EXPERT

IELTS 6

Deon Education Institute
Powered by Pearson

Suitable for students starting at band 5

Contents

Module 1 Communication (p.7)

A Communication today

Reading	Vocabulary	Speaking	Listening	Language development	Writing
Identify topic sentences; Matching headings (pp. 8-9)	Collocations; Phrasal verbs; Words with more than one meaning; Communication (p. 10)	Expand answers; Part 1 (p. 11)	Locate information; Section 1: Notes completion (p. 12)	Present tenses (p. 13)	Write an overview Task 1 (p. 14)

Module 1 review (p. 22)

Module 2 Feelings (p.23)

A Feeling good

Reading	Vocabulary	Speaking	Listening	Language development	Writing
Identify key words; *Yes, No, Not given* (pp. 24–25)	Definitions; Collocations; Research; Adjectives describing experiences (p. 26)	Generate ideas and vocabulary; Part 2 (p. 27)	Use word stress to understand the main idea; Section 2: Multiple choice (p. 28)	Building complex sentences, relative clauses (p. 29)	Generate ideas and vocabulary; Task 2: Opinion essay (p. 30)

Module 2 review (p. 38)

Module 3 Work and study (p.39)

A Learning for life

Reading	Vocabulary	Speaking	Listening	Language development	Writing
Use text structure to follow ideas; Summary completion (pp. 40–41)	Dependent prepositions; Education; Adjective endings; Collocations (p. 42)	Give reasons for your opinions; Part 3 (p. 43)	Identify similarity and difference; Section 3: Matching (p. 44)	Comparative forms (p. 45)	Choose data to compare; Link information; Task 1: Describe a chart (p. 46)

Module 3 review (p. 54)

Module 4 Science (p.55)

A Discoveries and inventions

Reading	Vocabulary	Speaking	Listening	Language development	Writing
Text referencing, Matching features (pp. 56–57)	Academic research; Collocations; Science; Verb endings (p. 58)	Give yourself time to think, Part 2 (p. 59)	Understand the context; understand connected speech, Section 2: Notes completion (p. 60)	Future probability; Present probability (p. 61)	Structure a paragraph (Task 2: Opinion essay (p. 62)

Module 4 review (p. 70)

Module 5 Art and leisure (p.71)

A The Arts

Reading	Vocabulary	Speaking	Listening	Language development	Writing
Identify antonyms and synonyms; Multiple-choice questions (pp. 72–73)	Verbs/Nouns + prepositions; Compound adjectives; Collocations; Art (p. 74)	Structure an argument; Pronunciation; Part 3 (p. 75)	Follow a sequence of ideas; Section 3: Label a diagram (p. 76)	Grammar to connect ideas (p. 77)	Generate comparisons; Task 2: Opinion essay (p. 78)

Module 5 review (p.86)

B Back to the old ways

Listening	Language development and vocabulary	Speaking	Reading	Writing
Section 1: Notes completion; Table completion; Form completion (p. 15)	Past simple; The media (p. 16)	Part 1: Talk about the news (p. 17)	Matching headings; Sentence completion (pp. 18–19)	Task 1: Describe a chart (pp. 20–21)

B Looking good

Listening	Language development and vocabulary	Speaking	Reading	Writing
Section 2: Multiple choice; Sentence completion (p. 31)	Parts of speech, Adjectives of feeling; Intensifiers (p. 32)	Part 2: Describe an event (p. 33)	Matching information; *Yes*, *No*, *Not given* (pp. 34–35)	Generate ideas and vocabulary; Task 2: Opinion essay (pp. 36–37)

B The world of work

Listening	Language development and vocabulary	Speaking	Reading	Writing
Section 3: Notes completion; Matching (p. 47)	Verb patterns (*-ing* and infinitives); Business and finance (p. 48)	Part 3: Discussing shopping and retail (p. 49)	*Yes*, *No*, *Not given*; Summary completion (pp. 50–51)	Task 1: Write a summary (pp. 52–53)

B Inner and outer space

Listening	Language development and vocabulary	Speaking	Reading	Writing
Section 2: Multiple choice, Notes completion (p. 63)	Future forms; Technology (p. 64)	Part 2: Describe a skill (p. 65)	Matching features; Sentence completion (pp. 66–67)	Task 2: Opinion essay (pp. 68–69)

B Hobbies and interests

Listening	Language development and vocabulary	Speaking	Reading	Writing
Section 3: Label a diagram; Table completion (p. 79)	Participle clauses (with *-ing* and *-ed*); Culture and entertainment (p. 80)	Part 3: Discussing toys and games (p. 81)	Multiple-choice questions; Matching information (pp. 82–83)	Task 2: Compare and contrast essay (pp. 84–85)

Module 6 Natural world (p.87)

A Living with our environment

Reading	Vocabulary	Speaking	Listening	Language development	Writing
Identify cause and effect; Short-answer questions (pp. 88–89)	The environment; collocations (p. 90)	Describe places; Part 2 (p. 91)	Identify the correct word form; Section 4: Summary completion (p. 92)	Present perfect simple (p. 93)	Describe changes over time; Task 1: Graphs (p. 94)

Module 6 review (p.102)

Module 7 Around the world (p.103)

A The joy of travel

Reading	Vocabulary	Speaking	Listening	Language development	Writing
Understand complex sentences; Matching sentence endings (pp. 104–105)	Travel and tourism; Dependent prepositions; Cause and effect; Collocations (p. 106)	Expand answers; Part 1 (p. 107)	Follow directions; Section 2: Label a map (p. 108)	Zero and first conditional (p. 109)	Write an introduction; Task 2: Cause and effect essay (p. 110)

Module 7 review (p. 118)

Module 8 Food (p.119)

A From the field

Reading	Vocabulary	Speaking	Listening	Language development	Writing
Deal with unknown vocabulary; Label a diagram (pp. 120–121)	Nutrition; Synonyms; Collocations; Prefixes (p. 122)	Stress and intonation; Give an opposing opinion; Part 3: Talk about eating habits (p. 123)	Listen for the correct spelling; Section 1: Table completion (p 124)	The passive (p. 125)	Sequence a process; Task 1: Describe stages in a process (p. 126)

Module 8 review (p. 134)

Module 9 Well-being (p.135)

A World health

Reading	Vocabulary	Speaking	Listening	Language development	Writing
Follow a sequence of ideas; Flow chart completion (pp. 136–137)	Adverbs and adverbials; Collocations; Dependent prepositions; Healthcare (p. 138)	Use a range of structures; Part 2 (p. 139)	Identify reference words; Section 3: Table completion; Short-answer questions (p. 140)	Modals of obligation (p. 141)	Write a conclusion; Task 2: Essays (p. 142)

Module 9 review (p. 150)

Module 10 Community (p.151)

A Law and order

Reading	Vocabulary	Speaking	Listening	Language development	Writing
Identify information not given; *True*, *False*, *Not given* (pp. 152–153)	Crime and punishment; Collocations (p. 154)	Ask for clarification; Part 3: Discuss school rules (p. 155)	Follow a process; Section 4: Flow chart completion (p. 156)	Quantifiers (p. 157)	Describe locations on a map; Task 1 (p. 158)

Module 10 review (p.166)

IELTS overview (p. 6)
Test strategies (p. 168)
Expert grammar (p. 173)
Speaking assessment criteria (p. 184)
Expert speaking (p. 185)
Writing assessment criteria (p. 191)
Expert writing (p. 192)
Audio scripts (p. 202)

B Living with other animals

Listening	Language development and vocabulary	Speaking	Reading	Writing
Section 2: Short-answer questions; Multiple choice; Summary completion (p. 95)	Articles; Countable and uncountable nouns; Wildlife (p. 96)	Part 2: Describe an animal (p. 97)	Matching headings; Short-answer question (pp. 98–99)	Task 1: Summarise a graph (p. 100–101)

B Global issues

Listening	Language development and vocabulary	Speaking	Reading	Writing
Section 2: Label a map; Matching (p. 111)	Complex noun phrases; Global issues (p. 112)	Part 1: Describing learning a language (p. 113)	Matching sentence endings; *Yes*, *No*, *Not given* (pp. 114–115)	Task 2: Cause and effect essay (pp. 116–117)

B The food on our plates

Listening	Language development and vocabulary	Speaking	Reading	Writing
Section 1: Table completion (p. 127)	Review of formal structures; Formal synonyms (p. 128)	Part 3: Discussing food and culture (p. 129)	Matching information; Label a diagram (pp. 130–131)	Task 1: Describe a process (pp. 132–133)

B Life stages

Listening	Language development and vocabulary	Speaking	Reading	Writing
Section 3: Multiple choice; Short-answer questions; Notes completion (p. 143)	Passive and active voice; Describe people (p. 144)	Part 2: Describe a person (p. 145)	Flow chart completion; Multiple choice (pp. 146–147)	Task 2: Problem-solution essay (pp. 148–149)

B Living together

Listening	Language development and vocabulary	Speaking	Reading	Writing
Section 4: Multiple choice; Flow chart completion; Summary completion (p. 159)	Second conditional; Town and city (p. 160)	Part 3: Discussing friends, family and community (p. 161)	Matching headings; *True*, *False*, *Not given* (pp. 162–163)	Task 1: Describe a map (pp. 164–165)

IELTS Overview

Listening (30 Minutes + 10 minutes transfer time)

Discourse Types	Question Types	Skills
Recording 1: a conversation between two people in an everyday context **Recording 2:** a monologue in an everyday context **Recording 3:** a conversation between up to four people in an educational setting **Recording 4:** a monologue on an academic subject	40 questions, including: • Multiple choice • Short-answer questions • Notes/Table/Form/Flow chart completion • Diagram labelling • Matching • Classification • Sentence completion • Flow chart summary • Plan/Map/Diagram labelling	• Listening for gist • Listening for main ideas • Listening for specific information • Understanding opinions

Academic Reading (60 minutes)

Text Types	Question Types	Skills
General interest texts taken from journals, newspapers, textbooks and magazines. These non-specialist texts are graded in difficulty and are representative of reading requirements for undergraduate and postgraduate students. Total of 2,000–2,750 words	40 questions including: • Multiple choice • Short-answer questions • Notes/Table/Form/Flow chart completion • Diagram labelling • Matching • Classification • Sentence completion • Flow chart completion • Matching paragraph headings • Matching lists/phrases • True/False/Not given	• Reading for gist • Skimming • Reading for main ideas • Reading for detail • Understanding logical argument • Recognising opinions, attitudes and purpose

General Training Reading (60 minutes)

Texts and extracts taken from books, magazines, newspapers, notices, advertisements, company handbooks and guidelines that you would encounter on a daily basis.

Academic Writing (60 minutes)

Task 1: a minimum of 150 words. A summarising description of graphic or pictorial input. **Task 2:** a minimum of 250 words. An extended piece of discursive writing.	**Task 1:** Describe, summarise or explain information from a graph, table or chart. **Task 2:** Respond to a point of view, argument or problem. Formal register required.	• Using the appropriate writing conventions and register • Describing processes • Describing data • Expressing a point of view • Comparing and contrasting • Analysing problems and solutions

General Training Writing (60 minutes)

Task 1: a minimum of 150 words. Writing a letter or email. **Task 2:** a minimum of 250 words. An extended piece of discursive writing.	**Task 1:** Write a letter or email to someone explaining a situation or requesting information. **Task 2:** Write an essay in response to a point of view, argument or problem. Can be personal in style.

Speaking (11–14 Minutes)

Format	Nature of Interaction	Skills
Part 1: Introduction and interview (4–5 minutes) **Part 2:** Individual long turn (3–4 minutes) **Part 3:** Exploring a topic/discussion (4–5 minutes)	**Part 1:** Speaking on familiar topics like home, family, work, studies, interests, etc. **Part 2:** You will be given a card which asks you to talk about a topic You have one minute to prepare before you speak for two minutes You will then be asked one or two questions on the same topic. **Part 3:** You will be asked more questions about the topic in Part 2 so you can discuss more abstract ideas.	• Giving personal information • Talking about everyday habits and issues • Expressing opinions • Organising ideas • Understanding the rules of conversation

Total test time: 2 hours and 45 minutes (+10 minutes transfer time for Listening)

1 Communication

1a Training
- **Reading:** Identify topic sentences (Matching: headings)
- **Vocabulary:** Collocations; Phrasal verbs; Words with more than one meaning; Communication
- **Speaking:** Expand answers (Part 1)
- **Listening:** Locate information (Section 1: Notes completion)
- **Language development:** Present tenses
- **Writing:** Write an overview (Task 1)

1b Testing
- **Listening:** Section 1: Notes completion; Table completion; Form completion
- **Language development and vocabulary:** Past simple; The media
- **Speaking:** Part 1: Talk about the news
- **Reading:** Matching headings; Sentence completion
- **Writing:** Task 1: Describe a chart

Lead-in

1 Work in pairs and discuss the questions.

1 How do you communicate with others?
2 What do you think the saying *a picture says a thousand words* means? Do you agree with it?
3 How do you think the pictures above were taken?
4 How much do you trust what you see on the internet?

2 Work in pairs. Look at the types of communication below and discuss the questions.

document-sharing sites emoticons sending text messages selfies social media profiles video-conferencing

1 When do you prefer to use these types of communication? Why?
2 Choose two types of communication and describe the advantages and disadvantages of each.
3 Do you think they will continue to be popular in the future? Why/Why not?

Reading (Matching headings)

Before you read

1 Work in pairs and discuss the questions. Check the meaning of the words in bold in a dictionary if necessary.

1 What is your favourite **image** on your **smart phone**? Where did you find/take it?
2 Do you think people and things in photographs **appear** the same as they do in **real life**? Why/Why not?
3 Do you think photographs are a more **reliable record** than descriptions? Why/Why not?

2 Look at the passage on page 9 and discuss the questions.

1 Where would you expect to see this kind of passage?
2 Look at the title. What is the topic of the passage?
3 Read the introduction. What is the passage about? What is a *photographic artefact*?

Identify topic sentences

3a Look at the underlined topic sentence in paragraph B of the reading passage and answer the questions.

1 What does a topic sentence do?
A link back to earlier paragraphs
B explain the main subject of the paragraph
2 What two things are compared in this topic sentence?
A the causes and effects of photographic artefacts
B the human eye and cameras

b There are words in the passage that relate to the topics A–C. Which topic is repeated more in paragraph B?

A distance B design C recent changes

c What is the best heading for paragraph B?

1 Digital cameras see better in the distance than old cameras
2 Digital cameras and people see distance differently

4a Underline the topic sentence in paragraph C. Is it the first sentence? What is the main idea of this paragraph?

b Which topic is repeated in paragraph C?

c Choose the heading that best matches paragraph C.

1 Inaccurate photos caused by advanced timing methods
2 How new cameras avoid mistakes made by earlier devices

Test practice

➤ **TEST STRATEGIES** page 170

5 Choose the correct headings for paragraphs A and D–G from the list below. You have two more headings than you need.

List of Headings

i When you have to learn more from the photographer
ii Not an exact copy of what we see
iii One material that always creates difficulties
iv Web companies that cheat customers
v Altering images to deceive the viewer
vi The closer you get, the more images change
vii A lack of mystery in today's images

Task analysis

6 Work in pairs and discuss the questions.

1 Does identifying the topic sentence help with the *Matching headings* task?
2 Did either of you do the following:
- read the headings, then look for matching sections in the text?
- read the text quickly, identify the topic of each paragraph, then look for headings that match?

Discussion

7 Work in pairs and discuss the questions.

1 Do you think that the growth of digital photography has been a good thing?
2 Are people more easily persuaded to believe things because of the internet?

THAT'S NOT A GHOST IN YOUR PICTURE, IT'S JUST THE WAY YOUR DIGITAL CAMERA WORKS.

A There has been a clear relationship between technological development over the years and a fascination with 'ghost' photography. Images of unexplained circles of light, ghostly mists and human-shaped images fill social media pages on the internet. The explanation is simple: few people realise how digital cameras work. The fact that an image only 'appeared' in the photo, but not real life, is not a sign of its ghostly origins. In fact, it is a perfectly normal part of digital photography. Scientists call them 'photographic artefacts', because they show things that only exist because it is a photograph. Put simply, contrary to popular belief, things in photos look different from real life.

B The biggest cause of photographic artefacts is the contrast between how the 'depth of field' works in modern cameras and in the human eye. This is because, although it is now possible to take excellent pictures of things far away, the quality of photos of objects that are very near is less accurate. Light causes these misrepresentations. The level of light never changes when humans stare at objects. However, this is not what happens with digital cameras. When a camera points at a light, the light becomes stronger and stronger. Orbs, which are perfect circles of light, are the most common photographic artefact and they are often the result of light reflecting off water or insects in the air near the camera.

C It is easy to see why humans see differently from digital cameras. However, digital cameras are also significantly different from the old film cameras. In many ways, digital cameras give less reliable results. For example, modern functions allow digital cameras to scan the image more than once over a period of less than a second, or to automatically select how long the lens is open. Generally this produces better photos, but if the camera moves during the photo, it may record multiple images, creating the appearance of ghostly forms. Ghostly mists often appear when the camera picks up the photographer's own breath on a cold night when the lens is open for longer. This never happened with film cameras.

D Filming under certain conditions will often produce unusual light effects in digital prints. For instance, glass often makes objects such as a light source behind the photographer appear in the printed photo. If the glass is clean, it may not be obvious that there was a window and all you see is an object that 'wasn't there when I took the photo'. A famous UFO photograph showed two clear bright saucer-shaped objects flying across a blue sky. Although very believable, it was, in fact, just a reflection of some streetlights behind the photographer.

E Most digital cameras come with a good zoom function, letting us take photos from far away. However, at some point, digital cameras can no longer produce clear images anymore. As you go nearer, instead of seeing the image as a continuous picture, the digital image becomes pixelated, which means it appears as a group of coloured rectangles. What you see in print is very different from the object in real life, and the purest example of an artefact of the pixellation process. As humans, we specialise in recognising faces or familiar things in random patterns, and may start to imagine things that were not there. In one case, an image with the physical appearance of a ghostly face in a red top appeared in a photo. Zoom out, and it looks more like a doll. Zoom out further, where the camera can cope with the amount of information it receives, and you can see it's actually a rope holding up a flag.

F A final group of photos have started appearing on the internet. Fakes, images created by computer, are not as common on internet sites as you'd imagine, even though it's possible to produce believable images with photo-editing software. Many smartphones contain apps which make it very easy to produce versions of photos with human forms added. Most of these are easy to spot.

G In considering photographic artefacts, it is necessary to also consider the story. In many cases, the ghostly nature depends entirely on the fact that the photographer's claim 'that wasn't there when I took the photo'. Often the unexpected appearance of an orb or mist in a photo leads the owner to make enquiries, and once they start to share information with people who believe the place or area to be haunted, they become aware of the possibility that the story could be true. Such photos end up relying on witness statements to support the claims, which are often unreliable. One thing is sure: ghostly images will continue to appear until smart phone technology moves on.

Vocabulary

Collocations

1a Match words from A with words from B to form collocations.

A

become clear physical share social technological

B

appearance aware development information media relationship

b Use the collocations to complete the sentences. Check any unknown words in a dictionary.

1 It's often acceptable to make decisions based on people's _____ .
2 _____ rarely contain honest representations of friends' lives.
3 People usually _____ of international events through online news feeds.
4 There is a _____ between online stories and general public opinion.
5 Now that researchers _____ on the web, there are more scientific advances.
6 _____ is not always a good thing.

c Work in pairs. Can you think of any examples to support the ideas in sentences 1–6?

Phrasal verbs

2a Match the beginnings of the sentences (1–8) with the endings (A–H).

1 It can be hard for me to **get**
2 It's not helpful to **bring**
3 I like it when people **point**
4 I would **sum**
5 When I write, I often **leave**
6 I'm better at **picking**
7 Online videos can help to **spell**
8 If friends get into an argument, I **back**

A **out** my errors to me.
B **up on** other people's mistakes than my own.
C **up** my experience of IELTS very positively!
D **out** how to do practical things.
E **up** old fears or worries.
F **them up** every time.
G **out** articles and prepositions.
H **across** my ideas in English.

b Match the phrasal verbs in bold with the meanings below.

bring attention to explain explain very clearly mention not mention notice summarise support

c Write the phrasal verbs in your vocabulary notebook. Then compare how you recorded the words with another student. Is it helpful?

Words with more than one meaning

3a Look at the pairs of sentences. Match the word in *italics* in A and B with the correct meaning below.

1 A That knife has a dangerous *point*.
B I don't see the *point* of sharing photos.
idea or opinions.
sharp end
2 A The scientist gave an *account* of his work.
B My wages are paid into my *account*.
where you keep your money in a bank
a written or spoken description
3 A She's an expert in the *area* of mechanical engineering.
B The police closed off the *area*.
a subject or group of activities
a part of the country or city
4 A The man *argued* that the internet was unsafe.
B I heard my neighbours *argue* outside.
disagree in an angry way
give clear reasons for something

b Decide which sentence in each pair is more likely to be found in academic texts.

Communication

4 Complete the article with the noun form of the words in brackets. Sometimes a plural form is needed.

Teentalk

Talk about teenagers, and the **1** conversation (converse) often turns to the problems that teenagers face. Older people might argue that **2** _____ (communicate) is difficult because young people and adults do not share the same values. But a study has shown that there is still general **3** _____ (agree) among both generations on the big questions in life. Over 80 percent of adults and teens said honesty and telling the truth were most important. Interestingly, teenagers might want to develop better **4** _____ (understand) of each other. Over half the teens said that they thought their friends valued **5** _____ (popular) more than honesty. Changes in **6** _____ (technical) have not made much **7** _____ (differ) to the way young people relate to other people. Over 72 percent said that they had talked to their parents about the really difficult subjects, like alcohol, dating and drugs. And when it came to these difficult **8** _____ (discuss), over half said that they trusted their parents' **9** _____ (decide) more than anyone else's.

Speaking (Part 1)

Expand answers

1a Work in pairs. Take turns to answer the questions. Try to talk for more than 20 seconds. Use the phrases below to help you introduce your opinions.

I find that ... I tend to think that ...
On the whole, I think ... Well, it's hard to say, but ...

1 Do you like spending time with friends? Why?
2 What activities do you and your friends like to do together?
3 Who do you prefer to talk to about problems: friends or family?
4 What do you think are the qualities of a good friend?
5 Is it hard to spend time with friends these days?
6 How is spending time with your friends different from spending time with your family?

b Work in pairs and discuss the questions.

1 When answering the questions, are you able to speak for more than twenty seconds each time?
2 How do you think you could expand your answers more?
3 How did the prompts help you?

2a 1.1 Listen to the students answering the questions in Exercise 1a. Match the students (A–F) with the questions (1–6).

A ____ B ____ C ____ D ____ E ____ F ____

b Look at the phrases the speakers used to expand their answers. Match the phrases in *italics* (1–6) with the purposes (A–F).

1 *The benefit of* being with family is ...
2 *... the downside of* being away is ...
3 Take schoolwork, *for instance*, ...
4 *I'm sure that* everyone enjoys spending time ...
5 *That's because* different people ...
6 *Most of the time* we just like hanging out ...

A Giving examples
B Giving reasons
C Stating advantages
D Stating disadvantages
E Expressing a habit
F Stating certainty

c Work with a different partner. Take turns to ask two questions from Exercise 1a. Use at least two of the phrases in Exercise 2b each time.

Test practice

➤ **TEST STRATEGIES** page 172
➤ **EXPERT SPEAKING** page 185

3 Work in pairs. Practise giving opinions on the test tasks below. Remember to expand your answers.

Communicating with people

- What do you use your mobile phone for the most: texting, phone calls etc.? [Why?]
- Do you think there are some situations when it is better to write than talk? [Why?]
- Do you sometimes go a long time without contacting people? [Why?]
- How have forms of communication changed in your lifetime?

Task analysis

4 Work in pairs and discuss the questions.

1 Did you introduce your opinions with a range of expressions?
2 Did you use any of the phrases in Exercise 2b to expand your answers?

Listening (Section 1)

Before you listen

1 Work in pairs and discuss the questions.

1 How often do you use your mobile phone?
2 Why did you choose your mobile phone?
3 How do you pay for your mobile phone calls?

Locate information

2a 1.2 You are going to hear part of a conversation between a mobile phone company sales representative and a customer. What do they discuss?

1 a new mobile phone
2 a new mobile service contract

b 1.2 Listen again and complete the sentence. You will hear two words that could fit the gap: *mobile* and *home broadband*.

The customer wants the _____ contract only.

c Look at the audio script 1.2 on page 202. How did you know *home broadband* was the wrong answer for Exercise 2b?

d 1.3 Read the sentence and listen to the next part of the recording. What signal words (words which signal when an answer is coming) do you hear? What is the answer? Check in the audio script 1.3 on page 202.

Student mobile plan
Comes with a free 'Sun 1 _____ ' phone

Test practice

➤ **TEST STRATEGIES** page 168

3a Read questions 2–10 in the test task and answer the questions.

1 What kind of information will you need (*how much, what, how many,* etc.)?
2 What signal words do you need to listen for?

b 1.4 Now listen and complete the test task.

Questions 1–10
Complete the notes below
*Write **NO MORE THAN TWO WORDS AND/OR A NUMBER** for each answer.*

Student mobile plan
Comes with a free 'Sun 1 _____ ' phone
Minimum contract 2 _____ months
600 minutes included
No limits on the number of 3 _____
Costs: £25 per month

Call-only plan
Pay 4 _____ when you start the plan
Includes: 5 _____ minutes for calls
Name: David 6 _____
Email: 7 _____ @studentuni.ac.uk
Main use: Keeping 8 _____
Pay by 9 _____ at first
Need to collect from 10 _____

Task analysis

4 Work in pairs. Look at audio script 1.4 on page 202 and discuss the questions.

1 Which signal words show you an answer is about to come? Did you hear them all?
2 If you got some answers wrong, can you see why?

Discussion

5 Work in pairs and discuss the questions.

1 Do you have a favourite make of mobile phone? Why/Why not?
2 Do you think you will use your phone more in future? Why/Why not?

Language development

Present tenses

➤ EXPERT GRAMMAR page 173

1a Choose the correct option in *italics* to complete the sentences.

1 I *look / am looking* for a new phone plan.
2 What *is that including / does that include*?
3 We *offer / are offering* it at that price for a short period.
4 How much data *are you wanting / do you want*?
5 *Are you using / Do you use* your phone for games regularly?
6 All you *are needing / need* to do is sign here.

b Which of the verbs in are not normally used in the continuous form?

2 Complete the sentences with the correct form of the verbs in brackets so that they are true for you.

1 I 'm studying (study) for my IELTS exam at the moment.
2 I _____ (work) right now.
3 I usually _____ (work as/study).
4 The thing that I _____ (enjoy) the most about my course/job is _____ .
5 The people I _____ (work/study) with are _____ .
6 In my free time, I usually _____ .

3a Read the article. What do you think a *mood* is?

The study of online moods **1** *is / ~~are~~* a large field of research. Every time you type a word, little signs of your mood **2** *shows / show* themselves. For example, type a lot of mistakes late at night, and the computer rightly or wrongly **3** *thinks / think* you **4** *is / are* tired and less concerned about details, so you may be in the mood to spend some money! Anything you have recently viewed online **5** *appears / appear* on your screen in adverts, knowing this is the moment you'll probably weaken. Changes in your status from 'single' to 'dating' **6** *send / sends* the kind of information restaurant and clothing companies love to hear, while clicking 'upset stomach' late into the night **7** *produces / produce* a very different set of adverts on your screen. But moods also tell social researchers a lot about public opinion and **8** *predicts / predict* how we might act in future. One recent study of 200 different moods **9** *shows / show* that bad moods online appear more often than good moods. It could just be that when people **10** *is / are* feeling down, they need to talk to others more. Healthcare services and the government **11** *hopes / hope* information like this may help them make better decisions.

b Choose the correct options in *italics* to complete the article.

4a Read the essay below. What essay questions does the paragraph answer?

1 Mobile phones have benefitted society. Discuss.
2 To what extent have mobile phones changed the way people shop?

These days, times **1** are changing (change) fast, and more and more people **2** _____ (use) the internet for daily tasks. The majority of people in my country never **3** _____ (visit) the travel agent's to book a holiday. They **4** _____ (use) their smart phones to check things like cinema times. Nobody **5** _____ (print) their photos anymore, people **6** _____ (not phone) to book tickets to a sporting event or the theatre. We **7** _____ (turn) to technology more and more.

But this **8** _____ (not come) without problems. Many people **9** _____ (rate) 'losing their phone' as their biggest fear, and currently, governments **10** _____ (not do) enough to keep us safe online.

b Complete the essay with the correct form of the words in brackets.

c Work in pairs and discuss the question. Do you think that mobile phones have benefitted society? Why/Why not?

5a Look at the Part 1 speaking questions (1–4). Underline the tenses in the questions. What tense are they?

1 Are you working or studying at the moment?
2 What do you like best about your course?
3 Is there anything you DISLIKE about your course?
4 What are you planning to do when you finish your course?

b Choose the correct option in italics to complete the responses.

1 I *study / 'm studying* English at the moment.
2 I *want / 'm wanting* to take the IELTS exam soon.
3 I *really like / 'm really liking* studying with people from other countries.
4 I *don't like / 'm not liking* the amount of vocabulary that we *need / are needing* to learn.
5 I *plan / 'm planning* to apply to university in Australia.

c Work in pairs. Take turns to answer the questions in Exercise 5a.

Writing (Task 1)

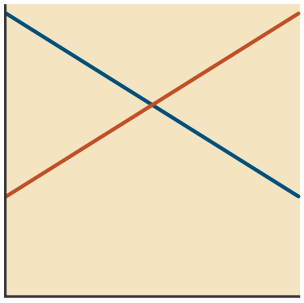
Write an overview

➤ EXPERT WRITING page 192

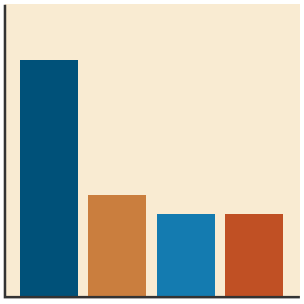
1a Match the introductory sentences (1–3) with the charts (A–C) below.

1 The chart illustrates mobile phone use among different age groups in the UK in 2015.
2 The graph gives an overview of spending on mobile phones and landlines in the USA over a ten-year period from 2000 to 2010.
3 The graph shows which services people used on their smart phones over a four-year period.

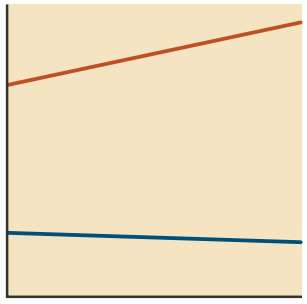
A



B



C



b Match the overviews that explain trends (1–3) with the charts (A–C).

1 We can see from the chart that under-25s spent more time on mobiles than any other age group.
2 The line graph shows that considerably more people used their phones to access the internet rather than make phone calls, and the gap between the two is growing.
3 The line graph shows that although people spent more money on landlines in the first half of the study, mobile phone expenditure became higher from 2006 onwards.

c What does the introductory sentence do?

1 gives examples of trends
2 introduces the main topic of the chart
3 gives a summary of the results

d How is an overview sentence different from an introductory sentence?

1 It talks about the questions that the researchers hoped to answer.
2 It talks about the results that researchers reported.

Test practice

➤ TEST STRATEGIES page 171

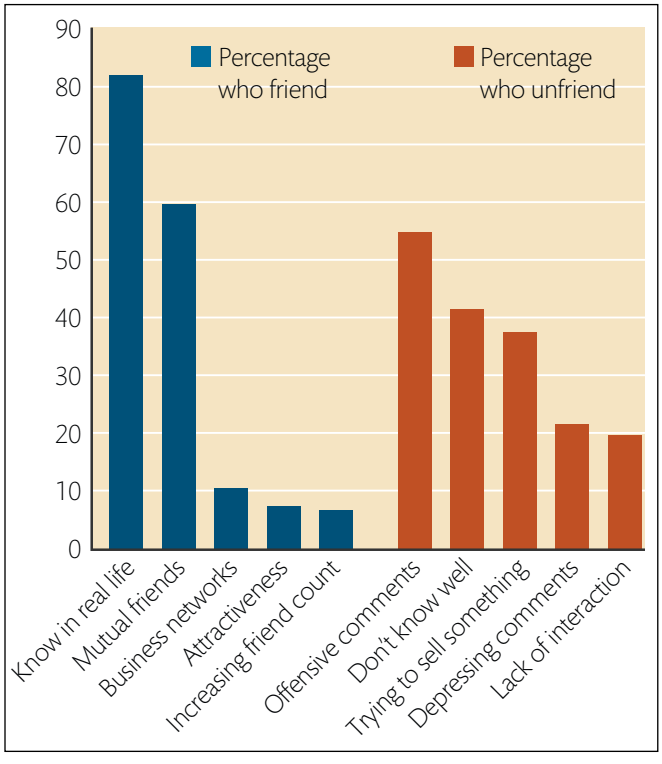
2a Look at the chart below. Which graph shape in Exercise 1 is most similar to the reasons why people 'friend' others on social media sites? Is the shape the same for reasons to 'unfriend'?

b Write an introductory sentence and an overview sentence for the chart below.

The chart below shows the main reasons why people choose to make or break friendship connections on a popular social media site.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.



Back to the old ways

Listening (Section 1)

Before you listen

1 Work in pairs and discuss the questions.

1 Which type of job do you think you would like in the media? Use the ideas below, or your own ideas.

advertising sales camera operator video blogger
website designer

2 What responsibilities are involved in that job?

Test practice

➤ **TEST STRATEGIES** page 168

2 1.5 Complete the task. Try to predict the kind of information you need for each gap and remember to listen for signal words.

➤ **HELP**

1 What are other ways of saying *I'm studying ...*?
6 What is the signal word here?

Questions 1 and 2

Complete the notes below.

*Write **NO MORE THAN THREE WORDS AND/OR A NUMBER** for each answer.*

Student is studying: 1 _____
Student is in the 2 _____ year of course

Questions 3–5

Complete the table below.

*Write **NO MORE THAN TWO WORDS** for each answer.*

Position	Where
Food assistant	at the 3 _____
4 _____	at the local newspaper office
Receptionist	in the 5 _____ at university

Questions 6–10

Complete the form below.

*Write **NO MORE THAN THREE WORDS AND/OR A NUMBER** for each answer.*

STUDENT DETAILS
Name: Ruby 6 _____
Address: 7 _____ Halls
Room No. 6003
Main skills: Graphic design and 8 _____ .
Place of interview: 9 _____ building
Time of interview: Wednesday at 10 _____ a.m.

Task analysis

3a What caused you the most problems in this listening task?

1 speed of recording/missing the answers
2 losing focus
3 writing the wrong word down

b Compare your ideas with another student.

Language development and vocabulary

Past simple

➤ EXPERT GRAMMAR page 173

1 Complete the sentences with the correct past form of the verbs in brackets.

1 I _____ (call) earlier about a part-time job.
2 I _____ (not want) to take on any extra work in my first year.
3 A couple of other jobs _____ (come) in yesterday.
4 _____ (you do) any graphic design on your course last year?
5 I _____ (take) a course on computer programming, and I _____ (do) pretty well.

2 Work in pairs. Talk about a technology you used when you were young, compared to now. Listen to your partner and check that they use the past tense correctly.

3 Complete the text with the correct form of the verbs in brackets.

By the year 1400, everything was in place for the Industrial Revolution to begin, not in Britain, where it eventually 1 *began* (begin) three centuries later, but in China. Without doubt, advances in media 2 _____ (mean) the Chinese were able to advance their understanding of science. The discovery of black ink 3 _____ (lead) to a revolution in communications in China, while other nations still 4 _____ (choose) to cut words into stone. The invention of paper in AD 200 also 5 _____ (let) them share ideas cheaply, as well as easily. Before that, they 6 _____ (write) documents by hand on more expensive bamboo or silk. Once they had affordable paper, they 7 _____ (undertake) the next obvious thing – printing. By AD 700 they 8 _____ (be) impatient with hand-copying. By using individual wooden letters and words which could be moved, they 9 _____ (deal) with the challenge of producing copies in minutes. The amount of shared knowledge 10 _____ (rise) rapidly after this time. Before that, they printed documents from words fixed onto paper, which they 11 _____ (rebuild) every time they needed a new piece of information. They also 12 _____ (dream) up camera technology long before the Europeans. Around 400 BC, Mo Tzu, 13 _____ (draw) up plans for a working camera. Descriptions of the first camera obscura in AD 1000 suggest they got it to work.

The media

4a Match the beginnings of the sentences (1–8) with the endings (A–H). Check the meaning of the words in bold in your dictionary.

1 I think 24-hour TV news channels changed
2 International news **agencies** should
3 These days big **events**
4 News channels should not just give
5 People are not interested in
6 Professional writers check their stories
7 The **content** of newspapers
8 It is often hard to get expert

A before they **broadcast** them.
B only employ local reporters.
C how **journalists** report the news.
D **views** on difficult subjects.
E their **audience** stories that are popular.
F are reported in too much detail.
G serious **issues** like the environment.
H can get very repetitive.

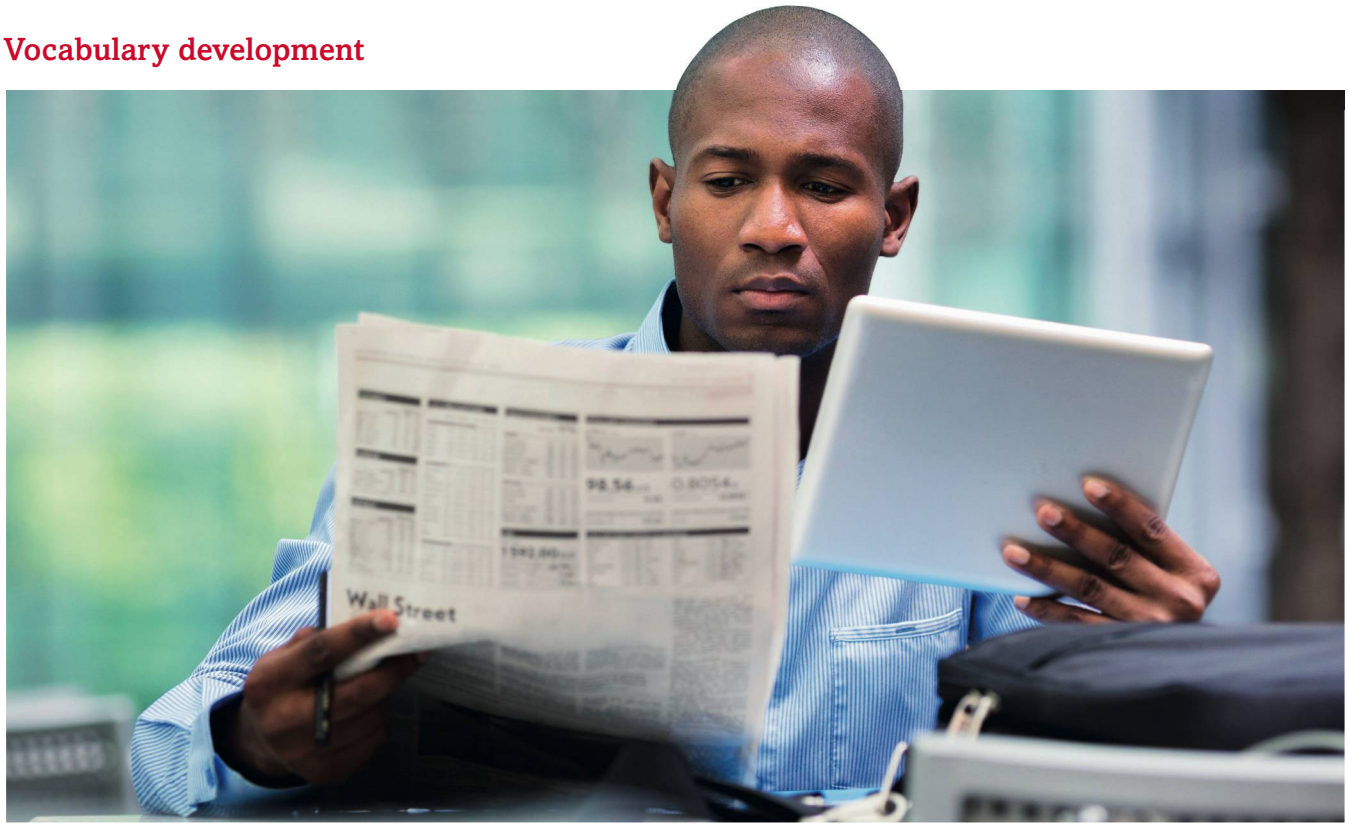
b Do you agree with the opinions? Expand your ideas with reasons or examples.

5 Complete the extract from an essay with the words from Exercise 4.

These days, the **1** _____ of many newspapers might be mainly fashion and animal photos, but for many years the media was almost as powerful as the president, the government and the law courts. The work of the **2** _____ who researched and wrote stories, and the international news **3** _____ which sold those stories around the world, were important. Very few people had the power to **4** _____ radio or television programmes, and people respected and trusted the **5** _____ they expressed. Television companies believed it was their responsibility to educate their **6** _____ . As well as reporting on interesting **7** _____ that had happened that day, there were often special programmes on big **8** _____ , such as poor housing or the environment.

Speaking (Part 1)

Vocabulary development



1 Work in pairs and discuss the questions. Check the words in bold in a dictionary.

1 What was the last **news article** you read? What was the **subject**? Was it **entertaining**, **informative**, **irritating** or something else? Why?
2 Do you prefer **current affairs** stories or **human interest** stories? Why? Do you ever read the **gossip columns** or the **back pages** with sport?
3 Do you like to **catch up on** personal news with friends? Do you like to **talk** problems **through** with them? Why/Why not?

Fluency and coherence

2a 1.6 Listen to Daniella. While you listen, look at the fluency descriptions below and choose the options which best describes Daniella's performance.

1 able to speak alone for about 30 seconds / needs to repeat ideas or pause
2 uses different connectors (*because*, *although*, *while*, etc.) / uses the same connectors quite often
3 is able to speak at a read-aloud speed / sometimes goes much slower

b Turn to page 184 and look at the descriptors for Bands 5 and 6 for *Fluency and coherence*. Match the phrases in Exercise 2a with a phrase with a similar meaning in the band descriptors.

c 1.7 Listen to Nicholas. Do you think Nicholas is better or worse that Daniella? How well do you think he expands his answers?

Test practice

➤ **TEST STRATEGIES** page 172

3 Work in pairs and complete the test task. Take turns to ask and answer questions. Record your answers so that you can listen later.

Learning about the news

- Do you read newspapers? Why/Why not?
- How do you prefer to learn about news events? Why?
- How do you share personal news with friends?
- Do you like hearing your friends' news? Why/Why not?

Assess and improve

4a What areas of fluency do you need to improve?

1 speed
2 using phrases like *Well, ..., Actually, ...*
3 not repeating ideas
4 expanding answers

b Which method would you like to try?

1 recording your voice and playing it back
2 practising chatting with friends outside of class
3 singing along with songs in English
4 another method

Reading (Matching headings; Sentence completion)

Before you read

1 Work in pairs and answer the questions.

1 When was the last time you read a book, but didn't finish it? What about an article? What happened?
2 Do you prefer to have your news selected for you, with only the kinds of stories you enjoy? Why/ Why not?

2 Look quickly at the passage on page 19 and decide what kind of text it is. What clues are there in the passage to tell you?

1 A historical text, explaining how things changed over time.
2 An argument with lots of different opinions on a subject.

Test practice

➤ **TEST STRATEGIES** page 170

3 Complete the test task. Remember to use the topic sentences of each paragraph to help you understand the main ideas.

➤ **HELP**

Paragraph B This writer prefers to use the first sentence of paragraphs to link back to the paragraph before. Where does this writer tend to put topic sentences?

7 Names with capital letters or numbers are easier to find quickly in texts. Which paragraph contains numbers?

Task analysis

4a Did finding the topic sentences help you to match up the headings?

b How could you become quicker at this kind of task?

- not worry about difficult words
- set a time limit for each paragraph
- use clues in the paragraph (like topic sentences and repeated topics)

Questions 1–6

*Choose the correct heading for paragraphs **B–G** from the list of headings below.*

*Write the correct number **i–ix**.*

List of Headings

i Sharing half-understood ideas
ii An old situation that's now more intense
iii Too much knowledge can be bad
iv Statistics showing how people read
v Pleasure in unhealthy content
vi Longer-lasting memories from books
vii Increased capacity for critical thought
viii Living in a world of your own
ix Only reading the reviews
x A biological response to habits

Example Paragraph A iv

1 Paragraph B _____
2 Paragraph C _____
3 Paragraph D _____
4 Paragraph E _____
5 Paragraph F _____
6 Paragraph G _____

Questions 7–10

Complete the sentences below.

