to the world's energy needs.

诚然，在偏远地区勘探油气可以暂时缓解能源供应压力。新的能源储备可能有助于满足工业和家庭日益增长的需求，尤其是在严重依赖化石燃料的国家。然而，这种好处不太可能持久，因为石油和天然气是不可再生资源，无论在哪里开采，最终都会枯竭。依赖新发现的储量只是推迟了问题，而非解决问题。因此，扩大化石燃料勘探无法为世界能源需求提供长期解决方案。

The major disadvantage of extracting energy from untouched areas is the environmental damage it can cause. Building roads, drilling facilities and transport infrastructure often destroys natural habitats and disturbs wildlife. In addition, oil spills and other accidents may pollute rivers, forests and surrounding ecosystems, causing damage that can take decades to

recover. If more remote regions are opened for energy exploration, many of the world's last remaining natural environments could gradually disappear. As a result, the environmental cost of exploiting these areas is far greater than the temporary economic and energy benefits that such projects may bring.

从未开发地区开采能源的主要弊端在于其对环境造成的破坏。修建道路、钻井设施和运输基础设施往往会破坏自然栖息地，干扰野生动物。此外，石油泄漏和其他事故可能污染河流、森林及周边生态系统，造成的破坏可能需要数十年才能恢复。如果更多偏远地区被开放用于能源勘探，世界上最后仅存的大量自然环境可能会逐渐消失。因此，开发这些地区的环境成本远远大于这些项目可能带来的暂时经济和能源收益。

In conclusion, although exploring remote places for oil and gas can increase energy supplies for a limited period, I believe that the disadvantages outweigh the advantages. Protecting untouched environments and investing in renewable energy sources is a more sustainable way to meet future energy demands.

总之，尽管在偏远地区勘探油气可以在有限时间内增加能源供应，但我认为其弊端大于好处。保护未受破坏的环境并投资可再生能源，是满足未来能源需求更可持续的方式。

8、看电视

Some people think watching TV is bad for children in every way. Others think it is good for the development of children as they grow up. Discuss both views and give your own opinion.

有些人认为看电视对孩子在任何方面都有害。另一些人则认为看电视对孩子成长过程中的发展有好处。讨论这两种观点并给出你自己的看法。

🍊 写作立场：有益

我认为**电视对儿童的发展总体是有益的**。虽然过度看电视可能带来一些负面影响，但这些问题主要来自缺乏管理，而高质量的电视节目能够帮助儿童学习知识、拓宽视野，因此其好处更值得肯定。

逻辑链分析：

主体段 1

提出观点：有人认为电视对儿童只有负面影响，但这种观点过于绝对。

举例：例如，纪录片和教育节目可以帮助儿童学习科学、历史或自然知识。

合理性推断：因此，电视本身并不是问题，关键在于观看的内容。

结果分析：只要选择合适的节目，电视同样能够促进儿童的发展。

主体段 2

提出观点：我认为电视能够帮助儿童成长。

扩展延伸：除了学校教育，电视还能让儿童接触不同国家的文化和社会，扩大他们的视野。

举例：例如，一些儿童纪录片会介绍不同国家的生活方式和野生动物。

结果分析：因此，电视不仅能够增加知识，还能培养儿童的好奇心和学习兴趣。

Some people believe that watching television is harmful to children in every aspect, while others argue that it contributes to children's development. I believe that television is beneficial overall because its educational value is greater than its disadvantages when children watch suitable programmes.

有些人认为，看电视对孩子在各方面都有害，而另一些人则认为看电视有助于孩子的成长。我认为，总体来说电视是有益的，因为只要孩子观看适宜的节目，其教育价值就大于弊端。

Some people argue that television has a negative influence on children because it may reduce physical activity and expose young viewers to inappropriate content. However, saying that television is harmful in every way is an exaggeration. For example, educational programmes and documentaries can teach children about science, history and nature in an interesting and understandable way. Through these programmes, children are able to gain knowledge that they may not learn from textbooks alone. This suggests that the real issue is not television itself but the type of content children choose to watch. As a result, appropriate television programmes can play a positive role in children's development.

