2026.9月大作文重点

在看预测之前大家要有一个认知：雅思写作的题库特别广，在不断增加新题的同时还会进行老题重考，所以完全无法统计出题库的完整内容，因此雅思写作可以视为“没有题库”。所以预测是基于近期高频考题做的整理，可以作为类似于“观点库”的辅助内容，但不要寄很大希望于预测到原题

- 一个比较偷懒的逻辑链思路（容易延伸）

提出观点——扩展延伸——举例——结果分析——【继续延伸】（可选）

无论是什么观点。都可以在观点的基础上进行详细解释。在这个解释的基础上假设一个情境进一步佐证xx会产生xx影响。然后就这个影响进行结果分析，就可以用很顺的逻辑完成一段论述，这个思路我同样觉得非常顺手。

并且只要加一句 “此外” （In addition）等词，就可以对观点做第二个延伸，然后继续举例或结果分析。

就以“父母对儿童成长的影响”这一话题为例，一道是小范围（家庭教育）；一道是大范围（社会、国际），说一下怎么一个观点做2个延伸

父母对儿童的成长有重要影响。那么这个影响有多角度的触点，我们只需要思考父母对儿童的成长，都可以从哪些方面去起作用，就可以得出多个延伸思路。

例如父母为儿童提供情感支持、价值观和行为规范，是孩子最早的榜样。

还可以写 “父母对孩子的具体教导” 、“父母的个人行为的潜在影响” 、"父母对事情的看法影响孩子三观"、“个人行为还可以分类为 为人处世、面对困难、处理矛盾.....” ，只要打开思路就有无数条线供我们延伸。

> 但是注意，一段最多给观点做2个延伸，不然就是罗列观点，会低分。并且一篇文章最多一段做2个延伸，不然也有罗列观点的嫌疑。总之，**必须保证每一个观点和延伸有足够的内容佐证，不能纯罗列**

有些人认为艺术画廊和博物馆应该展示更多本国的传统文化艺术作品。

那我们要集中思考 “展示更多本国的传统文化艺术作品” 的影响

对社会，弘扬传统文化

对年轻人，加强教育

对文化，表现保护传统的态度

对国家，民族自信心和自豪感

……

这只是粗略的思考，每一个都可以当做一个延伸方向。

1、继续工作

Some people believe that it is a good idea to continue to work at their old age. Do you agree or disagree?

有些人认为在老年时继续工作是个好主意。你同意还是不同意？

🍊 写作立场：不同意

我**不同意**老年人继续工作是一个好主意。虽然继续工作能够带来一定收入并保持社会联系，但退休后更应该关注健康和家庭生活，而且继续工作还可能影响年轻人的就业机会。

逻辑链分析：

主体段 1

提出观点：老年人不应该继续工作，因为退休后更应该关注身体健康。

反面假设：如果他们仍然承担正常工作压力，身体负担可能不断增加。

扩展延伸：随着年龄增长，恢复能力下降，工作会占用休息、运动和陪伴家人的时间。

结果分析：因此，继续工作反而可能降低他们晚年的生活质量。

主体段 2

提出观点：继续工作也不利于劳动力市场的发展。

举例：例如，如果许多资深员工长期留在岗位上，新毕业生能够获得的职位就会减少。

合理性推断：年轻人缺少工作经验后，将更难提升自己的职业能力。

结果分析：因此，适时退休能够促进劳动力更新，并提高整体就业效率。

Some people believe that it is a good idea for people to continue working in old age. However, I disagree with this opinion because retirement allows older people to enjoy a healthier life, and leaving the workforce at the right time also creates more opportunities for younger employees.

有些人认为，老年时继续工作是个好主意。然而，我不同意这种观点，因为退休能让老年人享受更健康的生活，而在适当的时候离开职场也能为年轻员工创造更多机会。

To begin with, elderly people should give priority to their health rather than their careers. If they continue working in demanding jobs after reaching old age, they are more likely to experience physical fatigue and mental stress. Unlike younger workers, older people usually recover more slowly and may already suffer from age-related health problems. In addition, full-time work often leaves less time for exercise, medical care and spending time with family members. As a result, remaining in employment for too long may reduce their quality of life instead of improving it.

首先，老年人应该优先考虑自己的健康，而不是事业。如果他们在进入老年后继续从事要求高的工作，就更容易出现身体疲劳和精神压力。与年轻员工不同，老年人通常恢复得更慢，而且可能已经患有与年龄相关的健康问题。此外，全职工作往往留给锻炼、医疗护理和陪伴家人的时间更少。因此，过长时间地留在工作岗位上可能会降低而不是提高他们的生活质量。

Another reason why I disagree is that delaying retirement can have a negative influence on the labour market. For example, in many companies, senior employees occupy management or technical positions for many years, which means fewer vacancies are available for recent graduates. Young people need these opportunities to gain practical experience and develop professional skills at the beginning of their careers. If older workers continue to stay in the same positions, the transfer of knowledge and responsibilities to the next generation may also become slower. Therefore, retiring at an appropriate age can encourage workforce renewal, provide more career opportunities for younger employees and maintain a healthier balance in the job market.

我不同意的另一个原因是，延迟退休可能对劳动力市场产生负面影响。例如，在许多公司中，资深员工长期占据管理或技术职位，这意味着应届毕业生的职位空缺更少。年轻人需要这些机会，以便在职业生涯初期获得实践经验和培养专业技能。如果老年员工继续留在同样的岗位上，知识和职责向下一代的转移也可能变得更慢。因此，在适当的年龄退休可以促进劳动力更新，为年轻员工提供更多职业机会，并保持就业市场更健康的平衡。

In conclusion, although some elderly people may still enjoy working, I believe that continuing to work in old age is generally not a good idea. Retiring at the appropriate time benefits older people's health while also supporting the long-term development of the labour market.

总之，尽管有些老年人可能仍然喜欢工作，但我认为老年时继续工作通常不是一个好主意。在适当的时候退休既有利于老年人的健康，也有助于劳动力市场的长期发展。

2、社区服务

Some people suggest that young adults should be encouraged to do some unpaid workfor a period of time for the community to help people. Does it bring more benefits ordrawbacks to the community and the young people?

有人建议，应鼓励年轻人花一段时间为社区做些无偿工作，以帮助他人。这对社区和年轻人本身带来的好处多于坏处吗?

🍊 写作立场：好处多于坏处

我认为，**鼓励年轻人在一段时间内从事无偿社区工作带来的好处多于坏处。** 对社区而言，这能够为有需要的人提供更多帮助；对年轻人而言，他们也可以通过真实的社会活动培养实用能力。虽然无偿工作会占用一定的个人时间，但这种影响通常是暂时的。

逻辑链分析：

主体段 1

提出观点：年轻人参与无偿工作能够为社区提供更多人力支持。

举例：例如，他们可以帮助社区中的老年人购买生活用品或完成一些简单的日常事务。

合理性推断：这些工作不一定需要专业人员，年轻志愿者可以承担其中一部分，减轻工作人员的压力。

结果分析：这样社区就能照顾更多需要帮助的人，并提高公共服务的效率。

主体段 2

提出观点：这种经历对年轻人自身的发展也有明显好处。

让步：无偿工作确实会占用他们原本可以用于学习、兼职或休息的时间。

扩展延伸：但是在社区工作中，他们需要与不同的人沟通，这些能力很难完全从课堂中获得。

合理性推断：因此，只要无偿工作的时间受到合理控制，年轻人获得的社会经验会超过短期的时间成本。

Some people suggest that young adults should be encouraged to spend a period of time doing unpaid work in their local communities. Although this may take up some of their personal time, I believe the benefits outweigh the drawbacks because such work can support local services and help young people develop useful skills.

有人建议，应鼓励年轻人花一段时间在本地社区做无偿工作。虽然这可能会占用他们一些个人时间，但我认为利大于弊，因为这类工作既能支持社区服务，又能帮助年轻人培养实用技能。

One major benefit is that young volunteers can provide additional support for people in the community. For example, they can help elderly residents buy daily necessities or deal with simple everyday tasks. Many of these activities do not require professional knowledge, so young people can take responsibility for them and reduce the workload of community workers. This is particularly useful in areas where public services have limited staff or money. As a result, local organisations can help more residents and provide services more efficiently. The community can therefore become a more supportive place, especially for people who cannot easily manage their daily lives alone.