*Choose **ONE WORD ONLY** from the passage for each answer.*

7 Around a third of internet surfers stay on a page for _____ .
8 According to Josh Schartz, the number of people who leave _____ is greater than the number who finish reading.
9 Michael Merzenich found that brains still changed after the period of _____ came to an end.
10 'Psychological obesity' is the natural preference for shocking _____ in articles.

EDUCATION

Why reading online may be slowing your brain down

A If the person reading this article were reading online, I would need to keep things brief. A lot of you would have left already. For every 150 'readers' who open an article on the internet, one in three of them will leave within seconds. Of the 100 who stay, only 95 will be able to concentrate and look beyond the photograph and headline at the top. Even fewer will get to even the middle of the article. Put simply, only a very small number of people actually read articles on the web.

B Not being able to stay focused is a problem. Deeper levels of thinking and understanding may be something we are losing now much of our reading is going online. A. V. Kak found in one study that people were able to remember more information from an article that they read on paper, than a similar group who read the same article online. Imagine the effect of this on a medical student who only studies papers online. Surfing the internet may seem like an efficient way of reading, but getting the physical text out of the library means you're less likely to forget.

C Even more dispiriting is the way these poor understandings are being passed on to others. Evidence suggests that people are creating links to articles they have not fully read, and even adding comments before getting to the end. Josh Schartz, a data expert, studies the reading styles of people online. Data was not available on the exact moment when a person stopped reading and then left a recommendation. However, his research suggests that the overall number of comments and the number of people who scrolled down to the end of the article did not match. This suggests that there is a very loose relationship between reading to the end and commenting. Commenting without reading everything only creates more and more misinformation.

D Studies of the brain have suggested that we should be more concerned about this than we are. Michael Merzenich has long argued against the argument that the brain is formed in the early years of childhood, then remains stable. Many believed that, once damaged, parts of the brain would never recover again. In fact, the brain is constantly changing and re-organizing itself, losing the connections that it does not need. As people spend less time thinking for longer periods of time, their brains react by re-wiring, deleting the bits associated with careful thought, making it much harder in the future to think hard about issues.

E Many have argued that this is nothing new. People have always started novels and not finished them. Even films, which require a relatively short commitment of only an hour or so of our time, are sometimes unable to keep our attention to the end. However, Alvin Toffler argued that the amount of free information that is thrown at us every day is different from anything that came before. We now have so much choice that many people refuse to waste their time on anything unless something is truly fascinating.

F The problem is even worse when you consider the kind of things we read online. Unfortunately, just as our bodies are programmed to want to eat fats and sugars, things which we know are not good for us, our brains prefer to read things that are shocking, such as gossiping, describing the embarrassment of others or just looking at attractive people. In other words, we read things we know we should not. Some experts have referred to this as 'psychological obesity'.

G Editors of respectable newspapers are aware that this kind of content is popular, but they put important news stories on the front cover anyway. They know that unpleasant stories, such as the events in war-torn areas, or poverty, matter and people should know about things beyond their daily lives. Online news sites only recommend articles on things we have shown an interest in before. In other words, what Nicholas Negroponte called the 'The Daily Me', bringing personalized content, also means that you miss being introduced to new concepts. With modern online news providers, you could exist quite happily never knowing what is happening outside of your personal interests.

Writing (Task 1)

Lead-in

1 Work in pairs and discuss the questions.

1 Do you think ticket prices at cinemas are good value for money?
2 How has the way people watch films changed since 2000?
3 Do you think it is wrong to watch films/movies without paying for them?

Understand the task

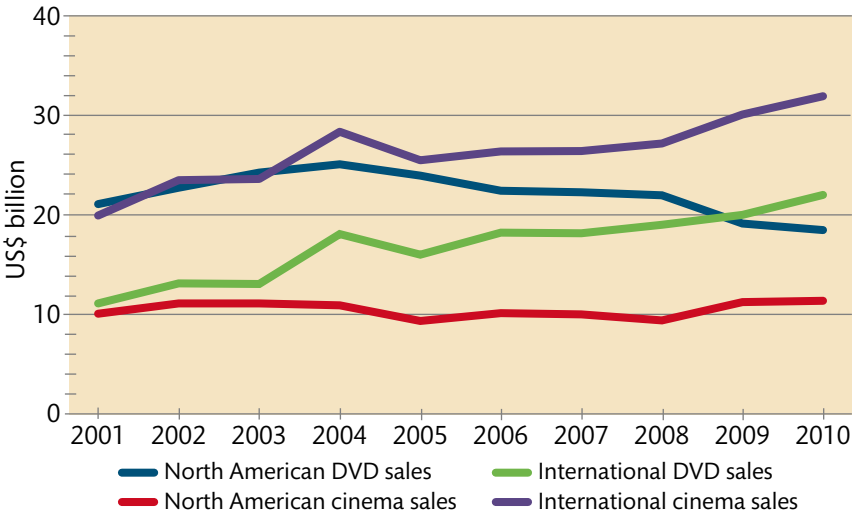
➤ **EXPERT WRITING** page 192

2a Match the words or phrases below with a word or phrase with a similar meaning in the introductory sentence in Exercise 2b.

abroad between by selling graph how much illustrates money the film industry made

b Rewrite the introductory sentence avoiding words from the original sentence where possible.

The graph shows the amount of income from cinema ticket and DVD sales in the USA and internationally from 2001 to 2010.



3a Look at the information on the graph and answer the questions.

1 Which market was bigger: the USA or the international market?
2 What happened in 2004?
3 Where did the movie industry make more money in 2010?

b Write an overview for this graph.

Plan the task

➤ **TEST STRATEGIES** page 171

4a Look at the criteria for *Part 1 Task achievement* on page 191 and answer the questions.

1 If your answer has no overview, which band will you get for Task achievement?
2 If you have no numbers from the graph, what band will your answer get for Task achievement?

b The Band 5 descriptor includes the phrase *recounts detail mechanically*. Complete the explanation with the correct form of the words below.

important grammatical listing mean

Using detail mechanically means that the student is 1 _____ words and numbers without showing that they understand what the data 2 _____ . It can be avoided by focussing on the most 3 _____ data, and using a variety of 4 _____ structures.

c Look at the sentences below. Which one 'recounts detail mechanically'?

1 'In 2001 the income from North American DVD sales was 21 and then it rose to 25 and then it fell to 21 and then it fell again to 18.'
2 'Income from North American DVD sales reached a peak in 2004, at $25 billion, but then fell to a new low of $18 billion by 2010.'

Language and content

5 Complete the description with the prepositions below, or nothing.

at by from by to

In 2001, International DVD sales were quite low, 1 _____ $11.5 billion, but they rose 2 _____ $6.5 billion by the year 2004, 3 _____ $18 billion. After a short dip, sales rose 4 _____ $6 billion to reach 5 _____ $22 billion.

6a Look at the graph in Exercise 2. Match the numbers below with the descriptions.

9.5 billion 15 billion and 32 billion 20 billion and 30 billion
62.5 billion and 83.5 billion 48% 76%

1 *Just under half* the US income in 2001 came from cinema sales.
2 Cinema sales accounted for *approximately* 10 billion.
3 *Around* three quarters of their income came from international sales.
4 *Almost* twice as much money came from international cinema sales.
5 International cinema sales were *exactly* 50% higher in 2009, compared to 2001.
6 The US film industry made *over* 20 billion more in 2010, compared to 2001.

b Match the words in italics in 1–6 above with the meanings A–D.

A the same as B generally the same as C more than D less than

Write your description

7 Write your description of the graph. Remember to write at least 150 words. Make sure that you understand the information and focus on the most important data.

Assess and improve

8 Work in pairs. Check your partner's description and answer the questions.

1 Have you and your partner presented an overview? Do they contain the same information? Can you decide together the best overview?
2 Have you both used numbers from the graph? Have you used the same numbers? Which did you miss/include when you didn't need them?
3 How can you get better at Task achievement in Part 1?
- practise with graphs online
- write a checklist and use it before you start a practice test
- another method

Review

1 Complete the text with the words below.

across area aware back up leave out popularity share technological

'If you can't explain simply, you don't understand it well enough.' *Albert Einstein*

Scientific discoveries and **1** _____ developments are around us every day. Television producers know that there is a demand for scientists who can get their ideas **2** _____ to a wider public.

Albert Einstein became **3** _____ of the benefits of explaining his ideas to the wider public from very early in his career. But you can't explain everything to everyone. His theory of relativity needs some knowledge in the **4** _____ of physics. There will be some details you can **5** _____ , but understanding Newton's law of gravity, for instance, is necessary to make sense of the theory of relativity. Anything practical, which you can **6** _____ with examples, will be easier to understand for non-specialists. So, for example, you might be able to explain what a theory does, but not why it is important.

As the **7** _____ of TV science documentaries grows, the demand for academics with star quality is high. Scientists who can **8** _____ ideas and information clearly have a bright future ahead of them.

2a Complete the sentences with the correct form of the verbs in brackets.

Should people be concerned about the information that they post on social media sites?

People who 1 _____ (not post) information on social media these days 2 _____ (miss) out on a large part of modern life. This 3 _____ (mean) that it 4 _____ (be) almost essential these days to give up the right to a truly private life.

Of course, social media sites have privacy policies that users agree to. But 5 _____ anyone really read the agreement before they tick the box? Long privacy agreements 6 _____ (not offer) a clear enough explanation and people 7 _____ (not have) the time to read them. Most experts 8 _____ (agree) that a new system is needed. One solution that 9 _____ (become) popular at the moment is a 'personal privacy agreement', which is linked to an individual and 10 _____ (go) with them when they 11 _____ (visit) or 12 _____ (sign up) to new sites.

b Write a paragraph in response to the essay.

3 Complete the sentences with one word. The first letter is given.

One of the big challenges for news 1a_____ is how to pay for serious, professional news 2 c_____ over the next 10 years. Bloggers simply do not have the skills that professional 3 j_____ have, and the 4 v_____ of amateurs on politics don't come with any kind of guarantee that they are being objective. 5 S_____ m_____ sites are great for personal news, but few trust them for national news. There is still a large 6 a_____ who want to watch professionally made television news services, even if we access them online. However, we have become accustomed to getting online services for free, and that includes our news services. Even newspapers are given out for free in the major capitals of the world these days. Our interest in current affairs and big 7 e_____ has not decreased, and it looks likely that TV channels will still 8 b_____ 24-hour news reports for the foreseeable future.

4a Complete the answer to the Part 2 task below with the correct form of the verbs in brackets.

Describe a public event that you decided to attend. You should say:

what happened at the event

who you went with

where the event was held

and explain why you decided to attend that event.

'When I was 18 I 1 _____ (go) to a really large public event. It 2 _____ (be) a large rock festival. We 3 _____ (get) to the site on the first day and we 4 _____ (put) our tent up in a really bad place. We 5 _____ (choose) the bottom of a hill, and of course, when it 6 _____ (begin) raining, all the water flooded down into our tent. But we 7 _____ (not mind) that, because we 8 _____ (see) some brilliant bands play. It was great! We had just finished our exams, and we 9 _____ (think) we'd do something special together. The event 10 _____ (take) place in a field just outside of Paris. It 11 _____ (not have) a name, I don't think. Anyway – we 12 _____ (decide) to go there because we wanted to do something memorable, and it was just the best experience of my life.'

b Practice reading the Part 2 answer, paying attention to pronunciation. Then repeat the activity with your own ideas.

2 *Feelings*

2a Training
- **Reading:** Identify key words (*Yes*, *No*, *Not given*)
- **Vocabulary:** Definitions; Collocations; Research; Adjectives describing experiences
- **Speaking:** Generate ideas and vocabulary (Part 2)
- **Listening:** Use word stress to understand the main idea (Section 2, Multiple choice)
- **Language development:** Building complex sentences (relative clauses)
- **Writing:** Generate ideas and vocabulary (Task 2: Opinion essay)

2b Testing
- **Listening:** Section 2: Multiple choice; Sentence completion
- **Language development and vocabulary:** Parts of speech, Adjectives of feeling; Intensifiers
- **Speaking:** Part 2: Describe an event
- **Reading:** Matching information; *Yes*, *No*, *Not given*
- **Writing:** Task 2: Opinion essay

Lead-in

1 Work in groups. Look at the words below and discuss the questions.

afraid annoyed bored disappointed excited exhausted grateful jealous sad stressed

1 What makes you feel each emotion?
2 What are *facial expressions*? What facial expressions does a person show with each feeling? e.g. people might frown when they are stressed.
3 Is it better to show your feelings or keep them hidden? Which do you usually do?
4 What is the best way to react when someone is angry?
5 Is it acceptable for both men and women to cry in public in your culture? Why/Why not?

Reading (*Yes, No, Not given*)

Before you read

1 Read the definition of *bucket list* and write down three things on your list not connected with family and work. Share them with a partner.

> **bucket list** (n) A list of things you want to do in your life before you are too old.

2 Read the first paragraph of the passage. Does it suggest sharing *extraordinary experiences* is positive or negative? Why?

Identify key words

3a The underlined words in statement 1 are *key words*. What are *key words*?

b Underline the key words in statements 2–4.

1 Sharing experiences provide us with immediate and long-term satisfaction.
2 Social communication is based on things we have in common.
3 People want to share their unusual experiences with each other.
4 Before the research, people believed extraordinary experiences bring mostly benefits.

4a Match the topics in statements (1–4) in Exercise 3 with the topics in the sentences (A–D) in the passage, using the key words.

1 – B.

b Which key words help you match the topics?

1 – B: Sharing experiences = extraordinary experiences; immediate satisfaction = pleasurable in the moment; long-term = long run

5 Compare the information in the pairs of sentences in Exercise 4a. Does each pair:

1 say the same?
2 say the opposite or contradict each other?

6a Underline the key words in the statements and use them to find the same topics in the passage.

1 Cooney recognised that people socialise successfully by talking about everyday subjects.
2 People who took part in the study chose the film they watched.
3 It is a good idea to think before talking about unusual things we did.
4 One person spoke for longer when discussing the film clips.

b Decide if each statement says the same as the information in the passage or contradicts it.

7a Underline the key words in the two statements below and find the topics in the final two paragraphs of the passage.

1 The people who participated in the study knew each other.
2 Some study participants said nothing during the post-video conversation.

b Does the information in statements 1 and 2 appear in the passage?

Trying to share our 'epic' moments may leave us feeling left out

[A]We love to reminisce and tell others about our extraordinary experiences – that time we climbed Mount Kilimanjaro, got to taste that rare food or ran into a celebrity on the street – but new research suggests this may not be such a wise idea. In fact, the findings, published in the latest edition of a psychology journal, suggest that sharing these extraordinary experiences are not as beneficial as we might think and can actually come at a social cost.

[B]'Extraordinary experiences are pleasurable in the moment but can leave us socially worse off in the long run,' says psychological scientist and study author Gus Cooney of Harvard University. [C]'The participants in our study mistakenly thought that having an extraordinary experience would make them the star of the conversation. But they were wrong, because to be extraordinary is to be different than other people, and [D]social interaction is grounded in similarities.'

Cooney, who conducted the research with co-authors Daniel T. Gilbert of Harvard University and Timothy D. Wilson of the University of Virginia, was interested in exploring the negative consequences of extraordinary experiences based on his own observations with others. He had noticed that we are keen to tell our friends about new or rare experiences, but most successful conversations are about ordinary topics. He therefore wondered 'if there might be times when extraordinary experiences have more costs than benefits, and whether people know what those times are.'

To find out if he was right, Cooney, Gilbert and Wilson invited sixty-eight participants to their laboratory in groups of four. In each group, one participant was asked to watch a highly rated video of a street magician performing for a crowd, while the other three participants were asked to watch a lower-rated animated video. Participants were told about each video's rating. After watching the videos, the participants sat around a table and had a five-minute unstructured conversation about them.

The findings were not what participants expected. It seems we should be more careful when choosing and sharing our experiences, because the participants who watched the higher-rated video, the 'extraordinary experiencers', reported feeling worse after the group discussion than those who watched the lower-rated video. Even though, before the experiment, all participants thought that the 'extraordinary experiencer' would talk more during the post-video discussion, that person actually spoke less and felt excluded from the conversation as a result.

Test practice

➤ **TEST STRATEGIES** page 170

8 Read the passage and complete the test task.

Questions 1–6

Do the following statements agree with the views of the writer in the reading passage? Write

YES	*if the statement agrees with the views of the writer*
NO	*if the statement contradicts the views of the writer*
NOT GIVEN	*if it is impossible to say what the writer thinks about this*

1 There were too few participants for effective research.
2 The study reflected what happens in the real world.
3 We have all experienced situations we can share with friends.
4 People tend to become jealous when they hear amazing stories.
5 Those who do interesting activities fail to connect with friends.
6 You should organise your aims in their order of importance.

Task analysis

9 Work in pairs and discuss the questions.

1 How easy or difficult was it to find the information in the text?
2 Which key word(s) in the first three answers helped you find that information?

Discussion

10 Work in groups. To what extent do you agree with the results of the research in the passage on page 24? To what extent do you agree with the response on this page? Why?

SCIENCE

SHOULD YOU THROW OUT YOUR BUCKET LIST?

There are two main reasons why you might not agree with Cooney, Gilbert and Wilson's research conclusions, and these do not include the fact that sixty-eight people is not a very high number to include in a study. Firstly, the video of a street magician is not the same as an incredible life experience. The research uses cost-benefit analysis, i.e. the benefit of watching the video minus the cost of not being included socially. But it is unlikely that a street performer, even an amazing one, produces results similar to the feeling of an extraordinary experience. So, when the cost of not being included is taken away from the benefit of watching the video, of course the result will be more negative.

Secondly, one wonders why the researchers assume that people who do extraordinary things only spend time with boring people who have no bucket list themselves? In reality, if you explore the Costa Rican rainforest, maybe your friend goes sailing, gets an amazing professional qualification, or watches his child graduate from college. All of these can be considered great topics of conversation. Of course people will always have lots of everyday experiences to talk about too. After all, when you return from an inspiring trip, you still have to do the laundry and call your parents.

Another possible conclusion could be that if you want to do fantastic things and not be lonely, you should choose friends who have similar ambitions. You can also be careful about the conversation topics you choose.

So before you throw your bucket list out the window, it is worth considering how useful this research is to your life goals and social situation. It certainly cannot hurt to reflect on the warning of the research. If doing great things makes you feel distant from your friends then, yes, you should probably think about how meaningful your goals are. However, if old friends cannot keep up with you or relate to your life goals, then you need to decide how much that should stop you from following your dreams.

Vocabulary

Definitions

1a Match the words below with the meanings (1–8).

assume benefit goal negative professional research similarities topic

1 a careful study of something to find out more information
2 think that something is true without having evidence
3 bad
4 something you want to achieve
5 characteristics that are almost the same
6 connected with a job.
7 an advantage
8 a subject that you talk or learn about

b What part of speech is each word: noun, verb or adjective?

2a Complete questions (1–8) with the correct form of the words from Exercise 1.

1 Is it a good idea to have a _____ in your studies? What is yours?
2 What are some positive and _____ effects of being ambitious?
3 What are some _____ between you and your parents?
4 What _____ qualifications might you need in future?
5 What do people _____ about you when they first meet you?
6 What _____ do you most enjoy talking about with your friends?
7 What is a _____ of learning English?
8 Why do university students do _____ ?

b Work in pairs and take turns to ask and answer the questions.

Collocations

3a Complete the collocations with words from Exercise 1. You can use a word more than once.

When scientists **conduct** 1 _____ , they first decide on a **research** 2 _____ , such as an area of interest or an important change. They discuss this with their team and decide on the 3 _____ that they want to **achieve**, for example looking at the positive or 4 _____ **effects** of something. From this, they plan their research question and methods. When ready, they **carry out** the 5 _____ and analyse the data. They publish the key findings and hope that it **provides** a 6 _____ to the field of research.

b Work in pairs. Use the collocations above to talk about research you have done in your academic life or research you have heard about.

Research

4a Choose the correct options in *italics* to complete the text. Sometimes both options are possible.

Facing up to our emotions

We know from **1** *methods* / *research* that smiling makes us feel good by releasing chemicals into our brain and frowning can make us feel less happy. But recent **2** *processes* / *studies* have found that being unable to smile or frown affects our emotions too. In one **3** *experiment* / *test*, researchers invited a group of people to a **4** *lab* / *laboratory* and injected half of them with a chemical that froze muscles in their forehead. All **5** *participants* / *researchers* watched a set of videos and completed a **6** *questionnaire* / *survey*. **7** *Analysis* / *Examination* of the data showed that the participants who couldn't smile felt fewer emotions that those who could. However, the **8** *findings* / *results* of a second study showed that the same chemical reduced the strength of negative feelings because they could not frown. We can therefore **9** *analyse* / *conclude* that it is not just our emotions which affect our muscles; our muscles also change the way we feel. It is possible that this **10** *data* / *research* may change some people's views on whether to use chemicals to reduce the lines on their face.

b Work in pairs. Do you think the benefits of reducing lines on your face with a chemical are greater than the disadvantages? Why/Why not?

Adjectives describing experiences

5a Cross out the adjectives below that cannot describe an experience.

amazing attractive awful depressing dull embarrassing enjoyable excellent fascinating frightening intelligent interesting nasty pleasant personal powerful private temporary

b Which adjectives in the box are positive and which are negative? Which are neither?

c Mark the main stress on each word.

amazing

6a Work in pairs. Use the adjectives in Exercise 5a to describe some of the experiences you have had in your life.

b Choose six adjectives from the box. What can each one describe?

an amazing person, view, book

Speaking (Part 2)

Generate ideas and vocabulary

1 Work in pairs. Think about the last 24 hours. What made you smile? Why?

2 Read the test task and answer the questions.

1 What is the topic?
2 How many points do you have to talk about?

Describe something that makes you happy.
You should say:
what it is
where or when you experience it
how often you experience it
and explain why it makes you happy.

3a You have a minute to make a list of things you could talk about. Share your ideas with a partner.

b 2.1 Listen to six people. What makes each one happy?

c Choose one thing in Exercise 3a or 3b to talk about later.

4a Look at Rafael's notes and answer the questions.

1 What is he going to say about each point?
2 What words has he written down?
3 How will these words help Rafael give a good description?

1. Camping. Tent, river, fishing
2. Mountains, lake, freshwater fishing
3. Summer – every other weekend. Not winter.
4. Relax, no stress, fresh air, slow, physical/ mental health

b 2.2 Listen to Rafael give his description and check your ideas.

5a Complete Hana's notes with the words and phrases below.

creative daydream make plans make up stories
no homework peaceful school holidays Sunday
thinking time warm bed

1 What? Have a lie-in
2 Where/When? _____ ,
3 How often? _____ , _____ .
4 Why? _____ , _____ , _____ , _____ , _____ , _____ .

b 2.3 Listen and check your ideas.

6a Think about what to say for each point in Exercise 2 and make notes. Write words/phrases that will help you use a higher level of vocabulary.

b Compare your list with a partner.

Test practice

➤ TEST STRATEGIES page 172 ➤ EXPERT SPEAKING page 186

7a 2.4 Listen to part of Rafael and Hana's descriptions. Complete the sentences with the phrases below.

also and Another reason is that As well as that,
Plus too

1 All you need to think about is starting a fire, catching a fish and cooking it. _____ , you can look at the beautiful scenery around you.
2 _____ you can breathe in fresh air ...
3 I think it's really good for your physical _____ mental health.
4 It makes me happy because I have more time to sleep. _____ I have some thinking time.
5 I think about what happened the week before. I _____ think about the things that are going to happen the following week.
6 I can make plans in my head. Sometimes I make up stories _____ .

b Work in pairs and discuss the questions.

1 What is the purpose of the phrases in the box?
2 How can they help your description?
3 What does each phrase do?

start a new sentence join two sentences
come before a verb come at the end of a sentence

8 Work with a different partner and take turns to give your description.

1 Use your notes and the phrases in Exercise 6.
2 Speak for between one and two minutes.

Task analysis

9 Work in pairs and discuss the questions.

1 How helpful were your notes when you spoke?
2 How can you use your notes better next time?

Listening (Section 2)

Before you listen

1 Work in groups and discuss the questions.

1 How important is beauty in our daily lives? Why?
2 Do you think it is important to make everyday objects, like ATMs, look attractive?

Use word stress to understand the main idea

2a 2.5 Listen to someone talking about a beautiful thing. You will only hear the stressed words, the others have been cut. Can you still answer the questions?

1 What does the speaker think is beautiful?
2 Why does he think it is important?

b 2.6 Compare your answers with a partner. Then, listen to the complete sentences and check your ideas. How helpful were the stressed words?

3 2.7 Listen and complete the sentences with the stressed words.

1 _____ _____ I _____ a _____ _____ .
2 _____ _____ is that _____ _____ _____ .
3 For _____ , the _____ of _____ from _____ is _____ .
4 We _____ that _____ _____ _____ _____ .
5 It's _____ that _____ _____ _____ _____ _____ _____ .

Test practice

➤ **TEST STRATEGIES** page 168

4a Read the question stem and options A–C in the test task below.

1 Underline the key words. What is the topic of the talk you will hear?
2 Are these key words likely to be stressed?

According to Japanese research,

A we choose to use objects which are more attractive.
B we have little interest in the design of products.
C we find attractive things less difficult to operate.

b 2.8 Listen to the first part of a talk. Which words signal that you are going to hear about Japanese research? Are they stressed?

c 2.9 Listen to the next part of the talk. Choose the correct option in the test task, A, B, or C. Why are the other two options not correct?

5 2.10 Underline the key words in the stems and options. In the test, you will have about 30 seconds to do this. Then listen and complete the test task.

Questions 1–5

*Choose the correct letter **A**, **B** or **C**.*

1 Don Norman says good-looking objects
A cause a reduction in feelings of anxiety.
B remind us of attractive things in our lives.
C are the result of a simple design.

2 To lower our stress levels, the speaker suggests
A looking around more.
B buying new items.
C living in the countryside.

3 According to the speaker, we can experience beauty by
A growing things in our gardens.
B simplifying our home environment.
C using all five of our senses.

4 The speaker recommends taking 'a mental vacation' by
A bringing the natural world indoors.
B looking for beauty in unattractive places.
C searching for attractive photos online.

5 Evelyn Underhill suggests that
A we fail to notice the beauty around us.
B more research on beauty is needed.
C beauty is less important in modern life.

Task analysis

6 2.10 Look at audio script 2.10 on page 204 while you listen to the talk again.

1 Circle the words which signal the answer is coming.
2 Underline the words which give you the answers to the questions in 6a.
3 Does the speaker use the same words or synonyms (words with the same meaning) of those in the options?
4 Why are the other two answers not correct?

Discussion

7 Work in pairs. Which of the speaker's advice is most helpful? Why?

Language development

Building complex sentences (relative clauses)

➤ EXPERT GRAMMAR page 174

1 Complete the sentences (1–6) with the pronouns below.

that (x2) when where which who

1 It is the machine _____ lets you take money out of the bank.
2 Most things do seem easier _____ you're happier and less stressed.
3 This morning I noticed the plum trees _____ are starting to bloom.
4 Look carefully at the smile of someone _____ you're close to.
5 Visit websites _____ you can see amazing photos of nature.
6 People _____ hear about the research might start to make an effort.

b Answer the questions.

1 When does *which*, *that* or *who* refer to the object of the sentence?
2 In which sentence can you leave out *which*, *that* or *who*? Why?

2a Work in pairs. Take turns to ask and answer the Part 1 speaking questions. Use the prompts. Make notes about your partner's answers.

1 What kind of people do you enjoy spending time with?
I like people ...
2 What time of day do you like the most?
I like the time of day ...
3 What kind of activities do you enjoy doing in your free time?
I enjoy activities ...
4 What kind of activities do you dislike doing?
I don't like activities ...
5 What kind of places do you enjoy visiting?
I like places ...
6 What is an enjoyable day for you?
I like days ...
7 What kind of films do you like?
I like films ...
8 What kind of food do you dislike?
I don't like ...

b Work with a different partner. Tell him/her about your previous partner's answers.

3a Work in a group. What can cause a person to feel stressed?

b Join the sentences about stress with the pronouns in brackets.

1 Things can make us feel stressed. They are irritating. (which)
Things which are irritating can make us feel stressed.
2 People feel stressed. They have a lot of work to do. (when)
3 Places can be stressful. There are a lot of people there. (where)
4 Some people have higher stress levels. They spend time in a noisy environment. (who)
5 Activities cause stress. They are very difficult. (which)
6 Employers ask their employees to work too hard. They cause stress. (who)
7 News increases stress levels. The news is not good. (which)
8 Meditation can work for people. They experience stress. (who)
9 Stress can be good for us. We see the stress as positive. (which)
10 Stress tends to have a negative effect. We think it is negative. (when)

4a Work in a small group. What are the effects of stress?

b Rewrite the essay paragraph about the positive effects of stress. Make it more academic by joining some of the sentences with relative pronouns.

Stress is a common emotion. It can have both a positive and negative effect on a person. It can help you achieve success. For example, it gives you motivation and energy. You need them to complete tasks well. In addition, stress can help your memory. When you are stressed, the brain releases chemicals. They help you to focus better. A person is probably happier in general. He or she is focused and successful.

c Work in pairs. Write a second essay paragraph describing the negative effects of stress. Use relative clauses where appropriate to make it sound more academic.

Writing (Task 2)

Generate ideas and vocabulary

1 Read the essay question and underline the key words. What does *factor* mean? What does *To what extent* mean? Use a dictionary to help you.

Some people believe that money is one of the most important factors in a person's happiness. To what extent do you agree with this?

2a Read the text about generating ideas. Which technique(s) could help you think of ideas for the essay question in Exercise 1? Why?

Techniques for generating ideas

1. Cubing. Look at the topic in six different ways and make notes, e.g. What, who, when, where, why, how? Or describe, assess, evaluate, compare, associate, argue.
2. Your perspective. Think about your life and how the topic relates to you.
3. Other perspectives. Think about the topic from different perspectives, e.g. people in different cultures, jobs; wealthy and poor people; older people and young people, etc. Which people are involved in the topic?
4. Identify examples. Think about examples related to the topic, from your life or other people's lives.
5. Flip a problem. Take a question about a problem and flip it, e.g. *How can we stop people eating fast food?* becomes *How can we make people eat more fast food?*
6. Generate vocabulary. Note down words and phrases related to the topic.

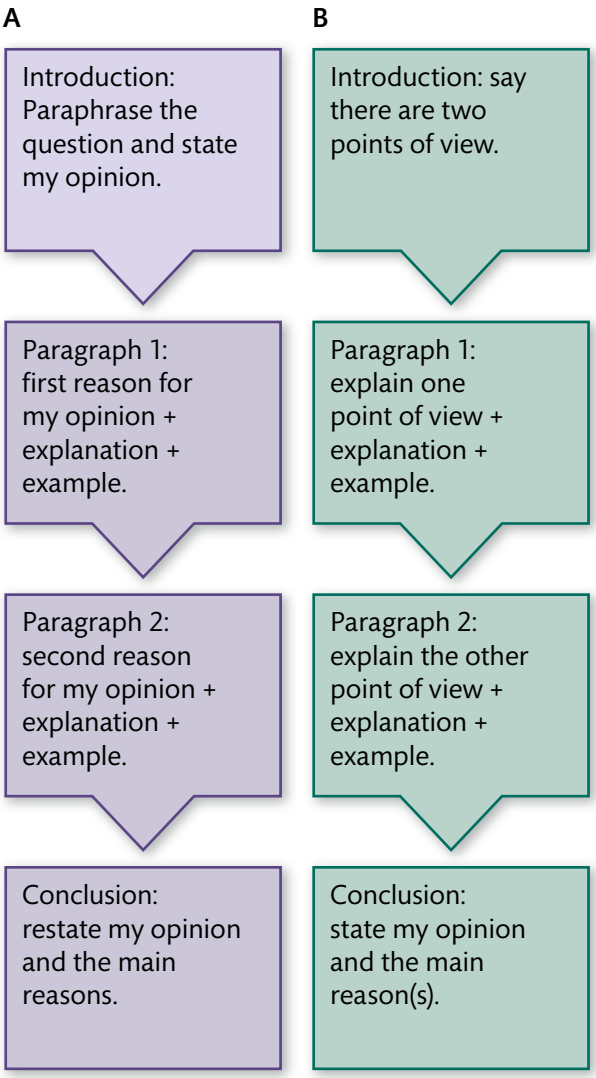
b Work in a group. Use one or two of the techniques and generate ideas for and against the statement in Exercise 1.

Reasons for	Reasons against
We can buy food and shelter.	

c Look at the reasons you wrote and decide if you agree or disagree with the statement in Exercise 1.

3 Look at your ideas in Exercise 2b.
1 Which two reasons best support *your* opinion?
2 How did you make your choices? Tell a partner.
3 Why is it important to generate ideas and then select the best ones before writing?

4 Look at the plans. Which one is most appropriate for the essay question in 1?



Test practice

➤ TEST STRATEGIES page 171

5 Write a plan for the essay question in Exercise 1.
1 Select two reasons to support your opinion.
2 Decide how to organise these ideas.
3 Think of additional information to support each reason, e.g. an explanation and example.
4 Organise your ideas into a plan – write key words only, not full sentences.

Task analysis

6 Work in pairs. Read each other's plans and discuss the questions.
1 Why is it important to write a plan before writing the essay in the exam?
2 How long do you think you should spend on this?

Listening (Section 2)

Before you listen

1 a Work in pairs and answer the questions.

1 How do you think the person is feeling? Why?
2 What is *body language*?

b How do you think body language affects what people think of you?

Test practice

➤ **TEST STRATEGIES** page 168

2 Look at the test task and answer the questions.

1 What are the key words in each question/stem?
2 Which word(s) in the question/stem might you hear on the recording to signal the answer is coming? What synonyms could you hear?

3 2.11 Complete the test task. Underline the key words in the stem and options and remember to listen for main ideas.

Task analysis

4 Work in pairs and answer the questions.

1 How much did underlining key words help you?
2 How much did listening for stressed words help you?
3 Look at the audio script 2.11 on page 204 and identify the signal words. How easily were you able to hear them when you did the task?

Questions 1–6

*Choose the correct letter, **A**, **B** or **C**.*

1 Which method of communication is often forgotten?
A online messaging
B body language
C discussions

2 The speaker is positive that the audience has
A shown similar behaviour to an animal.
B been in a position of power in their career.
C seen certain body language on television.

3 The speaker believes that job interviewees
A would prefer to appear small.
B usually sit high up straight in their seat.
C reflect the body language of the interviewer.

4 People who produce less cortisol feel
A successful
B relaxed
C depressed

5 The speaker suggests that each morning, people
A try to achieve an ambition.
B do a task more effectively.
C stand in a particular way.

6 Some participants were left out of the Columbia research findings because
A they did not complete the activity.
B they did not understand what to do.
C they refused to do what they were told.

Questions 7–10

*Complete the sentences below. Write **NO MORE THAN THREE WORDS** for each answer.*

7 Before the interview, participants created a presentation of their _____ .

8 While preparing, participants were _____ to check they behaved appropriately.

9 The interviewers rated each participant's _____ .

10 Participants with open body language were more _____ during the interview.

➤ **HELP**

1–6 The speaker will signal when they are going to talk about the next question. Listen for a key word in the question or stem.

7–10 The sentences are paraphrases of the talk but the missing word(s) are in the recording.

Language development and vocabulary

Parts of speech

➤ EXPERT GRAMMAR page 174

1 Match the underlined words in the sentence with the parts of speech 1–9.

Half the participants made themselves look big for two minutes before a very difficult job interview but the other half didn't.

1 noun (e.g. *book*) _____
2 verb (e.g. *study*) _____
3 auxiliary verb (e.g. *isn't*) _____
4 adjective (e.g. *confident*) _____
5 adverb (e.g. *really, slowly*) _____
6 preposition (e.g. *about, of*) _____
7 pronoun (e.g. *they, him*) _____
8 article (e.g. *a*) _____
9 conjunction (e.g. *because*) _____

2 Work in pairs and complete the sentences.

1 Sentences usually start with a _____ .
2 Articles come before a _____ .
3 Adjectives describe a _____ . They come before or after it.
4 Adverbs come before or after a _____ .
5 Prepositions usually come before a _____ .
6 A conjunction joins two _____ .
7 Auxiliary verbs come before _____ .

3a Find and correct the error in each sentence. The errors include missing words, word order errors or word form errors. What type of error is each one?

1 Research suggests that men have more confident than women.
2 Women have worked always hard.
3 In many countries, a percentage higher of women graduate from university.
4 Many men get promoted fastly but women don't.
5 You don't find a lot of women at top of big companies.
6 Companies with a lot of female managers are often very success.
7 New mothers usually take leave at least six months after a birth.
8 Time away from work can explanation why some women lack confidence.

b Work in groups. Do you think that women lack confidence in their studies and work? Why/Why not? If yes, how can we change this situation?

Adjectives of feeling

4a Which adjectives below are positive and which are negative?

anxious calm comfortable confused exhausted fascinated furious guilty nervous powerful proud relaxed shocked stressed surprised terrible terrified worried

b Complete the text with words from Exercise 4a. More than one word might be possible. Do not repeat a word.

A student can experience a range of emotions on their first day at university. When they wake up, their heart is often racing. They feel **very 1** _____ because they're **2** _____ that they won't make friends. On arriving at college, they might become **3** _____ when they see a huge building full of corridors and they have no idea where to go. But as soon as they start talking to someone, they start to feel more **4** _____ .
When they get into class, some students will feel **absolutely 5** _____ by the topic; others will be **incredibly** bored. There will be students who are keen to answer the tutor's questions and feel **really 6** _____ when they do it well. But there are also those students who sit low in their chair, **absolutely 7** _____ that the tutor will catch their eye and ask them to answer.
Despite all the nerves, by week four most students already feel **8** _____ with their new lives. They will have new friends and a good social life, which means a few of them might skip a lesson or two, but when they do, they feel **extremely 9** _____ . And of course, when an assignment is due, they will feel **really 10** _____ from staying up all night to finish it.

Intensifiers

5 Look at the intensifiers in bold in Exercise 4b and answer the questions.

1 How do they change the adjectives?
2 How are the adjectives that follow *absolutely* different from the others? What other adjectives in the box are like this?
3 Which make an adjective stronger – *very/really* or *extremely/incredibly*?
4 Which intensifier can be used with all of these adjectives?

6 Work in pairs. Choose an intensifier and an adjective from Exercise 4a but do not say what it is. Describe a time you felt like this. Your partner should guess the intensifier and adjective.

A: *Last month, I left my mobile on the train and never got it back.*
B: *Were you absolutely furious?*
A: *Yes, I was.*

Speaking (Part 2)

Vocabulary development

1a Check the meaning of the words in bold. Use a dictionary to help you.

1 Do students in your country have to take an **entrance exam** to get into university?
2 What kind of **ceremony** do universities hold for **graduates** in your country?
3 Have you ever received a **certificate**? What was it for?
4 Have you ever **made a speech**? How would you feel about making one in future?
5 Have you ever seen an **orchestra** play live? Do you enjoy **classical music**?

b Work in pairs and discuss the questions.

Focus on Lexical resource

2a Read the test task and underline the key words.

Describe a time you did something important.
You should say:
what it was
when and where it happened
how you felt
and why it was important.

b 2.12 Listen to Aimée and Huan doing the test task. Do you think they used their minute preparation time well? How do you know?

c 2.13 Listen to Aimée again and note down words/phrases she uses that show she has a good vocabulary.

3a Which statement below best describes Aimée's use of vocabulary?

1 Can talk about different subjects *but cannot change words easily.*
2 Can *talk about subjects clearly for a long time.* Sometimes uses the wrong word.
3 If the speaker does not know a word, they *can describe it well using different words.*
4 Tries to describe something using different words but *cannot always do it well.*

b Turn to page 184 and look at the descriptors for Bands 5 and 6 for *Lexical resource*. Match the phrases in *italics* in Exercise 3a with phrases with a similar meaning in the band descriptors.

Test practice (Part 2)

➤ **TEST STRATEGIES** page 172

4 Work in pairs and take turns to complete the test task in Exercise 2a. You have one minute to prepare and you should speak for between one and two minutes. Record yourselves if possible.

Assess and improve

5a Work in pairs and discuss the questions.

1 Did you both use your minute well to prepare for your talk?
2 Did you both use that minute to think of ideas *and* vocabulary you could use?
3 Which statement(s) in Exercise 3 best describe(s) your vocabulary use?

b How can you improve your vocabulary use when speaking? Choose A, B and/or C.

1 I need to be better at:
A using the preparation time better to think of more ideas.
B using the preparation time better to think of more vocabulary.
C using a wider variety of vocabulary when I speak.
2 To do this, at least twice a week, I will:
A practise thinking of ideas for a topic in one minute.
B practise thinking of vocabulary for a topic in one minute.
C practise using at least five good words/phrases when I speak about a topic for one minute.

Reading (Matching information; *Yes*, *No*, *Not given*)

Before you read

1 Work in groups and discuss the questions. Think of at least three reasons for each question.

1 Why do people like shopping?
2 Why do people like fashion?

Test practice

➤ **TEST STRATEGIES** page 170

2 Complete the test practice. Remember to underline the key words in the statements and use them to find the topic in the passage.

Task analysis

3 Work in pairs and discuss the questions.

1 How did the key words help you to do these tasks?
2 What did you find most difficult about this task?
- finding the topic in the passage
- unfamiliar vocabulary
- doing the task quickly
- deciding between False and Not given

3 Match the strategies to the issues in question 2. Which should you try?
- Learn new words/phrases every day.
- Practise scanning for synonyms in a passage.
- Make sure all information in the statement appears in the passage.
- Practise scanning for key words/synonyms quickly.

Questions 1–6

The Reading Passage has six paragraphs, ***A–F****.*

Which paragraphs contain the following information?

Write the correct letter, ***A–F****.*

1 People purchase things so they can feel good when other people notice them.
2 Some people in the fashion business choose the same type of clothes regularly.
3 People form opinions about males and females using different criteria.
4 A person wearing specially designed clothes made a more positive impression.
5 We use looks to make a judgement about someone's personality almost immediately.
6 The clothes we wear can help us focus better.

Questions 7–12

Do the following statements agree with the views of the writer in the reading passage? Write

YES	*if the statement agrees with the views of the writer*
NO	*if the statement contradicts the views of the writer*
NOT GIVEN	*if it is impossible to say what the writer thinks about this*

7 The clothes we wear do more than send messages to people.
8 We assume that good-looking people have better personal qualities.
9 When we regret buying something, we stop shopping.
10 The way men and women look for things has changed over the years.
11 Medical workers like to be recognised in their uniforms.
12 Most people choose to wear fashion so they can look like others.

➤ **HELP**

1–6 Unlike Questions 7–12, these statements are NOT in the same order as the passage.

10 What kind of medical workers are there?

Clothes and identity:
we are what we wear

A
We all communicate through fashion. Our clothes, accessories, hairstyles and make-up are all things we use to promote ourselves to others. Fashion is about meanings and symbols that give us immediate visual communication. But I would suggest it is also about decision-making, performance and fitting into society.

B
It is certainly true that fashion is linked to how we view each other. We make decisions based on a person's appearance within a second. Clothing style gives information about a person's character, sociability and intelligence. Attractive people generate a 'halo effect', which makes us believe everything connected with that person is positive. Consequently, we often think attractive people are more intelligent, healthy and sociable compared with unattractive people. In a recent study supported by a tailoring company, participants were shown images of a man for three seconds. The first image showed him in a suit made especially for him. The second showed him in a suit bought from a high-street shop. People thought the man in the first image was more confident, successful and a higher earner than in the second.

C
Researchers have also looked at the difference between wanting what we have and having what we want, and they made an interesting discovery. They found that we get more pleasure from buying objects than we do from owning the objects themselves. We enjoy shopping because it allows us to compare ourselves with others. Our new Prada shoes may be lovely, but our pleasure in them depends on impressing others. You'd think that buyer's guilt would stop us shopping but it doesn't. In fact, psychologists found that feeling guilty often pushes us to shop more. And when we can't find what we want, we are motivated to try even harder because our brains release the chemical dopamine which gives us pleasure. The longer it takes us to find what we want, the more dopamine our brain releases.