一些人认为电视对孩子有负面影响，因为它可能减少孩子的体育活动，并使年幼的观众接触到不良内容。然而，说电视在各方面都有害是一种夸大。例如，教育节目和纪录片能以有趣且易懂的方式，教给孩子科学、历史和自然知识。通过这些节目，孩子们能够获得他们单靠课本可能学不到的知识。这表明，真正的问题不在于电视本身，而在于孩子选择观看的内容类型。因此，适宜的电视节目可以在孩子的成长中发挥积极作用。

In my opinion, television is a useful learning tool because it helps children broaden their knowledge and understand the world beyond their own communities. Besides learning at school, children can watch programmes introducing different cultures, traditions and lifestyles from around the world. For example, many documentaries designed for young audiences explain how people live in different countries or how wild animals survive in nature. Such programmes encourage children to become more curious and interested in learning new things. As a result, television can improve both their general knowledge and their understanding of the wider world, which are valuable for their future education.

在我看来，电视是一种有用的学习工具，因为它有助于孩子拓宽知识面，了解自身社区以外的世界。除了在学校学习之外，孩子们还可以观看介绍世界各地不同文化、传统和生活方式的节目。例如，许多面向年轻观众的纪录片会讲解不同国家的人们如何生活，或野生动物如何在自然中生存。这类节目鼓励孩子变得更加好奇，并对学习新事物产生兴趣。因此，电视既能提高孩子的常识水平，也能加深他们对更广阔世界的理解，这对他们未来的教育很有价值。

In conclusion, although excessive or unsuitable television viewing may cause some problems, I believe that television is beneficial overall. With proper guidance from parents and suitable programme choices, it can become an effective way to support children's learning and personal development.

总之，尽管过度或不适宜的电视观看可能会带来一些问题，但我认为电视总体上是有益的。在父母的适当引导和适宜的节目选择下，电视可以成为支持孩子学习和个人发展的有效方式。

9、免费教育

Some people believe that university education should be free for everyone. Others think that students should pay for their own education.Discuss both views and give your own opinion.

有些人认为大学教育应该对所有人免费。另一些人则认为学生应该为自己的教育付费。讨论这两种观点并给出你自己的看法。

🍊 写作立场：不应该

我认为**大学教育不应该对所有人免费**。政府可以向经济困难的学生提供资助，但让所有人免费接受大学教育会给政府带来沉重的财政负担，而且学生承担部分费用也能提高他们对学习的责任感。

逻辑链分析：

主体段 1

提出观点：有人认为大学教育应该向所有人免费开放。

让步：这样确实能够让更多家庭负担得起高等教育，并提高受教育机会。

反面假设：然而，如果所有学生都由政府承担学费，教育支出将大幅增加。

结果分析：因此，完全免费的大学教育并不是一种可持续的政策。

主体段 2

提出观点：我认为学生应承担部分大学教育费用。

扩展延伸：当学生为自己的教育投入资金时，他们通常会更加珍惜学习机会，并认真完成课程。

合理性推断：这种责任感有助于提高学习效率，减少浪费教育资源的情况。

结果分析：因此，由学生承担合理的学费，同时向真正需要帮助的人提供资助，是更加公平和有效的做法。

Some people believe that university education should be free for everyone, while others argue that students should pay for their own studies. I believe that students should contribute to the cost of their education, although financial support should be available for those who cannot afford it.

有些人认为，大学教育应该对所有人免费，而另一些人则认为学生应自行承担学费。我认为，学生应当为自己的教育费用做出贡献，尽管对于无力承担的人，应该提供经济资助。

Supporters of free university education argue that everyone should have an equal opportunity to receive higher education regardless of their financial background. I agree that removing tuition fees could allow more young people to attend university and reduce the financial pressure on families. However, if governments paid the full cost of higher education for every student, public spending would increase significantly. This could leave fewer financial resources for other essential services such as healthcare, public transport and primary education. As a result, providing completely free university education for everyone would not be a sustainable policy in the long run.