一个主要好处是，年轻志愿者可以为社区居民提供额外的帮助。例如，他们可以帮助老年居民购买日常必需品或处理简单的日常事务。许多这类活动并不需要专业知识，因此年轻人能够承担起来，减轻社区工作者的负担。这在公共服务人员或资金有限的地区尤其有用。这样一来，本地组织就能帮助更多居民，并更高效地提供服务。因此，社区会变成一个更有互助性的地方，尤其是对那些无法独自轻松应对日常生活的人来说。

Unpaid community work can also contribute to the personal development of young adults. Admittedly, volunteering takes time that they could otherwise spend studying, doing part-time work or simply relaxing. However, community work gives them opportunities to communicate with different people, cooperate with others and take responsibility for real tasks. These abilities are difficult to develop fully through classroom learning alone. They may also make young adults more confident when they later enter university or the workplace. Therefore, as long as the period of unpaid work is reasonable and does not seriously affect their studies or employment, the practical experience they gain is more valuable than the temporary loss of free time.

无偿的社区工作也有助于年轻人的个人发展。诚然，做志愿者会占用他们本可用于学习、做兼职或单纯休息的时间。然而，社区工作让他们有机会与不同的人交流，与他人合作，并为实际任务承担责任。这些能力仅靠课堂学习是很难充分培养的。这些经历也可能让年轻人在日后进入大学或职场时更加自信。因此，只要无偿工作的期限合理，且不会严重影响他们的学业或就业，他们所获得的实践经验就比暂时失去闲暇时间更有价值。

In conclusion, unpaid community work can provide extra support for local residents while helping young adults develop practical social skills. Although it requires some personal time, I believe these benefits clearly outweigh the disadvantages for both the community and young people.

总之，无偿的社区工作既能向当地居民提供额外帮助，又能帮助年轻人培养实用的社交技能。尽管这需要付出一些个人时间，但我相信，对社区和年轻人而言，这些好处显然大于弊端。

3、居家时间

Nowadays, many people spend less and less time at home. What are the reasons for it? What are the effects of this trend on individuals and society?

如今，越来越多的人待在家里的时间越来越少。造成这一现象的原因是什么？这种趋势对个人和社会有哪些影响？

🍊 写作立场：正常分析

如今人们待在家里的时间减少，主要是因为**工作占据了更多时间，同时外出娱乐和社交活动也更加丰富。** 这种趋势对个人而言可能造成休息不足，并减少与家人相处的时间；对社会而言，则可能削弱家庭关系以及居民与本地社区之间的联系。

逻辑链分析：

主体段 1

提出观点：人们待在家里的时间减少，主要是因为工作压力增加以及户外活动更加丰富。

扩展延伸：许多人需要加班或长时间通勤，而空闲时间也更愿意用于购物或与朋友见面。

反面假设：如果工作时间较短，而且人们在家就能满足大部分娱乐和社交需求，他们自然没有必要经常外出。

结果分析：因此，工作和生活方式的变化共同压缩了人们真正待在家里的时间。

主体段 2

提出观点：长期减少居家时间可能对个人生活和社会关系产生负面影响。

举例：例如，一些父母早出晚归，与孩子一起吃饭和交流的机会越来越少。

扩展延伸：对个人而言，长时间在外会减少休息以及陪伴家人的时间；从社会角度看，人们也可能更少参与家庭活动和本地社区事务。

合理性推断：因此，人们可能更容易出现身体和精神上的疲劳，同时家庭成员之间以及居民与社区之间的联系也可能逐渐减弱。

Nowadays, many people spend less time at home than they did in the past. This trend is mainly caused by increasing work demands and the growing number of activities available outside the home. It can negatively affect individuals by reducing their time for rest and family life, while also weakening family and community relationships.

如今，许多人待在家里的时间比过去少了。这一趋势主要是由日益增长的工作需求和越来越多的户外活动所导致的。它可能会对个人产生负面影响，减少他们休息和家庭生活的时间，同时也会削弱家庭

和社区关系。

One important reason why people stay at home less is that modern life requires them to spend more time outside. Many employees work long hours or have lengthy journeys between their homes and workplaces. At the same time, people now have more choices for entertainment and social activities, so they often spend their free time shopping or meeting friends. If working hours were shorter and there were fewer attractive activities outside the home, people would naturally have more time to stay at home. Therefore, changes in both working patterns and lifestyles have significantly reduced the amount of time people spend there.

人们待在家里的时间减少的一个重要原因是，现代生活要求他们在户外花更多时间。许多员工工作时间长，或者上下班通勤路程遥远。与此同时，人们现在有了更多的娱乐和社交活动选择，因此他们经常把空闲时间花在购物或与朋友聚会上。如果工作时间更短，户外的吸引人的活动更少，人们自然会有更多时间待在家里。因此，工作模式和生活方式的变化都显著减少了人们待在家里的时间。

This trend may negatively affect individuals as well as wider society. For example, some parents leave home early and return late, giving them fewer opportunities to have meals or conversations with their children. At an individual level, spending most of the day outside can also reduce the time available for proper rest, making people more physically and mentally tired. Meanwhile, they may have less time to participate in family activities or become involved in their local communities. As this lifestyle becomes increasingly common, relationships between family members may gradually weaken, and residents may also feel less connected to the communities in which they live.

这一趋势可能会对个人以及更广泛的社会产生负面影响。例如，一些父母早出晚归，与孩子共进晚餐或交谈的机会变少。在个人层面，一天中大部分时间都在户外，也会减少适当休息的时间，使人们在身心上更加疲惫。同时，他们可能更少时间参与家庭活动或融入当地社区。随着这种生活方式变得越来越普遍，家庭成员之间的关系可能会逐渐减弱，居民也可能对所在的社区感到越来越疏离。

In conclusion, people are spending less time at home mainly because of demanding working lives and more opportunities for activities outside. This trend can reduce people's time for rest and family interaction while gradually weakening family and community connections.

总之，人们待在家里的时间越来越少，主要是因为繁重的工作生活和更多户外活动机会。这一趋势会减少人们休息和家庭互动的时间，同时逐渐削弱家庭和社区的纽带。

4、生活平衡

People aim to keep a balance between theirwork and other parts of their lives, but fewpeople achieve it. What are the problems intrying to achieve this goal and how canthese problems be

overcome?

人们力求在工作与生活的其他方面之间保持平衡，但很少有人能做到。在试图实现这一目标的过程中存在哪些问题？又如何克服这些问题？

🍊 写作立场：正常分析

人们难以实现工作与生活的平衡，主要存在两个问题：**工作占用了过多的时间，以及工作与私人生活之间的界限越来越模糊。** 我认为，这些问题可以通过企业限制不必要的加班和工作联系，以及个人更合理地安排自己的时间来解决。

逻辑链分析：

主体段 1

提出观点：实现工作与生活平衡最大的困难，是工作不断占用个人时间。

举例：例如，一些员工下班后仍然需要回复工作邮件或处理临时任务。

结果分析：这会直接减少他们用于陪伴家人以及个人兴趣的时间。

合理性推断：当工作长期进入私人生活时，即使人们主动想保持平衡，也很难真正做到。

主体段 2

提出观点：解决这一问题需要企业和个人共同建立清晰的工作与生活界限。

扩展延伸：企业应该减少不必要的加班；个人则可以提前安排运动、家庭活动和休息时间。

结果分析：这样可以保证工作不会持续占据私人时间，使人们有稳定的时间满足生活中的其他需求。

让步：虽然在特别忙碌的时期偶尔加班难以避免，但它不应该成为长期的工作常态。

Many people try to maintain a balance between their work and other parts of their lives, but relatively few are able to achieve this goal. The main difficulty is that work increasingly takes up people's personal time and makes it difficult to separate professional responsibilities from private life. This problem can be addressed by changes in workplace practices and better personal time management.

许多人试图在工作与生活的其他方面之间保持平衡，但能够实现这一目标的人相对较少。主要困难在于，工作日益侵占人们的个人时间，使人难以将职业责任与私人生活分开。这一问题可以通过改变工作场所的做法和更好的个人时间管理来解决。

One major problem in achieving work-life balance is that work often extends beyond normal working hours. For example, some employees are still expected to answer work emails or deal

with urgent tasks after they have left the office. This directly reduces the amount of time available for family relationships and personal interests. Modern technology has made this situation even more common because workers can be contacted almost anywhere through their phones or computers. Therefore, even when people actively want to achieve a healthier balance, it can be extremely difficult if their professional responsibilities regularly enter their private lives.