D
The shopping experience is not always the same for both genders, however. From a young age, women are judged on their appearance, and men on skills and abilities. Fashion can be used to change appearance, self-identity and boost confidence by showing some qualities and hiding others. It is therefore not surprising that shopping is more popular among women. It is beginning to change but in a 2013 paper, researchers found 80 percent of men hate shopping with their partner, and 45 percent try not to go at all costs. Half of couples fight when they shop together, as men claim they get bored, hungry or thirsty and wish they were outside. If we compare this to the past when men hunted alone, as fast as possible, and women spent time with each other selecting berries, nuts and vegetables, we can see shopping is the same. Women take their time and do it with friends. Men prefer to shop alone and fast.

E
Clothes and accessories are not only connected with our identity; they also affect how we feel and perform. When we give meaning to the clothes we wear, we can improve our cognitive abilities, which can influence our social interactions. Researchers found that simply wearing a lab coat increased performance on attention-related tasks. And, more interestingly, when it was described as a doctor's coat as opposed to a painter's, sustained attention increased even more. Psychologists call this effect 'enclothed cognition'.

F
Finally, fashion can allow us to fit into a group or stand out as different. Groups have a 'uniform' that identifies membership (e.g., punk, City worker). Our desire to be part of the group will influence the way we dress, and following the latest trends can give us membership of the 'fashionable' group. This is a problem for fashion, as people think it is about looking different. But once an item becomes fashionable, it is no longer different. Uniforms are frequently adopted by fashion and other industry leaders. For example, fashion magazine editor Anna Wintour only wears printed sleeveless dresses, and famous model Kate Moss is addicted to skinny jeans and ankle boots. Wearing the same clothes every day means you do not have to worry about what to wear and people immediately recognise you.

Writing (Task 2)

Lead-in

1 Work in pairs and look at the photos. What do they tell us about our attitudes to appearance?

Understand the task

➤ **EXPERT WRITING** page 193

2a Read the essay question and underline the key words. What, who and when is the question about? What does *care more about their appearance* mean?

Write about the following topic.

Both men and women care more about their appearance today than they did in the past.

To what extent do you agree or disagree with this statement?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

b Which of these things will help you to answer the question? Which will not?

popular clothes shops
your view of changing attitudes
a history of fashion
reasons for changing/unchanging attitudes
example of a change in attitude

Plan the task

➤ **TEST STRATEGIES** page 171

3 Which of these things should you do when writing an opinion essay?

1 Make your view clear to the reader.
2 Choose two or three points to write about and discuss them in depth.
3 Write about everything you know on the topic.
4 Answer every part of the essay question.

4 Decide whether you agree or disagree with the statement. Think of reasons to support your opinion. Think about:

1 Cubing: Who, what, when, how much, how, why.
2 Perspectives: your attitude compared to others', e.g. your parent's/grandparent's.
3 Examples: from your life and the life of someone from the opposite sex.

5a Select the best two ideas from your list to support your opinion.

b Answer the questions.

1 Are your ideas relevant to the question?
2 Do these ideas give reasons for your opinion?
3 Can you write about them in depth?

6a Organise your ideas into the essay plan below. Think carefully about the order of information. Include notes on reasons/examples.

Introduction	Paraphrase essay question (say it in different words). My opinion:
Paragraph 1	First reason for my opinion: • •
Paragraph 2	Second reason for my opinion: • •
Conclusion	Summary of the main points:

b Work in pairs and discuss your plans. Answer the questions and make any necessary change.

1 Is all the information relevant?
2 Is it in a good order?
3 Will the information support your opinion?

Language and content

7a Underline a phrase in each sentence that introduces an opinion, a reason or an example.

1 One reason for this is that these days, men feel they have to look good too.
2 I believe that both men and women care more about how they look these days.
3 I would suggest that men care more about their appearance these days than women.
4 Some men pay a lot of money to look good. For instance, they have plastic surgery.
5 Another reason is that people expect women to look good.
6 Woman always cared about their looks in the past. In my view, this has not changed.
7 I am of the opinion that a woman's attitude to her appearance has not changed.
8 One example is the fashion industry, which prefers to use skinny models.

b Which four or five phrases do you think you could use in your opinion essay? Tell a partner.

8a Read the text and find and correct six spelling errors.

In my veiw, men's attitudes to their appearance have changed whereas women's attitudes have stayed the same. One reason for this is that we see more famous men caring about their looks in the media these days, wich puts pressure on other men to do the same. For example, it is common to see stars like Cristiano Ronaldo looking good on the front of a magazzine or Justin Bieber looking good in a music video. Both of these people spend time and money on there hair, on wearing the latest fashion, on trendy accessories and on healthy-looking skin. Ordinery men feel they have to look as good even though they have less time and money to spend on their appearance.

b Match the errors in Exercise 8a to the types (1–5).

1 wrong letter
2 missing letter
3 wrong order of double vowels
4 extra letter
5 confusion with a similar word

Write your essay

9 Write the essay in Exercise 2a. Follow your plan in Exercise 6a. Use these suggestions to help you.

1 In your introduction, paraphrase the question and then state your opinion.
2 Give reasons for your opinions in the main body.
3 Explain each reason in depth, giving an example where possible.
4 Make sure your reasons/examples help to answer the essay question.
5 Use phrases like those in Exercise 7a.
6 Include a conclusion that restates your opinion and reasons.
7 Write at least 250 words.

Assess and improve

10a Read and assess your essay using the suggestions in Exercise 9. Make any necessary changes.

b Swap essays with your partner. Read and assess your partner's essay using the suggestions in Exercise 9.

c Give feedback to your partner. Say two things your partner did well and one thing he/she could improve.

d Listen to your partner's feedback and make any changes to your essay.

Review

1 Complete the text with one word in each gap. The first letter is given.

It is clear how positive feelings help us, and we also know why some 1 n_____ feelings, such as anger, fear or disgust, benefit us, helping us decide whether to fight or run away from danger. However, it is less easy to see the benefit of sadness. To investigate further, Australian scientists 2 c_____ research into the effects of sadness on motivation and the results have provided some interesting insights into its 3 b_____ . The scientists played either a happy film or a sad film to participants, who then had to complete a difficult task with challenging questions. The 4 r_____ showed that the happy people answered fewer questions correctly than the unhappy people. The researchers 5 c_____ that happy people feel safe and relaxed whereas sad people feel they have to act in order to deal with some kind of challenge. Other 6 s_____ into this same 7 t_____ have shown that sadness can make us focus more clearly and can improve our judgement. So depressing 8 e_____ can actually help us after all.

2 Join the phrases in A with the phrases in B using *which*, *who*, *whose* or *when*. Choose the correct verb in the phrase in B.

1 Jealousy can be a negative emotion which affects people's relationships.

A

~~1 Jealousy can be a negative emotion~~
2 Football fans feel high levels of excitement
3 Sometimes smiling can help people
4 It is difficult to calm someone down
5 People often feel frustrated
6 Disgust is an emotion
7 If you see a person
8 People

B

they *don't / doesn't* get what they want.
tell / tells us not to eat something dangerous.
their favourite team *win / wins* a match.
doesn't / don't show a lot of emotion can become stressed.
is / are feeling down to feel better.
cheeks *is / are* red, he or she may be embarrassed about something.
~~*affect / affects* people's relationships.~~
is / are furious.

3a Underline the word or words in each sentence that represent the parts of speech in brackets.

1 Happiness is an extremely positive emotion. (adjective)
2 In some countries, there is a governmental measure of happiness. (preposition)
3 A happy person experiences a chemical change in the brain. (article)
4 Happiness means different things to different people. (noun)
5 Scientific research has found many reasons why we are happy. (auxiliary verb)
6 How we look can help us to feel good. (pronoun)
7 Relationships have a significant impact on how happy we are. (verb)

b Complete sentences 1–7 with one word. Make sure it fits in both meaning and grammar.

1 An optimist is a person who tends to think _____ .
2 A pessimist usually expects things to go _____ .
3 Being positive _____ not always easy.
4 Some people say that positive thinking can create _____ .
5 Positive thinking can help people _____ become more successful.
6 Not all of _____ find positive thinking easy.
7 People are happier _____ they make a daily list of things they are grateful for.

4a Choose the correct intensifier and/or adjective in italics in each response to the questions.

What makes you laugh?

Of course I laugh when things are 1 *very / absolutely* funny but I also do it when I'm 2 *guilty / nervous* because I'm in a new or uncomfortable situation, or when I'm 3 *fascinated / shocked* by some news I wasn't expecting or something. I think it's just a way to help me deal with that news.

Is it important to laugh?

Yes, I think so. It can help you relax when you're feeling 4 *absolutely / very* 5 *comfortable / stressed*. It's also good if you're worried about something because laughing can help you feel 6 *prouder / more relaxed*. Of course there are some circumstances in which you should never laugh. For example, if someone's 7 *absolutely / extremely* 8 *furious / terrified*, then don't laugh because they'll just get angrier!

b Practise answering the questions in Exercise 4a.

3 Work and study

3a Training
- **Reading:** Use text structure to follow ideas (Summary completion)
- **Vocabulary:** Dependent prepositions; Education; Adjective endings; Collocations
- **Speaking:** Give reasons for your opinions (Part 3)
- **Listening:** Identify similarity and difference (Section 3, Matching)
- **Language development:** Comparative forms
- **Writing:** Choose data to compare; Link information (Task 1: Describe a chart)

3b Testing
- **Listening:** Section 3: Notes completion; Matching
- **Language development and vocabulary:** Verb patterns (*-ing* and infinitives); Business and finance
- **Speaking:** Part 3: Discussing shopping and retail
- **Reading:** *Yes*, *No*, *Not given*; Summary completion
- **Writing:** Task 1: Write a summary

Lead-in

1 Work in pairs and discuss the questions.

1 Why is education important?
2 What should be the main aims of education at the different stages below? Give reasons for your choice.

primary school secondary/high school university/tertiary education

3 Until what age do you think education should be compulsory? Why?

2 Work in pairs. Look at the photos and discuss the questions.

1 What do you think are the educational advantages and disadvantages of each learning environment?
2 How do you think the students will remember their educational experience later in life?
3 What are the similarities and differences between these institutions and the places you were educated?

Reading (Summary completion)

Before you read

1 Work in pairs and discuss the questions. Check the words in bold in a dictionary if necessary.

1 What does the media in your country say about **educational standards**?
2 How did teachers **discipline** children at the school/schools you attended?
3 Look at the photo of the teacher. Do you think she is **strict**? Why?/Why not?

Use text structure to follow ideas

2a Read the title and the introduction of the reading passage. What is it about?

b Each paragraph contains one idea. Read the first sentence of each paragraph and match the paragraphs (A–D) to the topics (1–4).

1 the differences in discipline that they observed
2 a description of how they carried out the experiment
3 the different attitudes to creative thinking that they observed
4 the reasons for carrying out the experiment

3a Read the summary. Does it summarise the whole passage or part of the passage?

The BBC introduced an experiment to bring Chinese teachers to a British school because of the 1 _____ of Chinese students in exams. The test results of students with the Chinese teachers were compared to the results of a 2 _____ , and they were asked about their 3 _____ at the end of the experiment. Chinese teachers thought their students were better 4 _____ than the British children. However, the British children 5 _____ that they were particularly naughty because they felt uncomfortable. In addition, the class rules meant that the children felt unable to use their 6 _____ well.

b Look at the first gap in the summary. Which paragraph in the passage do you think will contain this answer? Use your answers to Exercise 2b to help you.

c Read the section of the passage carefully. Is the missing word in the summary *effort* or *success*? What synonyms in the passage tell you the answer?

d Complete gaps 2–6, using the words below. Remember to:

1 use the text structure and focus of each paragraph to locate the information in the passage.
2 choose the correct word from the box. Look for synonyms of words in the passage.

admitted behaved control group denied educated experiences imagination study group instructors time

A Chinese approach to learning

A recent experiment carried out by the BBC to bring Chinese teachers to the UK is a little unusual. China is a country with a different culture and set of expectations of behaviour in class. It was perhaps only inevitable that the teachers would be shocked by the behaviour they found. The young people themselves admitted to behaving worse than they usually would. Coming from an educational culture where shame and social pressure are the main method of controlling the class, Chinese educators were never going to introduce their methods without protest. Why would anybody expect anything different?

A The reasons behind the experiment were obvious. Chinese students regularly come near the top in internationals comparison tests of students around the planet. They triumph in Maths, Reading and Science, while in the UK, young people have been getting lower marks in recent years. Many in Britain have been wondering if it is time to adopt Chinese methods of education here.

B In the experiment five teachers were brought from China and put in a UK school. They taught a group of 50 students maths, reading, science and modern languages. The students in the study group, and another control group who received regular lessons, were tested at the end of the period and an analysis of the results was carried out. In addition, both teachers and students who participated in the experiment were given interviews with one of the researchers on how they felt about what happened.

C The biggest difference between the two cultures was the lack of discipline in British schools. One Chinese teacher pointed out, 'In China we don't need classroom management skills because everyone is disciplined by nature, by families, by society.' Interestingly, students admitted that they found themselves behaving worse during the experiment than they normally would for their British teachers. Many pointed to the fact that the unfamiliarity of the teacher made them feel less comfortable than they normally would. The 'survive or die' approach to education was so unfamiliar that many students reacted negatively to it.

D Another key issue was that of the role of creativity in a classroom where discipline is king. While it was obvious that the British students would benefit from settling down and paying more attention to their lessons, it was also clear that the UK education system does, sometimes, encourage students to think outside of the box, be risk-takers, ask questions and challenge ideas. The Chinese teachers were uncomfortable with any attempt to ask questions, as it would stop the flow of the lesson they had planned in which there was no opportunity for free-thinking.

All of this suggests that an obsession with testing does not exist in the UK, which would be untrue. The purpose of the experiment was to see if British students would benefit from the Chinese approach. However, the message that the test result is the only thing that matters may not be getting through to students. One young person commented that 'Their teaching methods did get results but we didn't always feel we were learning much. They get results because we are in school for so long.'

It is not just the contrast between Chinese and British education systems. In India, a far more radical approach is being taken. At the cutting edge of educational research is the idea that a little chaos in the classroom is not necessarily a bad thing. Professor Sugata Mitra has introduced the 'Classroom in the Cloud' based on his 'Hole in the Wall' experiments, which have shown that students can teach themselves and each other through self-instruction. In fact, his research suggests that the presence of someone in charge is neither essential nor desirable. This minimally invasive education is a practical example of the argument that 'the mind is not a pot to be filled, but a fire to be started', but is yet to be tested.

From the experiment we can draw two conclusions. Firstly, no one has the monopoly on what is right and wrong with teaching and learning (not even the Finns, currently the world's leaders in education). Secondly, each country has an educational approach which is unique and reflects the values and expectations of its society, after decades, if not centuries, of experiment and practice. If nothing else, this experiment proves that point to be true.

Test practice

➤ **TEST STRATEGIES** page 169

4 Read about the conclusion of the experiment. Complete the summary using the list **A–I** below.

The author believes the British have an excessive 1 _____ in student results. Students felt that the positive results of Chinese educators was thanks to their teaching 2 _____ more than anything else. In India, some educational experts have seen a disorderly classroom as a 3 _____ . In one project, researchers have tried removing 4 _____ from classrooms with some success. The author concludes that education systems tend to be the result of the 5 _____ around them.

A unnecessary B technology C styles D hours
E interest F environment G teachers H benefit
I classmates

Task analysis

5 Work in pairs and discuss the questions.

1 What were the main ideas of the second passage? Does an understanding of text structure help you to locate answers quickly?
2 Underline the parts of the passage that tell you the answer. What synonyms were used in the passage?

Discussion

6 Work in pairs and discuss the question. Would you like to study in another country? Why/Why not?

Vocabulary

Dependent prepositions

1a Match the beginnings of the sentences (1–6) with the endings (A–F).

1 Psychologists decided to carry out *research*
2 They wanted to know if learning methods that *focused*
3 The got a group of four-year-old children to *participate*
4 After they carried out an *analysis*
5 Once the children grew up, it was *obvious*
6 There was a strong *contrast*

A of the results, they waited for 14 years.
B into the early signs of academic success in young children.
C in an experiment where they were told not to eat a sweet.
D to the researchers that the sweet test had worked.
E between the children who passed and failed the sweet test.
F on self-control helped children do well later in life.

b Underline the preposition that follows each word in *italics* and copy the phrase into your vocabulary notebook.

c Work in pairs and discuss. What famous experiments have you heard of? How did they carry out the research?

Education

2a Choose the correct option in *italics* to complete the sentences.

1 In my country, *assistance / attendance* at school is compulsory until at least sixteen.
2 In *elementary / secondary* school, children learn basic reading, writing and maths.
3 A university *site / campus* usually contains lecture buildings and accommodation.
4 *Greater / Higher* education generally gives people better opportunities.
5 A good *qualification / success* in English is necessary to get a good job.
6 You need to have perfect grades to get into a *top / status* university.
7 Children learn more in *informal / formal* education than they do at home.
8 Student *reaction / behaviour* is a big issue in my country.

b Work in pairs. What do you think works well in schools? What needs to be changed? Use at least three of the words or phrases in Exercise 2a in your answer.

Adjective endings

3a Write the adjective form of the words below in the correct place in the table. You may need to change the spelling at the end of the word.

achieve alphabet annoy care create disappoint do minimum harm inform

ending	example
-able	achievable
-ful	
-ive	
-al	
-ing	

b Use words from Exercise 3a to complete the sentences below.

1 What score do you need by the end of this course? Do you think it's _____ ?
2 Do you think you can pass if you only do a _____ amount of work?
3 What's the most _____ thing about learning a language?
4 Is it useful to organise your vocabulary notes in _____ order?
5 Are you _____ when you write down new words?

c Work in pairs and discuss the questions in Exercise 3b.

Collocations

4a Complete the text with the words below to make common adjective + noun collocations.

background consideration example methods opportunities research success theme

Does the state of a school building affect the **1 academic** _____ of the students studying there? Recent **2 educational** _____ suggests that students do better and achieve higher test scores in clean, comfortable buildings. An **3 obvious** _____ , such as a fallen roof or broken air conditioning, often brings media attention, but daily problems, such as hot and cold temperatures, light quality and access to fresh air, also make a difference. In fact, differences in **4 social** _____ , such as a difficult home environment or low family income, can be balanced by **5 careful** _____ of the school environment. A **6 common** _____ appearing in the research was the age of school buildings. At an average of forty-two years, many school buildings are no longer useful for modern society. Building design may limit **7 equal** _____ by failing to provide disabled access, or be clearly designed for **8 traditional** _____ of teaching, such as the old-fashioned lecture at a blackboard.

b Do you agree that the school environment affects learning?

Speaking (Part 3)

Give reasons for your opinions

1a Work in pairs and discuss the questions.

1 Is it important for sport to be part of the curriculum at school?
2 Do schools in your country usually have good sports facilities?
3 Is it a good idea for students to compete against each other in sports?

b 3.1 Listen to the student responses to the questions. Do they give a positive, negative or mixed response?

c Work in pairs. Match the reasons (A–C) to the opinions (1–3) expressed in Exercise 1b.

A That's because sports are an ideal way for students to learn that when someone beats you, it's usually because they worked harder than you did. Perhaps next time, you'll try harder!
B When I was at school, we had so much energy, which is why we needed somewhere to run around in wet weather. It wasn't always sunny.
C Students have a lot of free time in the evenings and at the weekends, and so they should be using that time for things like sports, not school time.

d What would be the opposite of these opinions? Can you think of reasons?

Schools should include sports on the curriculum – young people need to learn about health and fitness.

2a 3.2 Listen and look at the transcript of a student's answers. Which question in 1a is this student answering?

[1]I think that schools should encourage every child to be active [2]because there are so many problems with weight among adults these days [3]and also children's free-time activities tend to be very passive, sitting down all the time. [4]I think that schools can help to change this, so they should teach sport.

b Match the stages (1–4) in the student's answer with the functions (A–D). Underline the words the student used that helped you to identify the structure of the answer.

A Adding more reasons
B Introducing a reason
C Explaining why this is important
D Giving an opinion

c Join the simple sentences in the paragraphs below to make more complex sentences (sentences with more than one subject and verb). Use the words you underlined in Exercise 2b to help you.

1 I went to school. I did sports. It was good. We could relax. It helped us to study better afterwards. I think sports are an important part of school.
2 There aren't good facilities in my country. The equipment is old. There aren't many playing fields in the city schools. Sport is good for kids. We need to spend more money on school sports.

Test practice

➤ **TEST STRATEGIES** page 172
➤ **EXPERT SPEAKING** page 187

3 Complete the test practice in pairs. You might have more than one idea. The phrases below will help you to order your ideas.

I think there are three main reasons./There are a number of good reasons.
Firstly/First of all ...
Then also ...
Another point to consider is ...
Finally .../Last but not least, I think that ...

Art in schools

- Do you think that art should be taught in schools?
- Is art a good subject to study at university? Why/Why not?
- What qualities do you think an artist needs?
- How does art affect people every day? [e.g. in building design, or magazine images]

Task analysis

4 Work in pairs and discuss.

1 Which phrases did you use to introduce your opinions?
2 Which phrases did you use to introduce reasons for your opinions?
3 How often were you able to produce complex sentences? (Most of the time, just occasionally?)

Listening (Section 3)

Before you listen

1 Work in pairs and discuss the questions.

1 What do you think is most important when choosing where to study? Rank the ideas below from 1–6.

course subjects employment prospects facilities
location the reputation of the university the tutors

2 Do you think more people will choose to go to university in future? Why/Why not?

3 Do you think the courses below will become more popular in the future? Why/Why not?

architecture banking agriculture medicine
computer programming

Identify similarity and difference

2a 3.3 A student is comparing two university courses. Listen and complete the table with a tick (✓) if the feature is offered or a cross (✗) if it is not.

	Bartlett	Rugby
good course programme?	✓	✓
year's work placement?		
good options?		
better teachers?		
rowing team?		

b Match the beginnings of the sentences (1–5) with the endings (A–E).

1 I think that both universities
2 Unlike Rugby, where there's no work experience,
3 There are the same options
4 I think the main difference is that there are
5 Neither university

A better teachers on the Bartlett course.
B have a great course programme.
C on both these courses.
D has a rowing team.
E at Bartlett you can spend a year on a placement.

Test practice

➤ TEST STRATEGIES page 169

3 3.4 Complete the test practice.

Questions 1–5

Classify the university courses named in the table which are likely to

A disappear in the near future.
B see reduced numbers of students.
C continue to be important for many years.

Name of course	Future security
architecture	1 _____
medicine	2 _____
computer programming	3 _____
fashion	4 _____
creative writing	5 _____

Task analysis

4 Work in pairs. Look at the audio script 3.4 on page 205 and discuss the questions.

1 How were the different subjects linked in the recording? Were they comparing similarities or differences?
2 Underline the words that show that conversation changed direction. Were you able to keep up?

Discussion

5 Work in pairs and discuss. What subject would you like to study? Do you think that it will continue to be important in the future?

Language development

Comparative forms

➤ EXPERT GRAMMAR page 175

1a Complete the sentences with the comparative form of the words in brackets.

1 Computers are able to identify routine illness much _____ (accurately) than a human.
2 Computer experts are working to make it _____ (easy) for normal people to program computers
3 Certain university subjects are likely to become _____ (common) than they used to be.
4 Creative writing courses have been getting _____ (popular) in recent years.
5 People are going to have to think _____ (carefully) about studying at university.
6 They won't be able to spend _____ (much) money on a creative writing course as they did in the past.
7 Universities will need to offer _____ (few) fact-based courses in future.
8 Architecture students will be trained to think _____ (creatively) in future.

b Which of the comparatives in Exercise 1a are:

A adjectives? _____ , _____ , _____
B adverbs? _____ , _____ , _____
C quantifiers? _____ , _____

2a Rewrite the sentences so that the second sentence has a similar meaning to the first.

1 There were fewer subjects at school in the past.
There weren't _____ at school in the past.
2 History was less practical than it is today.
History wasn't _____ as it is today.
3 Students were encouraged to think less creatively.
Students weren't encouraged to think _____ .
4 Memorising facts isn't as important today as it was then.
Memorising facts is _____ today than it was then.
5 Sports were more highly valued in the past.
Sports are not _____ these days.
6 Students were more respectful of their teachers before.
Students are _____ these days.
7 Technology was less dominant than it is today.
Technology wasn't _____ it is today.
8 Students weren't under as much pressure then as they are today.
Students are under _____ today than in the past.

b Work in pairs and discuss. How has schooling changed over the last twenty-five years?

3a Complete the text with a comparative or superlative form of the words in brackets.

History doesn't have to be dull

In the 1990s, few subjects had a reputation for being **1** _____ (dull) history. Because of the poor way that history was taught, children were **2** _____ (aware) of the differences in time periods than they are today. The names of the **3** _____ (important) leaders and the dates of wars are much **4** _____ (interesting) to children than stories about daily life. The Horrible History books changed all of that. What were toilets like in the past? What were the **5** _____ (disgusting) jobs in history? Did you know woolly mammoths were still walking the planet when one of the **6** _____ (ancient) structures in the world, the pyramids, were built? These facts fascinate children. A lot of the past also feels very modern. Few current fans of Batman or Superman realise that those characters are **7**_____ (old) today's pensioners.
There's an important lesson among the fun. Understanding the past might make children **8** _____ (grateful) for modern comforts, and history should always be an opportunity to learn from past mistakes. We want future generations to be **9** _____ (likely) to repeat our errors in future. If future leaders have a **10** _____ (good) understanding of the past, we all benefit.

b Compare how history was taught when you were at school to now.

4a Look at the table below and complete the summary using the phrases below.

as popular as half as many most common
much lower slightly higher than the same as
second most popular twice as many

Thames Valley School A level choices		
	Last year	This year
Biology	30	20
Chemistry	40	40
English	55	60
Geography	30	15
History	15	15
Maths	58	60
Modern languages	20	30

The number of students choosing the core facilitating subjects has increased this year. With 60 students each, the 1 _____ choices were maths and English. In fact, they had 2 _____ students taking those exams as modern languages. The numbers for maths and English this year were 3 _____ the year before. Chemistry was the 4 _____ subject, with 40 entrants this year, exactly 5 _____ the previous year. In the past, around 6 _____ students chose history, rather than geography, but this year, the numbers for geography were 7 _____ . This means that history is now just 8 _____ geography, with 15 students taking each subject.

b Work in pairs. Cover up the summary and take turns to describe the chart to your partner.

Writing (Task 1)

Choose data to compare

1 a Work in pairs and discuss the questions.

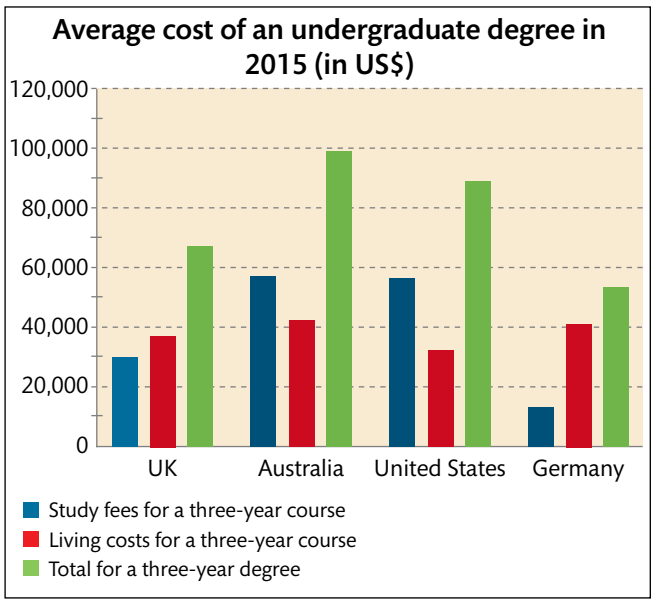
1 How do students pay for university in your country?
2 Would you like to study abroad for a year? Which country would you like to go to? Why?

b Look at the bar chart below. What information does the chart show?

c Find the country with:

1 the highest overall costs.
2 the lowest overall costs.
3 the highest and lowest study fees.
4 the highest and lowest living costs.

The chart below gives information on the average cost in US$ of a three-year degree course in four different countries in the world.



d Complete the sentences with the correct phrase. There is one extra phrase. What do the words *those of* and *that of* refer back to in sentences 2 and 3?

around 50 percent higher three times twice as
over four times ~~over 50 percent~~

1 The total cost of a degree in Australia was over 50 percent higher than in the UK.
2 Study fees in Australia and the USA were _____ higher than *those of* Germany
3 The total cost of a three-year degree in Australia was _____ than *that of* the UK.
4 Study fees in Australia were almost _____ high as in the UK.

Link information

2 Complete the paragraph with the words below.

All in all Although Both In fact That meant that

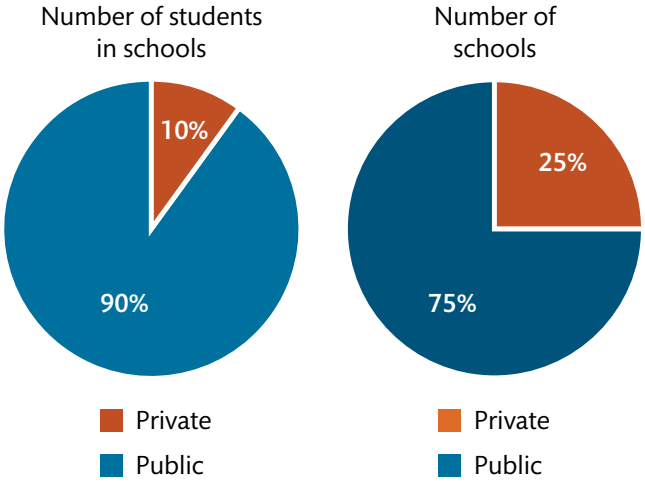
The country with the highest overall costs was Australia. 1 _____ the living expenses and the course fees were the highest among the four countries in the study. 2 _____ , the cost of a degree in Australia was almost twice as high as the UK, and almost four times as high as that of Germany. 3 _____ study fees were quite high in the USA, living expenses were much cheaper. 4 _____ the total cost of a degree in the USA was slightly lower than Australia. 5 _____ , it was much cheaper to study in the two European countries, the UK and Germany.

Test practice

➤ **TEST STRATEGIES** page 171

3 Write a paragraph describing the pie charts below. Remember to:

1 select the information to compare.
2 compare the data.
3 use *that of* or *those of*.
4 connect your sentences in a paragraph.



Task analysis

4 Look at your paragraph and answer the questions. Did you:

1 select the right data for making comparisons?
2 use the language of comparison?
3 use words to refer back to an idea?
4 connect your sentences?

Listening (Section 3)

Before you listen

1 Work in pairs and discuss the questions.

1 Would you like to work in an outdoor environment? Why/Why not?
2 What makes a good working environment? Rank the ideas below.

decoration	lighting	location	noise	people	size

3 Would you like to work in the office in the photo? Why/Why not?

Test practice

➤ **TEST STRATEGIES** page 168

2 Work in pairs. Look at the questions in the test task and answer the questions.

1 What is the topic of this Section 3 discussion?
2 Where is the pause in the recording?
3 What words in the question might you hear in the recording? (e.g. Question 1: *description, words, less, minimum, no more than*)

3 3.5 Complete the task. Remember to listen to how ideas are compared and contrasted.

➤ **HELP**

1 Are you listening for the current number, the minimum or the maximum?
6 The information you need comes before you hear the word *yellow*.

Questions 1–5

Complete the notes below.

*Write **NO MORE THAN TWO WORDS AND/OR A NUMBER** for each answer.*

Project notes
Description must be 1 _____ words or less.
Hand in final project by: 2 _____

The perfect office
All offices should have:
3 _____ to stop noise.
Seating area: Variety, e.g. coffee tables and 4 _____
Control over 5 _____

Questions 6–10

What office equipment do the speakers say will help with the following options?

A sleeping better
B being more creative
C feeling happy at work

*Write the correct letter, **A**, **B** or **C** next to questions **6–10**.*
You may choose any letter more than once.

6 yellow working environment
7 pictures
8 plants
9 large windows
10 soft lighting

Task analysis

4 Work in pairs and discuss the questions.

1 Which of the words that you predicted in Exercise 2 did you hear?
2 Look at the audio script 3.5 on page 205. Which questions used comparison/contrast in the answers?

Language development and vocabulary

Verb patterns (*-ing* and infinitives)

➤ EXPERT GRAMMAR page 175

1 Choose the correct options in *italics* to complete the sentences. In one sentence both options are possible.

1 You need *to include / including* a description of the project.
2 It was difficult *to get / getting* an appointment to use the university's 3D printer.
3 *To create / Creating* smaller spaces like this allows people more freedom.
4 A lot of people in that kind of environment dislike *to work / working* like that.
5 I was really interested in *understand / understanding* this area better.
6 You just have to stop *to sit / sitting* at your desk all the time.

2a Complete the text with the correct form of the verbs in brackets.

Choosing the right career is always difficult **1** _____ (do). Many people worry about **2** _____ (make) a mistake that they will regret, or choosing a career that's impossible **3** _____ (get) into. Most careers advisors today tell people **4** _____ (think) carefully about the things that they enjoy **5** _____ (do). **6** _____ (ask) people **7** _____ (identify) the skills that they used successfully in the past can help them **8** _____ (work out) what they might be good at **9** _____ (do) in the future. **10** _____ (list) the fields of knowledge that you already have, or would like **11** _____ (learn) about in the future, you may begin **12** _____ (see) a pattern. For example, if you love **13** _____ (teach) and **14** _____ (work) with animals, you could work in a zoo, or study biology. If you can find something you are passionate about, you are less likely **15** _____ (end up) in an unpleasant situation, **16** _____ (regret) the decisions you made.

b Underline the verb patterns in the article (e.g. *difficult to do*, *worry about making*). Write five questions to ask your partner about work using those verb patterns.

Business and finance

3a Match the beginnings of the sentences (1–8) with the endings (A–H).

1 Buy-one-get-one-free offers
2 *Competition* in markets
3 It's still a good idea to *set up*
4 I trust famous *brands*
5 The most useful *currency*
6 Companies can grow if
7 It's bad for a city when rich foreigners
8 I never watch

A a new internet company these days.
B creates a better economy for everyone.
C *commercials* on television.
D they get government *funding*.
E increase a company's *sales* for a short time.
F more than locally produced goods.
G is the Chinese yuan.
H *invest* in housing there.

b Work in pairs. Decide on a new business idea. How would you set it up? Why do you think it would work? Use five words from Exercise 3a in your answer.

4a Complete the essay extract with the correct form of words from Exercise 3.

Do you think that governments should spend money helping companies to become more environmentally friendly?

Another point is that it is often expensive to 1 _____ companies in a new field. Take, for example, solar energy. When solar panels were introduced, companies had to 2 _____ a lot of money at the beginning, and then hope that 3 _____ came in. A lot of the parts came from abroad and companies had to pay in a foreign 4 _____, such as dollars. It made everything very expensive, and there was a lot of 5 _____ from cheaper energy companies, until governments started to help 6 _____ projects to change to cleaner energy. It became cheaper and more people were interested.
However, not all companies need government help. There are some large companies which say that they are working to help the environment in their 7 _____ because they know that it will be good for their 8 _____ image, but in fact, they do very little to make the planet cleaner.

b Work in pairs. What services do you use for free? How do those services make money?

Speaking (Part 3)

Vocabulary development

1 Work in pairs and discuss the questions.

1 Do you enjoy shopping? Why/Why not?
2 Do you have any traditional markets in your country?
3 Why have large malls become popular?
4 Do you think shopping centres are a good place for young people to hang out?
5 Do adverts influence the things you purchase?

Focus on Grammatical range and accuracy

2a 3.6 Listen to a discussion between a student, Reham, and an examiner, addressing the first two questions below.

1 Does Reham use different connectors? (*because, for that reason*, etc.) Which ones do you hear?
2 Does Reham use simple or complex sentences?

Shops and retail

1 What kind of things do visitors to your country buy?
2 How can shops make shopping more pleasant for their customers?
3 How do you think shopping habits have changed in recent years?
4 Do you agree that buying things makes people happier?

b Rewrite Reham's sentences using the connectors below, or other connectors if you prefer.

because also so while however when

1 I think that most visitors go to the shops and buy clothes. Clothes are very cheap in my country.
2 And the shops are very beautiful and attractive. Nice shops make you want to buy things.
3 The shops have good lights, and good decoration. The shops have places where you can sit with your friends and have a coffee and chat. You see some clothes and you feel good, and you buy it.
4 Sometimes I like to go shopping. I don't go because there are no places in the car park. I wait a long time, maybe one hour. It is not good.

3 Turn to page 184 and look at the descriptors for Bands 5 and 6 for *Grammatical range and accuracy*. Match the phrases (1–5) with phrases with a similar meaning in the band descriptors.

1 the examiner can usually understand the idea
2 the student often gets things wrong
3 the examiner sometimes doesn't understand the idea
4 the student often uses connectors to make longer sentences
5 the student doesn't regularly use connectors to make longer sentences

4 3.7 Listen to another student, Zhuang, discussing the second two questions. Is his performance in grammatical range better? Why/Why not?

Test practice

➤ **TEST STRATEGIES** page 172

5 Complete the test task in Exercise 2a. Record your answers so that you can listen later.

Assess and improve

6a Listen to your answers. Did you:

1 give reasons for your answers?
2 use connectors to help make complex sentences?

b What could you do to improve your speaking?

1 Research alternative linking words and learn the grammar around them.
2 Make a list of ten different linking words, and try and use them in one conversation.
3 Record yourself doing the activity above, and repeat it in two weeks' time to see if you have got better at linking.

Reading (*Yes*, *No*, *Not given*; Summary completion)

Before you read

1 Work in pairs and discuss the question. How might the different 'intelligences' below help in the workplace? Why?

logic memory skills language skills creativity
emotional intelligence physical awareness

Test practice

➤ **TEST STRATEGIES** page 169–170

2 Complete the test task. Remember to use the text structure to find the main idea in each paragraph.

➤ **HELP**

1 The word *politicians* isn't in the text. What other word for *politicians* appears in the passage?

7 The sentence that mentions accountants begins with 'However'. What word in the previous sentence contrasts with the effect of emotional intelligence on accountants?

Task analysis

3 Work in pairs to discuss the questions.

1 Where were the answers in the passage? How did you locate them?
2 In which questions did following the text structure help you to understand difficult words?

Questions 1–6

Do the following statements reflect the claims of the writer in the reading passage? Write

YES *if the statement agrees with the claims of the writer*

NO *if the statement contradicts the claims of the writer*

NOT GIVEN *if it is impossible to say what the writer thinks*

1 Politicians have tried to use emotional intelligence as a tool for social change.
2 Schools and hospitals have seen an improvement in standards since 1995.
3 Menges' study showed that people had better recall of facts if a speaker stirred strong feelings.
4 Emotionally intelligent people make colleagues feel silly more often than others.
5 People experience more job satisfaction after emotional awareness training.
6 Anita Roddick used emotional appeals for good causes.

Questions 7–13

*Complete the summary using the list of words **A–L** below.*

In the University of Florida study, emotional intelligence had a more 7 _____ effect on people who worked in jobs such as accountancy and motor repairs than others. They found that emotionally intelligent people made faces and gestures their main 8 _____ , which weakened other skills. They concluded that emotional intelligence can matter in some 9 _____ . For example, 10 _____ were asked questions about workers' behaviour after a series of tests of emotional intelligence. They observed 11 _____ difference between workers with high or low emotional intelligence when it came to helpfulness. They found that workers with higher emotional intelligence felt more comfortable making 12 _____ than others. Not only that, but their supervisors were more likely to listen because the 13 _____ of emotionally intelligent people made their ideas easier to accept.

A researchers B focus C enthusiasm D disrespect
E negative F speeches G situations H no
I significant J managers K complaints L decision

PSYCHOLOGY

The Dark Side of Emotional Intelligence

Since the 1995 publication of Daniel Goleman's bestseller, *Emotional Intelligence*, the idea has been used by government leaders and educators as the solution to a wide range of problems. If we can encourage emotional intelligence among school children, leaders and doctors, we'll have more caring educational institutions, workplaces and better healthcare. As a result, emotional intelligence is now taught widely in secondary schools, business schools and medical schools.

Since the book's publication, social scientists have begun to document emotional intelligence with more reliable research methodologies and a more complex picture is emerging. Research led by University of Cambridge Professor Jochen Menges suggested that, when a leader gave an inspiring speech filled with emotion, the audience was less likely to challenge the message and remembered less of the content. Interestingly, though, audience members were so moved by the speech that they believed that they had remembered more of it.

It is clear that leaders who master emotions can rob us of our capabilities to reason. In a study led by psychologist Stephane Cote of the University of Toronto, university employees filled out a survey about their manipulative tendencies, and took a test measuring their emotional intelligence. Then, Cote's team studied how they interacted on the job. The employees who engaged in the most harmful behaviours were masters of manipulation with high emotional intelligence, using their emotional skills to demean and embarrass their peers for personal gain.

Of course, people aren't always using emotional intelligence for evil ends and emotional intelligence is certainly a skill that can be taught to others. In a study of emotions at the Body Shop, a research team led by Stanford professor Joanne Martin discovered that founder Anita Roddick used emotions to inspire her employees to fundraise for charity. As Roddick explained, 'Whenever we wanted to persuade our staff to support a particular project we always tried to break their hearts.' Roddick was often held up as an example of an emotionally intelligent leader.

However, emotional intelligence may have hidden costs. Recently, psychologists from the University of Central Florida comprehensively analysed every study that has ever examined the link between emotional intelligence and job performance. They found that in jobs that required extensive attention to emotions, higher emotional intelligence translated into better work. However, in jobs such as mechanics, scientists and accountants the results were reversed. Although more research is needed, one promising explanation is that these employees were paying attention to emotions when they should have been focusing on their tasks. If your job is to analyse data or repair cars, it can be quite distracting to read the facial expressions, vocal tones and body language of the people around you. In suggesting that emotional intelligence is necessary in the workplace, perhaps we've been misguided.

Instead of assuming that emotional intelligence is always useful, we need to think more carefully about where and when it matters. In a recent study at a healthcare company, employees were asked to complete a test about managing and regulating emotions, and then managers were asked to evaluate how much time employees spent helping their colleagues and customers. The relationship between emotional intelligence and helping simply didn't exist: helping is driven more by our motivations and values. However, emotional intelligence was significant when examining a different behaviour: challenging existing situations and speaking up with ideas and suggestions for improvement.

Emotionally intelligent employees spoke up more often and more effectively. When colleagues were treated unjustly, they felt they had to speak up, but were able to keep their anger in check and reason with others. When they took risks, for example when advocating for gender equality, emotional intelligence helped them keep their fear under control. When they brought ideas for innovation to senior leaders, their ability to express enthusiasm helped them avoid threatening leaders.

There is now growing recognition that emotional intelligence – like any skill – can be used for good or evil. So if we're going to teach emotional intelligence in schools and develop it at work, we need to consider the values that go along with it and where it's actually useful.

Writing (Task 1)

Lead-in

1 Work in pairs and discuss the questions.

1 Are there any jobs that are still seen as masculine or feminine?
2 Are male and female incomes the same in your country? Why/Why not?
3 What employment rights do workers have in your country?

Understand the task

➤ EXPERT WRITING page 194

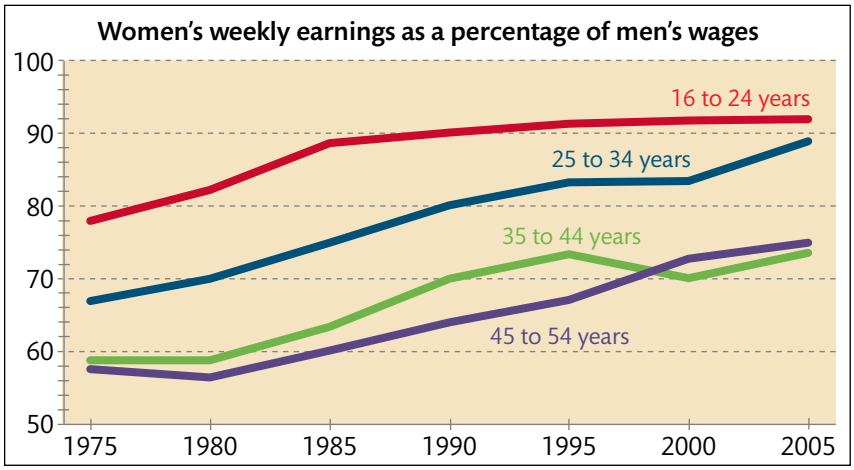
2a Work in pairs. Look at the graph and discuss the questions.

1 What does the graph show?
2 Which age groups have the smallest pay gap between male and female earnings?
3 What has been the overall pattern over the last thirty years?