支持免费大学教育的人认为，无论经济背景如何，每个人都应拥有接受高等教育的平等机会。我认同，免除学费可以让更多年轻人上大学，并减轻家庭的经济压力。然而，如果政府为每位学生全额支付高等教育费用，公共支出将大幅增加。这可能会导致其他基本服务（如医疗、公共交通和基础教育）可用的财政资源减少。因此，为所有人提供完全免费的大学教育，从长远来看并非可持续的政策。

In my opinion, students should pay at least part of the cost of their university education because this encourages them to take their studies more seriously. When people invest their own money in education, they are usually more motivated to attend classes, complete assignments and make full use of university resources. This greater sense of responsibility can improve learning outcomes and reduce the waste of educational opportunities. As a result, asking students to contribute to tuition fees is likely to benefit both individuals and society. At the same time, governments should offer scholarships or financial aid to students from low-income families so that talented young people are not prevented from entering university because of financial difficulties.

在我看来，学生至少应承担部分大学教育费用，因为这能激励他们更加认真地对待学业。当人们将自己的钱投入教育时，通常会更有动力去上课、完成作业，并充分利用大学资源。这种更强的责任感可

以提高学习效果，并减少教育机会的浪费。因此，要求学生分担学费很可能对个人和社会都有益。同时，政府应为来自低收入家庭的学生提供奖学金或助学金，以确保有才华的年轻人不会因经济困难而被挡在大学门外。

In conclusion, although free university education can improve access to higher education, I believe that students should pay a reasonable share of the cost while governments provide support for those who genuinely need financial assistance. This approach is both fairer and more sustainable.

总之，尽管免费大学教育可以提高高等教育的可及性，但我认为学生应承担合理比例的费用，同时政府为真正需要经济资助的人提供支持。这种方式既更公平，也更可持续。

10、薪酬

Some people think professional workers should be paid more than sport and entertainment person. To what extent do you agree or disagree.

有些人认为专业人士的薪酬应该高于体育和娱乐界人士。你在多大程度上同意或不同意？

🍊 写作立场：同意

我**同意**专业工作者（如医生和教师）应该比体育和娱乐行业人士获得更高的薪资。因为他们提供的是社会必需服务，对公众福祉和社会发展具有更长期、更稳定的价值。

逻辑链分析：

主体段 1

提出观点：专业工作者创造的社会价值更值得获得较高收入。

扩展延伸：医生和教师每天都在保障人们的健康和教育，这些服务是社会正常运行不可缺少的。

结果分析：如果他们获得合理甚至更高的薪资，更多优秀人才会愿意进入这些行业。

合理性推断：因此，提高专业工作者的收入能够促进社会长期稳定发展。

主体段 2

提出观点：体育和娱乐行业人士确实也应该获得合理的收入。

让步：优秀运动员和演员为公众带来娱乐，并创造一定的经济价值。

举例：例如，一些知名运动员能够吸引大量观众，并促进旅游和商业活动。

合理性推断：然而，他们提供的价值更多属于消费需求，而不是社会运行所必需。

Some people believe that professional workers, such as doctors and teachers, should earn higher salaries than people working in sports and entertainment. I agree with this view because professional workers provide essential services that have a greater and more lasting impact on society.

有些人认为，像医生和教师这样的专业工作者，其薪资应高于体育和娱乐行业从业者。我同意这一观点，因为专业工作者提供的基础性服务对社会具有更大、更持久的影响。

In my opinion, professional workers deserve higher pay because their work directly supports the well-being and development of society. Doctors protect people's health, while teachers educate future generations. Without these professionals, society would not function effectively. Offering them higher salaries would also encourage more talented young people to choose these careers instead of seeking jobs that are popular but less essential. As a result, more skilled professionals would be available to meet society's long-term needs. Therefore, paying professional workers more is likely to benefit both individuals and society as a whole.

在我看来，专业工作者理应获得更高薪酬，因为他们的工作直接支撑着社会的福祉与发展。医生保护人们的健康，而教师则教育下一代。没有这些专业人士，社会将无法有效运转。给予他们更高的薪资，也能鼓励更多有才华的年轻人选择这些职业，而不是去追求那些受欢迎但不太重要的岗位。这样一来，将有更多熟练的专业人才来满足社会的长期需求。因此，给专业工作者更高薪酬，很可能对个人和整个社会都有益。

Admittedly, people working in sports and entertainment also make valuable contributions. Successful athletes and actors provide enjoyment to millions of people and can generate significant economic benefits through tourism, broadcasting and related industries. For example, major sporting events often attract visitors from different countries and increase local business income. However, these contributions mainly satisfy people's leisure and entertainment needs rather than providing services that are necessary for everyday life. Therefore, although talented people in these industries should receive fair rewards for their achievements, there is no convincing reason why they should generally earn more than professionals whose work is essential to public welfare.