实现工作与生活平衡的一个主要问题是，工作常常超出正常工作时间。例如，一些员工在下班后仍被要求回复工作邮件或处理紧急任务。这直接减少了用于家庭关系和个人兴趣的时间。现代技术使这种情况更加普遍，因为员工几乎可以在任何地方通过手机或电脑被联系到。因此，即使人们积极希望实现更健康的平衡，如果职业责任经常侵入私人生活，那也会极其困难。

To overcome this problem, both employers and individuals need to create clearer boundaries between work and personal life. Companies should reduce unnecessary overtime and avoid contacting employees about ordinary work matters outside working hours. Individuals can also plan their free time more carefully by setting aside regular periods for family activities or relaxation. These measures can prevent work from continuously taking over personal time and ensure that people have enough opportunities to focus on other important parts of life. Admittedly, occasional overtime may be unavoidable during particularly busy periods, but it should not become a normal part of everyday working life.

要克服这个问题，雇主和个人都需要在工作与个人生活之间建立更清晰的界限。公司应减少不必要的加班，并避免在下班后就普通工作事务联系员工。个人也可以通过留出固定的时间用于家庭活动或放松，来更精心地规划自己的空闲时间。这些措施可以防止工作持续占据个人时间，确保人们有足够机会关注生活中其他重要的部分。诚然，在特别繁忙的时期，偶尔加班可能难以避免，但这不应成为日常工作的常态。

In conclusion, people often struggle to achieve work-life balance because their jobs occupy too much of their personal time. Clearer workplace boundaries and better time management can help people protect their private lives and achieve a healthier balance in the long term.

总之，人们常常难以实现工作与生活的平衡，因为工作占据了他们过多的个人时间。更明确的职场界限和更好的时间管理，可以帮助人们保护自己的私人生活，并从长远来看实现更健康的平衡。

5、医疗服务

Medical services should be run by profit-making company. To what extent do you agree or disagree?

医疗服务应由营利性公司运营。你在多大程度上同意或不同意这一观点？

🍊 写作立场：不同意

我**不同意**医疗服务应该主要由营利性公司运营。虽然营利性公司为了吸引患者，可能会提高服务效率和医疗设备水平，但**追求利润与医疗服务保障公众健康的核心目标存在冲突**。如果医疗服务过度商业化，低收入群体可能难以承担治疗费用，同时医疗机构也可能优先提供利润更高的服务。

逻辑链分析：

主体段 1

提出观点：营利性公司经营医疗服务确实可能提高医疗服务的效率。

让步：为了吸引更多患者，私人医疗公司通常有动力改善设备并提高服务质量。

扩展延伸：但是，公司最终需要获得利润，因此提高服务质量的同时，也可能提高医疗费用。

反面假设：如果患者因为价格过高而无法获得这些更好的服务，那么效率和质量的提升就无法真正惠及整个社会。

主体段 2

提出观点：更重要的是，以盈利为主要目标可能影响医疗资源的公平分配。

扩展延伸：营利性医疗机构可能更愿意治疗能够支付高额费用的患者，或者提供利润更高的医疗项目，而不是优先考虑最需要帮助的人。

合理性推断：然而，医疗服务属于基本需求，人们获得治疗的机会应该主要取决于健康状况，而不是经济能力。

结果分析：因此，如果医疗系统过度依赖营利性公司，贫富群体之间获得医疗服务的差距可能进一步扩大。

Some people argue that medical services should be run by profit-making companies rather than public organisations. Although private companies may improve efficiency and service quality, I disagree with this view because the pursuit of profit can make healthcare less affordable and lead to an unfair distribution of medical resources.

一些人认为医疗服务应该由营利性公司而非公共机构运营。尽管私营公司可能提高效率和服务质量，但我不同意这一观点，因为追求利润会使医疗保健变得更加难以负担，并导致医疗资源分配不公。

Profit-making companies can admittedly make medical services more efficient. In order to attract more patients, private healthcare providers have strong reasons to invest in modern

equipment and improve the quality of their services. This competition may give patients a better experience than they would receive in poorly managed public hospitals. However, these companies also need to generate profits, so improvements in quality may be accompanied by higher treatment fees. If a large number of patients cannot afford these better services, greater efficiency and advanced facilities will only benefit people with sufficient financial resources. Therefore, this advantage does not justify allowing profit-making companies to play the main role in healthcare.

诚然，营利性公司可以使医疗服务更加高效。为了吸引更多患者，私营医疗机构有充分理由投资现代化设备并提高服务质量。这种竞争可能会给患者带来比管理不善的公立医院更好的体验。然而，这些公司也需要创造利润，因此质量的提升可能伴随着更高的治疗费用。如果大量患者负担不起这些更好的服务，那么更高的效率和先进的设施只会惠及有足够财力的人。因此，这一优势并不足以证明让营利性公司在医疗保健中发挥主导作用是合理的。

More importantly, the pursuit of profit may result in an unfair distribution of medical resources. Private hospitals may prefer patients who can afford expensive treatment or focus on medical services that generate higher profits rather than those that are most urgently needed. However, healthcare is a basic necessity, and access to treatment should depend primarily on people's medical needs rather than their income. A low-income patient with a serious illness should not receive worse treatment simply because another patient can pay more. If healthcare becomes excessively commercialised, poorer people may delay necessary treatment or have access to fewer medical services. As a result, the health gap between different income groups could become even wider.

更重要的是，追求利润可能导致医疗资源分配不公。私立医院可能更倾向于选择能够负担昂贵治疗费用的患者，或专注于利润更高的医疗服务，而非最急需的医疗项目。然而，医疗保健是基本需求，获得治疗应主要取决于人们的医疗需求，而非收入。一位患有重病的低收入患者，不应仅仅因为另一位患者能支付更多费用就得到更差的治疗。如果医疗保健过度商业化，贫困人群可能会推迟必要的治疗，或获得更少的医疗服务。结果，不同收入群体之间的健康差距可能会进一步扩大。

In conclusion, although profit-making companies may make some medical services more efficient, I disagree that they should run the healthcare system. Affordability and equal access to essential treatment should take priority over financial profit.

总之，尽管营利性公司可能使部分医疗服务更加高效，但我不同意它们应该运营医疗体系。负担能力和公平获得基本治疗的机会，应优先于经济利益。

6、环境问题

Some people think that environmentproblems is too big for individuals, othersthink that the problems will never be solvedwith out participate of individuals. Discussboth views and give your own opinion.

一些人认为环境问题对个人来说过于宏大，另一些人则认为，没有个人的参与，这些问题永远无法解决。讨论双方观点，并给出你自己的看法。

🍊 写作立场：支持后者

我支持第二种观点：**环境问题虽然规模很大，不能仅靠个人解决，但没有个人参与，这些问题同样无法得到有效解决。** 政府和大型企业确实拥有更强的资源和影响力，但许多环境问题最终与普通人的日常行为有关，因此个人参与是不可缺少的。

逻辑链分析：

主体段 1

提出观点：一些人认为个人很难真正解决大规模的环境问题。

让步：这一观点有一定道理，因为减少工业污染、发展清洁能源等行动需要政府和大型企业投入大量资金和资源。

结果分析：因此，一个普通人改变自己的生活习惯，确实无法直接解决这些大规模问题。

反面假设：但是，如果因此认为个人完全不需要参与，即使政府制定环保政策，也很难取得理想效果，因为许多政策最终仍需要公众在日常生活中配合。

主体段 2

提出观点：我认为个人参与是解决环境问题不可缺少的一部分。

举例：例如，人们可以减少使用一次性塑料，并更多选择公共交通。

扩展延伸：单个人的改变看起来很小，但如果大量居民采取相同的行动，对塑料制品和私人汽车的整体需求就会下降。

合理性推断：因此，当个人行为形成集体改变时，就能够产生明显的环境影响，同时推动企业和政府采取更加环保的措施。

Some people believe that environmental problems are too large for individuals to deal with, while others argue that these problems cannot be solved without individual participation. I support the latter view because although governments and large companies have greater resources, the daily behaviour of ordinary people also has a significant influence on the environment.

一些人认为环境问题过于宏大，个人无法应对，而另一些人则认为，没有个人的参与，这些问题就无法解决。我支持后一种观点，因为尽管政府和大公司拥有更多资源，但普通人的日常行为也对环境有着重要影响。

Those who believe individuals have limited influence have some reasonable arguments. Large environmental problems often require action on a national or even international level. Admittedly, reducing industrial pollution or developing clean energy requires considerable investment and strong policies from governments and major companies. Therefore, a single person who changes their lifestyle cannot directly solve these large-scale problems. However, this does not mean that individuals have no responsibility. If ordinary people refused to participate in environmental protection, even well-designed government policies would be difficult to implement because many of them depend on changes in public behaviour.