The graph below shows the average amount of money women earned as a percentage of men's earnings in the USA from 1975 to 2005.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.



b Use your answers to Exercise 2a to help you to write an introduction sentence and an overview to summarise the main point.

Plan the task

➤ TEST STRATEGIES page 171

3a What are the main features of the graph? What data would you to select to illustrate those points?

b Look at the instruction in the task above again. Which is the best way to organise your answer?

1 describe each age group or year group separately
2 make comparisons between males and females, different age groups, and different years

c What phrase in the instructions tells you the answer to Exercise 3b?

4a Turn to page 191 and look at the criteria for *Coherence and cohesion* for Bands 5 and 6. Match a phrase (1–4) with a phrase with a similar meaning in the band descriptors.

1 connectors are used to show how ideas relate or contrast
2 information is listed in the same order as it appears in the chart
3 words like *that* and *those* are included, but might not be correct
4 ideas are organised

b Which of the phrases (1–4) will NOT help you to get a Band 6?

c Put the information below into the correct paragraphs for this task:

comparison of the younger and older age groups
introduction sentence
description of how things have changed over thirty years
overview
numbers from the graph
~~summary statement~~

Introduction	
Main paragraph	
Conclusion	summary statement

Language and content

5a Complete sentences (1–5) with the words below. You can use the words more than once.

although despite however in spite of

1 _____ seeing some improvements, women's wages were still lower than men's in 2005.
2 _____ all of the women saw their wages increase, some age groups saw slower growth.
3 _____ , there were some improvements in this area.
4 Many younger women were still paid less, _____ closing the gap.
5 The gap between men and women's wages in the 45–54 group was lower in 2005, _____ on average, these women still earned 25 percent less than men.

b Each sentence (1–5) contains a common error in the use of connectors in Exercise 5a. Correct the errors.

1 ~~However~~ Although women's wages were higher, they were not enough to close the gap.
2 Although most of the women saw their wages rise, but the wage increase for women aged 34–45 was slower.
3 Despite seeing a general rise in the amount that women earned.
4 In spite of women's pay grew, that growth slowed down in the 1990s.
5 There was an improvement in earnings for women under 24. However, there was an improvement in women's wages aged 25–34.

Write your description

6 Write your summary of the chart.

Assess and improve

7 Work in pairs. Compare your answers.

1 Did you both select the same information for your description?
2 Underline all the connectors you have used. Did you use a variety?
3 What reference words did you include?

8 Choose the method that you think will help to improve your writing.

1 Plan the task before you start to write.
2 Read more model answers and look at how they organise ideas.
3 Practise connectors of contrast in a grammar book or online.
4 Rewrite your description using longer sentences for homework.

Review

1 Complete the extract from an essay with the words below.

achievable campus creative disappointed elementary formal harmful higher qualification top

'The pressure on young people to pass tests in school is harming their development.' Discuss.

Any student in 1 _____ education will know that testing is a major part of their lives. And for some professions, a 2 _____ in law or medicine, for example, it is essential. Many careers, however, are 3 _____ without passing exams.

Testing is becoming a common part of student life. Even children in 4 _____ schools, who are as young as six, are being giving standardised tests. At the other end of the school career, competition for places at 5 _____ universities has become so fierce that in some countries, newer, harder exams have become necessary. This emphasis on performing in specific tests can be 6 _____ to young people's development, and gives the false impression that grades are the only thing that matters.

Once people leave 7 _____ education, and start learning on the job, students who worked so hard to achieve top grades may be 8 _____ to realise how little these things matter. Many business and technology leaders have few or no certificates or letters after their name. Skills such as 9 _____ thinking, character or contacts matter so much more than results beyond the walls of a university 10 _____ .

2 Match the beginnings of the sentences (1–6) with the endings (A–F).

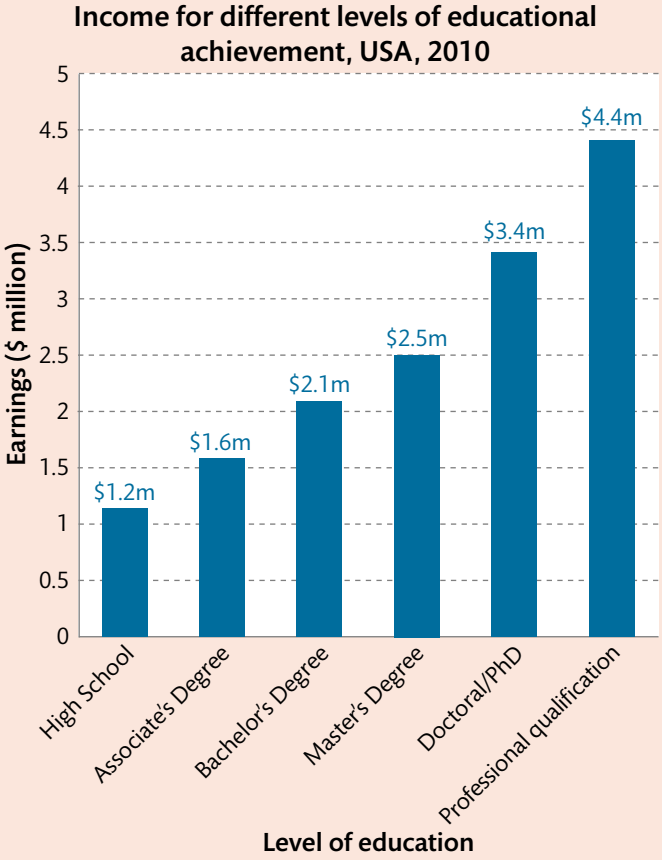
1 Up until recently, most successful students planned
2 Millennial, those reaching 18 since 2000, are mostly interested in
3 Millennial are expected
4 The majority don't want to worry about
5 They may be ignoring the fact that people who end up
6 People like Mark Zuckerberg give the impression that

A pleasing a difficult or unpredictable boss.
B to get a job with a top company when they graduated.
C working for themselves tend to work longer hours.
D to make up 75 percent of all the people in employment by 2025.
E starting their own business or working alone.
F hating a college environment is enough to become successful.

3 Complete the description of the chart with the comparative or superlative form of the adjectives in brackets.

The chart below shows the level of income over a lifetime for different levels of educational attainment in the USA.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.



The chart illustrates the relationship between level of education and earnings. The bar chart shows that when people stayed in education for 1 longer (long), they generally had 2 _____ (high) earnings. People who left school with the 3 _____ (low) level of education in the USA, a High School Diploma, earnt much less than the others, $1.2 million dollars over their lifetime. The earnings for people with an Associate's Degree were not much 4 _____ (big). Once people get either a Bachelor's or Master's Degree, earnings rise to $2.1 million and $2.5 million respectively. The 5 _____ (great) difference can be seen at the top levels. Those who completed their Doctoral qualification were almost three times 6 _____ (well off) than those who only finished high school. However, even a PhD was 7 _____ (important) in terms of earnings than a professional qualification, which led to an income of $4.4 million. So the chart shows that some qualifications are 8 _____ (valuable) than others.

4 Science

4a Training
- **Reading:** Text referencing (Matching features)
- **Vocabulary:** Academic research; Collocations; Science; Verb endings
- **Speaking:** Give yourself time to think (Part 2)

- **Writing:** Task 2: Opinion essay

Lead-in

1 a Work in pairs. Divide the items below into two categories: *discoveries* and *inventions*.

antibiotics DNA refrigeration cocoa bean telephone the petrol car rocket technology electricity

b Which of the discoveries and inventions in Exercise 1 have had a positive effect on the world? Which have had a negative impact? Why?

2 Work in a group. Each person should choose a discovery or invention from Exercise 1 and persuade your group that it is the most significant one of them all. Listen to each other's arguments and decide on the best one.

Reading (Matching features)

Before you read

1 Work in groups. The photo shows scientists acting out their research that has won an award. What do you think that research was?

2 Discuss the questions.

1 What science awards have you heard of?
2 Why is it important to have such awards?

Text referencing

3 Find and underline four different science awards mentioned in the passage. Look for capital letters.

4a Look at the reference words underlined in paragraph 1 of the passage.

1 What does each word refer to in the text? Does it refer back or forward?
2 What is the purpose of these words?

b Find three reference words in paragraph 2; four in paragraph 3 and five in paragraph 4.

1 What do they refer back or forward to?
2 What do *the former* and *the latter* refer to in paragraph 4?

5a Look at paragraph 1. Underline the information that tells us the statement below is true.
The Nobel Prize was founded by a scientist.

b What information in paragraphs 1 and 4 tells us that statements (1–4) about the Nobel Prize are not true?

1 It recognises only one field of science.
2 It has existed for almost three centuries.
3 The prize is awarded at a funny event.
4 It was awarded for making an animal fly.

c Match sentences (1–4) in Exercise 5b with prizes (A–C). Underline the information in the passage that supports your answers. You can use a letter more than once.

A The Ig Nobel Prize
B The UNESCO Niels Bohr Medal
C The Copley Medal

RECOGNISING SCIENTIFIC ACHIEVEMENT

There are countless awards and prizes in science. Many institutes offer their own national awards, and then there are international prizes too. Probably the most famous of all of these are the annual Nobel Prizes. Established in his will, the awards were the creation of Swedish chemist Alfred Nobel. They have recognised significant achievements in disciplines including chemistry, physics and medicine since 1895. Each prize can be given to more than one scientist, although one cannot be offered to teams of more than three. Winners attend a formal dinner and receive a gold medal, a diploma and a sum of money, which could be as much as $1 million.

The UNESCO Niels Bohr Medal was first given 100 years after the birth of quantum physicist Niels Bohr to commemorate his contribution to science. Unlike the Nobel Prize, it is not an annual award. The medal has been given out a dozen times since 1985 to people whose research in physics has or could make a significant impact on the world. In 2010, three different researchers were given the medal for their outstanding work.

The world's oldest surviving prize for science is the UK's Royal Society's Copley Medal. It is not only for physicists. It is given each year to any researchers who have made a significant achievement in an area of science. It was first given in 1731, 170 years before the first Nobel Prize was won. Today it consists of a silver medal and £5000 but the original prize was the interest on £100 donated by wealthy landowner Sir Godfrey Copley.

Finally, the Ig Nobel prizes aim to recognise research which first makes us smile and then makes us think. While their research may not change the world, the researchers' unusual experiments offer an insight into how something – often small and sometimes unimportant – works. Every year the prizes are given out at a humorous award ceremony. Only Sir Andre Geim has won both the Ig Nobel Prize and Nobel Prize. He won the former for his research into using magnets to raise a frog into the air. He won the latter with his later work on the discovery of graphene, a form of carbon.

Test practice

➤ **TEST STRATEGIES** page 170

6 Read the test task.

1 Find names A–D in the passage and underline them.
2 Underline the key words in statements 1–4.
3 Classify the statements by matching statements 1–4 with researchers A–D.

*Match each statement **1–4** with the scientist or institution that did the research.*

*Write the correct letter, **A–D**.*

1 It may allow medical practitioners to identify an illness.
2 It caused an animal to move differently.
3 It involved being hurt by many different insect types.
4 It linked pain levels to the location of the pain.

Scientist or institution that did the research

A Michael Smith
B Justin Schmidt
C Oxford University
D The University of Chile

Task analysis

7 Work in pairs and discuss the questions.

1 Did you need to read every word of the passage? Why/Why not?
2 For which answers did you need to understand referencing in the passage?
3 Choose one of the statements 1–4. Why did it not match the three other research examples?

1 It could help doctors to identify an illness.
A and B described pain but not an illness. D did not describe an illness.

Discussion

8 Work in groups and answer the questions.

1 How useful is the result of each experiment in the article?
2 Do you think money on this research was well spent? Why/Why not?

Scientists awarded Ig Nobel prizes for unusual research

A scientist who let bees sting him repeatedly on twenty-five different places on his body has been awarded the Ig Nobel Prize for physiology. The prize, which is now in its twenty-fifth year, is given for research that first makes you laugh, and then makes you think. Michael Smith, of Cornell University, was stung several times a day in different places on his body to find out which parts are the most sensitive. After weeks of research he found that many bee and wasp stings were uncomfortable, and the worst places to be stung were the upper lip and nostril, with the latter being the most painful.

A second researcher who won the physiology prize was Dr Justin Schmidt, a researcher from the Southwestern Biological Institute. He created the *Schmidt Sting Pain Index* which rates pain caused by bees, wasps and ants. Schmidt believes he's been stung more than a thousand times by 150 different species. While a honey bee only provides a level-two sting, a bullet ant causes the most pain at level four.

A third prize, given to scientists at Oxford University, did not involve animals. The scientists learnt that doctors can diagnose appendicitis – a serious medical condition – by the levels of pain the patient feels when travelling over speed bumps. Dr Helen Ashdown of the University of Oxford said: 'It may sound odd, but asking patients whether their pain worsened going over speed bumps on their way to hospital could help doctors in a diagnosis.' Once doctors have used this method to determine what the problem is, they can give the patient the correct medical treatment more quickly.

Finally, perhaps the most unusual prize of the night was the Biology Prize. It went to scientists from the University of Chile who attached a weighted stick to the back end of a chicken. The stick, which shared similar characteristics to a tail, resulted in the bird walking in a similar manner to a dinosaur.

Vocabulary

Academic research

1a Complete the summary of the passage on page 57 with the words below.

achievement annual consist contributions insight institutes sum significant team

There are many awards given to scientists for their 1 _____ to the science world. Sometimes they're given by 2 _____ and other times by international organisations. Most of the awards are 3 _____ , with prizes given once a year. The winners have usually provided 4 _____ into a particular area of science through their work. Their 5 _____ in physics, chemistry, medicine, etc. is usually 6 _____ in some way. Many awards are won by individuals but some are won by a 7 _____ . Prizes may 8 _____ of a medal, certificate or a 9 _____ of money. Examples of such awards are the Nobel Prize, the UNESCO Niel Bohr Medal, the Copley Medal and the less well-known Ig Nobel Prize.

b Work in pairs. Write a short paragraph to describe another type of award, e.g. literature, film, music, art. Use as many words from Exercise 1a as you can.

The MTV awards are an annual event. They recognise the contributions of musicians to the pop industry ...

Collocations

2a Match the beginnings of the sentences (1–6) with the endings (A–F). How is each collocation in bold formed (e.g. adjective + noun)?

1 Philo Farnsworth started with radios but his **subsequent**
2 Edward Jenner experimented with **medical**
3 Apes have **similar**
4 The discovery of DNA was a **significant**
5 Most researchers hope their work will **make**
6 Niel Bohr's research **offered**

A **achievement** for Watson and Crick.
B **treatment** for smallpox sufferers.
C **insight** into the behaviour of atoms.
D **characteristics** to humans.
E **an impact** on the world.
F **work** focused on the invention of TV.

b Think of an inventor. Describe him/her to a partner using collocations from Exercise 2a. Your partner should guess who it is.

This person's most significant achievement was the radio. His work had a huge impact on communication around the world. (Guglielmo Marconi)

Science

3a Work in groups and answer the questions.

1 Give an example of a **solid**, a **liquid** and a **gas**.
2 What is the **cure** for an infection caused by **bacteria**?
3 Name five things you might find in a **laboratory**.
4 Name five **chemicals** in English.
5 Name three types of **treatment** that a **patient** might receive in hospital.
6 Name three alternative sources for supplying **electricity**.
7 What two things can help you **recover** from flu?

b Give one point for every correct answer. Which team has the highest score?

Verb endings

4a Complete the text with the correct verb form of the nouns in brackets: *-ise/-yse*, *-ate* or *-ify*

Citizen Science Project

Children might contribute to the discovery of future antibiotics thanks to an invention by Vidhi Mehta. Experts **1** *realise* (realisation) that current antibiotics may not be able to cure infections in future and **2** _____ (estimation) that millions of people will die as a result. Vidhi Mehta is hoping that future research will prevent this and has asked children to help in a 'citizen science' project. With her simple toolkit, they can test items for possible antibiotic ingredients. Mehta does not **3** _____ (specific) what should be tested, only that it should come from the natural world and suggests they look in their back garden. Mehta hopes the results will **4** _____ (translation) into real research once they have been uploaded and scientists can **5** _____ (analysis) them. Researchers will be able to look for items that have potential and **6** _____ (investigation) them further. At the same time, children who **7** _____ (cooperation) with Mehta's project will experience science first-hand and **8** _____ (education) themselves on the nature of experiments.

b Look again at the noun and verb endings. Can you see any patterns?

c Work in pairs and discuss the questions.

1 What do you think of Mehta's project?
2 What are the benefits and problems of asking people to investigate something at home and share the results?

Speaking (Part 2)

Give yourself time to think

1 Work in pairs and answer the questions about each photo.

1 What is it?
2 What does it look like?
3 What do you use it for?
4 What are its benefits?

2 4.1 Listen to Carla and Tom describing the inventions in the photos. What answers do they give to the questions in Exercise 1?

3a 4.1 Listen again. Which person sounds more fluent? Why?

b 4.2 Listen to Tom again. Complete the sentences with the words below.

er How can I describe I guess Well

1 _____ , my favourite invention's a ping pong door.
2 _____ , what it looks like?
3 _____ , it's a special kind of door made of green plastic.
4 It's really useful for, _____ , one main reason.

c Work in pairs and discuss the questions.

1 How can the words/phrases in Exercise 3b help with fluency?
2 What happens if you use them a lot?

4 Work in pairs. Take turns to describe one of the inventions in the photos. Use the phrases in Exercise 3b to help you. Do not use each one more than once.

5a 4.3 Listen to Carla and Tom answer follow-up questions. How do they give themselves time to think?

b The question asks Carla and Tom to generalise. Which of the phrases in the box can be used to make generalisations?

almost always Generally speaking, In general,
Most (of my friends), specifically tend to (think)
The majority (of people) usually/never

c 4.3 Listen again to Carla and Tom. Tick the phrases they use.

Test practice

➤ TEST STRATEGIES page 172

6a Read the test task. You have one minute to plan what you are going to say.

Describe an invention you cannot live without.
You should say:
what it is
how it works
what you use it for
and why you can't live without it.

b Work in pairs. Take turns to give your talk. Try to speak for between 90 seconds and two minutes. Give yourself time to think. Record yourself so that you can listen later.

c 4.4 Listen to the follow-up question and take turns to answer it. Use phrases in Exercise 5b to help you.

Task analysis

7 Work in pairs and answer the questions.

1 Which phrases/questions from Exercises 3b and 5b did you use to give yourself time to think? Did they help?
2 Which phrases in 5b did you use to answer the follow-up question? Did you miss an opportunity to use more?
3 Did you pause a lot when you were speaking? Do you think this affected your fluency?
4 Which of these things could help you improve your fluency?
- quickly plan what to say before you speak
- read aloud
- think out loud while doing things at home
- regularly practise speaking on a topic for one minute without pausing

Listening (Notes completion)

Before you listen

1 Work in groups. Discuss the idea of *teleportation* (the possibility of travelling from one place to another in the form of energy).

1 How would this be useful?
2 Why might it be dangerous?

Understand the context

2a Work in pairs and discuss the questions.

1 Why is it important to quickly understand the context of a recording (the speakers, the place, the topic and the content)?
2 What can help you understand the context? Choose from the items below.

the narrator's introduction the speaker's introduction
the number of speakers the speaker's conclusion
identify the speakers' relationship statistics
the test questions

b 4.5 Listen to the narrator introducing the recording and answer the questions.

1 Who is speaking? Who is he/she speaking to?
2 What will the person speak about?
3 Where will it take place?

c 4.6 Listen to the speaker's introduction. What is the purpose of the talk?

Understand connected speech

3a 4.7 Read and listen to the sentence. Mark the connected speech. One connection has been marked for you.

The next step in teleportation is just a few years away.

b Complete the general pronunciation rule.

When a word ends with a 1*consonant / vowel* sound and the next word begins with a 2*consonant / vowel* sound, the words are connected in fast speech.

4a 4.8 Listen to six sentences. How many words are in each one? A contraction counts as one word.

b 4.8 Listen again and write the sentences down.

Test practice

➤ TEST STRATEGIES page 168

5a Read the test task. Why is it important to read the notes before the recording starts?

b Identify what type of word is missing in each gap (e.g. a number, verb, etc.).

c Look at the words around each gap. What synonyms or paraphrases might you hear?

Questions 1–6

Complete the notes below.

Write ***NO MORE THAN TWO WORDS AND/OR A NUMBER*** *for each answer.*

TELEPORTATION EXHIBITION

Opens	1 _____
Closes	5.00
Gallery 1	Theme: Teleportation today See a 2 _____ Images of the original experiment
Gallery 2	Theme: Teleportation in 3 _____ Teleporting an object to the moon Video on human teleportation Learn about the 4 _____ of teleporting
Gallery 3	Theme: 5 _____ uses of teleportation technology Details of a new super computer Timeline of the history Learn about a more 6 _____ superfast internet

6a 4.9 Listen to the recording and complete the test task in Exercise 5a.

b Quickly read the notes again and check the words fit the meaning and grammar of the sentence.

Task analysis

7 Work in pairs and discuss the questions.

1 How helpful was it to identify the context at the beginning of the recording?
2 Look at the audio script 4.9 on page 207. How important was it to understand connected speech to identify each answer?

Discussion

8 Discuss the question. Where would you go if you could teleport? Why?

Language development

Future probability

➤ EXPERT GRAMMAR page 176

1a Underline the words/phrases that describes possibility or probability in each sentence.

1 It could be dangerous and things might go wrong.
2 We will possibly not want to use it.
3 Teleportation will definitely be useful for us.
4 We may use it for travel, but it might not be safe.
5 It'll probably result in the invention of the superfast computer.

b Put the phrases you underlined in Exercise 1a the correct place in the table.

	+	–
completely sure	1 _____	will definitely not/ definitely won't
quite sure	2 _____	will probably not/ probably won't
not sure	will possibly *might* 4 _____ could	3 _____/possibly won't *might not* may not

2a Use the prompts and phrases in Exercise 1b to write predictions about 2050.

1 People/want to teleport in future.
People will probably not want to teleport in future.
2 Cars/all be self-driving.
3 Robots/do most manual work.
4 People/live to over 100 years old.
5 You/have to learn English like today.
6 Scientists/clone parts of the body for transplants.
7 Doctors/be able to cure serious illnesses.
8 Food/all be genetically modified.

b Work in groups. Discuss each opinion in Exercise 2a and give reasons. Can you all agree?

3a Underline the language of probability in each pair of sentences. Is the meaning the same? How is the structure different?

1 A Teleportation will probably not work with humans.
B There is a high probability that teleportation will not work with humans.
2 A Humans will probably be able to travel across the universe.
B There is a strong possibility that humans will be able to travel across the universe.
3 A The teleportation of objects will almost definitely become a reality.
B It is highly likely that the teleportation of objects will become a reality.

b Write four sentences about other future possibilities or probabilities using the prompts.

There is a (high) probability that ... will (not) ...
There is a strong/small possibility/chance (that) ... will (not) ...
It is highly/quite likely (that) ... will (not) ...

c Work in pairs. Share your sentences and ask/ answer questions about them.

4a Choose the correct options in *italics* to complete the article.

Manipulating our brains

People **1** *might not / not might* have to leave home to have a foreign holiday in future, according to physicist Dr Michio Kaku. Instead, they **2** *may / can* choose to download holiday memories directly to their brain. Kaku believes we are learning so much about the brain these days that it is **3** *high likely / highly likely* we will be able to manipulate it in future. His other predictions include memory recording and telepathy. Old age **4** *will probably not / will not probably* result in memory loss, as we will record our memories and download them to our brain when forgotten. He says there is a **5** *strong possibility / strong possible* that people will be able to perform basic telepathy with machines, directing them with our mind. However, science like this will come with ethical issues that we **6** *definitely will / will definitely* need to consider.

b Work in pairs. What do you think about Kaku's suggestions in the article?

Present probability

5a Which of the verb(s) below say:

1 you are completely sure something is true now?
2 you are completely sure something is not true now?
3 something is possible now?

can't could may might must

b Complete the sentences with a verb from Exercise 5a.

1 Scientists _____ possibly know the future; they're just guessing.
2 Poor quality teaching _____ be a reason few women study science, but I'm not sure.
3 Overuse of technology _____ be the cause of our brains getting smaller.
4 Physics _____ be one of the most challenging subjects to study. It's very complex.
5 It _____ be easy to do research. It _____ take a lot of time and patience.

c Work in pairs. Discuss whether you agree or disagree with the statements in Exercise 5b and why.

Writing (Part 2)

Structure a paragraph

1a Work in pairs. Did you enjoy science lessons at school? Why/Why not?

b Read the essay question and answer the questions (1–3).

1 What could the impact of fewer science students be in future?
2 What are two reasons for the government encouraging more science students?
3 What are two reasons for private companies taking responsibility to make science a more appealing option for study and work?

In some countries, the number of university students studying science is decreasing. Some people believe the government should encourage more people to take science courses. Other people say that it is private industry's responsibility. Discuss both these views and give your own opinion.

2a Read two examples of an essay paragraph giving the first viewpoint in the essay question. Which do you think is more effective? Why?

Paragraph A

The government should take action about the decreasing number of people choosing to study science as it is likely to have a negative effect on the country's economy. Many organisations need people who have an understanding of chemistry, physics and biology. If they are unable to find qualified staff, they may move their business to a country where scientists are available. To prevent the country's economy from suffering as a result of this, the government must ensure that a sufficient number of students study science at school.

Paragraph B

People need to learn science because otherwise there will be no one to do jobs in research or in science businesses like pharmaceutical companies. It is important for people to do science so we can learn new things and make new inventions. Companies need to employ new staff so we can have new things and new inventions. We have to train people to do this kind of work and the government can help with this. The government sometimes provides money to encourage people to study science at school.

b Match the sentence(s) (1–3) in paragraph A to the purposes (A–C).

1 Sentence 1
2 Sentences 2–3
3 Sentence 4

A Reach a conclusion.
B Introduce the main idea with a topic sentence.
C Explain, give examples, etc.

c Look for how the ideas link together in Paragraph A. Find:

1 two reference words and what they refer to.
2 two connectors that describe either the *cause* of something or the *effect* of something.

3a Put the sentences in the correct order to form a paragraph giving the second viewpoint in the essay question in Exercise 1b.

1 They therefore need to employ the right people to help them create new and innovate products.
2 It is not the government's responsibility to support private industry.
3 It is for this reason that they should motivate young people to take science courses so they can employ graduates with the right skills to grow their company.
4 Pharmaceutical companies and other organisations that work in science want to be competitive and make greater profits.

b Which two words/phrases connect ideas in the paragraph? How?

Test practice

➤ **TEST STRATEGIES** page 171

4a Write your own essay paragraph on the topic of government or private companies encouraging more science students. Pay attention to how you organise your ideas. Write at least 75 words.

b Swap paragraphs with a partner. Is the information organised clearly?

Listening (Section 2)

Before you listen

1 Work in pairs and answer the questions.

1 What is *virtual reality*?
2 How could a virtual reality device be used? Think about:

business people children elderly people
people with disabilities teachers

Test practice

➤ **TEST STRATEGIES** page 168

2 4.10 Listen and complete the test task. Remember to use the narrator's introduction, the test questions and the speaker's introduction to understand the context of the recording.

➤ **HELP**

1 *Initially* is a key word in the question. Listen for that word or a synonym.
7 What is a synonym of *diverse*? And *environments*?

Task analysis

3 Work in pairs and discuss the questions.

1 What helped you quickly identify the context of the recording?
2 How well did you accurately predict possible answers/word forms in questions 6–10?
3 Look at audio script 4.10 on page 207 and find the answers to any questions you got wrong. What made the question difficult?

4 What made these tasks challenging?

- Reading the questions/notes quickly
- Reading/Listening at the same time
- Identifying synonyms/a paraphrase
- Ignoring incorrect answers in the recording
- Spelling the word(s) correctly

Questions 1–5

*Choose the correct letter, **A**, **B** or **C**.*

1 When virtual reality was initially developed,
A products were too expensive.
B companies met people's expectations.
C it was only used by manufacturers.

2 Vision Next was first made after the owner
A sold the company for a profit.
B persuaded thousands of people to invest.
C refused a tempting offer.

3 Virtual Vista's main selling point is that it
A has its own screen.
B is easier to use.
C costs less to produce.

4 Why were people surprised when they heard about Far Vu?
A It connects to your mobile phone.
B A different type of product was expected.
C Users get an intense experience.

5 The main feature of Iris 3D is that
A It allows users to move their head easily.
B It allows the brain to slow images down.
C It prevents users from feeling ill.

Questions 6–10

*Complete the notes below. Write **NO MORE THAN ONE WORD** for each answer.*

USES OF VIRTUAL REALITY

Mostly used for:	6 _____
May be used to:	7 _____ a range of environments Enjoy new and exciting experiences from 8 _____ Do things normally physically impossible Positively affect a patient's 9 _____ Experience life in difficult circumstances
Could result in:	More 10 _____ between different groups of people

Language development and vocabulary

Future forms

➤ EXPERT GRAMMAR page 176

1a Match the underlined future forms (1–4) with their uses (A–D).

1 The device is coming onto the market next year.
2 We're going to look at four of those headsets today.
3 The headset comes with separate sensors. This means it's going to be more expensive.
4 These devices will take us away to other places.

A future prediction based on present evidence
B future prediction based on opinion
C future arrangement
D future plan/intention

b Work in pairs. Tell your partner about:

1 a future arrangement and a future plan for the next few months.
2 a future prediction based on present evidence and one based on opinion.

2 Choose the correct future form in *italics* to complete the text. Sometimes both are possible but one is more appropriate.

Artificial intelligence: Friend or foe?

Current developments in artificial intelligence (AI) mean we **1** *are seeing / are going to see* more of it in our everyday lives in future. One possibility is that people **2** *are going to have / will have* regular, meaningful conversations with their computers. But some experts believe that AI **3** *is going to / will* have negative effects on society and could even result in the end of human life. In the near future we know that more people **4** *are losing / are going to lose* their jobs to robots because it is already happening. They **5** *are having to / will have to* retrain as a result. But in the longer term, some scientists suggest that AI **6** *is going to care / will care* only about the job they are programmed to do and **7** *is not going to / will not be able to* take human values and emotions into account. Join us on Friday 4th October when four experts in the field **8** *are meeting / are going to meet* to debate this topic and contribute your opinion.

3a Complete the prompts to make true sentences about your partner. Guess the information, do not ask him/her.

1 He/She _____ tomorrow. (arrangement)
2 He/She _____ next year. (plan)
3 He/She _____ one day. (prediction based on evidence)
4 He/She _____ in future. (prediction based on opinion)

b Tell each other what you have guessed about each other's future and check if you are correct.

I think you're attending a lecture at 9a.m. tomorrow. Am I right?

Technology

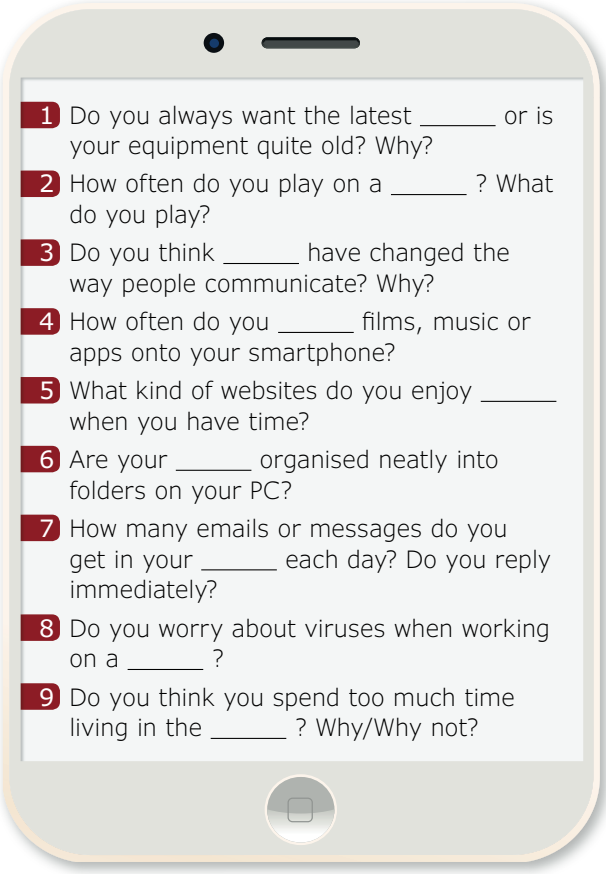
4a Work in pairs. Put the words below into the correct place in the table.

app browse charge device document download file games console handheld controller inbox install key network operate PC screen scroll social networking site virtual world

Hardware	Things you access on a computer	Things you do with technology

b Tick (✓) the things in the table that you own, access or do.

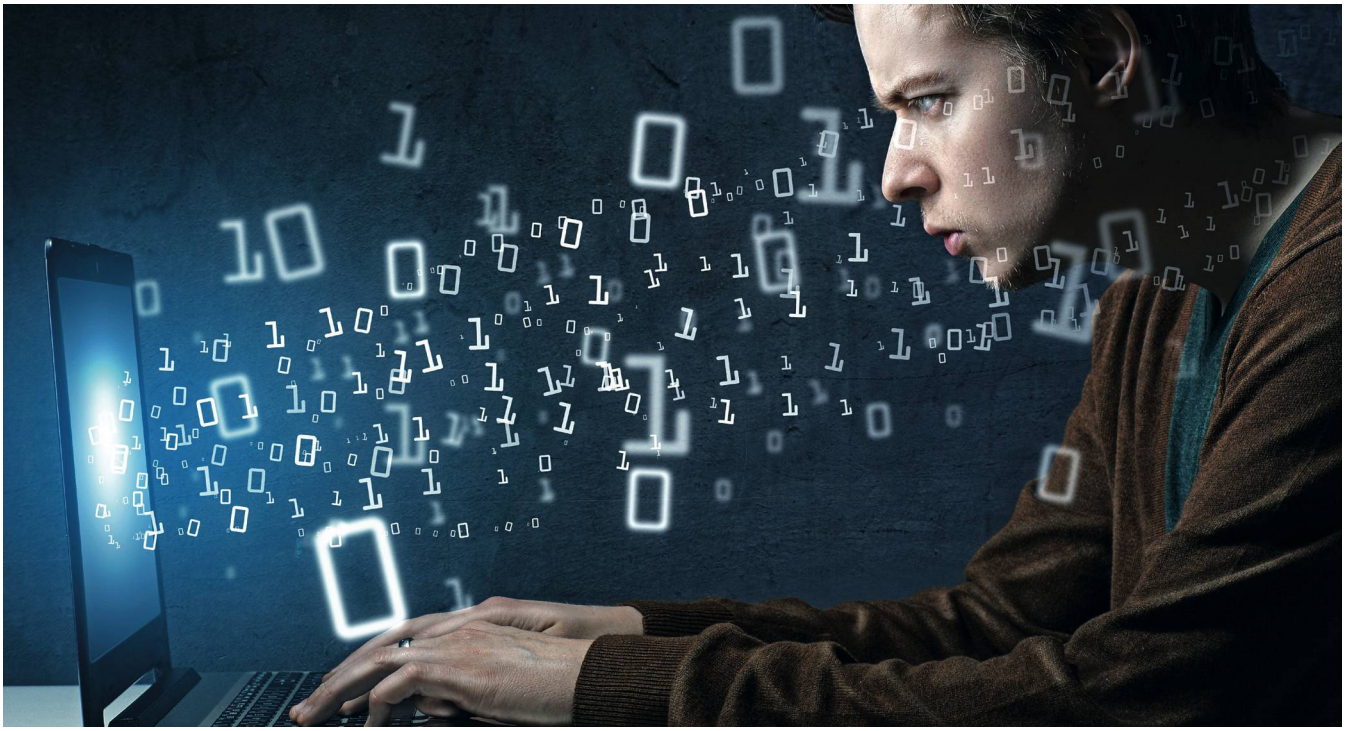
5a Complete the questions (1–9) with words from Exercise 4a. More than one might be possible. Change the word form where necessary.



1 Do you always want the latest _____ or is your equipment quite old? Why?
2 How often do you play on a _____ ? What do you play?
3 Do you think _____ have changed the way people communicate? Why?
4 How often do you _____ films, music or apps onto your smartphone?
5 What kind of websites do you enjoy _____ when you have time?
6 Are your _____ organised neatly into folders on your PC?
7 How many emails or messages do you get in your _____ each day? Do you reply immediately?
8 Do you worry about viruses when working on a _____ ?
9 Do you think you spend too much time living in the _____ ? Why/Why not?

b Work in groups and discuss the questions.

Speaking (Part 2)



Vocabulary development

1 Work in pairs and answer the questions.

1 The box lists practical skills. What are practical skills? Add four more below.

change a tyre cook drive first aid knit
program a computer ride a bike sew touch- type
use tools _____ _____ _____ _____

2 Which of the practical skills do you have? Which would you like to have? Why?

Focus on Fluency and coherence

2a Work in pairs. Read the test task. What skill could you talk about?

Describe a practical skill you have.
You should say:
what it is
when you use it
how you learnt it
and how it might be useful to you in the future.

b Turn to page 184 and look at the Band 6 descriptors. Which of the four descriptors do the questions below refer to?

1 Does she speak slowly?
2 Does she repeat herself, correct mistakes and/or pause a lot?
3 Can you always understand what she means?
4 Does she use different connectors (e.g. *and*, *however*) correctly to join her ideas?

c 4.11 Listen to Nada doing the test task and answer the questions in Exercise 2b. How would you describe her fluency?

Test practice

➤ **TEST STRATEGIES** on page 172

3a Work in pairs. Take turns with your partner to complete the test task in Exercise 2a and record yourselves so that you can listen later.

- You have one minute to prepare.
- Speak for between one and two minutes.
- Remember to use phrases to give yourself time to think.

b 4.12 Listen to the follow-up question. Take turns to answer it.

Assess and improve

4 Work in pairs to assess your fluency. Use the questions in Exercise 2b to help you. Listen to the recordings and make a note of:

1 what you did well.
2 ways you gave yourself more time to think.
3 the main area you need to improve.

Reading (Matching features; Sentence completion)

Before you read

1 Work in groups.

1 How much should we believe facts presented in films? Why?
2 Which of the activities below have you seen in a film? Which do you think are possible in real life?

travel back through time
travel forward through time
travel rapidly between universes
travel at the speed of light

Test practice

➤ **TEST STRATEGIES** page 170

2 Complete the test practice. Start by finding and underlining A–D in the passage. Remember to use reference words to help you.

➤ **HELP**

2 Look for words/phrases in the text that have similar meanings to *unlikely*.

12 What does it refer to in the statement?

Task analysis

3 Work in pairs and discuss the questions.

1 If any of your answers were incorrect, why were they incorrect? (e.g. You did not find the right information in the passage, you misunderstand some vocabulary, you chose the wrong word form.)
2 How can you avoid making these mistakes?

You chose an answer from the wrong section of the passage because you saw a key word there. Solution: Look for key words in each section before you decide where the information is.

Questions 1–6

Look at the following statements (Questions 1–6) and the list of science-fiction film activities below.

*Match each statement, **1–6**, with the correct action, **A–D**.*

***NB** You may use any letter more than once.*

1 The science has proved to be true.
2 This is unlikely to happen on a large scale.
3 The method used in the film was not sufficient.
4 Scientists are unclear about how this could work in practice.
5 Something similar worked in reality.
6 It affects us on Earth but in a very small way.

A Travelling through a worm hole
B Avoiding a black hole
C All food crops on Earth dying
D People ageing at different speeds

Questions 7–12

Complete the sentences below.

*Choose **NO MORE THAN TWO WORDS** from the passage for each answer.*

7 To ensure the science was correct, the film-maker asked a famous _____ for help.
8 _____ is a little faster for people on the top of tall buildings.
9 These days, few people _____ food.
10 Dangerous diseases are unlikely to attack _____ crop varieties.
11 An insect's journey through a piece of fruit gave the _____ its name.
12 If a space craft went fast enough to avoid a black hole, it would most likely _____ .

The science of INTERSTELLAR: fact or fiction?

The film *Interstellar* is an enjoyable space adventure which sees Matthew McConaughey do a number of incredible things in space in order to save humanity. Director Christopher Nolan wanted to get details right and got advice from well-known astrophysicist Professor Kip Thorne. So is the film more science fact than science fiction? Well, not exactly. As Thorne himself says: 'Some of the science is known to be true, some is an educated guess, and some is speculation.' In his new book *The Science of Interstellar* he describes how much of the film is accurate.

One of the main themes in *Interstellar* is that characters can age at different speeds depending on where they are in the universe. When two characters travel to a distant planet, they age by only a few hours, but return to find their shipmate is 26 years older. Could that be true? Well yes, we have evidence of this. On Earth the effect is small, adding just a few microseconds a day to the time of space. However, it means that time is moving ever so slightly more quickly on the 10th floor compared to a basement. As a result, GPS satellites circling the Earth need to be changed as they are moving through time slightly more quickly than a person with a Sat Nav on Earth, although only by forty microseconds a day.

The main idea behind *Interstellar* is that the Earth is dying. Mankind needs to find a new home before the last crop – corn – is entirely used up, or is killed by the same disease that killed all the other crops. It is true that most people today do not grow their own food and depend on a global system of production. It is quite possible that the system could fail but this would be only at a local level. In addition, deadly diseases usually only attack one group of plants, not multiple groups, and diseases which affect more than one plant species are generally not that deadly. Also, the film doesn't talk about the fact that humans eat a lot of other things, like animals and fish.

In *Interstellar*, the crew travelled large distances in space by jumping through a wormhole. A wormhole is a connection between two areas of space. Essentially, it's a kind of tunnel that allows you to travel quickly from one part of space to another. The term *wormhole* originally comes from a wormhole in an apple and it is the same kind of idea in space. An ant can reach the other side of an apple much faster if it goes through a hole in the centre. Wormholes can exist in theory but nobody knows how they could stay open long enough for someone to travel through them. Therefore they will probably never exist naturally in the universe. In *Interstellar*, the main character believes the wormhole was put there by an advanced group of people. However there is little chance that humans will find a way to control space and time in this way.

Finally, the crew of *Interstellar's Endurance* spaceship faced a problem when trying to get to a planet because it is under the control of a huge black hole. A black hole is an area of space that sucks everything around it inside. It's so strong that nothing can escape once it is inside the black hole. To stop the black hole pulling it in, the spaceship needed to travel at super-high speed. In the film, the main character solves this problem by travelling around the black hole and using that speed to get to the planet. This is not as strange as it sounds as something like this has been done in real life. It did not involve a black hole, but it did involve a space mission travelling around Earth and Mars to get enough speed to chase a comet. However, to escape a black hole, you would need a huge amount of speed. You also need to slow down again quickly to land on the planet, and the ship would almost certainly fall apart.

Writing (Task 2)

Lead-in

1 Work in pairs and look at the photo. Why have humans travelled into space?

Understand the task

➤ EXPERT WRITING page 195

2 Read the test task and underline the key words. How many things do you have to write about?

Write about the following topic:

Some people believe that space travel is a waste of government money while others believe it is important for human development. Discuss both these views and give your opinion.

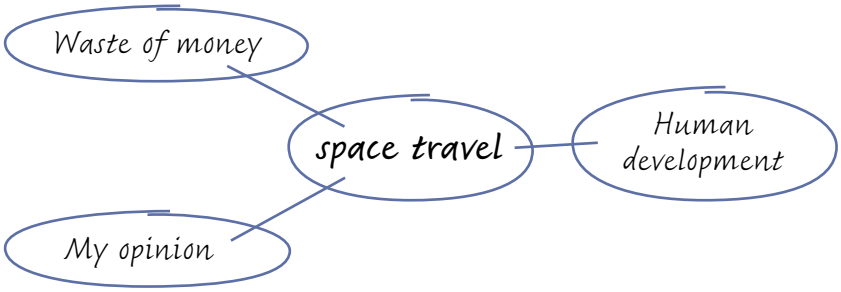
Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

Plan the task

➤ TEST STRATEGIES page 171

3 Think of reasons for both opinions in the test task. Add any ideas you have to the spidergram. What is your opinion?



4 Select the best reason for each opinion in the test task. Make sure you can explain it in depth and/or give examples.

5a Organise your ideas into the essay plan below. Include notes on explanations and examples.

Introduction	
Reason for opinion 1	
Reason for opinion 2	
Conclusion/My opinion	

b Work in pairs and discuss your plans. Answer the questions and make any necessary changes.

1 Can you write at least 75 words about each reason with an explanation and/or example(s)?
2 Is all the information relevant?
3 Is it organised clearly?

Language and content

6a Read the paragraph and answer the questions.