诚然，体育和娱乐行业从业者也做出了有价值的贡献。成功的运动员和演员为数百万人带来快乐，并能通过旅游、转播及相关产业创造可观的经济效益。例如，大型体育赛事常常吸引来自不同国家的游客，增加当地商业收入。然而，这些贡献主要满足的是人们的休闲和娱乐需求，而非提供日常生活所必需的服务。因此，尽管这些行业中的优秀人才应为他们的成就获得公平回报，但没有令人信服的理由说明他们总体上应比那些从事关乎公众福祉的关键工作的专业人士赚得更多。

In conclusion, I agree that professional workers should receive higher salaries than those in sports and entertainment because their work is indispensable to society and higher pay can attract more capable people into these important careers. While entertainers and athletes

deserve appropriate rewards, essential public services should be valued more highly in terms of income.

总之，我同意专业工作者的薪资应高于体育和娱乐行业从业者，因为他们的工作对社会不可或缺，而更高的薪酬也能吸引更多有能力的人进入这些重要职业。虽然娱乐界人士和运动员应得到适当的回报，但就收入而言，关键公共服务应被赋予更高的价值。

11、公共空地

In some cities, public parks and open spaces are changed into gardens where local residents can grow their own fruit and vegetables. Do you think the benefits outweigh the disadvantages?

在一些城市，公共公园和空地正被改建成花园，供当地居民种植自己的水果和蔬菜。你认为这样做利大于弊吗?

🍊 写作立场：利大于弊

我认为，**将部分公共公园和开放空间改造成居民种植水果和蔬菜的花园，利大于弊。** 虽然这样可能减少休闲活动空间，但它能够提高土地利用效率，并增强社区居民之间的联系，因此带来的整体收益更大。

逻辑链分析：

主体段 1

提出观点：社区菜园能够提高公共土地的利用价值。

举例：例如，居民可以利用这些土地种植番茄或生菜等蔬菜。

扩展延伸：这些农产品不仅可以供家庭食用，还能减少购买部分食品的开支。

结果分析：因此，公共空间能够创造更大的实际价值，而不仅仅是供人观赏。

主体段 2

提出观点：有人担心改建后会减少居民休闲空间。

让步：这确实可能影响一些人散步或进行户外活动。

扩展延伸：然而，大多数城市仍然拥有其他公园和运动场，而社区菜园本身也能成为居民交流的场所。

反面假设：如果所有开放空间都保持原来的用途，那么这些土地能够创造的社会价值将受到限制。

In some cities, public parks and open spaces are being converted into community gardens where local residents can grow their own fruit and vegetables. I believe that the benefits of this change outweigh the disadvantages because it makes better use of public land and brings communities closer together.

在一些城市，公园和空地正被改造成社区花园，供当地居民种植自己的水果和蔬菜。我认为，这种变化利大于弊，因为它能更好地利用公共土地，并拉近社区成员之间的联系。

One important advantage of community gardens is that they increase the practical value of public land. For example, local residents can grow vegetables such as tomatoes or lettuce instead of leaving large areas of land only for decoration. The food produced can be used by families, helping them reduce part of their grocery expenses while enjoying fresh produce. In addition, people learn useful gardening skills and become more aware of where their food comes from. As a result, these public spaces provide both environmental and economic benefits instead of serving only as places for sightseeing.

社区花园的一大优势在于，它提升了公共土地的实用价值。例如，当地居民可以种植番茄、生菜等蔬菜，而不只是让大片土地仅作观赏之用。产出的食物可供家庭食用，帮助减少部分食品开销，同时还能享受新鲜农产品。此外，人们还能学习实用的园艺技能，并更清楚地了解食物的来源。因此，这些公共空间既能带来环境效益，也能产生经济效益，而不仅仅是供人游览的地方。

Admittedly, turning parks into gardens may reduce the amount of space available for recreation. Some people may have fewer places for walking, exercising or relaxing outdoors. However, most cities already have other parks, playgrounds or sports facilities that can meet these recreational needs. Moreover, community gardens themselves can become pleasant places where neighbours meet, work together and share gardening experience. If every open space continued to serve only its original purpose without adapting to the changing needs of local residents, valuable land resources would not be used as effectively as possible. Therefore, the loss of some recreational space is outweighed by the wider benefits that community gardens provide.