那些认为个人影响力有限的人有一些合理的论据。大型环境问题往往需要在国家甚至国际层面采取行动。诚然，减少工业污染或开发清洁能源需要政府和大公司进行大量投资并制定强有力的政策。因此，单个人改变生活方式并不能直接解决这些大规模问题。然而，这并不意味着个人没有责任。如果普通人拒绝参与环境保护，即使是设计良好的政府政策也难以实施，因为其中许多政策有赖于公众行为的改变。

I therefore believe that individual participation is an essential part of solving environmental problems. For example, people can reduce their use of disposable plastic and choose public transport more often. Although these actions may seem insignificant when carried out by one person, their impact becomes much greater when millions of people behave in the same way. Lower demand for environmentally harmful products can also encourage companies to change the way they operate. It is therefore reasonable to believe that collective changes in individual behaviour can produce significant environmental benefits and encourage wider action from both businesses and governments.

因此，我认为个人参与是解决环境问题不可或缺的一部分。例如，人们可以减少一次性塑料制品的使用，更频繁地选择公共交通。尽管这些行为由一个人来做时似乎微不足道，但当数百万人以同样的方式行事时，其影响就会变得大得多。对危害环境的产品需求降低，也能鼓励企业改变运营方式。因此，有理由相信，个人行为的集体改变能够产生显著的环境效益，并鼓励企业和政府采取更广泛的行动。

In conclusion, governments and companies undoubtedly have greater power to address large environmental problems, but this does not make individual action unimportant. I believe environmental protection can only be effective when ordinary people actively participate and support wider environmental efforts.

总之，政府和大公司无疑拥有更大的力量来解决重大环境问题，但这并不意味着个人的行动不重要。我认为，只有普通人积极参与并支持更广泛的环境保护努力，环境保护才能真正有效。

7、环境问题2

The responsibility for protecting andreducing global environmental damage lieswith politicians as there is very little thatindividuals can do about this. To what extent do you agree or disagree?

保护和减少全球环境损害的责任在于政治家，因为个人对此几乎无能为力。你在多大程度上同意或不同意这一观点?

🍊 写作立场：部分同意

我**不同意**这一观点。政治家确实应该承担重要责任，因为他们能够通过法律和公共政策控制大规模污染；但是，认为个人“几乎无能为力”是不合理的。**个人的日常消费和出行选择同样会影响环境，而且公众的集体行为还能推动企业和政府作出改变。**

逻辑链分析：

主体段 1

提出观点：政治家确实在减少全球环境损害方面承担重要责任。

扩展延伸：他们拥有制定法律和分配公共资金的权力，因此能够限制企业和其他大型污染源的行为。

举例：例如，政府可以制定更严格的排放标准，迫使工厂减少污染。

合理性推断：因此，政治行动对于解决大规模环境问题十分重要，但这只能说明政治家的影响力更大，并不能证明个人没有责任。

主体段 2

提出观点：个人的行为同样能够对环境保护产生实际影响。

反面假设：如果人们继续大量购买污染严重的产品，并且完全不改变自己的生活方式，企业就没有足够动力采用更加环保的生产方式。

结果分析：相反，当大量消费者选择环保产品时，市场需求会发生变化，从而推动企业减少环境损害。

让步：单个人的影响确实有限，但当相同的行为由大量居民共同采取时，其整体影响就不能被忽视。

Some people argue that politicians should be responsible for protecting the environment and reducing global environmental damage because individuals can do very little. I partly agree with this view. Although politicians have greater power to deal with large-scale environmental problems, individual behaviour can also make a meaningful difference.

一些人认为政治家应该负责保护环境和减少全球环境损害，因为个人能做的很少。我部分同意这一观点。尽管政治家拥有更大的权力来处理大规模环境问题，但个人行为也能产生有意义的改变。

Politicians certainly have an important responsibility for environmental protection. They have the power to introduce laws and decide how public money should be spent, which allows them to control the behaviour of companies and other major sources of pollution. For example, governments can introduce stricter emission standards and require factories to reduce the amount of pollution they produce. Such policies can create changes on a much larger scale than the actions of one person. It is therefore reasonable to argue that political action is essential for addressing serious environmental problems. However, the greater influence of politicians does not mean that ordinary people have no responsibility.

政治家当然对环境保护负有重要责任。他们有权制定法律并决定公共资金如何使用，这使得他们能够控制企业和其他主要污染源的行为。例如，政府可以引入更严格的排放标准，要求工厂减少产生的污染量。这类政策能够带来的变化规模远大于一个人的行动。因此，有理由认为政治行动对于解决严重的环境问题至关重要。然而，政治家更大的影响力并不意味着普通人没有责任。

Individual behaviour can also have a real impact on environmental protection. If consumers continue to buy large amounts of environmentally harmful products and make no changes to their lifestyles, companies will have little reason to adopt greener methods of production. In contrast, when large numbers of consumers choose environmentally friendly products, market demand changes and businesses are encouraged to reduce their environmental impact. Admittedly, the choices made by one individual may have only a small effect, but the combined influence of millions of people can be considerable. Individuals should therefore be viewed as an important part of environmental protection rather than passive observers.

个人行为也能对环境保护产生实际影响。如果消费者继续大量购买对环境有害的产品，并且不改变自己的生活方式，企业就没有什么理由采用更环保的生产方式。相反，当大量消费者选择环保产品时，市场需求发生变化，企业就会受到激励去减少对环境的负面影响。诚然，单个人的选择可能影响甚微，但数百万人的综合影响力是不可忽视的。因此，个人应被视为环境保护的重要组成部分，而非被动的旁观者。

In conclusion, politicians have a major responsibility because they can introduce environmental laws and control large sources of pollution. Nevertheless, I partly agree that individuals can do very little, since their collective choices can influence both businesses and the wider environment.

总之，政治家负有重大责任，因为他们能够制定环境法律并控制大型污染源。然而，我部分同意个人能做的很少这一说法，因为他们的集体选择能够影响企业乃至更广泛的环境。

8、明星榜样

Young people today increasingly admiremedia and sports stars even though theyoften do not set a good example. Do you think it's a positive or negative development?

如今的年轻人越来越崇拜媒体和体育明星，尽管这些明星往往没有树立好榜样。你认为这是一种积极还是消极的发展趋势？

🍊 写作立场：负面发展

我认为这总体上是一个**负面发展**。年轻人可能因为崇拜明星而**模仿他们的不良行为**。对媒体和体育明星的过度关注可能让年轻人**把财富和名气错误地视为成功的主要标准**。虽然部分明星的成功经历能够激励年轻人，但这种积极作用不足以抵消上述问题。

逻辑链分析：

主体段 1

提出观点：年轻人崇拜没有树立良好榜样的明星，最直接的问题是他们可能模仿这些人的不良行为。

扩展延伸：年轻人经常通过社交媒体关注明星，因此会反复接触他们的言行和生活方式。

合理性推断：由于年轻人的价值观和判断能力仍在形成，他们可能因为喜欢某个明星而降低对其错误行为的警惕。

结果分析：这样一来，一些原本不应该被接受的行为可能被年轻人视为正常，甚至值得模仿。

主体段 2

提出观点：过度崇拜媒体和体育明星还可能让年轻人形成片面的成功观。

举例：一些明星经常展示昂贵的生活方式，使年轻粉丝把财富和名气与成功直接联系起来。

让步：当然，一些明星努力训练或工作的经历确实能够激励年轻人。

反面假设：但是，如果年轻人只关注明星最终获得的财富和关注度，而忽视责任感和实际能力，他们就很难形成健康和现实的成功观。

Young people today increasingly admire stars from the media and sports industries, even though some of these celebrities do not set a good example. I consider this a negative development because young people may copy their inappropriate behaviour and develop an unhealthy understanding of what it means to be successful.

如今，年轻人越来越崇拜媒体和体育界的明星，尽管其中一些名人并没有树立好榜样。我认为这是一种消极的发展趋势，因为年轻人可能会模仿他们不当的行为，并对成功的含义形成不健康的理解。

The most direct problem is that young people may imitate the negative behaviour of the celebrities they admire. Through social media, young fans can follow almost every part of a star's life, so they are repeatedly exposed to the way these famous people behave. Since young people's values and judgement are still developing, they may be less critical of inappropriate behaviour when it comes from someone they strongly admire. They may even believe that such behaviour is acceptable simply because a successful celebrity behaves in this way. As a result, actions that should normally be discouraged may gradually become normal or even attractive in the eyes of young fans.