1 Does the writer explain the main idea in depth?
2 Is all the information relevant?
3 Is the information well organised?
4 Are the ideas well connected using connectors or referencing?

Governments should not spend money on expensive journeys into space. There is the need for greater medical care. Millions of people around the world are unable to receive this kind of health care. They do not have enough money. Healthcare is just one of the things that we spend money on. If the government cut their spending on space travel, they could provide free medical facilities for people who need it.

b Improve the paragraph.

1 Cut the irrelevant sentence.
2 Replace the first word of a sentence with *One reason for this ...*
3 Join two sentences with *because*.
4 Add a final sentence that starts *This is likely to result in ...*

7a Complete the first line of the next paragraph with one of the phrases below. Two are possible. What is the purpose of these phrases?

For instance, However, In addition, In conclusion, On the other hand,

_____ , there is a possibility that space exploration will help to discover new cures for medical conditions on Earth.

b Why is language of possibility used in the sentence?

Write your essay

8 Write the essay in Exercise 2. Follow your plan in Exercise 5a. Remember to write at least 250 words. Organise and develop your ideas well.

Assess and improve

9a Read and assess your essay using these questions. Make any necessary changes.

1 Is each part of the exam task included in the essay?
2 Is the essay organised into paragraphs?
3 Are the ideas in each paragraph organised and connected well?
4 Do they include explanations and/or examples?
5 Is the essay 250 words or more?

b Swap essays with your partner. Read and assess your partner's essay using the questions in Exercise 9a.

10a Give positive feedback and suggestions to your partner. Listen to your partner's feedback and make any changes to your essay. What do you need to remember to do next time?

b What could help you write at least 250 words? Choose from the list.

- Give a more detailed explanation of ideas
- Give an example
- Link ideas better
- End with a concluding sentence

Review

1 Complete the text with the words below.

achievement bacteria contributions cooperating cure impact investigated laboratory patient recover team treatment

Penicillin: the full story

The story of the discovery of penicillin is well known. Dr Alexander Fleming returned to his 1 _____ after a holiday to find a strange mould in a dish. He soon realised that the mould was preventing the growth of the dangerous 2 _____ in there. However, this is not the full story. Fleming knew the mould had the potential to 3 _____ illnesses but had neither the knowledge nor the money to develop a drug himself. So, Oxford University scientist Dr Howard Florey took on this work with the help of his 4 _____ of researchers. They 5 _____ the science behind the mould and did tests until they had developed a medical 6 _____ that could work – penicillin. Their first 7 _____ was a man with an infection in his eye. The penicillin had some success but doctors ran out of the medicine after a few days and so the man was unable to 8 _____ from his infection and died. However, after 9 _____ with some American scientists, they were able to produce larger quantities of the drug. Since then, penicillin has saved the lives of millions of people around the world. It was a significant 10 _____ for the science world which made a huge 11 _____ on medicine. But it was not just the work of Dr Fleming; it was the result of 12 _____ from several different scientists.

2a Complete the answer to the speaking task with a word in each gap. More than one answer might be possible.

How do you think medical treatment will change in the future?

Well, I think it's highly 1 _____ that doctors will find a cure for the some of the most serious illnesses, although they probably 2 _____ find a cure for all of them. Plus there's a 3 _____ chance that new diseases will appear. Technology will 4 _____ change the way we're treated in hospitals, I'm sure about that, but I'm not sure exactly how. I think we 5 _____ get a diagnosis from a computer, in which case patients 6 _____ not see a human doctor at all. Machines 7 _____ won't replace doctors within the next few years. However, there's a 8 _____ possibility it'll happen before the middle of the century because we're learning more about science all the time.

b Do you agree with the answer in Exercise 2a?

c Practise answering these questions about the future.

1 What do you think homes will be like in future?
2 What do you think cars will be like in future?
3 How will our working lives be different in future?
4 How will technology change the way we buy things in future?
5 What will schools be like in future?
6 What skills will people need to learn at school in the future?

3 Complete the sentences with the most appropriate future form of the verb in brackets.

1 We know space tourism _____ (be) important in future because companies are developing the technology now.
2 Company bosses have arranged to discuss a launch date. They _____ (meet) next week.
3 I don't think everyone _____ (be able to) afford the cost of a space flight.
4 I _____ (save up) for a flight. That's my intention, anyway.
5 Flights _____ (not/last) long. I've heard they'll be around two hours.
6 Each flight _____ (probably/cost) over £200,000.
7 The pilots _____ (meet) together tomorrow to discuss safety issues.
8 One company is planning their publicity campaign now. They _____ (invite) famous people onto their first space flight.

4 Complete the paragraph from an essay with one word in each gap. The first letter is given.

One advantage of mobile technology is the ability to **1** b_____ the internet wherever you are. You can look at the emails in your **2** i_____ , or view updates on social networking **3** s_____ . You can also download **4** a_____ and play games. Unlike a **5** P_____ , you do not need a fixed internet connection as you can access the web through your phone's mobile **6** n_____ . There are disadvantages to such technology, however. The **7** s_____ on a mobile **8** d_____ is much smaller than on a computer, which can make it harder to see everything at once. You have to constantly **9** s_____ down the page to see everything on a web page or in a **10** d_____ , which makes working or studying more difficult.

- **Speaking:** Structure an argument; Pronunciation (Part 3)
- **Listening:** Follow a sequence of ideas; (Section 3: Label a diagram)
- **Language development:** Grammar to connect ideas
- **Writing:** Generate comparisons (Task 2: Opinion essay)

5b Testing
- **Listening:** Section 3: Label a diagram; Table completion
- **Language development and vocabulary:** Participle clauses (with *-ing* and *-ed*); Culture and entertainment
- **Speaking:** Part 3: Discussing toys and games
- **Reading:** Multiple-choice questions, Matching information
- **Writing:** Task 2: Compare and contrast essay

Lead-in

1 Look at the images and discuss the questions.

1 Which piece of art do you like best? Why?
2 Which room in the house would you like to put it in? Why?
3 Which image(s) show(s):

abstraction geometric shapes a landscape a portrait a sculpture a still life strong/soft colours

2 Work in pairs and discuss the questions.

1 Is it important to have art in your home? Why/Why not?
2 Do people like the same kinds of art in their homes as they see in galleries?
3 Why do you think governments spend public money on art galleries and works of art?

Reading (Multiple-choice questions)

Before you read

1 Work in pairs and discuss the questions.

1 What's your favourite colour? Why?
2 How are we influenced by the colours around us?

Identify synonyms

2a Look at the title and paragraph 1 quickly. What was 'the high price' of green paint?

b Find synonyms of the underlined words in paragraph 1.

1 What worries do people have about paint these days?
2 What was manufactured using the dangerous substances?
3 What long-standing argument has recently come to an end?

3 Read each option in the test question below.

1 Use the underlined words in paragraph 2 to help you decide whether the statements are true or false (only one is true).
2 Discuss why the other options are wrong.

When it first appeared, Scheele's green was popular because

A the public wanted cheap quantities of good paint.
B the inventors had discovered new paint ingredients.
C the other green paints available were less bright.
D the manufacturers of this paint created a demand.

4 Look at the test question below and match the underlined words with antonyms (words with opposite meanings) or synonyms in paragraph 3. Use those words to help you choose the option.

Doubts were voiced – raised his concerns

What do we learn in paragraph 3 about people's attitudes to wallpaper with emerald green dye?

A Doubts were voiced when the paint went on sale.
B Confusion was caused by the different names of the paint.
C Worries about the paint were ignored by doctors at the time.
D Fears were confirmed when customers saw what was in the paint.

The high price of green paint

1 When choosing a new colour for your walls or doors, your only concern today might be whether the shade you've chosen matches your furniture or suits your mood. In the 19th century, such concerns would be nothing compared to the possibility that the paint you've chosen might kill you. While mass-produced wall coverings were still in the experimental phase, some particularly hazardous chemicals were in use. These may even have brought down Emperor Napoleon Bonaparte. The mystery behind his death has often been a source of discussion, but a small piece of wallpaper from his bedroom has now provided the clue to resolve this debate.

2 It may not seem obvious today, but there was a time when your choice of decoration depended on what colours had been invented. Some ingredients were so expensive that certain colours were only available to the very wealthy. [1]But demand for paint was high and those rich deep greens simply couldn't be reproduced in large amounts to the same high standards for reasons of cost. Hoping to find a less expensive version, in 1814 two men called Russ and Sattler were experimenting with the chemical balance in a popular green of the day, known as Scheele's green. [2]It was made with a mineral called copper, and arsenic, which were chemicals already used in the trade. [3]The result was an emerald green that was almost as good as the more expensive versions around at the time. [4]Happily for the creators, they introduced their paint just as there was a growing market for colours in the Lancashire mills, which were producing cotton at an industrial pace for the first time in the world. It appeared in soaps, glass and even children's toys. It was also deadly poisonous.

3 The new industrialists began production, using a variety of brands from 1814 onwards. One famous German chemist, Leopold Gmelin, was suspicious almost immediately after it started to be sold, and he raised his concerns about the safety of the dye in 1815. Gmelin noticed that in damp weather, walls with Sheele's green gave off a mouse-like smell, a sign of arsenic, which medical experts had already accepted was a risk to health. He recommended that people take down their wallpaper immediately, but fashion mattered more than scientists' warnings. Even when the list of ingredients was published in 1822, and the dangers became obvious to many chemists with a basic understanding of poisons, few members of the buying public wanted to listen to the medical warnings.

Test practice

➤ **TEST STRATEGIES** page 170

5 Look at the passage and answer the test questions.

Questions 1–4
*Choose the appropriate letters **A**, **B**, **C** or **D**.*

1 The Times newspaper warned of the dangers when
- A the green was added to children's sweets.
- B the colour was linked to unexplained deaths.
- C the guests invited to a special dinner were all poisoned.
- D the demand for safe wallpaper grew too great.

2 The designer William Morris ignored the problem because he
- A had commercial reasons to hide the truth.
- B refused to use artificial colours in his work.
- C preferred the latest paints to old-fashioned ones.
- D felt confident that his paint met safety standards.

3 Why does Napoleon Bonaparte's death stand out from other deaths at the time?
- A It was the first time that wallpaper was linked to cancer.
- B It was caused by the unfair conditions he was kept in.
- C It was politically important to prove that his death was natural.
- D It was possible afterwards to connect his death to arsenic poisoning.

4 What evidence for Napoleon Bonaparte's poisoning appeared most recently?
- A a recording of his state of health in the last days of his life
- B the account of the condition of his body months after his death
- C an object that was taken from his room and preserved
- D the description of the way he decorated the room

Task analysis

6 Work in pairs and discuss the question.

How can you use antonyms and synonyms to help you?

Discussion

7 Work in pairs and discuss the question.

What do you think is more important, the way something looks or its usefulness?

Fashion Victim

By 1830, wallpaper production had risen to over a million rolls in the UK and it continued to increase to 30 million a year by 1870. Other synthetic alternatives had appeared but Scheele's green remained popular with designers, despite the many warning signs. At a formal meal held by the military in London in the 1850s, the table decorations were leaves made from sugar paste and coloured with Scheele's green. Many of the guests took the attractive leaves home for their children, and several deaths then followed. The event prompted The Times newspaper to start an investigation in the 1860s. They ran a series of articles once they had gathered anecdotal evidence that children sleeping in bedrooms painted with arsenic green had a tendency to get sick and even die at rates far higher than the average child.

The famous designer, William Morris, used poisoned paint in his wallpaper. His patterns were popular and are still influential today, which means that small pieces of his wallpaper have survived and can be tested. One piece dating back to 1864 clearly contained the naturally occurring poison, arsenic. Morris himself commented on the arguments against Scheele's green at the time, but Scheele's green was made from natural minerals, and he disliked the new 'synthetic dyes' that were being produced. The arguments that his paints were poisonous were, he said, not worth wasting time on. Natural paints, made with mineral products, were more beautiful, and that was all that mattered, in Morris' view.

Although the majority of deaths from wallpaper poisoning went unnoticed, there was one very famous victim, famous enough to leave evidence of the cause of his death centuries later. Napoleon Bonaparte had been imprisoned on the island of St Helena, after losing the Battle of Waterloo in 1815. He lived there just a few short years more before his mysterious death in 1821. Although technically in a prison, he was kept in a comfortable room in luxury. He was said to have died naturally of cancer, though few people believed that story. Many suggested that he had been murdered by the British government, keen to prevent him from coming to power again.

The debate appeared to be resolved in 1955, when a diary was made public. The owner of the diary, a servant who attended Napoleon for his six-year imprisonment, described the slow and painful death the former leader went through. Modern scientists reading the description immediately identified arsenic poisoning as the most likely cause, pointing to a strong case for murder. The fact that Napoleon's body was remarkably well preserved when it was eventually moved in 1840 also confirmed their theory. But was it intentional? A third theory emerged, with the sale of a piece of wallpaper from the emperor's bedroom in the last few years. It had survived because it had been used to wrap an important book, and was large enough to still contain the evidence scientists needed to confirm where the poison was coming from. The tests proved without doubt that the wallpaper, like many others of its day, contained arsenic in the design. With the emperor having spent years locked up in a room with this wallpaper, it was a sign of his strength that he survived so long. Fashion in home decoration has never had such a famous victim.

Vocabulary

Verbs/Nouns + prepositions

1a Match the beginnings of the sentences (1–8) with the endings (A–H).

1 Queen Mumtaz Mahal was the **source**
2 At the Great Wall of China, the earliest **phase**
3 The red sky in Munch's *The Scream* has been **linked**
4 The famous Leaning Tower of Pisa was **designed**
5 Persia was the first country to use a **symbol**
6 In ancient Britain, purple paint was only **available**
7 Vincent van Gogh painted thirty different **versions**
8 While studying a Matisse painting, a group of **experts**

A **to** the eruption of a real volcano.
B **of** its leader on coins.
C **by** a complete unknown.
D **of** construction began in the 7th century BC.
E **on** art failed to notice it was upside down.
F **of** inspiration for the Taj Mahal.
G **to** the king and queen, by law.
H **of** his own portrait.

b Work in pairs. Talk about a famous piece of art in your country for two minutes.

Compound adjectives

2a Complete the sentences (1–6) with the words below to form compound adjectives.

two Spanish long open part widely

1 There's usually a _____-**hour** queue to go up the Eiffel Tower in Paris.
2 I don't think art is _____ respected in my country.
3 I think the best literature is from _____-**speaking** countries.
4 You have to be really _____-**minded** to enjoy modern art.
5 Few of the art works produced today will be _____-**lasting**.
6 I wouldn't mind being a _____-**time** artist.

b Work in pairs and discuss the statements. Do you agree? Why/Why not?

Collocations

3a Choose the word that does not collocate in each group.

1 available: resources, information, behaviour
2 published: opportunity, research, material
3 alternative: approach, knowledge, solution
4 major: protection, concern, decision
5 military: action, difficulties, power
6 cultural: history, part, background

b Choose some of the collocations to make three sentences about your country's history.

Art

4a Complete the article with the words below. Make any changes necessary to the words.

fake original illustrate statues collection display style scene

The Getty Kouros

There is a piece of art in the Getty Museum that has been valued at over $9 million dollars. That's quite a lot when the piece in question is generally considered a **1** _____ .

The larger-than-life statue of a young man standing forwards, known as a Kouros, is on **2** _____ with a rather unusual note warning of its problematic past. If it is an **3** _____ Kouros from ancient Greece, it is one of only twelve in the world, and the most beautifully preserved. Unfortunately, many experts believe it's a little too well preserved. Getty added the Kouros to their **4** _____ in 1985. At that time, there were several signs that it was real. The **5** _____ of the hair was typical of artists in ancient Greece, and the **6** _____ were always meant to be part of a wider **7** _____ , with the feet always slightly turned to the right or left. The museum still was still deeply concerned, though, and asked leading geologists to test the stone. They concluded that it was very, very old. However, more recent experiments have questioned their findings. The Getty Kouros **8** _____ a common problem for art galleries these days. Modern forgers are becoming very good at their work, almost as good as the original artists.

b Work in pairs and discuss the questions.

1 Do you think the statue should be on display?
2 Do you think it's worth $9 million dollars? Why/Why not?

Speaking (Part 3)

Structure an argument

1 Work in pairs and discuss the questions.

1 Is a country's art important to a nation?
2 Why do large numbers of people go to visit famous works of art?
3 Do you think that art was better in the past than it is today? Why/Why not?
4 Should galleries charge for entry? Why/Why not?
5 Why do some people think art is a good investment?

2a Look at the sentences (1–4) which answer question 1 in Exercise 1. Put the sentences in the correct order.

1 The main reason why I think this is because a really good piece of art can pass on the emotions and worries of generations long dead.
2 For those reasons, I think art connects us to our past.
3 I think that without question, art definitely matters to a country.
4 And another thing is that people still look at the artwork of the past, but how many of us honestly read original books from those times?

b Match the functions (A–C) with the sentences (1–4).

A Introduce the idea _____
B Offer examples _____ , _____
C Summarise what was said _____

3a 5.1 Listen to four speakers discussing the questions in Exercise 1. Their last sentence has been deleted. Match the speakers (1–4) with their summary sentences (A–D).

A *That's why I believe that* they should offer free entry to galleries.
B *So* that's why these paintings are really popular.
C *Those are the two main reasons why* I think the quality of art has gone a bit downhill lately.
D *For those reasons*, I think a lot of people think it's a really good thing to buy art.

b 5.2 Now listen to the whole response and check your answers.

Pronunciation

4a 5.3 Listen to Hakam answering the Part 3 question below. Note how he makes a slight pause between ideas.

> Do you think governments should use public money to pay for art galleries and museums?

b Work in pairs and take turns to read the sentence aloud, pausing where there is a /.

I think it's OK / that we spend a lot of money / on art galleries. / I mean, / there are some objects / in a country's history / that are so important, / we need to keep them in that country.

c Mark where you think the pauses are in the sentences (1–4).

1 Experts generally agree that if national treasures are in the hands of the governments and museums, everyone can go and see them.
2 A lot of people have suggested that these national treasures are essential for our culture.
3 Few people really want these objects to end up decorating the homes of the rich.
4 So, I think it's important that we use public money to protect these objects for future generations.

d 5.4 Listen and check. Practise saying the sentences with the correct pronunciation.

Test practice

➤ **TEST STRATEGIES** page 172

5 Work in pairs. Take turns to answer the questions in the test task below. Here are some phrases that will help you while you prepare your arguments.

Some studies have shown that …
Many experts are concerned about …
There is a widely held view that …
A lot of people have suggested that …

- What kinds of jobs are there for people with art qualifications in your country?
- How does art benefit people?
- What kinds of art are there in the streets or in public spaces in your country?
- Do you think public spaces should be attractive, as well as functional?
- How have developments in technology affected the way that art is made?

Task analysis

6 Work in pairs and discuss the questions.

1 Did you remember to summarise your ideas?
2 Did you pause in the right places?

Listening (Section 3)

Before you listen

1 Work in pairs and do the tasks.

1 Draw a *vertical*, *horizontal*, *diagonal* and *curved* line. What things are made up of these shapes?
2 Describe the picture below in your own words.

Follow a sequence of ideas

2 5.5 You are going to hear an art expert describing the picture below. Is the talk about the lines and shapes, or the colours?

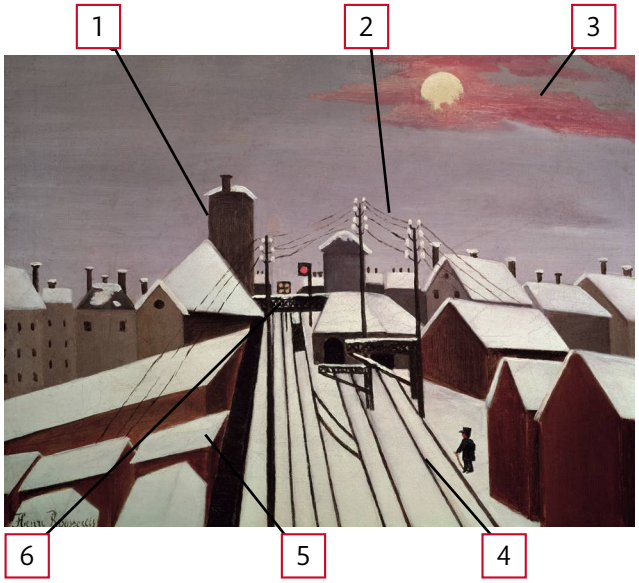
3a Match the phrases in *italics* in the sentences (1–6) with the information (A–F) that you would expect to follow.

1 The artist is using these lines *in order to* ...
2 The curved lines are *in contrast to* ...
3 I think in this painting, this is essential, *otherwise*, ...
4 The artist is clearly interested in something he or she wants to share with the audience. *In this case*, ...
5 Did the artist get it wrong? Well, not, *supposing* ...
6 What is *the source of this*? ...

A an example
B what would happen if not ...
C an example of something that does the opposite
D a cause
E a purpose
F what would happen if ...

b 5.6 Listen and check your answers.

c 5.6 Listen again and complete the labels. Use one word only for each gap.



1 Vertical lines show _____
2 Horizontal lines give a feeling of _____
3 Curves show _____
4 Diagonal lines provide _____ in the picture
5 Emphasis comes from the shape of the _____
6 The artist is interested in the _____

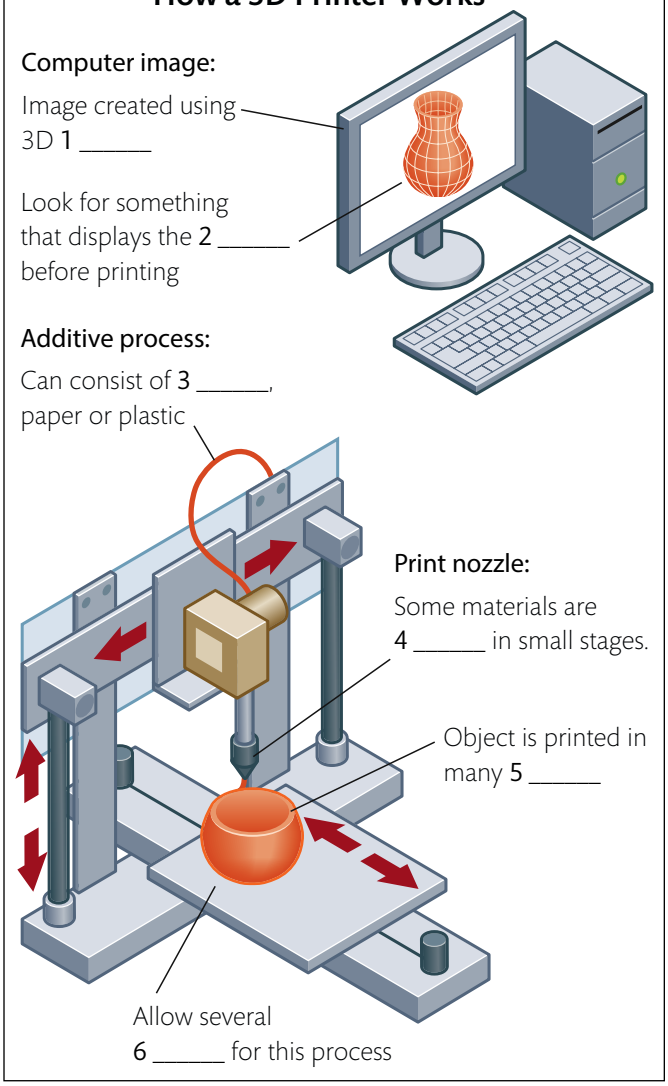
Test practice

➤ TEST STRATEGIES page 169

4 5.7 Listen and label the diagram below.

Complete the diagram below.
*Write **NO MORE THAN TWO WORDS AND/OR A NUMBER** for each answer.*

How a 3D Printer Works



Task analysis

5 Work in pairs and discuss the questions.

1 What helped you to get the answers: the picture, the words around the gaps or something else?
2 How does the picture help you to answer these gap fills?

Discussion

6 What would you like to print with a 3D printer?

Language development

Grammar to connect ideas

➤ EXPERT GRAMMAR page 176

1a Complete the sentences with the words below. In some cases, more than one answer is possible.

can do so so such these this (x2) that

1 Many people believe that they can't understand art, but they _____ .
2 Of course, colour is also essential, but we'll be looking at _____ in next week's talk.
3 The are very obvious vertical lines in the houses. The artist is using _____ method here to emphasise that _____ is a very urban scene.
4 The train tracks … he's asking the audience to follow _____ lines. If we _____ , we can see that there's a city in the distance.
5 We see the top lines of the roofs and the direction of the track. _____ features all help to make us look in a certain direction.
6 These shapes help to relax the image, perhaps less _____ than the colour, but it all helps.

b What do the gapped words in sentences (1–6) refer to?

2a Choose the correct option in *italics* to complete the text.

The cost of owning art

Year on year, people are prepared to spend record-breaking amounts on artwork. For **1** *these / those* with the money, it's an attractive investment. When Andy Warhol's Triple Elvis painting last came on the market in 1977, it sold for $83,000. At **2** *this / that* time, it was a lot to pay for modern art. **3** *Such / That* same painting sold for $83 million in 2015, making it a good investment for its owners. **4** *This / Such* numbers might be enough to persuade you to invest, but you also need to think of the cost of owning art. Insurance, security and climate control all add up. Few people have the money to meet **5** *this / such* high yearly costs, and **6** *these / those* who do, often feel more comfortable with their painting locked in a cupboard. Unfortunately, for **7** *this / these* reasons, a lot of important works of art are now owned by casinos, where security is already very high. If you want to see **8** *these / those* cultural treasures, you might have to walk past the gambling tables.

b Work in pairs. Describe your favourite painting or piece of artwork. How valuable is it? Where is it kept? Why do you like it?

3a Complete the sentences with the summary phrases below.

this change in attitude such recent improvements
these sleepovers these wealthy investors
this stunning architecture

Museums have tried to make their service better by opening later in the evenings and offering interactive displays. 1 _____ have resulted in higher visitor numbers. Many museums offer overnight stays for teenagers. 2 _____ have been made popular by films such as *Night at the Museum*. Social events are also common. The Natural History Museum in London has beautiful arches and sculptures. 3 _____ has made it popular for private events such as weddings. Most museums are supported by major technology companies. 4 _____ have the money to fund large interactive displays. All in all, museums now see their role as entertainment, not documentation, and 5 _____ has made museums more popular than ever before.

b Work in pairs. Do you think schoolchildren should visit museums? Why/Why not?

4a Work in pairs. Look at the essay prompt below. What opinions can you brainstorm on this topic?

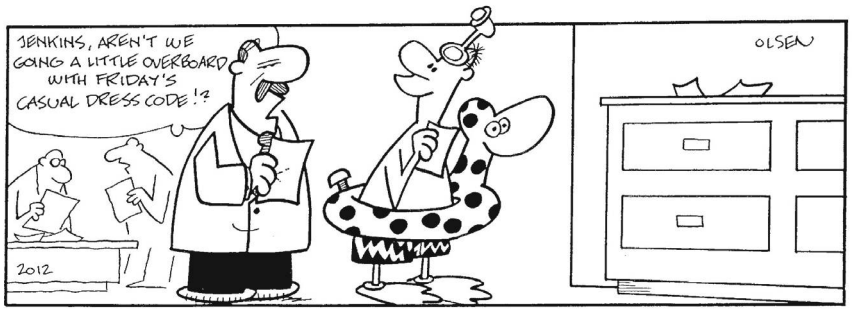
Should we invest in looking after old buildings, or should we replace them when they are no longer functional?

b Read the essay extract and improve it by using words to avoid repetition. You may need to change the grammar as well as replace words.

I think that we should look after the old buildings in our city. The old buildings represent our history and our cultural past. Representing our cultural past is important because it makes our cities look unique. When we make our cities look unique, they are more attractive to tourists, and being attractive to tourists is good for tourism.

However, it can be expensive to run a very old building. Very old buildings often need a lot of repairs. Very old buildings often don't have the latest windows, doors and insulation. Not having the latest windows doors and insulation means that they are inefficient. Being inefficient is bad for the environment as well as our wallets.

Writing (Task 2)



Generate comparisons

1 Read the essay question and underline the key words. What two things do you need to compare in this question?

'Allowing people to 'dress down' in casual clothes at work on certain days of the week encourages people to take their job less seriously. All workers should dress professionally every day of the week.'

Do you agree with this view? How do different styles of dress affect how people behave at work?

2a Work in a group and add notes alongside the ideas below.

	Casual clothes	Smart clothes
meeting clients		
effect on motivation		
different work demands		
another idea		

b Look at your notes in the table. Circle any similarities that the two types of clothing have. Underline ways in which they are different. Can you write any as comparatives?

They are both ...
While X is ...-er than ...

3a Put the sentences (1–4) in the correct order. Use the underlined references to help you.

1 So, a single rule for clothing might not be appropriate for every situation.
2 However, this is not necessarily a good thing as there are many jobs which require people to take a more creative approach to work.
3 Without doubt, looking professional helps people to feel professional, and sends a clear message about respect for rules.
4 For example, while wearing a smart uniform might help a police officer to do his/her job better, people who work in technology often perform best in a relaxed environment, and casual clothing communicates this very effectively.

b Look at the paragraph again. Find two phrases that mean:
1 'looking smart'. 2 'work well'. 3 'make something clear'.

Test practice

➤ **TEST STRATEGIES** page 171

4 Work in pairs. Take another idea from the table in Exercise 2a and build a paragraph comparing and contrasting ideas. Include a topic sentence.

Listening (Section 3)

A

B

C

D

Before you listen

1 a Have you ever played on any of the machines above? Which ones?

b Which do you think is the first type of machine that was invented? Why?

Test practice

➤ **TEST STRATEGIES** page 169

2 5.8 Complete the test task. Listen for words which show the sequence of ideas.

➤ **HELP**

1 Which machine do you need to listen for, the most popular, or the first one?

3 What do you think might make the lever go down?

Task analysis

3 Work in pairs and discuss the questions.

1 Why is it important to read the instructions.
2 How is diagram labelling similar to gap fill?
3 Look at the audio script 5.8 on page 209. What sequence words helped you identify the answer?

Questions 1–2

Complete the notes below.

*Write **NO MORE THAN TWO WORDS AND/OR NUMBERS** for each answer.*

Early vending machines

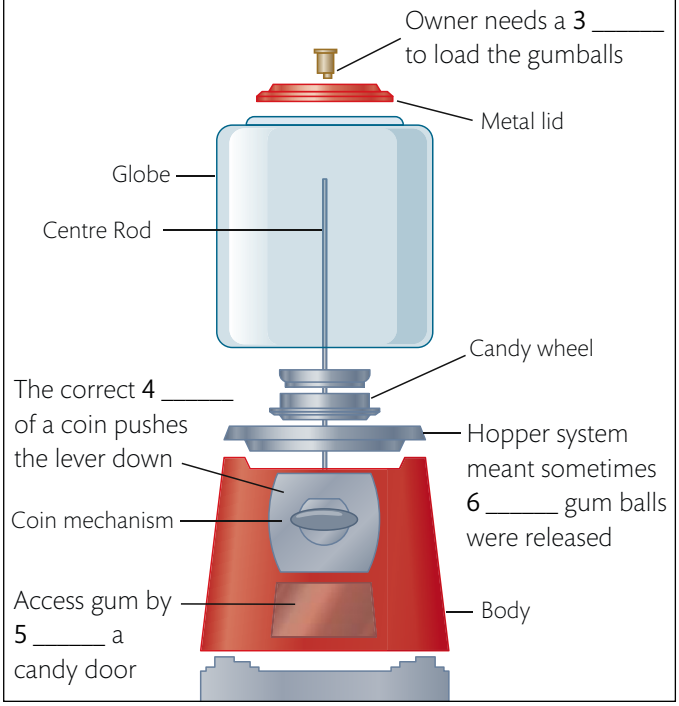
- First vending machine gave out 1 _____
- First modern coin machine sold 2 _____

Questions 3–6

Complete the diagram below.

*Write **NO MORE THAN TWO WORDS AND/OR NUMBERS** for each answer.*

The American gumball machine



Questions 7–10

Complete the table below.

*Write **NO MORE THAN TWO WORDS AND/OR NUMBERS** for each answer.*

Types of Vending machine:	
Systems	e.g. Mechanical vending machine 7 _____ systems, such as US newspapers
Products	Early machines – only 8 _____ products with a long shelf life Modern machines – Expensive products, e.g. cars and 9 _____
Popularity	Mostly public buildings, e.g. schools In Japan 10 _____ people per vending machine

Language development and vocabulary

Participle clauses (with *-ing* and *-ed*)

➤ EXPERT GRAMMAR page 177

1 Complete the sentences (1–6) with participle clauses (A–F).

1 I found a great website _____ who actually collects vending machines as a hobby.
2 There was a machine _____ by a Greek engineer.
3 The first gumball machine _____ came shortly after the British design.
4 The customer puts in a coin _____ and turning the hopper.
5 They had to turn this handle, _____ , which was also kind of fun.
6 The customer paid, then opened the door, _____ to all the newspapers inside.

A invented by the Thomas Adams Gum Company
B giving them access
C activating this crank system
D created in the first century
E belonging to a guy
F unlocking the candy door at the bottom

2a Read the text and replace the relative clauses in brackets with participle clauses.

Reading for pleasure

People have been reading for private pleasure for centuries. Even in the age of the internet, it has been suggested that people (who were born) 1 born after 2000 will depend on the ability to read and write more than any generation before them. Studies show that youngsters (who read) 2 _____ for fun on a regular basis do better in reading tests (which are taken) 3 _____ at school. Classes (which are designed) 4 _____ to teach the key reading skills don't always encourage people to read for fun. However, events (which focus) 5 _____ on shared reading often promote social skills as well as reading. Book Clubs (which involve) 6 _____ some kind of social aspect have been found to give a sense of belonging, and activities (which are based) 7 _____ on the review of books all have a positive effect. It may be surprising, then, to learn that at one time books were seen as a threat to intelligence. Seminars and talks (which were given) 8 _____ orally were the height of intelligent activity in Plato's time. There were concerns that anything that was written didn't test the individual's brain and powers of memorising enough!

b Work in pairs and discuss. What do you think are the benefits of reading as a hobby?

Culture and entertainment

3 Work in pairs and discuss the questions on culture and entertainment. Check the meaning of the words in bold in a dictionary if you are unsure.

1 What **role** do sportspeople play in your country?
2 What animal is used as a **symbol** of your nation?
3 What do people need to do to become a **celebrity** in your country?
4 Do you prefer **cosmopolitan** or traditional places?
5 What things make up a person's **identity**?
6 What kind of decisions are important to make **individually**, without help?
7 What are some of the features of a **multicultural** society?
8 What kind of a **society** do you come from?
9 It's important for politicians to be able to **relate** to others around them.
10 Many people prefer live **stage** shows to films or television.

4 Complete the text with a word from Exercise 3.

How to be Beyonce

You don't need a PhD to know that the **1** _____ , Beyonce, is fabulous, but apparently it helps. Beyonce has been a **2** _____ of success for many people since the start of her career, and now there's a seminar touring major universities around the UK called 'How to be Beyonce'. The lecture is about taking pop culture seriously, and the speaker has studied Beyonce's career from her days as a member of the band Destiny's Child to her performances singing **3** _____ as a solo artist. It seems we can learn a lot about the **4** _____ of successful women in modern **5** _____ . She has a very strong sense of **6** _____ , which many people would like to copy. She also tells her mostly female audience to be proud of being female and strong, and these values come across in her **7** _____ performances. At the same time, she values people from modest backgrounds, and this makes her easy to **8** _____ to. It is perhaps this last quality that gives her such popular appeal.

Speaking (Part 3)

A

B

C

Vocabulary development

1 Work in pairs and answer the questions.

1 Match the words to the pictures: **digital toy**, **doll**, **scooter**.
2 Do you think that *toys* should be **fun** or **practical**?
3 When you were a child, did you prefer being **indoors** or **in the fresh air**? Why?
4 Do you think toys have become too **commercialised** these days?

Focus on Pronunciation

2a Look at the Part 3 task. What kind of information do you need to give for each question (comparison, examples, reasons, opinion, etc.)?

1 What are some of the differences between physical toys and online games?
2 How do toys and games help develop children's social skills?
3 In what ways can toys be educational?
4 Why do some toys become more popular than others?
5 Do you think children can have too many toys?
6 Should governments allow toy companies to advertise directly to children?

b Turn to page 184 and look at the descriptors for Band 6 for *Pronunciation*. Match the sentences (1–3) with a sentence with a similar meaning in the band descriptors.

1 The speaker pronounces words clearly although makes some errors with pronouncing a sound or word.
2 The speaker can produce sounds, word stress and intonation.
3 The speaker sometimes produces sounds, word stress and intonation correctly but cannot do it all the time.

3a 5.9 Aisha is practising answering the first three questions. Complete the reasons 1–4, then listen and check.

1 Online games are bad for children's _____ , whereas physical games make them _____ .
2 Toys are good for children's _____ because they play in _____ .
3 Children like toys from _____ .
4 _____ toy can be educational.

b 5.10 Listen to Aisha answer Question 1 a second time. What does she do differently?

c Work in pairs. Take turns to answer Questions 2 and 3 in the test task. Use your answers in Exercise 3a to help you.

1 Use the language of introducing opinions.
2 Give reasons.
3 Sum up your point to structure your answers.
4 Pay attention to the pronunciation.

Test practice

➤ **TEST STRATEGIES** page 172

4 Work in pairs. Take turns to complete the test task in Exercise 2a. Record your answers so that you can listen later.

Assess and improve

5 Work in pairs.

1 What reasons did you give for your ideas?
2 How did you structure each of your answers?
3 How can you get more practice talking about different kinds of topics?

6 5.11 Work in pairs. Listen to the model pronunciation of the sentence below. Can you repeat it so that your pronunciation is similar?

I do think that toys and games can develop social skills. When they play with cars, or dolls, young children usually talk about what's happening. If they play games, they have to establish rules, and decide how to judge the winners. So I think that these games are very useful.

Reading (Multiple choice; Matching information)

Before you read

1 Work in pairs and answer the questions. Use a dictionary to check the words in bold.

1 How do you **select** the music you listen to?
2 How do you think you can predict a person's **taste** in music by looking at them or talking to them?
3 What music **genres** do you like? Do you have a favourite **recording artist**?

2 Look quickly at the passage on page 83. What is it about?

Test practice

➤ **TEST STRATEGIES** page 170

3 Complete the reading test. Remember to scan the text for synonyms of key words.

➤ **HELP**

1 Which words in the question more closely match 'the way you view others, or the way they approach problem-solving' in paragraph 1?

5–10 In which paragraph does the first name appear? What words in the questions might paraphrase 'a person's ability to relate to others'? Which question does that appear in?

Task analysis

4 Look at your answers to the questions.

1 Did you find synonyms or antonyms?
2 Look at Question 2 again. Check your answers with a partner. Why were the other options wrong? Check your ideas with a partner.

Questions 1–4

*Choose the correct letter, **A**, **B**, **C** or **D**.*

1 Cambridge researchers were able to predict a person's musical taste from
A their age and status.
B the friends around them.
C the way they think.
D the mood they are in.

2 The Cambridge psychologists' study was the first to
A consider music from different time periods.
B look at general music preferences.
C study the rules behind music composition.
D connect music to our deep emotions.

3 The participants in the study
A came from online communities.
B contacted the organisers themselves.
C were required to take part in the research.
D were unaware of music from other countries.

4 How did the researchers avoid music that might have a special meaning for the participants?
A by selecting participants with a lot in common
B by studying the participants over a period of time
C by presenting participants with a wide range of styles
D by using a series of tests to match participants to certain styles

Questions 5–10

Look at the following statements (Questions 5–10) and the list of researchers below.

*Match each statement with the researcher(s), **A–C**.*

***NB** You may use an option more than once.*

5 There is a weak connection between character and musical choice.
6 The research may teach us about people who find interaction challenging.
7 This was a new link between music and an existing theory.
8 The results of the research may be interesting to online music providers.
9 Musical choice can tell you a lot about a person's emotions.
10 The way you organise your thoughts and talk to people affects what music you like.

Researchers

A David Greenberg
B Jason Rentfrow
C Simon Baron Cohen

Can your musical tastes offer a window into how you think?

Do you like your jazz to be Norah Jones or Ornette Coleman, your classical music to be Bach or Stravinsky, or your rock to be Coldplay or Faith No More? The answer could give a better understanding of the way you think, say researchers from the University of Cambridge. We know that our music choices fluctuate over time as we grow and develop. For example, when people are very young, they may feel pressured into associating with a particular kind of music. And then we all choose some songs on the basis of our emotions at any one moment. However, these things are fairly temporary and often pass. Researchers at Cambridge believe that a person's taste in musical genre can be reliably predicted from cognitive factors, such as the way they view others, or the way they approach problem-solving.

Music is an important feature of everyday life and it is nearly everywhere we go. For this reason, it has attracted a lot of attention from psychologists. Previous studies have analysed how certain songs make us feel. Historical studies have looked at the way music is used culturally, such as in ceremonies to unite people. However, little was known about what determines our overall taste in music until this study research was published.

In the study of musical tastes, a team of psychologists identified two groups of people: 'Empathizers' who like to focus on and respond to the emotions of others, and 'systemizers' who like to analyse rules and patterns in the world. They found that by categorizing people into these two groups, they could more accurately predict what type of music they liked.

The researchers conducted a long and ambitious project, with multiple studies of over 4,000 participants who were found mainly through social media sites. They asked social media users to take a selection of psychology-based questionnaires; then the researchers placed the results on participants' social media profiles for others to see. At a later date, the same people were asked to listen to and rate fifty musical pieces. The researchers used library examples of music from twenty-six genres and subgenres with all of the volunteers to minimize the chances that participants would have any personal or national associations with the piece of music.

What they found was unexpected. According to David Greenberg from the Department of Psychology, although people's music choices change over time, this study shows that a person's ability to relate to others and their thinking style predicts what kind of music they like. He went on to argue that their cognitive style – whether they are strong on empathy or strong on systems – and how they communicate with others can be a better predictor of what music they like than their personality. For example, people who scored high on empathy tended to prefer soft music (from R&B, soft rock), unpretentious music (from country, folk) and contemporary music (from electronica, Latin, acid jazz, and Euro pop). They disliked intense music, such as punk and heavy metal. In contrast, people who scored high on systemizing favoured intense music. The results were the same even within a particular musical genre such as jazz: Empathizers preferred chill-out jazz, while systemizers preferred more adventurous, sophisticated jazz.

The researchers also analysed the music itself, and found that those who scored high on sociability preferred music that had low energy, and was often used to express negative emotions, such as feeling lovesick or depressed. They also preferred more emotional depth in their music. Those who were more systematic in tests preferred music that had high energy or positive emotions, and showed a high level of depth and complexity.

David Greenberg, also a trained jazz saxophonist, says the research could have implications for the music industry. 'A lot of money is put into algorithms to choose what music you may want to listen to, for example on internet music services like Spotify and Apple Music. By knowing an individual's thinking style, such services might in future be able to fine tune their music recommendations to an individual.'

Dr Jason Rentfrow, the senior author on the study, said that the line of research was significant. It highlighted how music mirrors the self, and can be an expression of how we're feeling, and is a reflection of our social and cognitive selves. Professor Simon Baron-Cohen, a member of the Cambridge team, added: 'This new study is a fascinating extension to the 'empathizing-systemizing' theory of psychological individual differences. It took a talented PhD student and musician to even think to ask this question. The research may help us to understand those at the extremes, such as people with autism, who are strong systemizers and may experience difficulty socializing.'

Writing (Task 2)

Lead-in

1 Work in pairs. What is your experience of video games? How has it affected the way young people play these days?

Understand the task

➤ EXPERT WRITING page 196

2a Read the essay question and underline the key words. Is this an advantages/disadvantages essay or an essay with a focus on comparing and contrasting?

Write about the following topic.

Some people have argued that video games are a waste of time, and people should spend their time and money on better hobbies. Compare and contrast the benefits of video games with other hobbies. In your opinion, which is more useful? Why?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

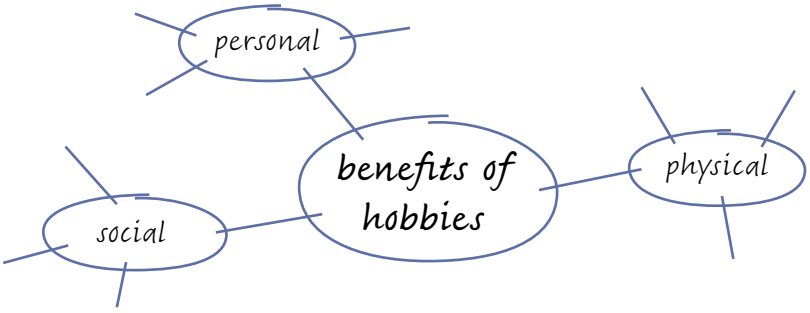
b What might be a 'better' hobby?