诚然，将公园改造成花园可能会减少可供休闲的空间。有些人可能会觉得散步、锻炼或户外放松的场所变少了。然而，大多数城市已经拥有其他公园、游乐场或体育设施，可以满足这些休闲需求。况且，社区花园本身也能成为邻里之间相聚、协作和分享园艺经验的宜人场所。如果每块空地都一成不变地维持原有用途，而不去适应当地居民不断变化的需求，宝贵的土地资源就无法得到最大化的利用。因此，社区花园带来的更广泛好处，足以弥补部分休闲空间的减少。

In conclusion, although converting public parks into community gardens may reduce some leisure space, I believe the advantages are greater because these gardens improve the use of public land, provide fresh food and strengthen relationships among local residents.

总之，尽管将公园改造成社区花园可能会减少一些休闲空间，但我认为其利大于弊，因为这些花园改善了公共土地的利用方式，提供了新鲜食物，并增进了当地居民之间的关系。

12、独自观影

People these days prefer to watch films and TV programmes alone rather than with other people. Why is that?Do you think it is a positive or negative development?

如今人们更喜欢独自观看电影和电视节目，而不是和别人一起看。这是为什么？你认为这是一种积极的还是消极的发展趋势？

🍊 写作立场：消极的发展

我认为，如今人们更喜欢独自观看电影和电视节目，主要是因为个人设备越来越普及以及人们希望拥有更多自主选择。**我认为这是一个负面发展。** 虽然观看体验更加自由，但人与家人和朋友共同交流、分享感受的机会会减少。

逻辑链分析：

主体段 1

提出观点：越来越多人选择独自观看影视作品，是因为观看方式更加方便和个性化。

扩展延伸：智能手机、平板和流媒体平台让人们可以随时观看自己喜欢的内容。

合理性推断：因此，独自观看逐渐成为最省时、最灵活的选择。

举例：例如，人们可以在上下班途中观看自己喜欢的电视剧。

主体段 2

提出观点：我认为这是一个负面发展。

扩展延伸：一起观看电影或电视节目能够让家人和朋友分享感受、讨论剧情，并增加交流机会。

结果分析：如果越来越多人长期独自观看，他们面对面互动的时间可能会减少。

让步：当然，独自观看更加自由，但这一优势不足以弥补社交互动减少带来的影响。

Nowadays, many people prefer to watch films and television programmes alone rather than with family or friends. This trend is mainly caused by changes in technology and lifestyle. In my

opinion, although watching alone is more convenient, it is a negative development because it reduces opportunities for social interaction.

如今，许多人更喜欢独自观看电影和电视节目，而不是与家人或朋友一起。这一趋势主要由技术和生活方式的变革所导致。在我看来，尽管独自观看更为便捷，但这是一种消极的发展，因为它减少了社交互动的机会。

One major reason for this trend is that modern technology allows people to watch whatever they want whenever they want. Streaming platforms and mobile devices have made entertainment far more flexible than before. People no longer need to wait for others to be available or agree on what to watch. Instead, they can choose programmes that match their own interests and watch them at a convenient time. As a result, watching alone has become the easiest and most practical option for many people. For example, commuters often watch television series or films on their phones while travelling to work or school.

导致这一趋势的一个主要原因是，现代技术让人们可以随时随地观看任何想看的节目。流媒体平台和移动设备使娱乐方式比以往更加灵活。人们不再需要等待他人有空，也不必协商看什么内容。相反，他们可以选择符合自己兴趣的节目，并在方便的时间观看。因此，独自观看已成为许多人最简单、最实际的选择。例如，通勤者经常在上班或上学途中用手机观看电视剧或电影。

Despite these advantages, I believe this is a negative development because shared viewing experiences play an important role in maintaining relationships. Watching a film together gives family members and friends opportunities to discuss the story, exchange opinions and spend enjoyable time with one another. These shared experiences help strengthen personal relationships and improve communication. If more people continue to watch entertainment alone, they may gradually spend less time interacting face to face, which could weaken their social connections over time. Admittedly, watching alone provides greater freedom and privacy, but these benefits are less important than the value of spending quality time with other people.