最直接的问题在于，年轻人可能会模仿他们所崇拜的名人的负面行为。通过社交媒体，年轻粉丝几乎可以追踪明星生活的每一个细节，因此他们反复接触到这些名人的行为方式。由于年轻人的价值观和判断力仍在发展中，当不当行为来自他们强烈崇拜的对象时，他们可能缺乏批判性。他们甚至可能仅仅因为成功的名人是这样做的，就认为这种行为是可以接受的。结果，那些本应被劝阻的行为，在年轻粉丝眼中可能逐渐变得正常甚至具有吸引力。

Another concern is that excessive admiration for celebrities can give young people an unhealthy idea of success. For example, some stars frequently display expensive lifestyles online, which can make their followers associate success mainly with wealth and fame. Admittedly, some celebrities can inspire young people because their achievements are based on years of hard work. However, this positive influence becomes limited if young fans focus mainly on the final rewards rather than the effort behind them. If young people judge success only by money and public attention while ignoring responsibility and genuine ability, they may develop unrealistic goals for their own lives.

另一个担忧是，对名人的过度崇拜会给年轻人带来不健康的成功观。例如，一些明星频繁在网上展示奢华的生活方式，这可能让粉丝将成功主要与财富和名气联系起来。诚然，有些名人确实能激励年轻人，因为他们的成就是基于多年的努力。然而，如果年轻粉丝主要关注最终的回报而非背后的付出，这种积极影响就会变得有限。如果年轻人仅凭金钱和公众关注度来判断成功，而忽视责任和真正的能力，他们可能会为自己的人生设定不切实际的目标。

In conclusion, I believe the growing admiration for media and sports stars who do not behave as good role models is a negative development. It can encourage young people to accept inappropriate behaviour and develop a narrow understanding of success.

总之，我认为对未能树立良好榜样的媒体和体育明星日益增长的崇拜是一种消极的发展趋势。它可能鼓励年轻人接受不当行为，并对成功形成狭隘的理解。

9、体育成功

Some people argue that the fittest andstrongest individuals and teams can achievethe greatest success in sports. But other people think success is much related to themental attitude. Discuss both views andgive your opinion.

一些人认为，身体最强健的运动员和团队才能在体育中取得最大成功。但另一些人认为，成功更多与心理素质有关。讨论双方观点，并给出你的看法。

🍊 写作立场：支持后者

我支持第二种观点：**心理素质比单纯的身体强健更能决定运动员能否取得最高水平的成功。**身体素质当然是竞技体育的基础，因为力量和体能会直接影响运动表现。但是，当运动员的身体水平已经比较接近时，**能否控制压力、保持专注**往往更能决定最终结果。因此，主体段1承认身体素质的重要性后进行反驳，主体段2重点论证心理素质。

逻辑链分析：

主体段 1

提出观点：一些人认为强健的身体是体育成功的主要条件。

让步：这一观点有一定道理，因为很多运动都要求运动员拥有足够的力量和体能。

举例：例如，在足球比赛中，良好的体能能够帮助球员在整场比赛中保持较高的运动强度。

反面假设：但是，如果身体条件是决定成功的主要因素，那么身体素质相近的顶尖运动员应该取得相似的成绩，而现实中他们的表现往往存在明显差异。

主体段 2

提出观点：相比之下，我认为心理素质对于取得最高水平的体育成就更加重要。

扩展延伸：重要比赛往往会给运动员带来巨大压力，他们需要保持冷静和专注，才能正常发挥自己的能力。

结果分析：心理素质较强的运动员能够在关键时刻减少失误，并作出更合理的判断，因此更有可能赢得重要比赛。

合理性推断：所以，当顶尖运动员之间的身体差距已经很小时，心理素质往往会成为决定胜负的关键因素。

Some people argue that the fittest and strongest individuals or teams are most likely to achieve great success in sports, while others believe that mental attitude plays a more important role. Although physical fitness is clearly necessary for competitive sports, I believe mental strength is more important in determining success at the highest level.

一些人认为，身体最健壮、最强壮的个人或团队最有可能在体育中取得巨大成功，而另一些人则认为心理素质发挥着更重要的作用。尽管身体素质对于竞技体育显然是必要的，但我认为在决定最高水平的成功时，心理素质更为重要。

There are good reasons why some people consider physical condition the main factor in sporting success. Admittedly, many sports require athletes to have sufficient strength and fitness to perform well throughout a competition. For example, football players need good physical fitness to maintain a high level of performance during an entire match. Athletes who are physically stronger may therefore have an advantage over weaker competitors. However, if physical ability were the main factor determining success, top athletes with similar levels of fitness should achieve similar results. In reality, some consistently perform better than others even when there is little difference in their physical condition, suggesting that another factor is involved.

有些人认为身体状况是体育成功的主要因素，这是有充分理由的。诚然，许多运动项目要求运动员具备足够的力量和体能，才能在整场比赛中发挥出色。例如，足球运动员需要良好的体能才能在整个比赛中保持高水平的发挥。因此，身体更强壮的运动员可能比体能较弱的对手更有优势。然而，如果体能是决定成功的主要因素，那么体能水平相近的顶尖运动员应该取得相似的成绩。事实上，即使身体状况几乎没有差异，有些人也始终表现得比其他人更好，这表明还有另一个因素在起作用。

I believe mental strength is often this deciding factor. Important competitions can create enormous pressure, so athletes need to remain calm and focused in order to perform at their normal level. Those with a strong mental attitude are better able to control nervousness and concentrate on the competition rather than worrying about the final result. Consequently, they are less likely to make mistakes at important moments and are more capable of making sensible decisions under pressure. It is therefore reasonable to argue that when elite athletes have similar physical abilities, their mental strength can ultimately determine who wins.

我认为心理素质往往是这个决定性因素。重要比赛会产生巨大压力，因此运动员需要保持冷静和专注，才能发挥出正常水平。心理素质过硬的人更能控制紧张情绪，把注意力集中在比赛本身，而不是担心最终结果。因此，他们在关键时刻更不容易犯错，也更有能力在压力下做出明智的决策。因此，有理由认为，当顶尖运动员体能相当时，心理素质最终能决定谁能获胜。

In conclusion, physical strength and fitness provide an essential foundation for sporting performance, but they do not guarantee the greatest success. In my view, mental attitude is

more important at the highest level because it allows athletes to perform effectively under pressure and use their physical abilities when they matter most.

总之，身体力量和体能是运动表现的重要基础，但它们并不能保证取得最大的成功。在我看来，在最高水平的竞技中，心理素质更为重要，因为它能让运动员在压力下有效发挥，并在最关键时刻运用他们的身体能力。

10、书写方式

Fewer and fewer people are writing by pens,pencils and brushes. What are the reasons for this? Is this a positive or negative development?

越来越少的人用钢笔、铅笔和毛笔书写。造成这种情况的原因是什么？这是积极还是消极的发展趋势？

🍊 写作立场：正常分析

越来越少的人使用钢笔、铅笔或毛笔书写，主要是因为**电子设备让文字输入和修改变得更加方便，同时学习和工作也越来越数字化。** 我认为这总体上是一个**积极的发展**，因为电子书写能够提高学习和工作的效率。虽然传统书写能力可能因此减弱，但这一损失相比数字化带来的便利较为有限。

逻辑链分析：

主体段 1

提出观点：人们减少手写的主要原因是电子设备更加方便，而且学习和工作环境已经高度数字化。

扩展延伸：电脑和手机不仅可以快速输入文字，还能够轻松修改和保存内容，而许多学校和公司也开始要求提交电子文件。

合理性推断：因此，当数字输入能够更快完成相同任务时，人们自然没有必要频繁使用传统书写工具。

举例：例如，大学生现在通常直接用电脑完成并提交作业，而不是手写整篇文章。

主体段 2

提出观点：我认为这种变化总体上是积极的，因为数字书写能够明显提高效率。

让步：长期减少手写确实可能使一些人的书写能力下降，也可能使传统书写方式逐渐不那么常见。

结果分析：但是，电子文字可以快速修改、保存和分享，使人们能够用更少的时间完成学习和工作任务。

反面假设：如果人们仍然主要依靠手写来处理大量文件，他们需要花费更多时间修改和传递信息，从而降低整体效率。

Fewer people nowadays use pens, pencils or brushes for writing, as digital devices have gradually replaced traditional writing tools. This change is mainly caused by the convenience of electronic technology and the increasing digitalisation of education and work. In my opinion, it is generally a positive development because digital writing makes many everyday tasks more efficient.