Plan the task

➤ TEST STRATEGIES page 171

3a Complete the spidergram with the collocations below. What hobbies do you think each one might describe?

be part of a community deal with disappointment develop quick reactions
interact with others learn better co-ordination pick up a new skill stay fit
train towards specific goals work as a team



b Turn to page 191 and look at the criteria for *Lexical resource*. What phrase best describes Band 6?

1 Use the necessary language to complete the task and control spelling.
2 Use less common words and phrases frequently.

4a Complete the table with notes on the topics below.

	Video games	Other hobbies e.g. _____
personal development		
opportunities to develop social skills		
_____		

b Select the best ideas and reject any that are not helpful. Decide how you are going to organise your paragraphs.

5 Write just the topic sentences for each of the paragraphs below.

Introduction:

Paragraph 1:

Paragraph 2:

(Paragraph 3):

Conclusion:

6 Work in pairs and discuss your plans. Answer the questions and make any necessary changes.

1 Do the topic sentences make sense?
2 Is the overall development of ideas good?
3 Do all the examples you're going to use make sense with those topic sentences?

Language and content

7a Work in pairs and match sentences (1–5) with the additional information (A–E).

1 Video games can help to develop problem-solving skills.
2 There may be a large amount of violence in a lot of games.
3 Activities such as art develop real-world skills.
4 Looking at screens for too long can cause eye problems.
5 People need to stay fit and get exercise if they sit down all day.

A This is **especially** true for young children, who have a lot of energy.
B **In addition to this**, many require players to work as a team.
C Doing this may lead to back problems, **too**, as it is unhealthy to sit down for too long.
D There may **also** be views which strengthen racial and female stereotypes.
E This can be useful for your career, **as well as** offering you a relaxing hobby.

b Look back at your plan. Use some of the connectors in Exercise 7a in places where you add ideas and/or examples to your points.

Write your essay

8 Write the essay in Exercise 2a. Follow your plan in Exercise 5. Remember to write at least 250 words.

Assess and improve

9a Work in pairs and discuss the questions.

1 How often do you repeat words? Can you think of other words you could use to avoid repetition?
2 Why is it important to think of vocabulary and phrases before you start writing?
3 How do linkers of addition help you to build a clear argument?

b Swap essays with your partner. Find:

1 two strengths.
2 one thing you might change to make it better.

10 What can you do to improve your spelling?

- read more
- note down spelling mistakes and review
- learn some spelling rules
- work with friends to test each other

11 Find another IELTS question. Write 4–5 topic sentences for that task. Do the ideas follow? What examples could you use? What vocabulary do you know that you could use?

Review

1 Match the beginnings of the sentences (1–6) with the endings (A–F).

1 There has always been a lot of money in creating
2 Most towns have a statue
3 Building a new art gallery is a major
4 Since the arrival of the internet,
5 Some pieces of artwork are national treasures
6 Nature has long been a source

A fake paintings that are supposedly by well-known artists.
B and a symbol of values in a nation.
C of someone historically important to the region.
D of inspiration for artists.
E decision as it costs a lot of money, but can also bring in a lot of tourism.
F style and design matter even more than ever.

2a Choose the best way to complete the answers to the speaking Part 3 questions below, (A or B).

Should we teach art in schools?
Do you think a qualification in art is useful?
What is the value of art in society?

1 Teaching art to children can allow them to express ideas and use their imagination.
A To do so would prevent them from showing their creative side.
B This may lead to a successful career in one of the many creative industries later in life.
2 Professions like television production or games design need a background in art.
A There has been considerable growth in these areas of economic interest recently.
B These skills are not shared by people who work in these industries.
3 Art has always been used by people in power to show their wealth and influence.
A Such art was only available to the poor.
B Such displays of expensive jewellery, clothing and home decoration are just as common today.
4 By learning about art and design young people can understand that words alone cannot express every emotion.
A Writing is more important than this approach.
B This role of art is so basic that it predates written language.
5 Art can help young people to see the world from different points of view.
A If they can do this, they will grow up to become better citizens in future.
B These new approaches cannot be taught through art lessons.

b Work in pairs. Practise saying the sentences in Exercise 2a and giving your own answers.

3 Complete the text with the words below.

cosmopolitan cultural identity multicultural military role society symbols

There are few **1** _____ of a country more important than the national flag. So when New Zealanders were asked whether they wanted to change their flag, it raised many questions about national **2** _____ and who they were. The main problem is that the existing flag is not very representative of modern New Zealand **3** _____ . It is a **4** _____ nation which celebrates its Maori past as much as its British heritage, but this is not reflected in the flag. Some opposed any change, saying it would disrespect the **5** _____ that the flag has played in the history of the country, and particularly in military campaigns. The flag first flew in a battle that cost the lives of more New Zealanders than any other. The change would also have involved huge cost to the nation. Others have argued that the nation has more pressing matters to be concerned with, and the modern, **6** _____ nature of modern New Zealand won't be affected by any change to the flag. In the end, in a referendum in 2016, New Zealanders decided to keep their flag as it is.

4a Complete the second sentence so it has the same meaning as the first, using reduced relative clauses.

Are hobbies a waste of time?

1 A hobby can be a source of personal pride, which leads to a positive outlook.
A hobby can be a source of personal pride, _____ .
2 A hobby which is based on physical exercise relaxes the body, while one which focuses on interests can be relaxing for the mind.
A hobby _____ relaxes the body, while one _____ interests can be relaxing for the mind.
3 A lot of people have second careers which allow them to make money from their passion or interest.
A lot of people have second careers _____ .
4 Having an interest which is shared with others allows you to meet people who are focused on similar things.
Having an interest _____ .
5 Studies also suggest hobbies which are practised on a regular basis can reduce negative emotions, which helps people to enjoy better health.
Studies also suggest hobbies _____ .

b Write a paragraph in answer to the question in Exercise 4a.

6 The natural world

6a Training
- **Reading:** Identify cause and effect (Short-answer questions)
- **Vocabulary:** The environment; collocations
- **Speaking:** Describe places (Part 2)
- **Listening:** Identify the correct word form (Section 4: Summary completion)
- **Language development:** Present perfect simple
- **Writing:** Describe changes over time (Task 1: Graphs)

6b Testing
- **Listening:** Section 2: Short-answer questions; Multiple choice; Summary completion
- **Language development and vocabulary:** Articles; Countable and uncountable nouns; Wildlife
- **Speaking:** Part 2: Describe an animal
- **Reading:** Matching headings; Short-answer question
- **Writing:** Task 1: Summarise a graph

Lead-in

1 Work in pairs. Look at the photos and answer the questions.

1 What do the photos show?
2 Write a list of positive and negative changes to the world in recent decades. Which do you think has had the most impact?
3 Do you think we are more or less environmentally friendly compared to fifty years ago?

2 Look at each problem and solution below. How effective do you think each solution is? Why? Are there alternative solutions?

Problem	Solution
Poor air quality in the city.	Provide better public transport to reduce car use.
Increased use of energy.	Promote use of renewable energy such as solar power.
Increased levels of waste.	Provide more recycling facilities.

6a Living with our environment

Reading (Short-answer questions)

Before you read

1a Work in pairs. How important are trees and plants to humans? Use the words/phrases below to discuss your ideas.

carbon dioxide economy ecosystem food
global warming health homes life pollution

b How popular are parks and gardens where you live? Why?

2a Read the heading of the passage. Who do you think *Mother Nature* is? What might the passage say?

b Read the passage to check your predictions. What is the main idea of the passage?

Identify cause and effect

3a Look at the underlined phrases in the passage. Which two phrases:

1 introduce the cause of something?
2 introduce the result of something?
3 say there was an effect?

b Which phrases are formed by:

1 verb + noun?
2 verb + preposition?

c Find a place in the passage where *because* joins two clauses and choose the definition of a clause.

1 A paragraph in a text with more than two sentences.
2 A group of words that contains a verb and often a subject.

4a Look at the first circled word in the passage. What does *which* refer to: a noun or a clause?

b What ideas do the other circled words refer to: nouns or clauses?

5a Read the passage and answer the questions.

1 According to the research in the passage, what have Earth's plants helped with?
2 What was different after very old woodland was destroyed?
3 What do Earth's forests and seas keep us safe from?
4 What does a rise in carbon dioxide lead to?

b How did cause/effect phrases and *which* help you answer the questions in Exercise 5a?

CAN WE RELY ON MOTHER NATURE?

Could Mother Nature be coming to our rescue again? New research indicates that the Earth's vegetation has been absorbing more carbon dioxide than had been thought, which has led to a reduction in global warming and will give us more time to get it under control.

Mother Nature has been very kind to us. For centuries she took everything humans threw at her without seriously fighting back. The green land we have in Britain today is the result of the destruction of ancient forests which changed our ecosystem significantly. However, this land now takes care of a much bigger population at a higher standard of living in what is still mainly a beautiful country.

The Industrial Revolution had an impact on some parts of the country, but did not endanger the world as a whole. Air and water pollution had an effect at a local level but, until recently, no global effect. Even with today's environmental issues, the Earth's oceans and vegetation take in half the carbon dioxide we produce, which protects us against climate change.

Recently, however, there have been worrying signs that this protection is weakening. Warming seas, for example, may be taking in less carbon dioxide, which makes the new research findings on plants very welcome. The increase in carbon dioxide in the atmosphere results in greater plant growth and these extra plants take in more carbon dioxide. The researchers say we underestimated the amount by sixteen percent because the gas remains in leaves for longer than had been thought. If they are right (and other scientists believe the research is good), it seems that nature is even kinder than we realised.

Test practice

➤ **TEST STRATEGIES** page 169

6a Read the test task and underline the key words in each question.

b Which word, synonym or paraphrase could you look for in the passage below to find the answer to Question 1?

c Scan the passage opposite to find the answer to Question 1. Did the word/synonym/paraphrase from Exercise 6b help you?

d Look for words, synonyms or paraphrases for questions 2–5 and scan the passage for the answers.

Answer the questions below.

*Use **NO MORE THAN THREE WORDS** from the passage for each answer.*

1 What aspect of our changing climate causes forest fires?
2 Which part of global warming are experts in agreement about?
3 What form of sunlight goes back out of the atmosphere?
4 What improves a cloud's ability to reflect the sun?
5 What connects the Arctic to bad weather in Britain?

Task analysis

7 Work in pairs and discuss the questions.

1 On a scale of 1–10 (1 = easy, 10 = difficult) how easy was it to find the answers in the passage? Did synonyms or paraphrases help you?
2 Which questions did cause/effect phrases or *which* help you answer?

Discussion

8 Read the second half of the article in depth. Then, work in groups and answer the questions.

1 Are you surprised by the fact that there are benefits to our pollution? Why/Why not?
2 Should this information change how whether we stop pollution in the future?

But, as scientists also point out, there are limits to Mother Nature's patience. The positive effect of carbon dioxide on plant growth is unlikely to continue in the long term because trees and vegetation meet other problems, most importantly a lack of nutrients such as phosphorus and nitrogen that they need to grow.

Global warming brings other problems too. For instance, tree-killing insects do better in warmer temperatures. One example is the pine bark beetle, which has killed 45 million acres of forest in western Canada and north-west America. Also, climate change leads to drier weather which results in more forest fires. These release huge amounts of carbon dioxide into the atmosphere.

The positive and negative effects of global warming cause much debate in climate science. However, the basic physics of global warming are agreed by scientists. Sunlight passes through the atmosphere, like glass in a greenhouse, warming the Earth. Much of it is reflected back as infrared radiation and a large amount of it is absorbed by greenhouse gases like carbon dioxide in the atmosphere, heating the world further. Without this natural process, the Earth would be 20°C colder, and humans would not be able to live here. However, when we produce more carbon dioxide, it increases greenhouse gases. This causes even higher temperatures.

Although scientists agree on this, they do not always agree on how we deal with nature's acts of kindness. Clouds are a good example of this. They naturally send heat back out into space but air pollution results in a further increase in this effect. As we clean the pollution from our skies, we send less heat back into space. Similarly, increased temperatures result in melting ice which leads to rising seas. But these actually absorb more heat.

All in all, it seems that an increase in carbon dioxide will not warm the Earth as much as we had thought. However, we still need to take immediate action. For leading scientists, it is important to focus on the changes the world has already experienced from low levels of warming. These include the tree-killing insects and the melting ice in the Antarctic and the Arctic. Interestingly, the latter is being increasingly linked to storms here in Britain.

If we can't solve this problem, what will happen when the Earth gets even warmer? Perhaps nature is trying to send us a warning.

Vocabulary

The environment

1a Put the words below in the correct place in the table. What part of speech is each word?

breeze cave degrees centigrade cliff coastline flood fog harbour humid lightning ocean rainforest soil snowy storm stream thunder volcano waterfall windy

Geographical features	Weather and climate

b Work in pairs and discuss the questions. Try to use as many of the words in Exercise 1a as possible.

1 Which of the geographical features can you find in your country? Which can you find in your region?
2 What is the weather like at different times of the year in your country?

2a Match words from A with words from B to make phrases related to the environment.

air-pollution

A

~~air~~ climate energy forest fossil global greenhouse nuclear water

B

change crisis energy fire fuels gases ~~pollution~~ shortage warming

b Work in a groups. Which of the things in Exercise 2a are concerns in your area? Why? What are some solutions?

3a Complete the text with the words below.

effect debated indicates instance global positive

For some time people have 1 _____ whether global warming exists at all and if so, what has caused it. Research 2 _____ that temperatures have increased and scientists now agree that humans have had an 3 _____ on this. However, there are still a small number of people who believe that climate changes on a 4 _____ scale are natural. These are often people in the political arena, which means their opinions receive more attention in the media than scientific viewpoints. If a politician states, for 5 _____ , that a large increase in greenhouse gases is not man-made, newspapers print it and people hear it. For us to have a 6 _____ effect on climate change, we need to be accurately informed.

b Work in pairs and discuss the questions.

1 Do you think people are aware of the effects of global warming? Why/Why not?
2 In what ways can education help to solve the problem? Will education always change how people behave? Why/Why not?

c Using the notes below, write a short paragraph that includes at least five words from Exercise 2a, changing their form if necessary.

Past – people argue, global warming.
Today – research, average temperature Earth ↑ by 0.4 to 0.8°C, last 100 years.
Main cause over last 50 years, world = fossil fuels. + Land clearing.
Might rise by 1.4 to 5.8°C by 2100.
Impact = melting ice,
rising seas,
dangerous weather conditions
Need action.

Collocations

4a Complete the statements with the words below. Use the words in bold in the sentences to help you.

effect global huge issue lack levels living natural

1 Global warming is a _____ **process** which we cannot do anything about.
2 We have to choose between the environment and our current **standard of** _____ .
3 The main **environmental** _____ for us to address is water pollution.
4 Pollution should be dealt with locally, even though it has a _____ **effect**.
5 People in areas with **low** _____ of pollution do not need to be eco-friendly.
6 Many governmental measures are having a **positive** _____ on pollution.
7 As a _____ **amount** of pollution is caused by businesses, they should clean it up.
8 A _____ **of** agreement between countries is the biggest threat to the environment.

b Work in groups. Discuss whether you agree or disagree with the statements in Exercise 4a.

Speaking (Part 2)

Describe places

1 Work in pairs. Look at the photo and answer the questions.

1 Which country do you think this is?
2 What do you think you can see and do there?
3 Have you visited or would you like to visit this place? Why/Why not?

2a Are the adjectives below positive, negative or neutral? This might depend on the context.

amazing basic colourful convenient dull exciting fascinating interesting gorgeous historic lively modern narrow overcrowded peaceful pretty relaxing romantic safe spectacular stressful tasty unattractive unusual

b Mark the word stress on each adjective. Which words are difficult to say? Practise saying them.

c Work in pairs. Use adjectives in Exercise 2a to describe the place in the photo.

3a 6.1 Listen to Marta talk about India. Tick the adjectives in Exercise 2a that she uses. What effect does this have on the listener?

b Replace the word *interesting* with adjectives from Exercise 2a. Change the article where necessary.

1 The whole area looked interesting.
2 The Taj Mahal is an interesting building and its history is interesting too.
3 In New Delhi there were some interesting places.
4 People in India wear interesting clothes.
5 We tried some of the interesting food.
6 All in all, we had an interesting time.

c 6.2 Listen to Marta repeat the task.

1 Note down the adjectives she uses to replace *interesting* in the sentences in Exercise 3b.
2 What effect do these adjectives have on the listener?

4a 6.3 Listen to Mubarak talking about the same place. Complete each sentence with a word.

1 I think they're _____ lively and colourful.
2 For example, there was a _____ pretty old fort there.
3 Some of the buildings were old and _____ unattractive.
4 It didn't look _____ safe to me but it was OK for them.
5 Some of the streets were narrow so it was _____ stressful to walk around.
6 It was an _____ amazing place to visit.

b Work in pairs and answer the questions.

1 How do the words in the gaps change the meaning of the adjectives?
2 Which of these words is more informal than the others?

5 Work in pairs. Take turns to describe the place where you live. Use a range of adjectives.

Test practice

➤ **TEST STRATEGIES** page 172

➤ **EXPERT SPEAKING** page 188

6a Read the test task. Make notes about what you are going to say, including some adjectives you could use. You have one minute.

Describe a place you enjoyed visiting.
You should say:
where you went
who you went with
what you did there
and what you thought about it.

b Work with a different partner. Take turns to give your talk. Try to speak for between one and two minutes.

Task analysis

7a Work in pairs and discuss the questions.

1 Did you use a range of adjectives to describe the place? What helped or stopped you?
2 What can best help you use a range of adjectives in Task 2 in future?
- Memorise new adjectives.
- Practise describing lots of different things before the test.
- Note down a variety of adjectives in the one-minute planning time.
- Repeat the task again to try to improve.

b Work with a different partner. Repeat the task. Try to improve your use of adjectives or use different adjectives.

Listening (Section 4)

Before you listen

1 Work in groups and discuss the questions about the places below.

a dry desert a tropical island a high mountain range
a rainforest the polar region

1 What do you think the weather is like?
2 What kinds of food might grow there?
3 How do you think humans can survive there?

Identify the correct word form

2a Match the word forms below to the rules (1–7). More than one answer maybe possible.

adjective comparative adjective superlative adjective
adverb singular noun plural countable noun
uncountable noun *-ing* verb

1 It comes after *a/an/the* and sometimes after an adjective.
2 It comes before an adjective or after a verb.
3 It comes before a noun or after *be/seems/looks*.
4 It is the subject of the sentence or comes after a preposition.
5 It comes after *the* or no article and sometimes after an adjective.
6 It comes after *much* and/or before *than*.
7 It comes after *the* and before a noun.

b Choose the correct form of the missing word in each gap from the options in Exercise 2a.

1 The purpose of shivering is to create more _____ .
2 When cold, our blood focuses on heating the most _____ organs.
3 In _____ temperatures, we experience the death of _____ in our hands, feet, etc.
4 Without heat, cells _____ disappear forever.
5 There is a _____ difference between the internal temperature and skin temperature of a woman and a man.
6 _____ temperature changes is more difficult for older people and puts them at risk.

c 6.4 Listen and write one word in each gap in Exercise 2b. Did you predict the correct word form?

3 Look at the audio script 6.4 on page 210. How does the speaker paraphrase the words/phrases (1–8)? The sentence number is in brackets.

1 the creation of more (1)
produce a greater amount of
2 focuses on (2)
3 heating (2)
4 In very cold temperatures (5)
5 we experience the death of (5)
6 disappear forever (6)
7 temperature changes (11)
8 difficult (11)

Test practice

➤ **TEST STRATEGIES** page 169

4a Quickly read the test task and summary. What will the recording be about?

b Predict the type of missing word(s) in each gap. Can you guess what the actual words might be? You have 30 seconds.

c 6.5 Listen and complete the test task.

Questions 1–6

Complete the summary below.

*Write **NO MORE THAN TWO WORDS AND/OR A NUMBER** for each answer.*

Humans need the correct 1 _____ , clothing and shelter to cope with freezing conditions. In Siberia, people live with average winter temperatures of 2 _____ °C, while still doing typical everyday activities. However, they only usually stay outside for up to 3 _____ at a time.

Humans can cope with freezing temperatures without it harming them. We can survive a zero temperature, even in 4 _____ . However, 5 _____ can change the temperature dramatically, making it seem much colder. This can put us in a very unsafe situation within 6 _____ .

Task analysis

5 Work in pairs and discuss the questions.

1 How did trying to guess the missing word help you?
2 Were you able to do it in thirty seconds?
3 What could help you next time?
- Read key words in each sentence only.
- Ignore words you do not understand.
- Focus only on the words around the gaps.

Discussion

6 Could you live in a very cold area like Siberia? Why/Why not?

Language development

Present perfect simple

➤ EXPERT GRAMMAR page 177

1a Underline the present perfect simple verb in each sentence.

1 I've recently been to Yakutsk.
2 The right clothes are important, especially if a gale has just started blowing.
3 There are towns in that area that have recorded over -60°C.
4 The Yakutsk people have lived in that region for around 800 years.

b Match the sentences (1–4) in Exercise 1a with their uses (A–D).

A an action which started in the past and continues today
B an action which happened a very short time ago
C an action which happened in the past but we do not know exactly when, with a present result
D with *just*, *already* and *yet*

2a Look at the two sentences. When do we use *for*? When do we use *since*?

1 People have lived there for around 800 years.
2 People have lived there since around 1200.

b Decide if the time expressions below go with *for* or *since*.

last year three decades over an hour a few seconds
a long time the beginning of the month
several months hours November a week

c Work in pairs. Take turns to make sentences about your life using the verbs below in the present perfect simple and *for/since*.

be become have feel know like live own want work

I've lived here since I was three.

3 Write sentences from the prompts using the present perfect simple and *for/since*.

1 Death Valley, California/hold the record/highest temperature/1913
Death Valley in California has held the record for the highest temperature since 1913.
2 Some parts of the Atacama Desert/have no rain/years
3 Vostock station in Antarctica/officially be/the coldest place on Earth/1983
4 Eureka, Canada is the coldest inhabited place. People/live/there/over sixty years
5 People/inhabit/Sahara Desert/thousands of years
6 The Sahara Desert/be/dry/6,000 years. Before that, it was green and wet

4a Look at the sentence. Why does the speaker use the past simple in the second clause?

Although people have lived in Yakutsk for centuries, the population grew quickly after 1880 because of gold mining.

b Complete the Task 1 description with the correct form of the verbs in brackets.

As we can see from the graph, the average temperature in the summer 1 _____ (rise) significantly since 1972, from 24.3°C to 26.2°C. Last year alone, it 2 _____ (increase) by 0.15°C. The average spring temperature 3 _____ (not/go up) quite so significantly since 1965 but there 4 _____ (be) a noticeable increase of 0.33°C between 2001 and 2016. The autumn and winter temperatures 5 _____ (become) warmer too. The average autumn temperature 6 _____ (rise) by 0.07°C between 1972 and 2015, while the average winter temperature 7 _____ (go up) from -2 to -1.78°C.

c Work in pairs and answer the questions.

1 How has the climate in your country shaped your life? Think about work, home, clothing, free time, transport, etc.
2 What changes have you noticed in the temperatures in your country?

5a Look at the sentences with adverbs *just, already, recently* and *yet* and answer the questions (1–4).

The teacher's just given us a test.
I've recently learnt how to pronounce the word 'temperature' properly.
Have you done your homework yet?
– No, I haven't done it yet but I will soon.

1 Which adverbs appear in a positive sentence?
2 Which adverb appears in a negative sentence or question?
3 Which adverb sits at the end of the sentence/question?
4 Which adverbs sit between the auxiliary verb and main verb?

b Work in pairs. Look at the list of IELTS tasks and skills and discuss the questions.

Plan an essay Match headings (reading)
Write a cause/effect essay Describe a place (speaking)
Label a map (listening) Describe a table
Answer multiple-choice questions (listening)
Practise using *for/since* Describe probability
Use transport vocabulary
Identify cause/effect in a text (reading)
Practise using the passive

1 Which of these have you *already done*?
2 Which have you *just* or *recently studied*?
3 Which have you *not studied yet*?

c Which skills in Exercise 5b are you confident about? Which do you need more practice in?

Writing (Task 1)

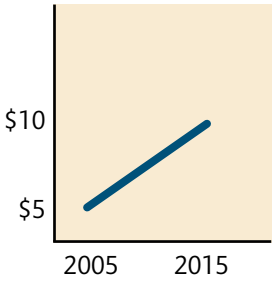
Describe changes over time

1 What different types of charts or graphs tend to appear in the IELTS test? Which can show changes over time?

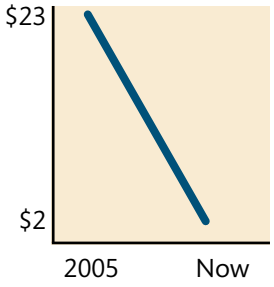
2a Match the verbs below with the graph they describe A–D.

decrease double fall go down go up increase reach a peak remain the same rise remain stable stay the same

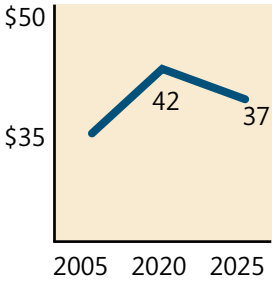
A



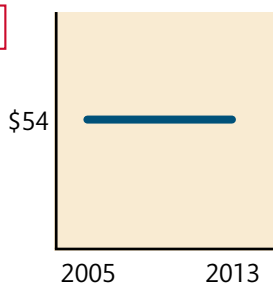
B



C



D



b Complete the sentences which describe graphs A–D. Use a verb in the correct tense in the first gaps and a number in the other gaps.

A The number *doubled* from *5* to *10* between 2005 and 2015.
A The cost _____ by $ _____ between 2005 and 2015.
B The cost _____ from $ _____ to $ _____ since 2005.
C The cost _____ in 2020 and then drop from $ _____ to $37.
D The cost _____ at $54 over an _____-year-period to 2013.

c Why is it important to include a number? What prepositions are used to describe each number?

3a How do the adverbs change the meaning in each pair?

1 decrease slightly/decrease sharply
2 rise significantly/rise steadily
3 grow gradually/grow dramatically

b Write three sentences to describe the changes in graphs A–C using a verb and adverb from Exercise 3a.

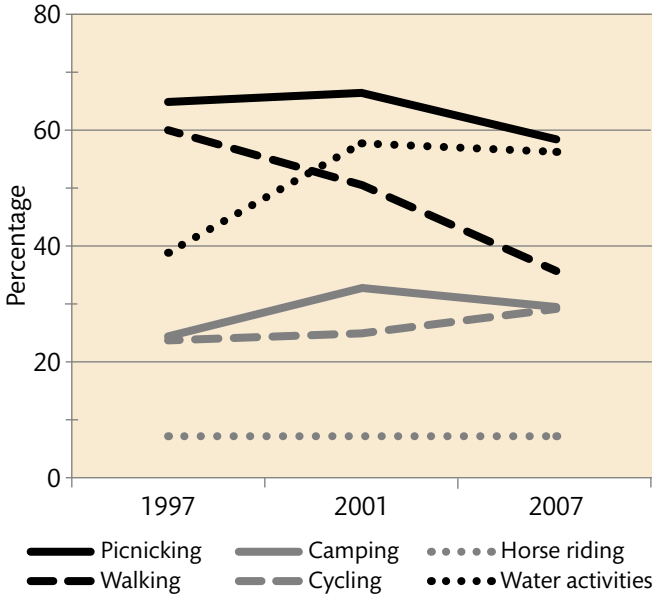
Test practice

➤ TEST STRATEGIES page 171

4a Work in pairs and discuss the questions.

1 What do the graph title and labels show?
2 What is the main thing we learn from the graph?

Percentage of people participating in outdoor activities in Australia



b Complete the description with an appropriate word or number. Use a variety of verbs.

This line graph 1 _____ the proportion of people in Australia who did six different 2 _____ outside over a ten-year period. We can 3 _____ from the data that 4 _____ of the six activities fell in popularity between 2001 and 2007, with only one increasing slightly. The most significant fall was walking. In 1997, around 5 _____ percent of people enjoyed walking as an outdoor activity. This dropped 6 _____ 50 percent in 2001 and then 36 percent in 2007.

Picnicking and water activities followed similar patterns, increasing then 7 _____ over the twenty-year period. The percentage of people who enjoyed picnicking increased 8 _____ between 1997 9 _____ 2001 while the proportion of those taking part in water activities 10 _____ more significantly 11 _____ just under 40 percent 12 _____ nearly 60 percent. Picnicking then decreased more 13 _____ to less than 60 percent in 2007 whereas water activities 14 _____ by just two or three percent.

c Write a paragraph comparing the data for camping, cycling and horse riding.

d Swap your paragraph with a partner. Check that:

1 the information is accurate.
2 the verbs describing change are accurately used.
3 correct prepositions and numbers are used.

Listening (Section 2)

Before you listen

1a Work in groups. What do you know about the animals below?

bear chimpanzee elephant gorilla panda parrot penguin snake

b What are the advantages and disadvantages of zoos? Think about these things.

the animals in the zoo the animal species the cost the visitors

Test practice

➤ **TEST STRATEGIES** page 169

2 6.6 Complete the test task. Remember to predict the word form in each gap and the possible missing word in the summary.

➤ **HELP**

2 What is another word for 'animal type'?

10 What type of word is likely to come after 'the most'?

Task analysis

3 Work in pairs and discuss the questions. Look at the audio script 6.6 on page 210 to help you.

1 What synonyms of the words in Questions 1 and 2 did you hear?
2 Why were the three incorrect options in 3 and 4 incorrect?
3 After the recording finished, did you read the completed summary (5–10)? Why is this useful?

Questions 1–2

Answer the questions below.

*Write **NO MORE THAN THREE WORDS AND/OR NUMBERS** for each answer.*

1 Where did the zoo owners first keep animals?
2 How many different types of animals live at the zoo?

Questions 3–4

*Choose TWO letters **A–G**.*

*Which **TWO** animals are currently included in the zoo's breeding programme?*

A rhino
B tiger
C elephant
D gorilla
E panda

Questions 5–10.

Complete the summary below.

*Write **NO MORE THAN TWO WORDS** for each answer.*

Zoos provide 5 _____ and educate us. Through 6 _____ done in zoos, we can learn more about wild animals, for example how to help them 7 _____ . However, it is important to regularly question the 8 _____ of zoos. Scientific research suggests that just 25 percent of 9 _____ are among the 2.6 million animals in zoos around the world and it is probably an even lower percentage for endangered animal species. It is possible that only the most 10 _____ species are kept so visitors keep coming.

Language development and vocabulary

Articles

➤ EXPERT GRAMMAR page 178

1a Complete the sentences with *a*, *an*, *the* or zero article.

I'm here to tell you 1 _____ little bit about the conservation work at Milton Zoo. 2 _____ zoo was started by 3 _____ family who first had animals in their garden, where they also grew and sold 4 _____ plants. 5 _____ family's friends would visit just to see 6 _____ animals so they decided to open 7 _____ zoo to the public. 8 _____ development of 9 _____ zoo since then has been huge. It's now around 100 acres, making it one of 10 _____ largest zoos in the country.

b Why is *a, an* or *the* used in each gap?

Countable and uncountable nouns

2a Complete the table with the words below.

accommodation development education garden glass news number plant programme research result space species time website wildlife

Countable	Uncountable	Countable + uncountable	Always plural

b Choose the correct option in *italics* to complete the rules.

Countable noun + singular or plural verb
Uncountable noun + 1 *singular / plural* verb
Plural noun + 2 *singular / plural* verb

3 Choose the correct option in *italics* to complete the text. Look carefully at the nouns that follow.

An evil animal?

The aye aye is a lemur that **1** *live / lives* in the forests of Madagascar. Its hunting behaviour **2** *is / are* unusual as it uses one of its fingers to make holes in trees and pull out small insects. Time **3** *is / are* important to the aye aye. It comes out exactly thirty minutes before the sun sets to hunt. During the day it sleeps, so opportunities to see the animal **4** *is / are* few.

The aye aye **5** *is / are* an endangered animal although research **6** *tell / tells* us that there are more in the wild than first thought. This news **7** *is / are* very positive, although animal groups **8** *continue / continues* to introduce programmes that protect the areas where the aye aye lives.

Wildlife

4a What kinds of animals are related to the words/phrases below: mammal, bird, insect or reptile? You can use the words/phrase more than once.

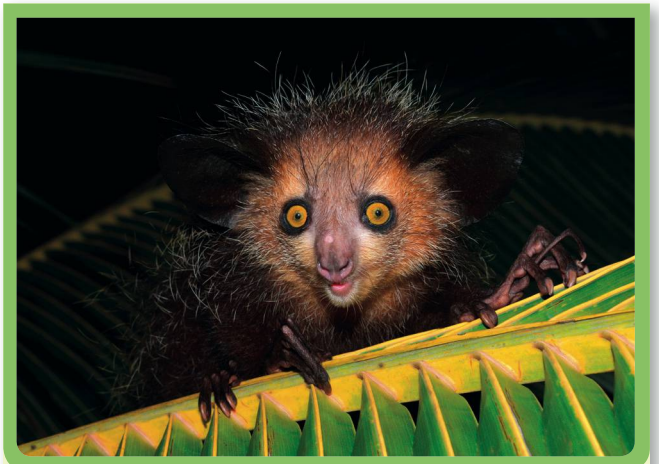
bark buzz feather fur lay eggs nest paw tail tweet wing

b Work in groups. Each think of an animal. Take turns to ask and answer *yes/no* questions to try to guess each other's animal.

Does it have feathers? Does it live in the rainforest? Is it found mostly in Africa?

5a Complete the second half of the text in Exercise 3 with the words below.

adult behaviour breeding cage creatures die out female fur males nest tail wildlife



A young aye aye is covered in silver **1** _____ but this becomes thick and brown when it becomes an **2** _____. Aye ayes are usually around one metre in length, with a **3** _____ as long as its body. It has teeth which continue to grow so it can chew through tree bark. It also has a thin middle finger and a very long fourth finger. Ayes ayes live naturally in the rainforest but, like other **4** _____ which lives here, it has had to adapt to new conditions when parts of the rainforest have been destroyed. Aye ayes sleep in a **5** _____. They are not particularly social **6** _____ although the **7** _____ do sometimes spend time together. Like many species, the **8** _____ is the more dominant of the two sexes. Because the **9** _____ of local people towards the aye aye means it is more likely to be killed than be caught and kept in a **10** _____, a few organisations are worried that it might **11** _____. To prevent this from happening, they are **12** _____ ayes ayes in captivity.

b Work in pairs. Did you know about the aye aye before you read the article? Why do you think local people believe it is evil?

Speaking (Part 2)

Vocabulary development

1 Work in pairs and answer the questions.

1 Look at the animal in the photo. What is it?
2 How could you describe it? Use the words below to help you.

attractive angry cute dangerous furry extinct large lively poisonous powerful pretty rare shy social strong tiny well-trained wild

Focus on Lexical resource and Pronunciation

2a Read the test task. What animal could you talk about?

Describe an animal you like.
You should say:
What it is
What it looks like
Where you can see it
and why you like it.

b 6.7 Listen to Jorge doing the test task and answer the questions.

1 Does he talk about the subject for a long time, using a variety of vocabulary?
2 If he doesn't know a word, does he describe it well using different words?
3 Does he use words correctly?

c 6.7 Listen again and answer the questions about Jorge's pronunciation.

1 Does he pronounce words clearly so you can understand him?
2 Does he sound interested in what he is saying?

d Work in pairs and answer the questions.

1 How could Jorge improve his use of vocabulary?
2 How could Jorge improve his pronunciation?

Test practice

➤ **TEST STRATEGIES** page 172

3 Work in pairs and take turns to do the test task in Exercise 2a.

1 Make notes about what you can say. You have one minute. Try to use the adjectives in Exercise 1.
2 Speak for between one and two minutes. Record your answers so that you can listen later.
3 Assess your partner's speaking using the questions in Exercises 2b and 2c.

Assess and improve

4a Give your partner feedback on his/her performance in the test task.

1 Say two things he/she did well. What did he/she do well?
2 Say one thing he/she could do better next time.

b How could you improve? Choose some ideas from the list.

- Learn and practise using more words
- Practise using vocabulary more accurately
- Practise pronouncing words more clearly
- Practise intonation and sentence stress to sound more interested

Reading (Matching headings; Short-answer questions)

Before you read

1 Work in pairs and answer the questions.

1 For what reasons do people hunt animals?
2 Do you think all these reasons are good reasons?

Test practice

➤ **TEST STRATEGIES** page 170

2 Complete the test task. Use cause/effect language to help you answer some questions.

➤ **HELP**

1–6 Remember to make sure the heading matches the meaning of the whole paragraph.

8 Look for language in the passage which describes a change for the worse.

Task analysis

3a Work in pairs. Look at any answers you got wrong for questions 1–6. Why were they wrong?

1 You did not understand the heading.
2 You did not correctly identify the main idea in the paragraph.
3 The vocabulary in the passage was too difficult.
4 A different reason.

b Look at any answers you got wrong for questions 7–10. Why were they wrong?

1 You did not find the right information in the passage.
2 You did not read the whole section carefully.
3 You did not understand the language in the question or passage.
4 A different reason.

Questions 1–6

The reading passage has seven paragraphs, ***A–G****.*

Choose the correct heading for paragraphs ***A–F*** *from the list of headings below.*

List of Headings

i Using hunting to stop a worse crime
ii Legal hunting has little financial benefit
iii Trying to make a living
iv Start by learning about the problem
v Different agricultural styles lead to different outcomes
vi Emotional reactions may have negative consequences
vii The system is not perfect but can be beneficial
viii Motivation to take care of animals
ix Travelling to Africa by plane

Example Paragraph **G** iv

1 Paragraph **A** _____
2 Paragraph **B** _____
3 Paragraph **C** _____
4 Paragraph **D** _____
5 Paragraph **E** _____
6 Paragraph **F** _____

Questions 7–10

Answer the questions.

Use ***NO MORE THAN THREE WORDS AND/OR A NUMBER*** *from the passage for each answer.*

7 What do trophy hunters provide that helps prevent the unlawful killing of animals?
8 What greatly reduced wild animal numbers in the past in Namibia?
9 What stop animals in Namibia from moving from place to place?
10 What percentage of trophy hunting income goes to local villages?

Examining the African Hunting Debate

A When a famous Zimbabwean lion was hunted and killed by a foreign tourist, people on social media were furious. This resulted in an airline ban of the transportation of trophies killed by tourists and people repeatedly asking travellers to avoid countries that allow this kind of trophy hunting. Trophy hunting describes legal hunting where people pay to do it. It is permitted in countries including Namibia, South Africa, Tanzania and Zambia. While many people are disgusted by this, what they don't often realise is that stopping this kind of hunting might actually do more harm than good.

B Let's look at Namibia for example. The local Minister of Environment and Tourism, Pohamba Shifeta, said that if airlines stopped transporting wildlife trophies, this would prevent the Namibians from protecting wildlife in their country. This is because the money that people pay to trophy hunt is used to stop illegal hunting, which is a much bigger problem than legal hunting. This suggests that trophy hunting can have a positive impact on the protection of wildlife, in theory at least.

C Namibia is often described as trophy hunting's biggest success story. It is indeed true that hunting played an important role in increasing the number of wild animals after wars in the 1970s and 80s negatively affected herd sizes. Today there are still eighty animal protection organisations in Namibia that rely completely on money from legal hunting. As Namibian journalist John Grobler says, farmers look after their animals better if they sell them to hunters. Namibia is currently experiencing a lack of rain which means some farmers may not have enough food for their animals. If they can't earn money from their animals because hunting is stopped, farmers may decide to let them die. If hunting is stopped altogether, farmers will let the whole herd die.

D In Botswana, hunting large animals is now illegal for everyone and they have not suffered from the problems that John Grobler suggests above. However, there is a big difference between Botswana and Namibia – in Botswana there are no fences between people's land, which means animals are able to move around freely. If farmers stop feeding them, they just go somewhere else to find food. In Namibia there are fences so the same thing will not happen there. Botswana's ban on hunting is not without its problems, however. Large, wild animals are regularly killed when human life, food crops or farm animals are put in danger. In fact, this kind of animal death is considered to be a bigger killer than controlled hunting.

E Interestingly, in a recent article, Botswanan villagers said they would protect local wildlife better if they could earn money from it through hunting. However, this opinion goes against the results of a large study carried out by Economists at Large. They concluded that in nine African countries that allow trophy hunting, the 'sport' accounted for just 1.8 percent of total tourism revenue, while, more importantly, only 3 percent of the money actually reached the communities where hunting occurs.

F So what does all of this tell us? It tells us that whatever we might think about the hunters, hunting can have a positive effect – both for wildlife and for African people – when and where it is properly and ethically managed. However, too often the opposite occurs and the industry suffers from bad management and bad ethics. It also tells us that trophy hunting is far more complex than both those who love it and those who hate it often realise. So while the hunting industry might need some serious changes, it's perhaps not time to stop it completely when African wildlife organisations have no other way of making money. It is interesting to look at Zambia in this regard. Before hunting was stopped in 2013, 60 percent of the Zambian Wildlife Authority's (ZAWA) revenue came from legal hunting. Today, ZAWA has very little money and has had to receive some from the Zambian government more than once.

G So what can we do? Apart from supporting Africa's national parks and wildlife areas as photographic tourists, there are no easy answers or quick solutions. But if we first try to understand the issue, it is a step in the right direction. And while this situation might make us angry, remember that shouting at our computer doesn't really help anyone.

Writing (Task 1)

Lead-in

1 Work in pairs and discuss the questions.

1 Why do some animals become extinct?
2 Should we be worried when animal populations fall? Why/Why not?
3 Is it worth spending time and money on increasing populations again? Why/Why not?

Understand the task

➤ **EXPERT WRITING** page 197

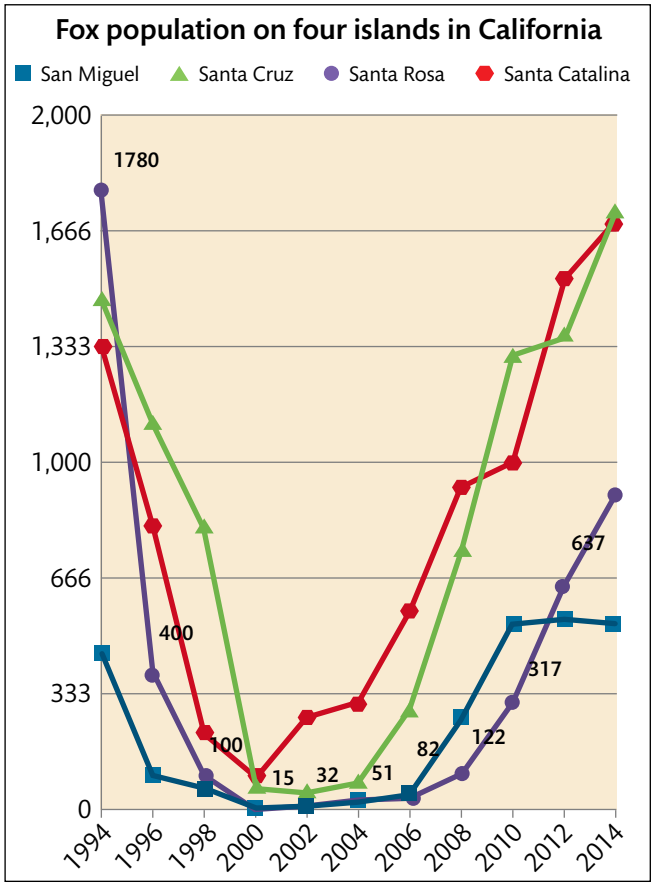
2 Read the test task and look at the information in the graph. Underline the key words.

You should spend about 20 minutes on this task.

The graph below shows the population of foxes on four different Californian islands between 1994 and 2014.

Summarise the information by selecting and reporting the main features and make comparisons where relevant.

Write at least 150 words.



Plan the task

➤ **TEST STRATEGIES** page 171

3a Work in pairs and answer the questions.

1 What is the graph about?
2 What is the most important feature of the graph?
   A The Santa Rosa fox population fell most significantly in 1994.
   B The population of foxes on all islands fell and then increased.
   C The San Miguel Island fox population started to fall again in 2014.
3 What other information could you write about?

b Use your answers to questions 1–3 in Exercise 3a to complete the paragraph plan with key words and numbers only. Organise your ideas logically and include comparisons.