尽管有这些便利之处，但我认为这是一种消极的发展，因为共同观看的体验在维系人际关系方面发挥着重要作用。一起看电影能让家人和朋友有机会讨论故事情节、交流看法，并共度愉快时光。这些共同的经历有助于增进人际关系和改善沟通。如果更多人继续独自观看娱乐内容，他们可能会逐渐减少面对面的交流时间，长此以往可能会削弱社交联系。诚然，独自观看提供了更大的自由度和隐私，但与与他人共度有意义时光的价值相比，这些好处并不那么重要。

In conclusion, people increasingly choose to watch films and television programmes alone because technology has made entertainment more flexible and personalised. However, I consider this a negative development since it reduces valuable opportunities for communication and shared experiences with family and friends.

总之，人们越来越倾向于独自观看电影和电视节目，是因为技术让娱乐变得更灵活、更个性化。然而，我认为这是一种消极的发展，因为它减少了与家人和朋友进行交流和共享体验的宝贵机会。

13、压力

Everyday activities cause stress for many people in the modern world. Why is this the case? What can be done to solve this problem?

在现代社会，日常活动会给许多人带来压力。为什么会这样？可以采取哪些措施来解决这个问题？

🍊 写作立场：2个措施

现代人日常生活压力越来越大，主要是因为工作和生活节奏不断加快，以及科技让人们始终处于工作和信息之中。**我认为这一问题可以通过改善工作制度和培养健康的生活习惯得到缓解。**

逻辑链分析：

主体段 1

提出观点：现代人的日常压力主要来自快节奏的工作和生活。

举例：例如，许多人每天需要完成大量工作任务，并不断回复工作信息。

结果分析：这使他们很难真正放松，即使下班后仍然感到疲惫。

合理性推断：因此，长期处于这种状态会导致越来越大的心理压力。

主体段 2

提出观点：政府、企业和个人都应采取措施减轻压力。

扩展延伸：企业可以鼓励合理的工作时间，个人也应该安排运动或兴趣活动来放松自己。

让步：虽然这些措施不能完全消除压力，但能够有效降低其影响。

结果分析：因此，人们可以更好地保持身心健康，并提高长期的工作和生活质量。

In the modern world, many people experience stress in their everyday lives. This problem is mainly caused by increasingly busy lifestyles and constant work-related pressure. I believe that it can be reduced through better working practices and healthier personal habits.

在现代社会，许多人在日常生活中承受着压力。这一问题主要由日益繁忙的生活方式和持续的工作压力所致。我认为，通过改善工作方式和培养更健康的个人习惯，可以缓解这一问题。

One major cause of everyday stress is the fast pace of modern life. Many employees have to complete a large number of tasks within limited working hours, and they are often expected to respond to emails or messages even after work. For example, office workers may continue checking work notifications in the evening instead of relaxing with their families. As a result, they have little opportunity to recover from the pressure of work, and both physical and mental

tiredness gradually build up. Therefore, it is not surprising that many people feel stressed during their daily lives.

日常压力的一个主要原因是现代生活的快节奏。许多员工不得不在有限的工作时间内完成大量任务，而且往往下班后还需要回复邮件或信息。例如，上班族可能会在晚上继续查看工作通知，而不是与家人一起放松。结果，他们几乎没有机会从工作压力中恢复过来，身心疲惫逐渐累积。因此，许多人在日常生活中感到压力，就不足为奇了。

To address this problem, both employers and individuals should take responsibility. Companies can reduce unnecessary overtime and encourage employees to maintain a healthier balance between work and personal life. At the same time, individuals should make time for regular exercise, hobbies or other relaxing activities instead of spending all their free time dealing with work. Although these measures cannot remove stress completely, they can significantly reduce its negative effects. As a result, people are more likely to remain healthy, improve their concentration and enjoy a better quality of life over the long term.

要解决这一问题，雇主和个人都应承担责任。公司可以减少不必要的加班，并鼓励员工在工作和个人生活之间保持更健康的平衡。同时，个人应抽出时间进行定期锻炼、培养爱好或从事其他放松活动，而不是把所有空闲时间都用来处理工作。尽管这些措施无法完全消除压力，但能显著减轻其负面影响。这样一来，人们更有可能保持健康，提高专注力，并长期享受更高质量的生活。

In conclusion, everyday stress mainly results from demanding work schedules and the difficulty of separating work from personal life. By improving workplace policies and encouraging healthier lifestyles, it is possible to reduce stress and help people live more balanced and satisfying lives.