如今，越来越少的人使用钢笔、铅笔或毛笔书写，因为数字设备已逐渐取代了传统的书写工具。这一变化主要是由电子技术的便利性以及教育和工作的日益数字化所导致的。在我看来，这总体上是积极的发展趋势，因为数字书写使许多日常任务更加高效。

The main reason for the decline in handwriting is that electronic devices provide a faster and more convenient way to produce written content. Computers and smartphones allow users to type quickly, edit mistakes easily and store large amounts of information. At the same time, schools and workplaces increasingly require people to work with digital documents, which further reduces the need for handwriting. It is therefore natural for people to choose typing when the same task can be completed more efficiently. For example, university students now commonly write and submit their assignments on computers instead of producing entire essays by hand.

手写衰退的主要原因是电子设备提供了一种更快、更便捷的方式来生成书面内容。电脑和智能手机让用户能够快速打字、轻松修改错误并存储大量信息。同时，学校和工作场所越来越要求人们处理电子文档，这进一步减少了对书写的需求。因此，当同样的任务可以更高效地完成时，人们自然会选择打字。例如，现在大学生通常用电脑撰写和提交作业，而不是手写完成整篇文章。

I believe this development is positive overall because digital writing can significantly improve efficiency. Admittedly, writing less by hand may weaken people's handwriting skills and make some traditional forms of writing less common. However, digital documents can be edited, stored and shared much more quickly, allowing people to complete academic and professional tasks in less time. They can also correct errors without rewriting an entire page, which is particularly useful when producing long documents. If people still depended mainly on handwriting for large amounts of written work, changing and exchanging information would take considerably longer. The practical advantages of digital writing therefore outweigh the loss associated with using traditional writing tools less frequently.

我认为这一发展总体上是积极的，因为数字书写能显著提高效率。诚然，手写减少可能会削弱人们的书写技能，并使某些传统书写形式变得不那么常见。然而，电子文档可以更快速地编辑、存储和共享，使人们能够用更少的时间完成学术和工作任务。人们还可以修正错误而无需重写整页内容，这在制作长篇文档时尤为实用。如果人们仍然主要依赖手写来完成大量书面工作，那么更改和交流信息将耗费更长时间。因此，数字书写的实际优势超过了因减少使用传统书写工具而带来的损失。

In conclusion, handwriting is becoming less common because digital devices are more convenient and modern education and work increasingly depend on electronic documents. Although traditional writing skills may become weaker, I consider this a positive development because it allows people to handle written information much more efficiently.

总之，手写正变得越来越不常见，因为数字设备更加便捷，而且现代教育和工作越来越依赖电子文档。尽管传统书写技能可能会减弱，但我认为这是一种积极的发展，因为它使人们能够更高效地处理书面信息。

11、孩子犯错

Some people think children have the freedom to make mistakes, while otherpeople believe that adults should prevent children from making mistakes. Discuss bothsides and give your opinion.

一些人认为孩子有犯错自由，而另一些人则认为成年人应该阻止孩子犯错。讨论双方观点，并给出你的看法。

🍊 写作立场：支持前者，但是要在安全范围内

我支持第一种观点：**孩子应该被允许犯一些错误，而不是由成年人阻止所有错误。** 成年人的干预确实可以避免一些即时问题，但如果孩子始终依赖成年人替他们判断，他们就很难真正理解错误的原因。相比之下，在安全范围内允许孩子犯错，能够帮助他们**培养解决问题的能力，并逐渐学会独立判断**。

逻辑链分析：

主体段 1

提出观点：一些人认为成年人应该及时阻止孩子犯错，因为这样能够避免不必要的问题。

让步：这一观点有一定道理，尤其是当孩子的决定可能带来安全风险时，成年人及时干预能够保护他们。

反面假设：但是，如果成年人每次发现孩子可能犯错时都立即阻止，孩子就没有机会自己面对问题并思考哪里出了错。

合理性推断：因此，过度保护虽然能够减少短期错误，却可能使孩子长期依赖成年人作出判断。

主体段 2

提出观点：我认为，在安全范围内允许孩子犯错能够更有效地培养他们解决问题和独立判断的能力。

举例：例如，一个孩子因为没有提前安排时间而没有按时完成作业，可以亲自面对老师的批评。

结果分析：这种经历能够让他真正意识到时间管理的重要性，并主动思考下次应该如何安排任务。

扩展延伸：通过不断经历这种“犯错、发现问题、自己调整”的过程，孩子会逐渐减少对父母的依赖，并学会为自己的选择负责。

Some people believe that children should have the freedom to make mistakes, while others argue that adults should prevent them from doing so. Although adult intervention can protect children from immediate problems, I believe children should generally be allowed to make mistakes within reasonable limits because this helps them develop problem-solving skills and independent judgement.

一些人认为孩子应该有犯错的自由，而另一些人则认为成年人应该阻止孩子犯错。尽管成年人的干预可以保护孩子免受眼前的困扰，但我认为在合理的范围内，通常应该允许孩子犯错，因为这有助于他们培养解决问题的能力和独立判断力。

There are understandable reasons why some adults try to prevent children from making mistakes. Admittedly, intervention is necessary when a child's decision may put their safety at risk, since young children cannot always recognise potential dangers. In such situations, parents and teachers have a responsibility to protect them. However, if adults immediately step in whenever children are about to make a mistake, children will have little opportunity to face problems themselves or understand why their decisions were wrong. They may consequently become dependent on adults to make decisions for them. Therefore, preventing every mistake may solve short-term problems but can limit children's ability to think independently in the long term.

一些成年人试图阻止孩子犯错，这是有可以理解的原因的。诚然，当孩子的决定可能危及安全时，干预是必要的，因为年幼的孩子并不总能识别潜在的危险。在这种情况下，家长和教师有责任保护他们。然而，如果每当孩子即将犯错时成年人就立即介入，孩子就很少有機會自己面对问题，或理解自己的决定为什么是错的。他们可能会因此变得依赖成年人来替他们做决定。因此，阻止每一次错误或许能解决眼前的问题，但从长远来看可能会限制孩子独立思考的能力。

I believe allowing children to make manageable mistakes is a more effective way to prepare them for adult life. For example, a child who fails to complete homework because of poor time management may have to face criticism from the teacher. This experience can help the child understand the importance of planning and think about how to organise tasks differently next time. More importantly, children can gradually learn that their decisions have consequences and that they need to find solutions when something goes wrong. Through this process of making mistakes and correcting them, they can become more independent and responsible rather than always relying on their parents.

我认为，允许孩子犯可处理的错误，是让他们为成年生活做好准备的一种更有效的方式。例如，一个因时间管理不善而未能完成作业的孩子，可能不得不面对老师的批评。这种经历能帮助孩子理解规划的重要性，并思考下次如何以不同的方式安排任务。更重要的是，孩子能逐渐明白，他们的决定会带来后果，当事情出错时，他们需要自己寻找解决办法。通过这种犯错和改正的过程，他们可以变得更加独立和有责任感，而不是总是依赖父母。

In conclusion, adults should certainly intervene when children's safety is seriously threatened, but they should not prevent every mistake. Allowing children to experience manageable failures can teach them to solve problems independently and take responsibility for their own decisions.

总之，当孩子的安全受到严重威胁时，成年人当然应该干预，但他们不应阻止每一个错误。允许孩子经历可处理的失败，能够教会他们独立解决问题，并为自己的决定承担责任。

12、健康饮食

Some people think the government should subsidisefruit and vegetables to make healthy food moreaffordable. Others argue that the government should taxunhealthy food instead. Discuss both these views andgive your own opinion.

一些人认为政府应该补贴水果和蔬菜，使健康食品更便宜。另一些人则认为政府应该对不健康食品征税。讨论这两种观点，并给出你自己的见解。

🍊 写作立场：支持后者，前者有局限

我更支持**政府补贴水果和蔬菜**。对不健康食品征税确实可以通过提高价格减少部分消费，但这种方式会增加消费者的经济负担，而且并不能保证人们转向健康食品。相比之下，补贴能够**直接降低健康食品的价格，让更多人有能力长期选择更健康的饮食**，因此效果更加直接。

逻辑链分析：

主体段 1

提出观点：一些人支持对不健康食品征税，因为价格上涨能够降低消费者的购买意愿。

让步：这一方法确实可能使部分消费者减少购买高糖或高脂肪食品。

结果分析：但是，对这些食品征税也会增加消费者的日常生活成本，尤其会给低收入家庭带来更大的经济压力。

扩展延伸：更重要的是，少买不健康食品并不意味着消费者一定会购买水果和蔬菜，因此征税无法直接建立健康的饮食习惯。

主体段 2

提出观点：我认为补贴水果和蔬菜是促进健康饮食更加有效的方法。

举例：例如，如果政府补贴能够明显降低新鲜蔬菜的价格，预算有限的家庭就更容易经常购买。

合理性推断：当健康食品与其他食品之间的价格差距缩小时，人们在日常购物中更可能主动选择健康食品。

结果分析：长期来看，这能够改善公众的饮食习惯，并减少与不健康饮食有关的健康问题。

Some people believe that governments should subsidise fruit and vegetables to make healthy food more affordable, while others argue that unhealthy food should be taxed instead. Although taxation may discourage some people from buying unhealthy products, I believe subsidising healthy food is more effective because it directly makes better choices affordable to a wider population.