Paragraph 1 Introductory sentence: Overview statement:	*The graph gives information about ...* *We can see that ...*
Paragraph 2 Detailed information and supporting percentages	*Looking at the graph in more detail, we learn that...*
Paragraph 3 Detailed information and supporting percentages	

c Work in pairs and discuss your plans. Answer the questions and make any necessary change.

1 Does the overview statement describe the key features of the graph?
2 Is all the detailed information relevant and in a logical order?
3 Have you thought about how you can compare information?

Language and content

4a Turn to page 191 and look at the criteria for *Lexical resource* in the descriptors for Bands 4–6. How can you show a range of vocabulary with the test task in Exercise 2?

b Read part of a description of a graph. Does the writer:

1 use a range of vocabulary?
2 spell words correctly?

We learn that the population of grey owls increased slightly from 350 in 2005 to 375 in 2010. The population of grey wolves which lived in the same woodland area increased slightly by 33 in this period, from 450 to 483. Numbers of both animals then fell dramatically. Owl numbers fell dramatically to 313 over the next five years whereas the number of grey wolves fell to around 421.

c Improve the range of vocabulary in the paragraph by changing some of the verbs and adverbs.

5a Turn to page 191 and look at the criteria for *Grammatical Range and Accuracy* in the descriptors for Bands 4–6. What do they say about punctuation?

b Correct the punctuation in the sentences 1–5.

1 we usually start a sentence and names, like santa cruz, with a capital letter.
2 Ordinary nouns, like *Fox* and *Population*, will often start with a capital letter in a title or heading, but not in a sentence like this.
3 We end a sentence with a full stop
4 We use full stops at the end of a sentence. Whereas we use a comma between clauses.
5 We should avoid using an exclamation mark in an academic text!

c Read more of the description of the graph in Exercise 4b. Does the writer:

1 use both simple and complex sentences (e.g. relative clauses)?
2 use grammar accurately?
3 use correct punctuation?

The changing population of Brown Bears followed a similar pattern to the changing population of beavers between 2005 and 2010 The number was around 600 but then numbers for both decreased. The number of Beavers fell steadily to just over 520 over the next three years while the population of bears went down significantly to around 440 the latter stayed the same for the next two years whereas the number of beavers began to rise slowly. It reached 545 in 2016

d Improve the accuracy of the paragraph by correcting the punctuation. What effect does incorrect punctuation have on the reader?

Write your description

6 Complete the test task in Exercise 2. Follow your paragraph plan in Exercise 3b. Use a range of vocabulary and correct punctuation. Remember to write at least 150 words.

Assess and improve

7a Read and assess your description using these questions. Make any necessary changes.

1 Have you included an overview of the graph that summarises the key information?
2 Have you given detailed information and supported it with percentages?
3 Have you used a range of verbs/adverbs?
4 Is your punctuation correct?

b Exchange descriptions with your partner. Read and assess your partner's description using the questions above.

c Give positive feedback and one or two suggestions to your partner. Listen to your partner's feedback and make any changes to your description.

Review

1a Match the words below with the definitions 1–10. Four words are not used.

breeze cave flood fog fossil fuels lightning greenhouse gases humid soil stream thunder volcano waterfall water shortage

1 a small river
2 cloudy air near the ground
3 a large hole in the side of a cliff or mountain
4 the top layer of the earth in which plants grow
5 the loud noise you hear during a storm
6 when there is uncomfortable weather with wet, hot air
7 a lack of H_2O
8 a light wind
9 a mountain with a hole in the top where hot liquid sometimes flows out
10 a source of energy that is created over millions of years from dead animals/plants, e.g. coal/oil

b Write definitions for the four unused words in Exercise 1a.

2a Choose the correct verb to complete the IELTS speaking test answers.

What do you think has had the biggest negative impact on the environment in your country?

'Well, factories 1 *have had / had* a large effect over the years because they 2 *'ve released / released* a lot of chemicals into the air when they are making their products. In homes, people 3 *have also caused / also caused* damage. For example, when the refrigerator 4 *has first become / first became* available to homeowners, it created a lot of CFC gases. No one 5 *knew / has known* how dangerous they were at the time, but since then we 6 *'ve learnt / learnt* more about them and so fridges are more environmentally friendly these days.'

What has the government in your country done to help protect the environment?

'One of the main things they 7 *'ve done / did* is to introduce recycling laws. When I was young my parents 8 *haven't separated / didn't separate* their rubbish at home but they 9 *'ve had / had* to do this for the last ten years or so. In the past we 10 *have just buried / just buried* all our waste in the ground but in the last decade we 11 *'ve been able / were able* to reuse a lot of material. This 12 *already had / has already had* a positive impact on my country, I think.'

b Practise answering the two questions in Exercise 2a.

3 Complete the paragraph from an essay with *is, are, a, an, the* or no article (–).

Parks 1 _____ important for our well-being and should not be used for 2 _____ other purposes. Green areas 3 _____ necessary for cities to function successfully because 4 _____ people need a place to go to relax after work or at weekends. It is true that accommodation 5 _____ also important for a successful city but if the city is full of 6 _____ buildings without any green areas, children 7 _____ less able to play outside safely and people 8 _____ less able to do sport in 9 _____ attractive environment. The welfare of families 10 _____ more important than 11 _____ development of new homes or offices. For this, we need 12 _____ green areas, plants and trees to remain.

4 Complete the description with an appropriate word. The first letter is given.

The pangolin

The pangolin is a mammal which lives in Asia and Africa. It has no **1** f_____ but is instead covered with scales, larger than those on a lizard or snake. It can be between 30 centimetres and 1 metre in length, including its long **2** t_____ at the back. **3** M_____ are usually much heavier than **4** f_____ . Pangolins walk on their back legs because their front **5** p_____ have long claws which make them difficult to move about on. They use their tails to maintain their balance.

Pangolins have a strong sense of smell and good hearing which helps them to locate insect **6** n_____ . They then use their long claws and long tongue to catch the insects. Pangolins are not social **7** c_____ . They tend to spend time with each other only to breed. It is typical **8** b_____ for young pangolins to stay with their mothers until they become **9** a_____ at the age of around two years old, at which time their mothers leave them to become independent. Pangolins live to an age of around twenty years, but as many are caught for their meat and scales, all eight species are at different stages of **10** d_____ o_____ .

7 Around the world

- **Listening:** Section 2: Label a map; Matching
- **Language development and vocabulary:** Complex noun phrases; Global issues
- **Speaking:** Part 1: Describing learning a language
- **Reading:** Matching sentence endings; *Yes, No, Not given*
- **Writing:** Task 2: Cause and effect essay

Lead-in

1 Work in pairs and discuss the questions.

1 What kind of holidays are popular in your country? Why?
2 How do people plan their holidays these days?
3 Do you generally enjoy travelling? Why/Why not?

2 Work in pairs. Look at the infographic and discuss the questions.

1 Which piece of information do you find surprising?
2 Which countries receive the highest number of tourists? Why do you think this is?
3 What technologies influence how we travel?

7a The joy of travel

Reading (Matching sentence endings)

Before you read

1a Work in pairs and discuss the questions in pairs.

1 What are the advantages and disadvantages of living in a popular tourist destination?
2 How might tourism benefit poorer nations?

b Read the first paragraph of the passage on page 105 quickly. What do you learn about the economic effect of tourism?

Understand complex sentences

2a Look at the underlined sentence 1 in the passage and answer the questions (1–3).

1 Circle the noun that is the main subject and underline the main verb.
2 Put square brackets [ ] around the relative clause.
3 What is the best summary of sentence 1?

A The restaurants are the point of production.
B The money remains in the area.
C Visitors spend money on holiday.

b Look at the underlined sentence 2 in the passage and repeat steps 1 and 2 of Exercise 2a. Sentence 2 contains three main clauses.

c Find two examples of cause and effect language in sentence 2.

3a Look at the first half of the sentence below. Choose the best ending (A or B) so that it has a similar meaning to sentence 2 in the passage.

When visitors buy things in a tourist town, they
A create income that can be shared in the community.
B benefit large international tourist chains.

b Look at the test question and follow steps (1–5).

Countries without rich natural resources
A are disadvantaged in terms of attracting tourists.
B might be able to profit from their culture.
C could discover issues with transport.

1 Underline the key words.
2 Find the relevant piece of text in the passage on page 105.
3 Circle the subject and underline the main verb.
4 Put square brackets [ ] around the sub-clauses.
5 Identify the cause and effect.
6 Choose the option (A–C) that completes the sentence.

Test practice

➤ **TEST STRATEGIES** page 170

4 Read the passage and complete the test task.

Questions 1–5

Complete each sentence with the correct ending, ***A–H****, below.*

1 Offering a range of tourist activities
2 Receiving visitors only at certain times of the year
3 The construction of important transport links
4 The flexibility of jobs in tourism
5 In cases where tourism is handled well, it

A provides services that everyone can enjoy.
B brings the opportunity to conserve the area.
C lets people work part time throughout the year.
D allows locals to fit tourism work around other employment.
E creates regions where tourism flourishes.
F encourages workers to learn different professions.
G makes the most of the natural beauty of regions.
H helps women in particular to improve their lives.

Task analysis

5 Work in pairs. Think about how you answered the questions. What helped you?

1 locating the answers quickly
2 breaking long sentences into parts
3 identifying cause and effect
4 another strategy

Discussion

6 Work in pairs. Read the last three paragraphs of the text again. Do you agree with the writer that tourism can achieve the Millenium Development Goals (MDG) 1, 3, 7 and 8?

Tourism in the developing world

Although it is often underestimated, the tourism industry has the potential to meet the needs of many people who live in the poorest parts of the world. To start with, tourism is the fourth largest industry in the global economy, generating around $1 trillion, and this money has a direct positive impact on locals. Secondly, tourism itself is changing. When tourism emerged in the 1950s, it was the European countries which benefitted most. Just fifteen nations received 98 percent of all international arrivals, but by 2007, budgets had increased and that number had fallen to 57 percent. In fact, tourism is a major source of income for 83 percent of developing countries, which have become popular destinations, and one-third of the world's poorest nations depend on it.

The economic power of tourism has transformed many societies in recent years. Compared with other major global industries such as the fuel industry, and chemical and car manufacturing, tourism often has more benefits for the people who live in the nation. There are several reasons for this. [1]To start with, all money which is spent usually stays at the point of production, in other words, in local bars and restaurants in the resort. [2]There are often few foreign middle men, so locally based hotels, restaurants, growers and producers directly receive the income which is spent in the area, and that in turn allows more of the cash to stay within the region.

A second reason is that many countries that lack the raw materials needed to enter profitable industries like the fuel industry or agriculture, are nevertheless able to participate successfully in tourism if they have distinct history and traditions. Such countries can use their unique characteristics to create income and give them an advantage when previously they might not have been able to compete.

The third reason is that tourists often have a broad list of requirements. As well as a variety of hotels and restaurants, modern tourists also look for adventure sports and leisure choices. This enables tourist centres to form complex and varied supply chains of goods and services, which in turn means that there is a demand for people to train in a very wide range of skills, from security to cleaners, art historians to hotel managers and car rental companies.

Many tourism jobs are also often seasonal, and whereas in other parts of the world this has been seen as a problem, in many developing countries it is a bonus as it allows workers to take on jobs in tourism alongside their existing occupation, such as farming.

A final, but perhaps most important benefit that tourism has over other industries is that it encourages the development of facilities which everyone can use, and which without doubt benefit the host nation. Improved healthcare, roads, sports centres and high-end restaurants can be funded by foreign investment but enjoyed by locals and visitors alike, and domestic tourism often also improves as a result. This helps to raise living standards for all.

Because of the benefits, the United Nations has identified the development of tourism as one of the methods poorer countries might use to meet half of the eight Millennium Development Goals (MDGs). For the first goal of reducing poverty, MDG1, the benefits of tourism are obvious. It can provide jobs and creates income for communities that often lack any other possibilities for employment. Nigeria is one country that the United Nations has identified as having huge possibilities from tourism.

The fact that the tourist industry also tends to produce flexible labour markets with a range of jobs can also help to achieve another goal, MDG3, that of promoting gender equality. In Mali, an organisation which trains female artists of the Djenne, one of Mali's oldest and most visited towns, has had success. In Costa Rica, the female arts cooperatives creating products for the tourism industry have grown considerably and provide many of the workers for the first time with both independent incomes and greater self-confidence.

If carefully managed, tourism can also be an important part of promoting a sustainable environment, meeting the needs of another goal, MDG7. In fact, it goes further than that. Not only is there the possibility to protect the natural environment, but also the historical, archaeological and religious sites too. Areas with strong tourism also have a stronger practice of traditions, arts and crafts. Finally, as tourism by definition involves the transfer of people, cultures and ideas, it is ideally placed to foster effective global partnerships, the last goal, MDG8.

Vocabulary

Travel and tourism

1a Complete the collocations in the sentences (1–8) with the words below.

budget destination direct domestic facilities rental resort security

1 I think having a lot of holiday _____ **homes** isn't very good for a town.
2 My home town is a popular **tourist** _____ for several reasons.
3 There are separate airports for _____ **flights** and international ones in my country.
4 There are good **leisure** _____ at the hotel.
5 You can **fly** _____ from my home town to Paris.
6 You have to go through a lot of _____ **checks** before you fly in my country.
7 I think _____ **travel** has made it easier for more people to get about.
8 My idea of a perfect **holiday** _____ is a beach, great hotels and lots of restaurants.

b Work in pairs and discuss. What leisure facilities do you expect in a holiday resort?

c Describe a holiday that you have been on. Use at least three of the collocations from Exercise 1a.

Dependent prepositions

2a Choose the correct prepositions in *italics* to complete the essay.

I think that tourists have been responsible **1** *for / to* a lot of damage to the environment in the past. Anyone who is serious **2** *with / about* reducing climate change should think again about relying **3** *on / in* air transport. Many experts **4** *for / on* the environment have called **5** *by / for* a ban on unnecessary air transport if we are to succeed **6** *in / by* bringing down global temperatures. There have been attempts to introduce tree-planting schemes, but few people actually participate **7** *on / in* these projects. Any change is likely **8** *with / to* be negated **9** *for / by* the general increase **10** *in / of* air travel.

b Write an essay plan for the question below. Use some of the phrases above in your response.

Do you think that air travel should be banned for environmental reasons? Why/Why not?

	Pros	Cons
banning air travel		
flying less often		
...		

Cause and effect

3a Match the beginnings of the sentences (1–6) with the causes or effects (A–F).

1 Sustainable tourism can help to
2 Some communities dislike tourism because
3 Countries with beautiful natural resources
4 Many countries have won contracts
5 It's easier to export goods abroad
6 Many countries need to develop alternative

A if there are already good transport facilities.
B visitors disrespect local values.
C industries to protect them in case tourism decreases.
D protect important habitats in the long term.
E will find it easier to attract wealthy tourists.
F from large international tour operators.

b Work in pairs and discuss the questions. Use four phrases from Exercise 3a in your answer.

1 What has made/is needed to make tourism popular in your country?
2 What are attitudes to tourism like in your country?
3 Do you think tourism is a good or a bad thing?

Collocations

4a Match words from A with words from B to make collocations. Use the collocations to complete the text.

A

high imported local rapid rural strong

B

areas change economy expectations goods relationship

While many countries cap their hotels at five stars, in recent years, seven-star hotels have become more common. These places are rarely found in 1 _____ , but rather in city centres, where international travellers prefer to shop and do business. Customers often expect access to 2 _____ , rather than local produce. Visitors have 3 _____ , and helicopter meet-and-greet services are almost obligatory. These hotels bring welcome income to the 4 _____ – there has been a 5 _____ between hotel construction and economic growth in countries in the Middle East, for example. Such areas have gone from empty desert to cosmopolitan centre within just one generation and this kind of 6 _____ would be hard to achieve without international visitors.

b What would you expect from a seven-star hotel in your country?

Speaking (Part 1)

Expand answers

1 Work in pairs and answer the questions.

1 How do you usually travel?
2 What are the benefits of using public transport?
3 What was the worst journey you have ever taken?

2a 7.1 Listen to six students. What aspect of transport is each discussing?

Speaker 1 Describing a long journey

b 7.1 Listen again and match the students (1–6) with the phrases they use (A–F) to expand their answers.

A There was one time when ...
B I can't say for certain but I think the main reason is ...
C I get the impression that it'll soon ...
D The main difference between then and now is ...
E I haven't really thought about that ... but I suppose I'd ...
F I think the current situation with ... is ....

c Match the functions (1–6) with the phrases (A–F) in Exercise 2b.

1 Describe a situation now
2 Describe an anecdote from your past
3 Explain your answer
4 Compare the past and now
5 Predict future developments
6 Express uncertainty

3a Look at the questions (1–4) and decide which functions you could use from Exercise 2b to expand your answer.

1 Have you ever been on a very long journey? (When?)
2 When do people generally make long journeys in your country? (Why?)
3 Do you think journeys take longer now than they did in the past? (Why?)
4 What changes would improve the transport in your country? (Why?)

b Work in pairs. Take turns to answer the questions.

Test practice

➤ **TEST STRATEGIES** page 172

➤ **EXPERT READING** page 187

4 Look at the test task and give expanded answers to the questions. Record your answers so that you can listen later.

1 Where did you go for your last holiday? (When?)
2 What kind of holidays do you prefer? (Why?)
3 In your country, did people in the past have different holiday experiences to the ones they have now? (Why?)
4 Where would you like to go on holiday? (Why?)

Task analysis

5a Listen to the answers you recorded and tick all the phrases from Exercise 2b that you were able to include.

b Think of other phrases you could use to expand your answers.

Listening (Section 2)

Before you listen

1a Work in pairs and discuss the questions.

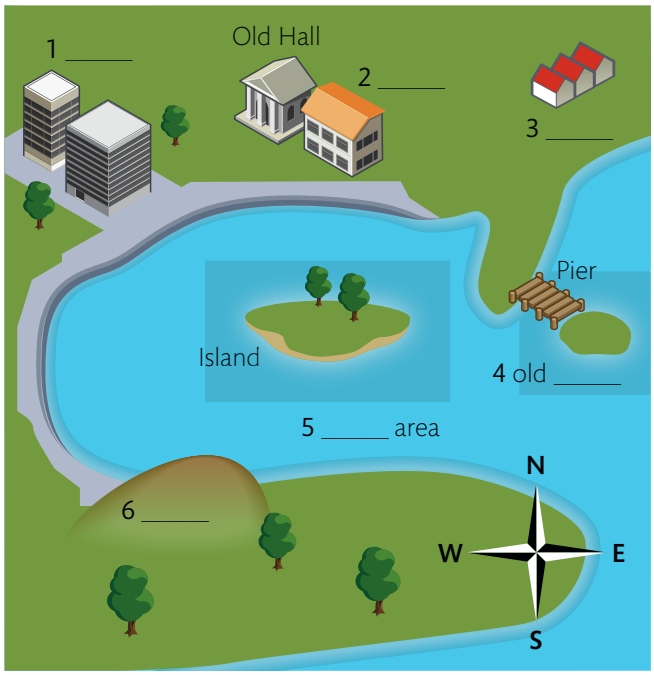
1 Have you visited a new town before? What was it like finding your way around?
2 What would you recommend a visitor to your town or city do?

b What makes people want to live abroad? Discuss the ideas below. Are there any other reasons you can think of?

job opportunities family connections
better lifestyle curiosity

Follow directions

2a Look at the map below. What does it show?



b Look at the map and complete the sentences (1–8) with the phrases below.

clockwise east side centre of right-hand side
to the northwest of just behind past south of
southwest of

1 The island is in the _____ the map.
2 Location 1 is _____ the harbour
3 The Old Hall is _____ Location 2.
4 Location 3 is on the _____ of the Old Hall on this map.
5 Location 4 is on the _____ of this map.
6 Location 5 is directly _____ the island.
7 Location 6 is _____ Location 5.
8 If you start at Location 1 and travel _____ around the map, you'll go _____ locations 2, 3, 4, 5 and 6.

3 7.2 Listen to a tour guide describing the map in Exercise 2a. Write the names of the missing locations (1–6).

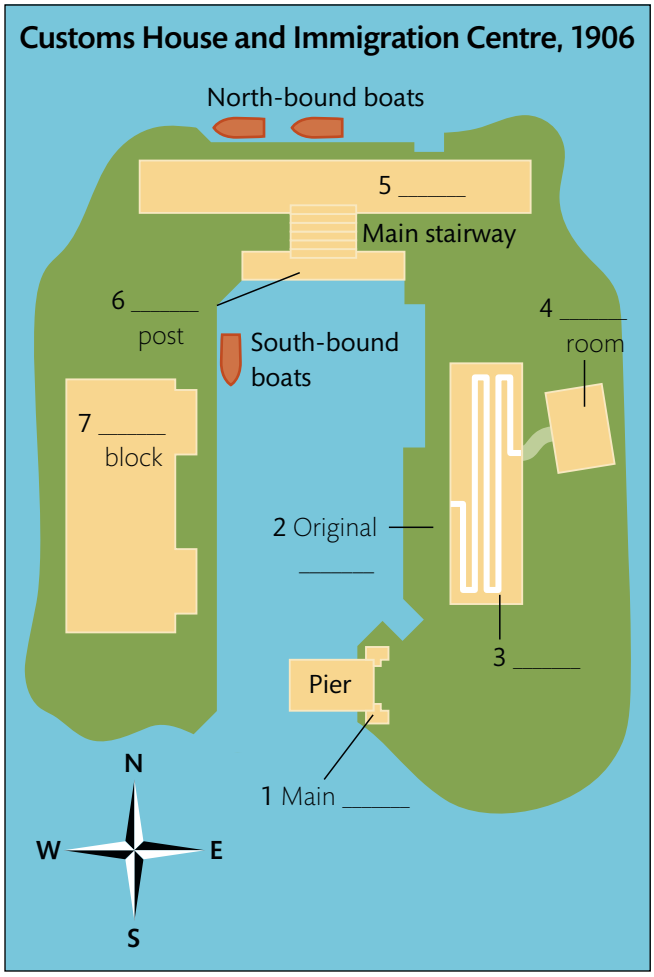
Test practice

➤ TEST STRATEGIES page 169

4a Look at the test task below. How many places are there on the map? What directions might you need to listen for? What is the purpose of an immigration building?

b 7.3 Listen and complete the task.

Questions 1–7
Label the plan below.
*Write **NO MORE THAN TWO** words in each answer.*



Task analysis

5 Work in pairs and discuss the questions.

1 What helped you to follow the directions? What made the task difficult?
2 How do the existing named places help you?

Language development

Zero and first conditional

➤ EXPERT GRAMMAR page 178

1a Match the beginnings of the sentences (1–5) with the endings (A–E).

1 If you *look* at the map on the wall here,
2 We're *going* by boat on this trip,
3 If you *take* a boat from the pier,
4 Provided that we *have* enough time,
5 We'll *get started* now,

A we'll *stop* at the viewpoint on our way back.
B you'll *see* all the main tourist spots are clearly marked.
C unless anyone *has* any more questions!
D you *can cross* the harbour more quickly than driving round.
E otherwise we *won't have* enough time to get round the harbour.

b Underline the word that introduces the condition (e.g. *If*). What tenses are used in the *if* part of these sentences? What tenses are used in the other part?

2a Complete the sentences (1–10) with the correct form of the verbs in brackets. Use the first conditional.

1 It _____ (be) problematic if air travel _____ (get) cheaper in the next ten years.
2 There _____ (be) more problems with traffic unless we _____ (invest) in roads.
3 Provided that the government _____ (build) high-speed links in the future, train journey times _____ (halve).
4 Many people _____ (choose) to travel to space when the technology _____ (make) it possible.
5 Ports _____ (need) to be bigger if companies _____ (keep) making bigger ships.
6 Even if traffic _____ (get) worse, cars _____ (still be) popular.
7 Countries _____ (build) more bridge and tunnel links if cars _____ (continue) to be popular.
8 Trains _____ (become) more crowded unless we _____ (find) a solution to the road problems.
9 We need to _____ (create) radical new plans, otherwise, major cities _____ (come) to a standstill.
10 Provided that space agencies _____ (share) their ideas, space technology _____ (improve) air transport in future.

b Work in pairs and discuss the statements in Exercise 2a.

3a Practise making true sentences about your future plans.

1 If I pass this exam, _____ .
2 When I finish my studies, _____ .
3 Provided that everything goes to plan, _____ this time next year.
4 I hope I _____ if I get lucky. Otherwise, I _____ .
5 I'll see my friends _____ unless _____ .
6 If I get really fluent in English, I _____ .
7 If I have to change careers in the future, I _____ .
8 Provided that I have enough money, I _____ .

b Work in pairs and ask and answer about each other's future plans. Use the zero or first conditional.

4a Complete the text with the correct form of the verbs in brackets.

Hotels of the future

When people **1** _____ (check into) a hotel in the future, they **2** _____ (not need) to speak to a single human until they **3** _____ (walk) out again. Several hotels already offer automated services to guests. For example, when you **4** _____ (arrive) at Lowry hotel in Manchester, a robot receptionist **5** _____ (greet) you. If today's hotels **6** _____ (be) any indication of the future, innovations in bathroom technology **7** _____ (probably start) in the hotel industry. New showers which don't need water are already in development. When a test subject **8** _____ (step) in, sound waves **9** _____ (shake) the dirt off their body in the near future. It's not just the bathrooms, though. Most hotels offer a gym service, but in future, rather than waste valuable floor space with all that equipment, a virtual trainer **10** _____ (work out) with you in your room if you **11** _____ (request) that service. And if you **12** _____ (call) room service, you **13** _____ (not need) to worry about waking the night staff, with the new robot waiters coming to hotels soon. You **14** _____ (not have) to connect your laptop to the hotel wifi either, provided that you **15** _____ (choose) a hotel with the latest smart mirrors. These mirrors display your emails while you put your make-up on. And if none of that **16** _____ (appeal), how about something truly unusual for your next holiday? When you **17** _____ (book) into the Poseidon resort in Fiji, you **18** _____ (sleep) with the sharks, literally. The hotel is entirely underwater.

b Work in pairs. Would you like to stay in hotels like these?

Writing (Task 2)

Write an introduction

1a Look at the essay questions below. Underline the cause and/or effect words.

1 *Air travel is likely to be the greatest cause of pollution in the future. To what extent do you agree with this statement?*
2 *The way cities address transport problems in the next ten years will affect their future in the next fifty years. Discuss how current developments in transport might affect the future.*
3 *Encouraging people to visit other countries is the best way to improve international understanding. Do you think that travelling will create better understanding?*
4 *As populations become more mobile, the idea of national borders between countries will disappear in future. To what extent do you agree with this statement?*

b Choose one question and brainstorm possible positive and negative causes and effects.

Issue	Cause	Effect

2a Look at the introduction below. Which question in Exercise 1a does it answer?

[1]Travel for business or personal reasons has become increasingly common. [2]These days major airports deal with millions of passengers per day, rather than per year. [3]Some argue that with more and more of us travelling, we will become more open-minded. [4]This essay will aim to assess whether travelling widely can improve understanding between people of different countries.

b Which sentence in the introduction:

A is the thesis statement (one sentence that states the purpose of the essay clearly)?
B offers a very general background to the topic?
C makes a general comment, states a related fact?
D re-states the question in different words?

3a Match the thesis statements (A–C) to the remaining essays in Exercise 1a.

A Although people are introducing measures to limit the effect of pollution in the airline industry, it is still likely to be a major source of pollution in future.
B The nation you are born in still affects how you live more than any other factor, and will continue to do so in future.
C Modern economies depend on mobile populations, and so the way we manage transport is crucial over the coming decade.

b Choose one of the thesis statements in Exercise 3a and work in pairs to discuss the questions below.

1 How many paragraphs would you expect the writer to use?
2 What might be the focus of each of those paragraphs?
3 What evidence might the writer use (personal experience, examples, etc.)?
4 What conclusion are they likely to reach (e.g. persuading the reader to take certain action, suggesting there are no clear answers to the question)?

Test practice

➤ **TEST STRATEGIES** page 171

4 Write an introduction for one of the essay questions from Exercise 1a.

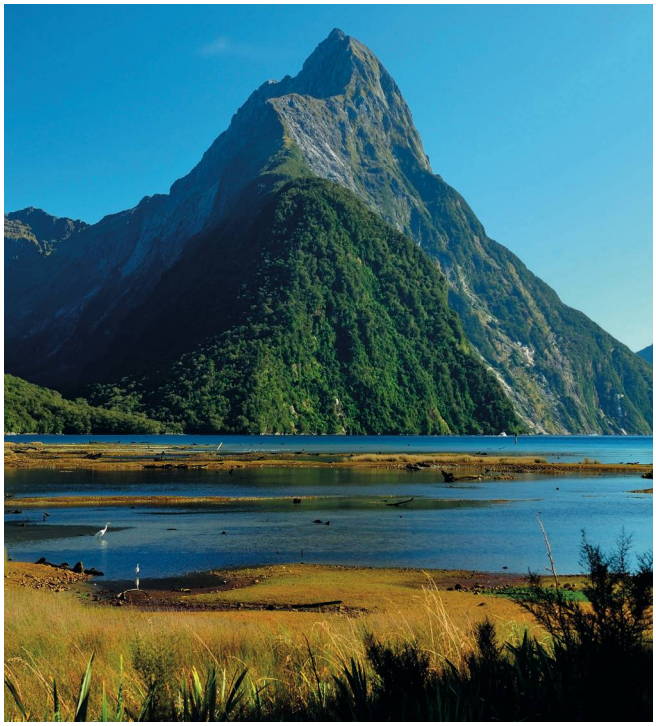
1 What is the general topic? Write a sentence about that.
2 Restate the question in your own words.
3 Finish your introduction with a thesis statement.

Task analysis

5 Look at your introduction. Did you:

1 describe the general background to the topic/ make a general comment about the topic?
2 rewrite parts of the question in your own words?
3 write a clear thesis statement?

Listening (Section 2)



Before you listen

1 Work in pairs and discuss the questions.

1 What do you know about Australia and New Zealand?
2 What tourist attractions are there in that region?

Test practice

➤ **TEST STRATEGIES** page 169

2 7.4 Look at the questions in the test practice and predict the signal words you might hear. Complete the tasks. Remember to listen for the language of following directions.

➤ **HELP**

1 How would you describe A in relation to the main entrance? What might be outside the building?

7 Listen for the word *north*. Why is the building brown? What does this represent?

Task analysis

3 Work in pairs and discuss the questions.

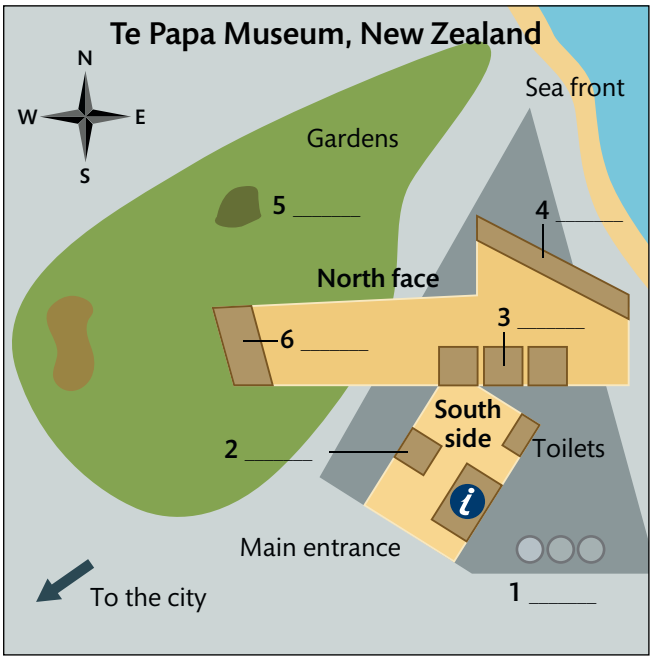
1 How did the language for following directions guide you round the building?
2 Look at one answer you got wrong. Find it in the audio script 7.4 on page 211 and underline the words that give the answer. Could you use a different strategy to help you next time?

Questions 1–6

Label the map below.

*Write the correct letter **A–I**, next to questions 1–6.*

A café
B gift shop
C visitor centre
D cloakroom
E temporary exhibition room
F information desk
G cave
H decorated walls
I volcanic rocks



Questions 7–10

How does the speaker describe the purpose of each of the following areas?

*Choose **FOUR** answers from the box and write the correct letter, **A–F**.*

Purpose

A to represent the native culture
B to celebrate independence
C to provide views of the city
D to bring people together
E to reflect nature
F to symbolise what more recent arrivals offer

Area

7 the north face _____
8 the south side _____
9 the central area _____
10 the top floor _____

Language development and vocabulary

Complex noun phrases

➤ EXPERT GRAMMAR page 179

1a Look at the underlined complex noun phrases. Which is the main noun in each one?

We have a fantastic range of exhibitions at Te Papa at the moment.
The more recent arrival of people from Europe to the island is celebrated along the south side of the building.

b The sentences above uses *complex noun phrases*. Which is the better definition of a complex noun phrase?

1 When extra information is added before or after the main noun.
2 When extra information is given about the subject of the main verb.

c Put the nouns or preposition + noun in the correct order to make complex noun phrases.

1 The museum is *of old and new culture / a celebration / in New Zealand.*
The museum is a celebration of old and new culture in New Zealand.
2 There's a *to the east / car park / of the building.*
3 The top floor represents the *of people / original groups / on the island.*
4 You must visit the *of the gardens / near the centre / before you leave / traditional cave.*
5 The *of the island / history* is represented by *of the museum / the spheres / at the entrance / on the left*

2 Rewrite the sentences using complex noun phrases.

1 The population increased. It happened in 2010. As a result, there were problems. Food production was too low.
There was an increase in the population in 2010 and as a result there were problems with food production .
2 Global temperatures went up. It happened between 2000 and 2016. People had to leave their homes. Those people were from small islands. The small islands were in the Pacific.
A rise _____ meant that _____ .
3 The level of cyber crime grew. It grew around the world. It happened in 2015. There were changes. The changes happened on the internet. They happened in the years previous to 2016.
There was a _____ as a result of _____ .
4 Social problems will rise. It will happen in the poorer neighbourhoods. It will happen over the next ten years. The number of police reduced.
There will be _____ because of _____ .

Global issues

3a Work in pairs and match the words in *italics* (1–10) in the articles with the definitions (A–J).

Fears grew overnight when a chemical factory **1** *exploded* following yesterday's earthquake in the region. **2** *Officials* warn the number of casualties might rise.

There's more trouble in football with reports of new evidence of **3** *corrupt* decision-making among leaders using their **4** *position* for personal gain.

Politicians from around the world will hold talks later today to **5** *debate* international **6** *security* issues.

7 *Disability* rights groups say that improvements have been made in reducing **8** *discrimination* in the workplace.

Pop stars and celebrities have **9** *spoken* out against the government for not doing enough to help **10** *starving* refugees leaving the war-torn region in the east.

A someone with power, usually in the government
B an illness or injury that makes it difficult to do ordinary things
C discuss a subject that people have different opinions on
D to say publicly what you think about someone
E the things you do to keep someone safe
F to suffer because you haven't got enough to eat
G the power someone has
H dishonest or immoral
I when one group is treated unfairly
J burst loudly or violently

b Work in pairs. Take turns to speak for two minutes about a news story that touches on one of the topics in Exercise 3a.

c Where do you go for English stories to help you prepare for the IELTS exam?

4a Complete the table with the correct form of the words.

Verb	Noun (thing/ person)	Adjective
explode	1 _____	2 _____
3 _____	4 _____	corrupt
debate	5 _____	6 _____
7 _____	security	8 _____
9 _____	10 _____	starving

b Choose three words from the table and write two sentences for each one, using a different form of the word.

Speaking (Part 1)

Vocabulary development

1 Work in pairs and discuss the questions. Check the words in bold in a dictionary.

1 If you could travel **abroad** to study, where would you go? What would you study?
2 What do you think you would find most difficult?

living on a tight **budget** **culture shock**
integrating with other students **home sickness**
completing **coursework**

Focus on Grammatical range and Fluency

2a 7.5 Look at the Part 1 questions below. Listen to Camille answering these questions. What problem does she have?

Learning a foreign language

1 Do you like learning different languages? Why/Why not?
2 How did you learn to speak English?
3 What are the benefits of learning a language in the country where it is spoken?
4 What language would you like to learn in future? Why?

b Think of three more things that Camille could say to expand her answers (1–4). Use some of the phrases you learnt on page 107 to help give you ideas.

1 I like learning different languages.
2 I learnt to speak English at school.
3 Yes, I think you can learn better in a country where a language is spoken.
4 I would like to learn Chinese.

c Work in pairs. Answer the questions using your ideas from Exercise 2b. Make sure that you connect your ideas to make complex sentences (e.g. with *also*, *however*, *unlike*, etc.).

3a 7.6 Listen to Chaira and Zhiang. What do they do well? What do they need to improve?

Student	Good points	Points to improve
Chiara		
Zhiang		

b Look at the band descriptors on page 184. What band would you like to achieve? What do the descriptors say about the *Grammatical range and accuracy* and *Fluency and coherence* at that level?

Test practice

➤ **TEST STRATEGIES** page 172

4 Work in pairs and complete the test task. Take turns to ask and answer questions. Record your answers so that you can listen to them later.

Visiting homes

1 Do you like to visit other people's houses? Why/Why not?
2 What things do you often take with you when you visit other people?
3 What preparations do you make when someone visits you?
4 Do you think people visit each other more now than in the past? Why/Why not?
5 Do you think we will continue to visit people in their homes in future? Why/Why not?

Task analysis

5 Work in pairs and discuss the questions.

1 How many functions from Exercise 2 on page 107 were you able to use in your answers?
2 How often did you need to pause?
3 How often did you use complex sentences?

Reading (Matching sentence endings, *Yes*, *No*, *Not given*)

Before you read

1 Work in pairs and answer the questions.

1 What do you think are the most urgent issues that need to be addressed in the world today? Use these ideas to help you.

violence poverty nutrition literacy equality

2 Do you think that the world is getting better or worse? Why?

2 Look at the passage. What do the numbers refer to? What does this tell you about the passage?

Test practice

➤ **TEST STRATEGIES** page 170

3 Complete the test task. Remember to use the connectors of cause and effect to help you identify answers.

➤ **HELP**

1 Find words related to journalists in the text. Is the answer in the same sentence, or slightly later?

7 Where is *violence* or *violent* first mentioned? Read the sentence just before it and answer the question.

Task analysis

4 Work in pairs and answer the questions.

1 For questions 1–6, look at your answers again and underline the cause and effect relations in the passage.

2 How could you become quicker at locating *Yes*, *No*, *Not Given* answers?

- look for paraphrasing of the question
- locate all the answers before reading in detail
- complete the easiest ones first

Questions 1–6

Complete each sentence with the correct ending, ***A–H****, below.*

1 Journalists are in the habit of writing about bad news
2 It has been suggested that the poverty line should be raised
3 Infant mortality rates have gone down
4 Men are growing taller
5 Women have a stronger position in society
6 The number of people who can read and write has increased

A so the length of the average lifetime has grown.
B so society is more critical of war.
C because they may fail to reach targets.
D so people have an unrealistic view of modern life.
E so there is better understanding of others.
F so the balance of people in power is better.
G because the way we eat has changed.
H because the situation among the poor has improved.

Questions 7–12

Do the following statements agree with the claims of the writer in the reading passage?

Write

YES *if the statement agrees with the claims of the writer*

NO *if the statement contradicts the claims of the writer*

NOT GIVEN *if it is impossible to say what the writer thinks about this*

7 The drop in violent behaviour is the most impressive change.
8 Pinker's approach to comparing historical periods is misguided.
9 The loss of life in the Second World War was unnecessary.
10 Information about the decline in violence in Europe comes from a trustworthy source.
11 English people have a realistic view of the past.
12 People's expectations of war have changed very little in the last hundred years.

Despite appearances, the human race is losing its appetite for violence and suffering

Negative reports in newspapers and the media may leave us feeling in despair, and certainly there are troubling situations in the world. However, they are clearly not giving us the full picture. A new study suggests that, historically, we are living in a time that is not only the healthiest, wealthiest and best-educated in history, but also by far the least violent.

To demonstrate, take the extraordinary rate of economic growth in China and India. As a result of development in these two countries, there has been a huge decline in recent years in the share of the world population living on less than $1.25 a day, from 53 percent in 1981 to 17 percent in 2011. In fact, many people argue that we should be using a global poverty line of $10–$15 a day, but that very debate is a sign that we have made incredible progress at relieving the worst forms of poverty in recent decades.

This has had an obvious effect on world hunger, with fewer people suffering starvation in the last twenty-four years. Both men and women saw their life expectancy increase by six years globally from 1990 to 2012, but the gains were far greater in the countries with the lowest income, up to nine years in some cases. This increase is not necessarily due to people living longer, but a drop in the child mortality rate, which has fallen by up to two-thirds in some areas.

Overall, we're showing signs of being healthier. For nearly 2,000 years, male heights were stable, but since Europe industrialised, they have shot up. Nutrition and overall living standards are the main factors behind height, and we are living in the first couple of centuries of huge advances.

This is all inspiring stuff, but nowhere near as incredible as the differences in the attitude we take to our fellow man. Our violent inner selves are giving way to the better angels of cooperation and kindness in dramatic ways. Stephen Pinker, the cognitive scientist, decided to take a historical approach to the subject of violence in our society. According to his study, the extent to which violence has declined in every shape and form is astonishing.

In his statistical argument Pinker rightly focuses on the rate of violence in relation to the size of the population, rather than the just the figures for violent acts. What matters to an individual living in a particular place and time is their personal risk of becoming the victim of violence. The Second World War was the worst episode in human history in terms of the total numbers killed on the battlefield. The death toll of 55 million is shocking. However, when compared to the population size at the time, it was only the ninth most deadly event over the past 1,200 years. The worst of all, according to Pinker's understanding of the figures, was the eighth-century An Lushan revolt, which killed 36 million in and around China. In modern-day terms, it would have been equivalent to 429 million deaths in the mid-20th century. Although statistics for ancient wars were not always recorded accurately, there is enough evidence in reports to show just how violent war lords could be in ancient times.

A more reliable source of data comes from an analysis of court records in later periods, which shows an incredible decline in murder across Western Europe between the 13th and 20th centuries. Murder rates fell between tenfold and a hundredfold. For example, the murder rate in 14th-century Oxford was 110 per 100,000 people. By the time we reach 20th-century London, it was less than one. Interestingly, a survey of public opinion on the internet suggested that the average person felt that 20th-century England was about 14 percent more violent than 14th-century England. In fact, it was 95 percent less violent.

Pinker suggests several historical forces that have promoted more peaceful behaviour. Besides the more obvious development of rule of government and commercial interests, he suggests feminisation and cosmopolitanism are largely responsible. Since violence is largely a male pastime, the increasing respect for the interests and values of female members of society has led society away from viewing violence as an acceptable solution to disagreements. A more cosmopolitan culture – resulting from growing literacy, mobility and the mass media – can encourage people to become more patient and have more respect for those who are unlike themselves. Of course, the increased tendency to use knowledge and reason to make decisions has also played a major part. Many people these days recognise that violence is a pointless option, and have reframed it as a problem to be solved, rather than a contest to be won. Less than a century ago, many Europeans were looking forward to what became the First World War one – it is unthinkable that anyone would look forward to war today.

Writing (Task 2)

" Crisis? Which crisis?"

Lead-in

1 Work in pairs. Rank the global issues below from 1–5, where 1 is the most damaging. Explain your ranking.

Social unrest
Youth unemployment
A growing gap between the rich and poor
Economic problems
Lack of communication between nations

Understand the task

➤ **EXPERT WRITING** page 198

2 Look at the essay title below and underline the key words.

You should spend about 40 minutes on this task.
Write about the following topic:

In many countries, young people are finding it harder to get work. What do you think are the main causes of this? What effect might this have in future?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.
Write at least 250 words.

3 Which of the features below would help you to answer the question? Which would not help you?

1 reasons why young people cannot find work
2 examples of places where these things happened
3 solutions to correct the problem
4 descriptions of the effects of high youth unemployment
5 detailed analysis of whether this is a good or bad thing

Plan the task

➤ **TEST STRATEGIES** page 171

4a Think of at least three possible causes and effects of the problem of high youth unemployment.

Cause	What or where	Effect
Many countries have experienced economic problems.	The UK suffered after the banking crisis.	Young people out of university were competing with more experienced people for the same job.

b Look at your list again. Which ideas are strong enough to write a whole paragraph on? Cross out the weakest ideas. Do you have enough examples?