总之，日常压力主要源于繁重的工作安排以及工作与个人生活难以分离。通过改善职场政策和鼓励更健康的生活方式，减轻压力、帮助人们过上更平衡和更满意的生活是完全可以实现的。

14、英语

English is now widely used as the mainlanguage of education, especially in the education systems of some non-English speaking countries. Do you think it is a positive or negative development?

英语现在被广泛用作主要教学语言，尤其是在一些非英语国家的教育体系中。你认为这是一种积极的还是消极的发展趋势？

🍊 写作立场：积极发展

我认为，**在非英语国家以英语作为主要教学语言是一种积极的发展。** 虽然学生在学习初期可能会面临语言障碍，但长期来看，这种教育方式能够帮助他们获取更多优质教育资源，并提

升未来的就业竞争力。

逻辑链分析：

主体段 1

提出观点：英语作为主要教学语言能够帮助学生获得更多学习资源。

扩展延伸：大量教材、学术论文和在线课程都是用英语编写的，学生能够直接接触最新知识。

举例：例如，许多国际大学课程和公开课都以英语授课。

结果分析：因此，学生能够拥有更广阔的学习机会，并提高自己的学术能力。

主体段 2

提出观点：有人担心英语授课会增加学习难度。

让步：对于英语水平较低的学生来说，刚开始确实可能难以理解课堂内容。

合理性推断：然而，随着语言能力不断提高，他们能够同时掌握专业知识和英语技能。

反面假设：如果学校完全放弃英语教学，学生未来在国际交流和就业中可能会失去许多机会。

English has become the main language of education in many non-English-speaking countries. Although some people worry that this trend makes learning more difficult, I believe it is a positive development because it gives students greater access to educational resources and improves their future career opportunities.

在许多非英语国家，英语已成为主要教学语言。尽管一些人担心这一趋势会增加学习难度，但我认为这是一种积极的发展，因为它能让学生更广泛地获取教育资源，并提升他们未来的职业机会。

One important advantage of using English as the main language of education is that students can access a much wider range of learning materials. Many textbooks, academic journals and online courses are written in English, allowing students to learn directly from the latest research instead of relying on translated materials. For example, many international university courses and open educational resources are delivered entirely in English. As a result, students have more opportunities to improve their academic knowledge and keep up with developments in different fields.

将英语作为主要教学语言的一大优势在于，学生可以接触到更广泛的学习资料。许多教科书、学术期刊和在线课程都是用英语撰写的，学生能够直接学习最新的研究成果，而不必依赖翻译材料。例如，许多国际大学课程和开放教育资源完全以英语授课。因此，学生有更多机会提升学术知识，紧跟不同领域的发展动态。

Admittedly, studying in English can be challenging at the beginning, especially for students with limited language skills. They may need more time to understand lectures or complete assignments. However, as their English improves, they are able to develop both subject knowledge and language ability at the same time. These two skills are highly valuable in today's global job market, where many international companies require employees to communicate in English. If schools chose not to use English in education, students might have fewer opportunities to study abroad, cooperate with people from other countries or compete for international careers. Therefore, the temporary difficulty of learning in English is outweighed by its long-term benefits.

诚然，用英语学习在初期可能具有挑战性，尤其是对语言能力有限的学生而言。他们可能需要更多时间来理解讲课内容或完成作业。然而，随着英语水平的提高，他们能够同时发展学科知识和语言能力。这两项技能在当今全球就业市场上极具价值，因为许多跨国公司要求员工具备英语沟通能力。如果学校不在教育中使用英语，学生出国留学、与外国人合作或参与国际职业竞争的机会可能会减少。因此，用英语学习带来的长期收益远远超过初期的困难。

In conclusion, I believe that using English as the main language of education in non-English-speaking countries is a positive development because it expands access to high-quality educational resources and prepares students for future academic and professional success. Although students may face language challenges at first, the long-term advantages are much greater.