一些人认为政府应该补贴水果和蔬菜，使健康食品更加实惠，而另一些人则认为应该对不健康食品征税。尽管征税可能会阻止一些人购买不健康的产品，但我认为补贴健康食品更为有效，因为它直接让更广泛的人群能够负担得起更好的选择。

Those who support taxes on unhealthy food argue that higher prices can reduce demand for these products. Admittedly, if food containing large amounts of sugar or fat becomes more expensive, some consumers may buy it less frequently. However, such taxes can also increase everyday living costs, particularly for low-income families who already have limited food budgets. More importantly, reducing the consumption of unhealthy products does not necessarily mean that people will start eating healthier alternatives. Consumers may simply choose other cheap products instead of buying fresh food. Therefore, taxation can discourage certain choices, but it does not directly encourage people to develop healthier eating habits.

那些支持对不健康食品征税的人认为，提高价格可以减少对这些产品的需求。诚然，如果含有大量糖分或脂肪的食品变得更贵，一些消费者可能会减少购买频率。然而，这类税收也可能增加日常生活的成本，特别是对于食品预算本已有限的低收入家庭而言。更重要的是，减少不健康产品的消费并不一

定意味着人们会开始选择更健康的替代品。消费者可能只是转而选择其他廉价产品，而不是购买新鲜食品。因此，征税可以阻止某些选择，但并不能直接鼓励人们养成更健康的饮食习惯。

I believe subsidising fruit and vegetables would be a more effective approach. For example, if government support significantly reduces the price of fresh vegetables, families with limited budgets will find it easier to buy them regularly. Price is an important consideration when people choose food, so making healthy products more affordable can encourage consumers to include them in their daily diets. Unlike taxation, this approach gives people a direct financial reason to choose healthier food rather than simply punishing them for buying less healthy products. As a result, healthier eating habits may gradually become more common, which could reduce health problems associated with poor diets in the long term.

我认为补贴水果和蔬菜将是更有效的方法。例如，如果政府补贴大幅降低新鲜蔬菜的价格，预算有限的家庭就会发现定期购买它们更加容易。价格是人们在选择食物时的重要考量因素，因此让健康产品更实惠可以鼓励消费者将其纳入日常饮食。与征税不同，这种方法给了人们一个直接的经济理由来选择更健康的食物，而不仅仅是惩罚他们购买不太健康的产品。这样一来，更健康的饮食习惯可能会逐渐变得更加普遍，长期来看这可以减少与不良饮食相关的健康问题。

In conclusion, taxing unhealthy food may reduce its consumption, but it can increase financial pressure without guaranteeing healthier choices. I therefore support subsidies for fruit and vegetables because they directly make healthy diets more affordable and encourage better eating habits.

总之，对不健康食品征税可能会减少其消费，但可能增加经济压力，且不能保证人们做出更健康的选择。因此，我支持补贴水果和蔬菜，因为它们直接使健康饮食更加实惠，并鼓励更好的饮食习惯。

13、名人

Nowadays celebrities are more famous for their glamour and wealth than for their achievements, and this sets a bad example to young people. To what extent do you agree or disagree?

如今，名人更因光鲜外表和财富而非其成就而出名，这给年轻人树立了坏榜样。你在多大程度上同意或不同意这一观点？

🍊 **写作立场：基本同意**

我**基本同意**这一观点。如今，一些名人的财富和光鲜生活确实比他们的实际成就获得更多关注，这容易让年轻人**把金钱和外在形象错误地当作成功的主要标准**。此外，如果年轻人只看到明星成功后的生活，却忽视成功背后的努力，他们还可能形成**不现实的成功观**。

逻辑链分析：

主体段 1

提出观点：名人因财富和光鲜生活受到关注，容易让年轻人形成错误的成功标准。

扩展延伸：社交媒体经常展示明星昂贵的生活方式，却较少强调他们真正取得的专业成就。

合理性推断：年轻人的价值观仍在形成，因此反复接触这些内容后，他们可能逐渐把财富和外表与个人价值直接联系起来。

反面假设：如果年轻人更多关注一个人的实际能力和成就，他们就更可能形成健康、现实的成功标准。

主体段 2

提出观点：另一个问题是，名人的光鲜形象可能让年轻人忽视成功背后需要长期努力。

举例：例如，一些网络名人主要展示昂贵的生活，却很少让粉丝看到获得这些财富所需要的工作。

让步：当然，有些明星也会公开自己的训练或工作经历，并因此给年轻人带来积极影响。

结果分析：但是，当媒体主要强调最终获得的财富而不是努力过程时，年轻人可能认为成功可以快速获得，从而降低他们对长期学习和工作的重视。

Nowadays, celebrities often receive more public attention for their glamorous lifestyles and wealth than for their actual achievements. I largely agree that this sets a bad example for young people because it can give them an unhealthy definition of success and make them underestimate the effort required to achieve meaningful goals.

如今，名人往往因其光鲜亮丽的生活方式和财富而获得更多公众关注，而非其实际成就。我大体上同意这给年轻人树立了坏榜样，因为它可能让他们对成功形成不健康的定义，并使他们低估实现有意义目标所需的努力。

One major problem is that the strong focus on celebrity wealth and appearance can influence how young people measure success. Social media frequently shows famous people enjoying expensive lifestyles, while their professional achievements may receive much less attention. Since young people's values are still developing, repeated exposure to such content can gradually lead them to connect personal value mainly with money and appearance. They may therefore pay less attention to qualities such as genuine ability and responsibility. If young

people were encouraged to focus more on what a person had actually achieved, they would be more likely to develop a healthier and more realistic understanding of success.

一个主要问题是，对名人财富和外表的过度关注会影响年轻人衡量成功的方式。社交媒体频繁展示名人享受奢华生活，而他们的专业成就可能得到的关注要少得多。由于年轻人的价值观仍在发展中，反复接触此类内容会逐渐使他们将个人价值主要与金钱和外貌联系起来。因此，他们可能不太关注诸如真正能力和责任等品质。如果鼓励年轻人更多关注一个人实际取得的成就，他们就更有可能形成更健康、更现实的成功观。

Another concern is that glamorous celebrity images can hide the effort normally required to become successful. For example, some online celebrities mainly display their expensive lifestyles without showing followers the work required to earn their wealth. Admittedly, certain famous people openly discuss their training or professional experiences and can therefore motivate young people to work harder. However, when the media concentrates mainly on the final rewards of success rather than the process behind them, young audiences may develop unrealistic expectations. They may begin to believe that wealth and fame can be achieved quickly and consequently place less value on long-term study and hard work.

另一个担忧是，光鲜的名人形象可能掩盖了通常需要付出努力才能成功的现实。例如，一些网络名人主要展示他们奢华的生活方式，却不向粉丝展示他们赚取财富所需付出的努力。诚然，有些名人会公开谈论他们的训练或职业经历，因此能激励年轻人更加努力。然而，当媒体主要关注成功的最终回报而非背后的过程时，年轻观众可能会产生不切实际的期望。他们可能开始相信财富和名气可以快速获得，因而对长期学习和辛勤努力的重视程度降低。

In conclusion, I largely agree that the modern focus on celebrities' glamour and wealth can negatively influence young people. It can create a narrow definition of success and encourage unrealistic expectations about how genuine achievement is obtained.

总之，我大体上同意现代对名人光鲜外表和财富的关注会对年轻人产生负面影响。它可能形成狭隘的成功定义，并助长对如何获得真正成就的不切实际的期望。

14、在家教育

In some countries, there has been an increase in the number of parents who educate their children themselves at home instead of sending them to school. Do you think the advantages of this outweigh the disadvantages?（教育类）

在一些国家，越来越多的父母选择在家教育孩子，而不是把孩子送去学校。你认为这种做法的优点是否大于缺点？

🍊 写作立场：弊大于利

家庭教育最大的优势是父母可以根据孩子的实际学习情况调整教学，使学习更加个性化。但是，这种优势很难弥补两个更明显的问题：**孩子缺少稳定的同龄人社交环境，而且父母通常难以提供学校那样系统、专业的教育。**

逻辑链分析：

主体段 1

提出观点：家庭教育确实能够让孩子获得更加个性化的学习体验。

做对比：学校教师需要同时照顾许多学生，而在家教育的父母可以根据自己孩子的学习速度调整课程。

结果分析：因此，孩子可以在薄弱的内容上投入更多时间，同时按照适合自己的速度学习，从而提高学习效率。

让步：不过，这种优势高度依赖父母的教学能力；如果父母缺乏专业知识，即使教学更加个性化，也不一定能够保证良好的学习效果。

主体段 2

提出观点：相比之下，家庭教育更严重的问题是孩子会失去学校提供的稳定社交环境和专业教育。

举例：在学校里，孩子每天需要和同学合作完成课堂任务，这能够帮助他们学习如何沟通。

扩展延伸：与此同时，学校教师通常接受过专业训练，而大多数父母很难具备同样的教学能力。

合理性推断：由于社交能力和学术知识都对孩子未来的发展十分重要，因此这两方面的缺失比个性化学习带来的便利更加严重。

In some countries, an increasing number of parents choose to educate their children at home rather than send them to school. Although homeschooling can provide children with a more personalised learning experience, I believe its disadvantages outweigh its advantages because children may lose important opportunities for social interaction and professional education.

在一些国家，越来越多的家长选择在家教育孩子，而不是送他们去学校。尽管在家上学可以为孩子提供更个性化的学习体验，但我认为其弊端大于好处，因为孩子可能会失去重要的社交机会和专业教育。

One clear advantage of homeschooling is that education can be adjusted to suit an individual child's needs. In traditional schools, teachers have to teach many students at the same time, while parents at home can change the learning pace according to their child's progress. As a result, children can spend more time on subjects they find difficult and move faster through areas they already understand. This may make learning more efficient and reduce unnecessary pressure. However, this advantage depends heavily on the parents' ability to teach. If they lack sufficient knowledge or teaching skills, personalised lessons do not necessarily lead to better academic results. Therefore, the flexibility of homeschooling should not automatically be considered superior to formal education.

在家教育的一个明显优势是，教育可以根据孩子的个人需求进行调整。在传统学校里，教师需要同时教授多名学生，而家长在家中则可以根据孩子的进度调整学习节奏。这样一来，孩子可以在觉得困难的科目上花更多时间，在已经掌握的领域则加快进度。这可能会使学习更高效，并减少不必要的压力。然而，这一优势在很大程度上取决于家长的教学能力。如果他们缺乏足够的知识或教学技巧，个性化的课程并不一定能带来更好的学业成绩。因此，在家上学的灵活性不应自动被视为优于正规教育。

More importantly, homeschooling may prevent children from receiving the social and educational experiences that schools provide. For example, students at school regularly work with classmates on classroom tasks, which teaches them how to communicate and deal with different opinions. These experiences are difficult to reproduce at home because children have fewer opportunities to interact with people of the same age on a daily basis. In addition, school teachers usually receive professional training and can provide systematic instruction in different subjects, while most parents cannot offer the same level of teaching. Since both social skills and academic knowledge are important for children's future development, losing these opportunities is a more serious problem than the limited benefits of personalised learning.

更重要的是，在家上学可能会使孩子失去学校所提供的社交和教育体验。例如，在校学生经常与同学一起完成课堂任务，这教会他们如何沟通和处理不同意见。这些经历在家中很难复制，因为孩子日常与同龄人互动的机会较少。此外，学校教师通常接受过专业培训，能够提供不同学科的系统教学，而大多数家长无法提供同等水平的教学。既然社交技能和学科知识对孩子的未来发展都至关重要，失去这些机会比个性化学习带来的有限好处是更严重的问题。

In conclusion, homeschooling offers greater flexibility and allows lessons to match children's individual needs. However, I believe its disadvantages outweigh these benefits because schools provide essential social experiences and more professional education.

总之，在家上学提供了更大的灵活性，能让课程匹配孩子的个人需求。然而，我认为其弊端大于这些好处，因为学校提供了必要的社交体验和更专业的教育。

15、手机与电脑的普及

Some people think that with theincreasing use of mobile phones andcomputers, people lose the ability tocommunicate face to face. To what extent do you agree or disagree?(科技)

有人认为随着手机和电脑的日益普及，人们逐渐丧失面对面交流的能力。你在多大程度上同意或反对？（科技）

🍊 写作立场：部分同意

我部分同意。手机和电脑的广泛使用确实让人们的面对面交流机会减少，一些人甚至变得更依赖虚拟沟通。但与此同时，这些工具也提升了沟通效率，并且在某些情况下反而能促进面对面关系的发展。

逻辑链分析：

主体段1

提出观点：频繁依赖电子设备会降低人们面对面交流的能力。

扩展延伸：很多人习惯通过信息或社交软件沟通，而避免直接交流。

举例：例如，年轻人常常更愿意发消息而不是打电话或当面沟通，导致他们在公共场合表达时更紧张。

结果分析：长此以往，人们的口头表达与倾听能力可能下降。

主体段2

提出观点：然而，手机和电脑并没有彻底削弱面对面交流，反而有助于建立和维护关系。

举例：例如，很多人通过视频通话与远方的家人保持联系，这往往促成他们在见面时交流更自然。

反面假设：如果没有这些技术，人们可能会因距离而失去联系，导致面对面沟通机会更少。

合理性推断：因此，问题不在于工具本身，而在于人们如何使用它们。

The rapid spread of mobile phones and computers has transformed the way people communicate. Some argue that these devices reduce our ability to engage in face-to-face interaction. I partly agree with this view: while digital communication can weaken traditional skills, it also creates opportunities for stronger connections.

手机与电脑的快速普及，彻底改变了人们的沟通方式。有人认为，这些设备削弱了我们进行面对面交流的能力。我在一定程度上认同这一观点：尽管数字沟通可能会弱化传统交流技能，但它也为建立更紧密的人际联结创造了机遇。

On the one hand, excessive reliance on electronic devices can diminish people’ s ability to communicate effectively in person. Many individuals now prefer sending text messages or chatting online rather than meeting or speaking directly. Young people, for example, often feel more comfortable expressing themselves through social media posts than through face-to-face conversations. As a result, they may become nervous in public discussions or struggle with active listening. Over time, this dependence on technology can erode confidence and reduce the subtle social skills that are best developed through personal encounters.

一方面，过度依赖电子设备确实可能降低人们面对面高效沟通的能力。如今，许多人更倾向于发送短信或在线聊天，而非直接见面或通话。例如，年轻人往往觉得通过社交媒体发帖表达想法比面对面交谈更自在。长此以往，他们可能在公开讨论中感到紧张，或难以掌握积极倾听的技巧。这种对技术的依赖会逐渐削弱人的沟通自信，也会让那些需通过亲身接触才能充分培养的细微社交技能（如肢体语言解读、语气感知等）逐渐退化。

On the other hand, modern technology has also enabled people to maintain and even strengthen their relationships. Mobile phones and computers allow individuals to stay in touch with family members and friends who live far away. For instance, video calls help parents regularly see their children studying abroad, making their eventual face-to-face meetings warmer and more meaningful. If such technology did not exist, distance could easily weaken bonds and reduce the chances of in-person interaction altogether. Thus, the negative impact depends largely on how people use these tools rather than on the tools themselves.

另一方面，现代科技也让人们得以维系甚至深化人际关系。手机与电脑让人们能与远方的亲友保持联系。比如，视频通话让父母能定期看到在国外求学的孩子，这不仅拉近了心理距离，也让他们日后的面对面相聚更显温暖、更具意义。若没有这类技术，距离很可能会逐渐淡化情感联结，甚至完全剥夺面对面交流的机会。由此可见，科技对人际沟通的负面影响，很大程度上取决于人们如何使用这些工具，而非工具本身。

In conclusion, while the use of phones and computers can reduce face-to-face communication skills in some cases, it is not accurate to say they destroy such abilities. With balanced use, technology can complement rather than replace direct human interaction.

总之，尽管手机与电脑的使用在某些情况下可能会削弱面对面沟通技能，但断言它们会彻底摧毁这种能力并不准确。只要合理平衡使用，科技完全可以成为直接人际互动的补充，而非替代品。