总之，我认为在非英语国家将英语作为主要教学语言是一种积极的发展，因为它扩大了对优质教育资源的获取，并为学生未来的学术和职业成功做好准备。尽管学生最初可能面临语言方面的挑战，但其长远优势要大得多。

15、经济发展

Nowadays, most countries improve the standard of living through economic development. But some social values are lost as a result. Do you think the advantages of the phenomenon outweigh the disadvantages?

如今，大多数国家通过经济发展来提高生活水平，但结果是一些社会价值观随之丧失。你认为这种现象的利大于弊吗？

🍊 写作立场：利大于弊

我认为，**经济发展带来的优势大于社会价值流失带来的劣势。** 虽然一些传统社会价值可能会被削弱，但经济发展能够显著改善人民生活水平，而且社会价值可以通过教育和文化活动继续传承。

逻辑链分析：

主体段 1

提出观点：经济发展能够直接提高人们的生活水平。

扩展延伸：国家拥有更多财政收入后，可以改善医疗、教育和交通等公共服务。

结果分析：因此，人们能够享受更安全、更便利、更舒适的生活。

举例：例如，一些发展中的国家在经济增长后建成了更多医院和学校。

主体段 2

提出观点：经济发展确实可能导致部分社会价值逐渐淡化。

让步：例如，人们可能更加重视物质财富，而减少与家人相处或参与传统活动的时间。

反面假设：然而，如果政府和学校继续重视文化教育，并鼓励传统节日和社区活动，这些社会价值并不会完全消失。

合理性推断：因此，这种负面影响是可以缓解的，无法抵消经济发展带来的整体收益。

Nowadays, many countries improve people's standard of living through economic development. However, some people believe that this progress also causes the loss of important social values. In my opinion, the advantages outweigh the disadvantages because economic growth brings significant improvements to people's lives, while social values can still be preserved through appropriate efforts.

如今，许多国家通过经济发展来提高人民的生活水平。然而，一些人认为，这种进步也导致了重要社会价值观的丧失。在我看来，利大于弊，因为经济增长为人们的生活带来了显著改善，同时通过适当的努力，社会价值观仍然可以得到维护。

One major advantage of economic development is that it directly improves people's quality of life. As the economy grows, governments usually collect more tax revenue, which can be invested in public services such as healthcare, education and transportation. Better hospitals provide higher-quality medical treatment, improved schools create more educational opportunities, and modern transport systems make daily life more convenient. As a result, people enjoy a safer, healthier and more comfortable lifestyle. For example, many developing countries have built new hospitals and schools after achieving rapid economic growth, allowing more citizens to benefit from essential public services.

经济发展的一大优势在于它直接提高了人们的生活质量。随着经济增长，政府通常会获得更多的税收收入，这些收入可以用于医疗、教育和交通等公共服务的投入。更好的医院提供更高质量的医疗服务，改善后的学校创造更多教育机会，现代化的交通系统使日常生活更加便捷。因此，人们能够享受

更安全、更健康和更舒适的生活方式。例如，许多发展中国家在实现经济快速增长后，建设了新的医院和学校，使更多公民受益于基本的公共服务。

Admittedly, economic development may weaken some traditional social values. People may pay more attention to earning money and spend less time with their families or taking part in traditional cultural activities. However, this does not mean that these values will inevitably disappear. If governments continue to support cultural education and encourage traditional festivals, while schools teach students the importance of respect, responsibility and family relationships, many valuable traditions can still be passed on to future generations. Therefore, the negative influence of economic development on social values can be reduced and should not outweigh its overall benefits.

诚然，经济发展可能会削弱某些传统社会价值观。人们可能更注重赚钱，与家人相处或参与传统文化活动的时间减少。然而，这并不意味着这些价值观必然会消失。如果政府继续支持文化教育，鼓励传统节日活动，同时学校教导学生尊重、责任和家庭关系的重要性，许多宝贵的传统仍然可以传承给后代。因此，经济发展对社会价值观的负面影响是可以减轻的，不应盖过其整体益处。

In conclusion, although economic development may have some influence on traditional social values, I believe its advantages are much greater because it improves people's living standards and creates better public services. At the same time, social values can continue to be protected through education and cultural activities.

总之，尽管经济发展可能对传统社会价值观产生一定影响，但我认为其利远大于弊，因为它改善了人们的生活水平，并创造了更好的公共服务。与此同时，通过教育和文化活动，社会价值观仍能得到持续保护。