5 Look at the band descriptors for Task 2 Writing on page 192 to remind yourself of the main requirements. Then answer the questions below.

1 Do your ideas all directly answer the question?
2 Have you thought about the causes of high youth unemployment AND the effects?
3 How can you arrange these paragraph ideas so that there is a logical development of ideas?

Language and content

6a Look at the sentences (1–6). Does the first clause in the sentences describe a cause or an effect?

1 People say that high youth unemployment will result in social problems.
2 Older people have used their experience to get jobs that young people might have done in the past.
3 There has been a rise in depression among the young as a result of the problems.
4 The problems with the economy were caused by poor control of the banking sector.
5 In the long term, this trend will lead to a skills shortage.
6 Many 20- or 30-year-olds are delaying starting a family, as they cannot afford the costs.

b Look at the underlined phrases in Exercise 6a and answer the questions.

1 What part of speech are they?
2 Which phrases are followed by: an infinitive verb, a noun phrase or a clause?

7a Join the ideas in the pairs of sentences (1–5) with a connector phrase from Exercise 6a. You will need to make grammatical changes to the sentences.

1 There is high youth unemployment. The number of people in university increased.
High youth unemployment has resulted in an increase in the number of people at university.
2 Young people do not have the experience they need. In twenty years, there will be a problem finding skilled workers.
The lack of _____ .
3 Young people cause more problems socially. They are bored and need more of a challenge.
Young people _____ .
4 There is even more competition for graduate jobs. More people go to university.
The competition _____ .
5 Parents need to support young people for longer. They lack money to buy a home or car of their own.
Parents need to _____ .

b Look at the Band 5 and 6 descriptors for *Grammatical range and accuracy* Writing Task 2 on page 192. How can cause/effect connectors help you to improve your grammar score?

Write your description

8 Write your essay. Remember to write at least 250 words.

Assess and improve

9 Check your description using the band descriptors for *Cohesion and coherence* and *Grammatical range and accuracy* on page 192. What do you have to do to move up a band in this category?

Review

1 Complete the sentences with a phrase. The first letter of each word is given.

1 b_____ t_____ – very low-price flights, etc.
2 s_____ t_____ – the business of providing people who are on holiday with places to stay, etc. that won't harm the environment
3 d_____ f_____ – a journey by plane within the same country
4 l_____ f_____ – the spaces, buildings or services that are provided for people to use in their spare time
5 h_____ r_____ – a place where a lot of people go on holiday
6 s_____ c_____ – the things people in airports do to keep someone or something safe
7 f_____ d_____ – to travel without stopping or changing planes
8 r_____ h_____ – a place where people stay for a short time

2 Match the beginnings of the sentences (1–6) with the endings (A–F). Choose the correct verb to complete the sentences.

1 The Chinese will soon be spending more on tourism than the Americans if
2 Most Chinese tourists still go on holiday in their own country provided
3 If they *fail / will fail* to attract this growing group,
4 Luxury shops and hotels should provide Mandarin-speaking staff.
5 If Chinese travellers *want / will want* to avoid high luxury taxes back home,
6 Nations may find it difficult to attract this important new group

A unless they *start / will start* to provide better services for Chinese visitors.
B that they *are / will be* able to go on holiday at all.
C traditional tourist destinations, like Paris, will lose out.
D Otherwise they *will find / find* it difficult to attract Chinese tourists.
E current trends *continue / will continue.*
F they often do more shopping while they are abroad.

3 a Complete the extract from an essay with the words below.

official position debate disability speak participate serious call

Why do some public facilities fail to consider disabled users? What is the effect of this?

Times have changed since the **1** _____ recognition of formal rights for all members of society. In the 1970s, various political leaders used their **2** _____ in society to **3** _____ for greater opportunities for all people to **4** _____ fully in all social areas. With great role models in the fields of business, sport and academia, there is no longer any **5** _____ about whether people with a **6** _____ can contribute to society.

However, we still live in towns and cities largely designed for people without physical restrictions, and if we are to be **7** _____ about offering equal opportunities, then changes are still needed. More people need to **8** _____ out when public buildings fail to provide wheelchair access, support for those with sight difficulties or other, small, design faults that make life difficult. This is largely cause by neglect.

b Write the next paragraph of the essay, explaining the effects.

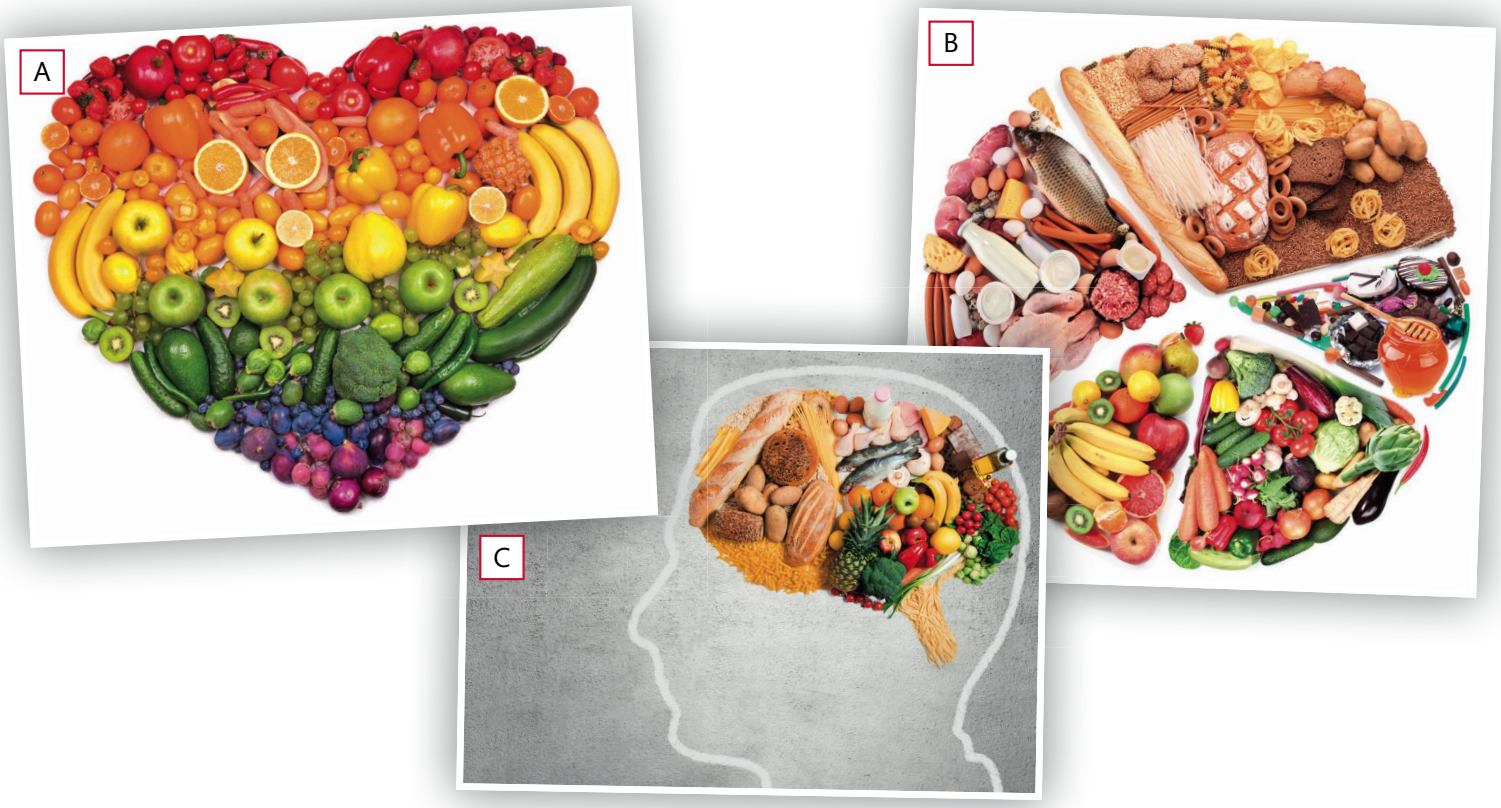
4 Complete the sentences by putting the words in the correct order to form complex noun phrases.

1 Fewer people have signed up for a career *in European countries / in the last thirty years / in nursing.*
2 There is usually a rise *of serious illnesses / in the hot summer months / in the number.*
3 There has been an increase *of major infections / in the last twenty years / in the number / in the world.*
4 There have been a number *to the antibiotic problem / in the last twelve months / of new approaches.*
5 Safe housing, a clean environment and low stress contribute *in a community / in the long term / to maintaining good health.*

8 Food

8a Training
- **Reading:** Deal with unknown vocabulary (Label a diagram)
- **Vocabulary:** Nutrition; Synonyms; Collocations; Prefixes
- **Speaking:** Stress and intonation; Give an opposing opinion (Part 3: Talk about eating habits)
- **Listening:** Listen for the correct spelling (Section 1: Table completion)
- **Language development:** The passive
- **Writing:** Sequence a process (Task 1: Describe stages in a process)

8b Testing
- **Listening:** Section 1: Table completion
- **Language development and vocabulary:** Review of formal structures; Formal synonyms
- **Speaking:** Part 3: Discussing food and culture
- **Reading:** Matching information; Label a diagram
- **Writing:** Task 1: Describe a process



Lead-in

1 Work in pairs and discuss the questions.

1 What was your favourite food when you were a child? Has it changed?
2 What food do you dislike? Is it unpopular with other people too?
3 How often do you eat out? What kinds of restaurants do you go to?
4 Where do you and your family usually shop for groceries?
5 How important is it to learn how to cook? How often do you cook?

2 Look at the photos and answer the questions.

1 How many food items in the photos can you name?
2 What is each image saying about food?
3 What can be some effects of having a poor diet?
4 What other issues with food are people concerned about today? Make a list. Think about:
- the growing of food
- the manufacturing of food
- our eating habits

Reading (Label a diagram)

Before you read

1 Work in pairs and answer the question. Which do you prefer: tea or coffee? Why?

2a Read the title of the passage and predict five words you might find there. Compare your list with a partner.

b Scan the article to try to find your five words. How many did you predict correctly?

Deal with unknown vocabulary

3a Look at the words in bold in the passage. What part of speech is each one (noun, verb, etc.)? Word endings or prefixes might help you.

nurture = verb because it is followed by 'coffee beans'

b Match the words in bold in the passage with the meanings (1–8). Read the whole sentence to help you.

1 help to develop
nurture because it sits between 'plant' and 'coffee beans'. It is logical that it means 'grow' or 'develop'.
2 collect a crop from fields
3 something that makes you feel more active
4 very unusual
5 solids, liquids or gases made up of more than one thing
6 characteristics or qualities
7 take apart
8 mixes

c Work in pairs. What helped you to find the meanings in Exercise 3b?

4a Complete the gaps in the sentences (1–8) with a word from the corresponding underlined sections of the passage.

1 _____ are key compounds that make up the coffee bean.
2 Caffeine is one such substance. _____ is another.
3 Trigonelline contributes to the _____ of coffee.
4 Pyridines create the _____ that we associate with roasted coffee beans.
5 Nicotinic acid contributes to the creation of _____ .
6 Trigonelline can lower levels of _____ in our teeth.
7 Melanoidins create the _____ of coffee that we are familiar with.
8 Melanoidins also help to lower _____ in the body.

b Work in pairs and answer the questions.

1 Which words in Exercise 4a are scientific words? Which suffixes tell you that?
2 Did you need to understand the scientific words to do Exercise 4a? Why/Why not?

5 Read the full article. What is the overall message?

1 Scientists are beginning to understand the chemistry behind coffee production.
2 Coffee provides a wide variety of benefits to those consumers who drink it.
3 The manufacturing of coffee is complex and not easy for scientists to understand.

The science of coffee

As young apprentices in Honduras learn to plant, **nurture** and **harvest** coffee beans, they are becoming part of a tradition that **combines** history and some **extraordinary** science. The secret to a good morning roast involves a surprising amount of chemistry. Coffee is the most widely consumed **stimulant** in the world – and, according to some estimates, it is the third most popular drink on the planet after water and tea. Around 2.25 billion cups are drunk each day. It has only been recently that science has started to **deconstruct** the drink and unlock the secrets of the 1,000 **compounds** that are found in roasted coffee beans and that give them their unique **properties**.

[1] Some of the most important compounds found in coffee beans are alkaloids, the most recognisable of which is caffeine. A 200ml cup of coffee typically contains approximately 50 to 75mg of caffeine, although the amount varies considerably depending on the method of preparation and the type of coffee.

[2] Another less well-known alkaloid in coffee beans is trigonelline. Found in a lower concentration than caffeine, [3] it plays an important role in the development of flavour during roasting when 60 percent of it turns into carbon dioxide, water and aromatic compounds called pyridines. [4] These are responsible for the sweet, caramel aroma of roasted beans. Trigonelline also produces nicotinic acid or vitamin B3 – more commonly known as niacin. [5] This is important for digestion and helps the body generate good cholesterol, among other things. Researchers have also discovered that [6] trigonelline can help to reduce tooth decay.

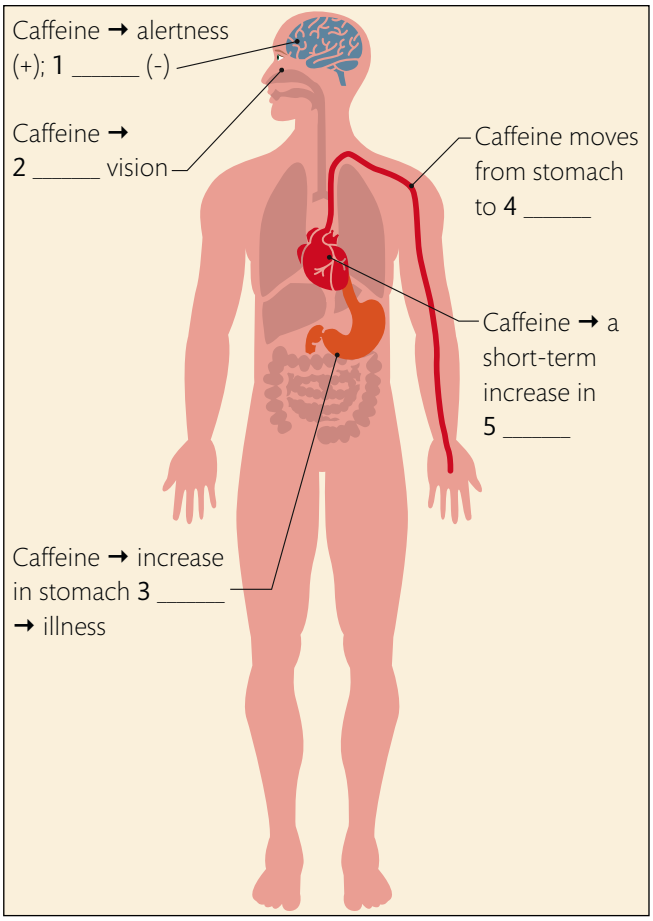
Finally, [7] coffee gets its deep brown colour during roasting when heavy compounds combine to form complex melanoidins, [8] which scientists have discovered can reduce inflammation.

Test practice

➤ **TEST STRATEGIES** page 169

6a Read the test task. Look at the diagram and labels. What does the diagram show?

Complete the diagram below.
*Write **NO MORE THAN TWO WORDS** from the passage for each answer.*



b Look at Question 1 and answer the questions.

1 What word form is the missing word?
2 Find the place in the passage that gives you the answer to Question 1. Use the other words in the label to help you.
3 Read the information and find the word(s) in the passage that fits the gap.

c Follow steps 1–3 for Questions 2–5.

Task analysis

7 Work in pairs and discuss the questions.

1 How did you locate the information in the passage?
2 Did you complete any labels without fully understanding the vocabulary?

Discussion

8 Work in groups and discuss the questions.

1 How much caffeine do you consume every week?
2 Do you think the benefits of caffeine outweigh the negatives? Why?

The effects of caffeine on the body

Caffeine provides no nutritional value, meaning it contains no calories, carbohydrates, protein, fat, etc. It is tasteless, which can be a disadvantage as you do not necessarily know if it is in your food. Although caffeine can cause physical and mental side effects, it can also provide benefits to both your body and mind. The quickest effect of caffeine is that it reaches your brain quickly and acts as a stimulant to the central nervous system. The result is a sense of alertness. For this reason, caffeine is often used by people who want to focus. It is also used in drugs that cure headaches but too much caffeine can be unhealthy and actually cause them too, especially if you are not used to consuming it. As well as reaching your brain quickly, caffeine also affects your eyesight. It causes your eyes to dilate which means your pupils are wider and let in more light. This can actually make your eyesight much sharper.

The next effect happens in your stomach. Caffeine raises the amount of acid that exists there, which may cause heartburn or an upset stomach. It is also a diuretic, which means it forces your body to get rid of water. That is why it is ineffective in curing thirst. Caffeine is then absorbed from your stomach into your bloodstream and reaches its highest levels there within an hour or two. In most people, there is no long-term effect on blood pressure but it can cause it to rise for a short time. If you have irregular heart rhythms, caffeine may cause your heart to beat faster, therefore if you have high blood pressure (hypertension) or heart-related problems, you should ask your doctor if caffeine is safe for you.

Vocabulary

Nutrition

1a Work in pairs. What food types do you think make up a balanced diet? Make a list.

b Complete the text with the words below.

calories carbohydrates cholesterol dairy fat hunger iron nutritional protein sugar taste thirst

Balancing your diet

A balanced diet comprises four key elements: fruit and vegetables, carbohydrates, dairy foods and protein. Pasta, rice and bread are all a good source of 1 _____ but they should make up only a third of what we eat. 2 _____ products and meat are a good source of 3 _____ . This is essential for our body and also gives us energy. However, it also contains 4 _____ which can cause us to become overweight if we have too much of it. 5 _____ also creates a problem. People enjoy eating sweet foods and drinking fizzy drinks because they 6 _____ good and give us energy. But this energy is short-lived and we soon find ourselves with a feeling of 7 _____ or 8 _____ again. Too much sugar and fat in general can, more significantly, create high levels of 9 _____ in our systems which can result in health problems. Vegetables have a lot of 10 _____ value. They provide us with vitamins and 11 _____ , which helps us to form red blood cells, but they have few 12 _____ .

c Work in pairs. Think about your diet. What does it mostly consist of?

Synonyms

2a Replace the underlined words in the sentences (1–8) with the synonyms below. Which words are more academic?

involves complex considerably consume generates occur physical health vary

1 People should <u>eat</u> at least five portions of fruit and vegetables a day.
2 Keeping slim <u>is about</u> healthy eating, not exercise.
3 Nutritional information on food packaging is too <u>difficult</u> for most people to understand.
4 Try to <u>change</u> the food you eat each day.
5 Nutritional problems <u>happen</u> when people eat too much meat.
6 The availability of cheap fast food <u>creates</u> problems in many societies.
7 Exercise doesn't just improve <u>the well-being of your body</u>; it helps mental health too.
8 Eating healthily today is <u>much</u> easier than it was a hundred years ago.

b Work in pairs. Do you agree or disagree with each statement? Give reasons.

c Complete the table with the noun forms of the verbs. Underline the word stress for each one.

Verb	Noun
consume	1_____
involve	2_____
generate	3_____
occur	4_____
vary	5_____

Collocations

3a Match words from A with words from B to form collocations.

A

balanced commonly naturally play significant vary

B

a role considerably diet effect known as occurring

b Write six sentences about nutrition and/or food. Include collocations from Exercise 3a.

Sugar is a naturally occurring ingredient of fruit.

Prefixes

4a Underline the prefixes in the words below and answer the questions.

disadvantage ineffective irregular unhealthy

1 What part of speech is each word?
2 How does each prefix change the meaning of the word?

b Complete the text with the words below and the prefixes *dis-, in-, ir-* or *un-*.

agree appear expensive healthy important known responsible usual

Food fashion

It seems that one day experts say that one food is good for you and the next day other experts **1** _____ and say that it's actually **2** _____ . The worst thing is happily eating a nice, **3** _____ apple or orange and suddenly learning that some previously **4** _____ fruit from the other side of the world is the new super food that we all have to have. And of course, it's twice the price. Personally, I think it's **5** _____ of experts to promote these kinds of food fashions, especially as they soon **6** _____ . Surely it's **7** _____ what fruit we eat. It doesn't have to be new or have an **8** _____ name, because any fruit is good for us, isn't it?

c Work in groups.

1 Identify at least three opinions in the text.
2 Discuss whether you agree with these opinions.

Speaking (Part 3)

Stress and intonation

Ingredients	Nutritional information	
Maize starch, Wheat flour, Flavourings, Salt, Skimmed milk powder, Flavour enhancer (E621), Colour (E150c), Onion powder, Hydrogenated palm oil, Sugar, Citric acid (E472c)	**Typical values**	**Per 100g (dry mix)**
	Energy	1371kJ
	Protein	11.4g
	Carbohydrate	62.6g
	of which sugars	5.1g
	Fat	1.7g
	of which saturates	0.9g
	Fibre	0.6g
	Sodium	0.5g

1 Work in pairs and look at the food label. How helpful are labels for teaching people about healthy eating? Do you use them? Why/Why not?

2a Underline the stressed syllable in each word.

1 educate (v), education (n), educative (adj)
2 responsibility (n), responsible (adj), responsibly (adv)
3 microwave (v), microwave (n), microwaveable (adj)
4 inform (v), information (n), informative (adj)
5 govern (v), government (n), governmental (adj)

b 8.1 Listen and check your ideas. Is the same syllable stressed in each word family?

c 8.2 Listen to Alice answering the questions in Exercise 1. Tick the words in Exercise 2a she uses.

3a 8.3 Read the text and listen to part of Alice's talk. Which words does she stress and why? Where is the main (strongest) stress?

They tell us what kinds of things are in the food we buy, like the number of calories or the amount of salt.

b 8.4 Underline the stressed words in the sentences (1–3). Where is the main stress? Listen and check your ideas.

1 It's true that food labels can help to educate people. Having said that, I'm not sure labels do actually result in healthier eating.
2 While the label's there to help me choose the healthiest option, I never read it.
3 So, although food labels can be very informative, they don't actually work and I think we should look more closely at the manufacturing process.

4a 8.4 Listen again to the sentences in Exercise 3b. Where does Alice pause in each sentence? Does her voice rise or fall before a pause.

b Work in pairs. Take turns to practise saying the sentences in Exercise 3b. Use correct sentence stress and intonation.

Give an opposing opinion

5a Find three words/phrases in Exercise 3b that introduce an opposing opinion. Does Alice start with her opinion or the opposing opinion? Why?

b Work in pairs. Take turns to make sentences about fast food from the prompts (1–6). Use the word/phrase in brackets to introduce the opposing viewpoint. You can change the order of information.

1 called 'fast food' / not always quick (While)
While it's called 'fast food', it's not always quick.
2 can taste good / unhealthy (It's true that ...)
3 is convenient / not high quality (Although)
4 popular / not everyone eats it (While)
5 cheap / not always nutritious (Although)
6 gives you energy / soon feel hungry again (It's true that ...)

Test practice

➤ **TEST STRATEGIES** page 172

➤ **EXPERT SPEAKING** page 189

6a Read the questions in the test task.

1 Note down three words, phrases or collocations you can use to answer each question.
2 Think about an opposing idea you can introduce for each question.
While some people say eating habits have stayed the same, I think they've changed a lot.

1 How are eating habits in your country today different from those in the past?
2 How do you think eating habits might change in the future?
3 What does your government do to encourage healthy eating?
4 What can a government do to prevent people from eating unhealthy foods?
5 Whose responsibility is a person's health?

b Work in pairs. Take turns to ask and answer the questions. Record your answers so that you can listen later.

Task analysis

7 Work in pairs and discuss the questions.

1 Did you effectively use *While*, *Although* and *It is true that ...* to introduce an opposing opinion?
2 What could help you to improve your pronunciation? Choose from the list.
- Practise reading aloud.
- Listen and repeat after a podcast or radio show presenter.
- Record yourself speaking and check you stressed words and sentences correctly.

Listening (Section 1)

Before you listen

1 Work in groups and discuss the questions.

1 How many items of food in the photo can you name?
2 Where do people usually buy fruit and vegetables in your country? Why?
3 Is it common to grow your own fruit or vegetables in your culture? Why/Why not?

Listen for the correct spelling

2a 8.5 Listen to some people spelling some names and choose the correct spelling.

1 Dr Jevons / Givens
2 Chloe / Khloe
3 Berkeley / Barkley Road
4 Stephen / Steven
5 Mr Matthews / Mathews
6 Lily / Lilli Park

b 8.6 Listen and write the names (1–6) that you hear.

c 8.7 Listen and write the names (1–6) that you hear.

Test practice

➤ **TEST STRATEGIES** page 168

3a 8.8 Read the test task and listen to the introduction. What is the conversation about? What is the relationship between the two speakers?

b Predict the missing word(s). What type of word should you listen for (e.g. noun, verb)? Can you guess what the actual word is?

Questions 1–7

Complete the table below.

*Write **NO MORE THAN TWO WORDS** for each answer.*

Name	Location	Advantages
Price U Save supermarket	1 _____ Road	daily 2 _____
Daisy's Delicatessen	Bridge Street	especially good for 3 _____
4 _____ corner shop	Rose Lane	can support 5 _____
Bishops Street 6 _____	Bottom of High Street	sells unusual 7 _____

c 8.9 Listen and complete the task.

Task analysis

4 Work in pairs and discuss the questions.

1 Did you spell answers 1 and 4 correctly? If not, why not?
2 How much did predicting the missing word(s) help you? Why?

Discussion

5 If you held a dinner party, what would you cook, who would you invite and what activities would you organise?

Language development

The passive

➤ **EXPERT GRAMMAR** page 180

1a Look at sentence below and answer questions 1–4.

The food market was relocated last year.

1 What is the subject of the sentence?
2 Do we know what or who did the action? Is it the same as the subject?
3 What auxiliary verb is used? What form is the main verb?
4 What tense is the verb in?

b Answer questions (1–4) in Exercise 1a about the three sentences (A–C).

A The delicatessen's named after the owner, Daisy.
B The corner shop's recently been sold.
C Hopefully the market won't be moved again for some time.

2 Work in pairs. Identify if the verb in each sentence is active (A) or passive (P).

1 Around 141 trillion tonnes of calories worth of food are wasted each day in the USA.
2 Last year, people in developing countries spent 70-80 percent of their income on food.
3 By 2030, food demand will rise by a third.
4 Insects have been a part of the diet in some countries for centuries.
5 Most farm animals in the world are looked after by women.
6 The potato was not grown in China until the 17th century.

3a Complete the text with an auxiliary verb in the correct form.

Food prices **1** _____ usually affected by two key factors: supply and demand. In the past, food supply fell when farm land **2** _____ lost to developers who turned it into housing estates. Food levels **3** _____ also reduced by political conflict and when crops **4** _____ killed by disease.

A reduced supply like this usually results in a rise in prices. Prices **5** _____ also affected by the cost of fuel which will usually **6** _____ passed onto the consumer.

b How much does price affect your decision to buy food?

4a Read the process of creating canned food. Rewrite each sentence so it is in the active form.

1 The vegetables are harvested from the field by the farmer.
The farmer harvests the vegetables from the field.
2 They are put into a machine by the farmer.
The farmer _____ .
3 They are cooled by the first machine.
The first machine _____ .
4 The vegetables are washed by a second machine to remove the dirt.
A second machine _____ .
5 The regular-shaped vegetables are separated from irregular-shaped ones by a third machine.
A third machine _____ .

b Rewrite each sentence so it is in the passive form.

1 The farmer throws away the irregular-shaped vegetables.
The irregular-shaped vegetables _____ .
2 The farmer packs the vegetables for shipping.
The vegetables _____ .
3 The farmer places the vegetables in low-temperature storage.
The vegetables _____ .
4 The farmer takes the vegetables to a distributor.
The vegetables _____ .
5 The distributor delivers the vegetables to supermarkets.
The vegetables _____ .

c Work in pairs. Do you think it is right that vegetables are thrown away simply because they are not the perfect shape? Why/Why not?

5a Complete the description of the process of canning green beans. Put the verbs in brackets in the correct active or passive form.

First, the green beans are transported from the farm to a processing plant. There, they 1 _____ (sort) and any irregular shaped beans are removed and thrown away. A machine 2 _____ (cut) the beans into pieces of the same size so they all look the same. They 3 _____ (then/place) into hot water for between one and two minutes, in a process known as *blanching*. The blanched beans 4 _____ (pack) into cans and then the cans 5 _____ (heat) for twelve minutes in order to seal them. Once cooled, the cans 6 _____ (move) to a labelling area where a machine 7 _____ (stick) a label onto each one. The cans 8 _____ (package) into boxes which 9 _____ (ship) to distributors around the country. The distributors 10 _____ (then/deliver) the boxes to supermarkets and shops in their region.

b Work in pairs. How was the process different before canning and refrigeration were invented?

Writing (Task 1)

Sequence a process

1 Work in small groups and discuss the questions.

1 What does *fast food* mean?
2 What kind of fast food do you enjoy the most? Why?
3 Do you ever think about where the ingredients of fast food come from? Why/Why not?

2a The *sequencers* below tell us where an action comes in a process. Put them in the correct place in the table.

After that Before Finally First In the final stage
Later Next Once Then To begin

First stage	Middle stages	Last stage

b Complete the text with words from Exercise 2a. More than one choice might be possible.

Fast food fries

1 _____ , potatoes are shipped to the processing plant in trucks where they are cleaned by machines and peeled. 2 _____ they are sent through a tube at high speed and cut into long thin pieces of potato. They are 3 _____ placed into hot oil and partially fried for a short time as this gives the fries their familiar crunch. However, 4 _____ that, they are coated with natural sugar to give them a consistent colour at every time of the year. 5 _____ they have been taken out of the fryer, they are placed into a machine. There, they are frozen so they keep their flavour. The chips are 6 _____ placed into boxes and shipped to fast food restaurants across the country, where they are fried in deep fat fryers in front of customers. 7 _____ , the fries are covered with salt. They are placed into cardboard containers and served to customers.

c Answer the questions (1–3).

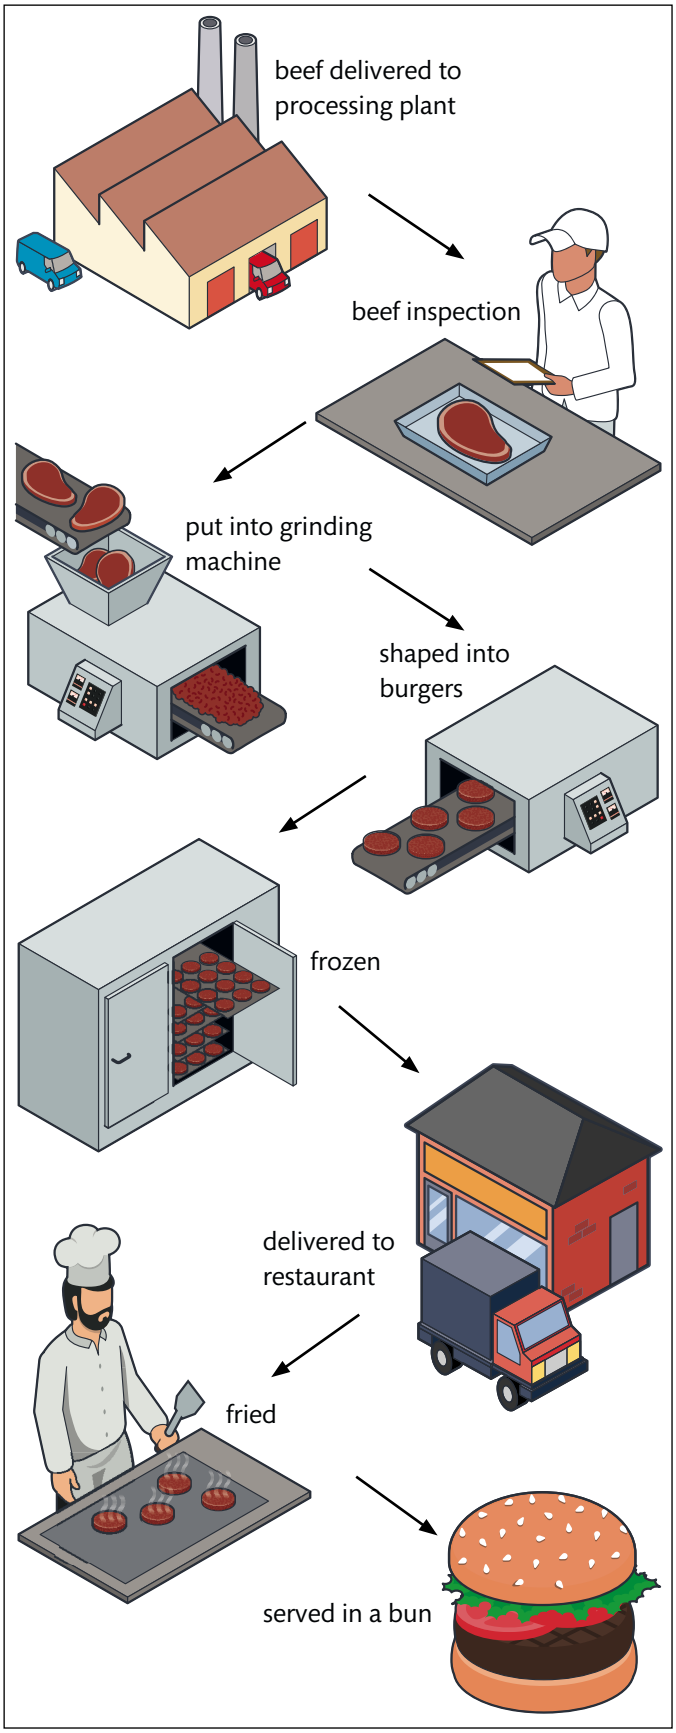
1 Which sequencers begin a sentence or clause?
2 Which come between the subject and verb?
3 Which are followed by a comma?

Test practice

➤ **TEST STRATEGIES** page 171

3a Work in pairs. What does the diagram opposite show? The words in the labels can help you.

b With your partner, write a description of the stages of how fast food restaurant burgers are made. Use the sequencers in Exercise 2a to help you describe the stages.



8b The food on our plates

Listening (Section 1)

Before you listen

1 Work in groups and discuss the questions about the jobs below.

chef fisherman food writer food photographer food scientist waiter/waitress

1 What skills do you need for these jobs?
2 Would you like to work in the food industry? Why/Why not?
3 Which of the six jobs would you enjoy doing the most? Why?

Test practice

➤ **TEST STRATEGIES** page 168

2 8.10 Listen and complete the test task. Listen carefully for the spelling of names.

Questions 1–5
Complete the table below.
*Write **NO MORE THAN TWO WORDS** for each answer.*

Job	Employer	Work day(s)	Duties
kitchen assistant	The 1 _____ café	weekends	2 _____ , wash dishes
3 _____	Bellamy's restaurant	Thursday and Friday evening	serve customers, wipe tables
barista	4 _____ department store	Saturday	prepare drinks, 5 _____

Questions 6–10
Complete the table below.
*Write **NO MORE THAN TWO WORDS AND/OR A NUMBER** for each answer.*

Position	Duties	Pay	Other benefits
6 _____	check food quality	7 £_____ an hour	recipe creation
food packer	pack and 8 _____ boxes	£8.45 an hour	9 _____ at end of summer
office assistant	type reports, 10 _____	£12.50 an hour	receive health and safety training

➤ **HELP**

4 Remember that *apostrophe* is a type of punctuation.
8 The missing word here can be both a noun and a verb.

Task analysis

3 Work in pairs and discuss the questions.

1 Did you spell the names correctly? If not, which letters did you mishear?
2 Did you have time to predict the types of words missing in each gap? How could you use the time better next time?

Language development and vocabulary

Review of formal structures

➤ EXPERT GRAMMAR page 180

1a Read two excerpts from an essay (A and B) and find at least one example of each of these features:

1 an active verb (e.g. *give*)
2 a passive verb (e.g. *is given*)
3 a relative clause (e.g. *which* ...)
4 a *that* clause (e.g. *I think that* ...)
5 a simple sentence (i.e. one clause)
6 a complex sentence (i.e. two clauses)

A

One of the advantages of eating out is the fact that the food is bought fresh each day and it is cooked by a professional chef. It is therefore likely that the quality and taste will be better than the kind of food you may cook at home. In addition to this, the food which is offered by the restaurant may give you the opportunity to experience a different style of food, for example Chinese or Indian. This can be an enjoyable experience. So, although eating out can be expensive, it provides many benefits.

B

When you eat out, the food's usually fresh each day and a professional cook makes it, so it will probably be better than your home-cooked food. Also, if you go to a restaurant that cooks a different style of food, like Chinese or Indian, then you can also try out this kind of food. It can be fun and you can learn something new too. So, eating out might be expensive but you get a lot from it.

b Which excerpt is more formal/academic, A or B? What formal grammatical structures help you decide?

2 Rewrite the following essay excerpt so it is more formal. Follow instructions 1–4.

1 Join the first two sentences with *is the fact that* to create a *that* clause. Delete words where necessary.
2 Change at least two active verbs to passive verbs.
3 Join two sentences with *Although* to create a complex sentence.
4 Join two sentences with a relative pronoun (e.g. *which, who*).

There is another good thing about eating out. You do not have to cook the meal because someone else does it for you. A waiter brings it to your table and takes your plates away later. It means you can sit back. You have to pay the bill but you can go home without worrying about washing dirty dishes.

Formal synonyms

3a Look at the paragraph in Exercise 2. Which words or phrases are <u>not</u> very formal?

b Replace the words or phrases in the paragraph with words or phrases below.

being concerned about benefit of delivers
household chores prepare relax removes

4a Match the words/phrases in A with the more formal synonyms in B.

A

choose eat find look at make put show so take take away

B

as a result collect consume display locate place prepare remove select view

b Complete the description with the correct form of the formal words in Exercise 4a.

The diagram illustrates how food is ordered and delivered in a restaurant. As we can see, the restaurant has no waiters. 1 _____ , the food is ordered via a tablet computer 2 _____ in the middle of each table and delivered via a network of tracks. First, customers 3 _____ the menu, 4 _____ their preferred meal and pay for it by swiping their credit card across the machine. Once the order is made, it is 5 _____ on a screen in the kitchen. The food is then 6 _____ by chefs and put onto a plate. The plate travels along a metal track from the kitchen to a serving area in the restaurant. When the plate arrives at the serving area, a computerised announcement is made and the customer knows to 7 _____ the plate. After the food has been 8 _____ , the customer takes the empty plate to a cleaning area and 9 _____ it on a tray. The tray is carried along a track to a dishwashing area in the kitchen. The plate is 10 _____ from the tray by a member of staff and put into a dishwasher where it is cleaned.

c Work in pairs. Write a short description of the process in a traditional restaurant, using formal words from Exercise 4a.

d Work in pairs. What are the advantages and disadvantages of a restaurant like this? Think about the customers, staff and owner.

Speaking (Part 3)

Vocabulary development

1a Which phrases below could you use to describe the benefits of eating with others? Why? Tell a partner.

a sense of community chat communicate
convenience custom friendship generation habit
happiness healthy eating lonely relationship

b 8.11 Listen to two test candidates, Yohei and Fatima, discussing meals. Which words in Exercise 1a did they use? Could they have used other words from the box?

Test practice

➤ **TEST STRATEGIES** on page 172

2 Read the test questions. Which one did Yohei and Fatima each answer in Exercise 1b?

1 How important is eating together in your culture?
2 What food customs are there in your culture?
3 How have people's meal time habits changed in your country in recent years?
4 What are the advantages of eating out?
5 Do you think the food culture in your country will change in future?

Focus on Speaking band descriptors

3a Match the key words below with the band descriptors (1–4). Then check your answers on page 184.

meaning complex sentences connectives hesitation
mispronunciation mistakes simple sentences
paraphrases repetition speak at length
words and sounds

1 Fluency: _____ , _____ , _____ , _____
2 Lexical resource: _____ , _____
3 Grammar range and accuracy: _____ , _____ , _____
4 Pronunciation: _____ , _____

b Look at the descriptors for the band you want to achieve on page 184. What does it say about each heading in Exercise 3a?

4a 8.11 Work in pairs. Choose one band descriptor each from Exercise 3a. Listen to Yohei and Fatima again and decide whose answer is better and why.

b Share your ideas with another pair.

5 Work in groups of four. Take turns to ask and answer at least three questions in Exercise 2.

- One student asks the questions.
- One student answers the questions.
- One student assesses the speaker's fluency and use of vocabulary.
- One student assesses the speaker's grammar and pronunciation use.

Assess and improve

6 Use your assessment in Exercise 4 to give feedback to your group.

1 Say what each speaker did well.
2 Say what each speaker could do better next time.
3 Set yourself a goal for improvement. How can you achieve that goal?

Goals
- *Hesitate, repeat yourself or self-correct less.*
- *Use a wider range of vocabulary.*
- *Make fewer mistakes in ... (e.g. verb patterns).*
- *Use better word stress, sentence stress or intonation.*

Reading (Matching information; Label a diagram)

Before you read

1 Work in pairs and answer the questions.

1 Do you put tomato ketchup or mustard on your food? When?
2 Why do you think ketchup is so popular around the world?
3 Would it be easy to create and sell a new ketchup brand? Why/Why not?

Test practice

➤ **TEST STRATEGIES** page 170

2 Complete the test task. Remember to try to guess the meaning of unknown words from the context.

➤ **HELP**

1, 2, 5 *first mention*, *research* and *explanation* are key words. Make sure they match the information in the paragraph you choose.

7 What kind of container is in the diagram? Look for this in the passage.

Task analysis

3 Work in pairs and answer the questions.

1 How did you answer Questions 1 and 2? Did you both follow the same process or do something different?
2 Which unknown vocabulary made Questions 7–10 difficult? How did you deal with this?

Questions 1–6

*The passage below has six paragraphs labelled **A–F**.*

Which paragraph contains the following information?

*Write the correct letter, **A–F**.*

***NB** You may use any letter more than once.*

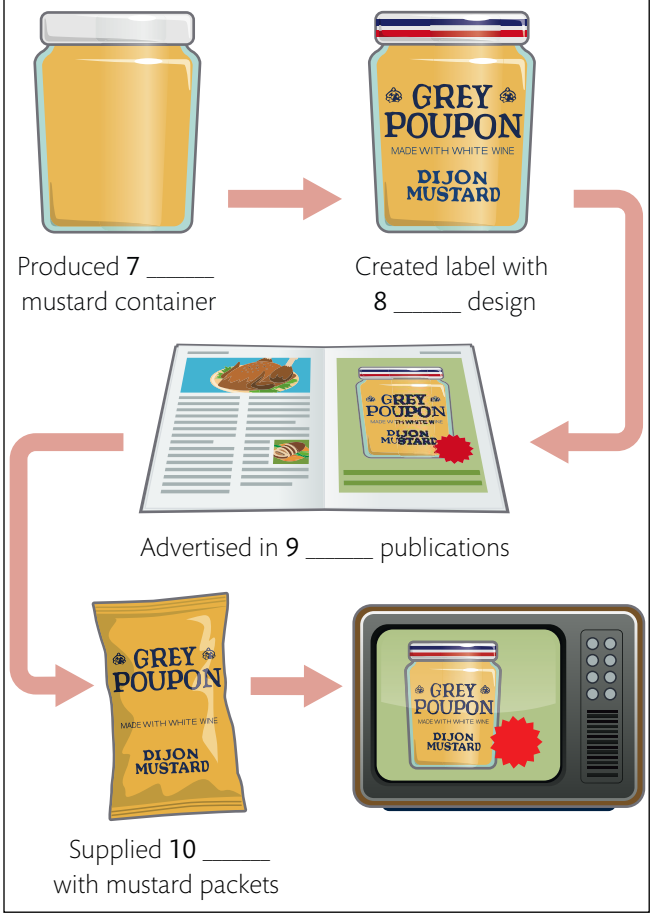
1 the first mention of a man with a dream
2 research that showed customers were happy to change brands
3 a description of a time when a salesman failed to make a profit
4 an example of an industry where small businesses are unable to compete with the leading brand
5 an explanation for the success of an advertising campaign
6 a description of how a product is made

Questions 7–10

Label the diagram.

*Write **NO MORE THAN ONE WORD** from the passage for each answer.*

How Grey Poupon became a number one brand



The ketchup conundrum

A Many years ago, just one mustard dominated the US supermarket shelves: the American brand French's. It was a yellow mustard that came in a plastic bottle. If you looked hard in the grocery store, you might find something in the specialty foods section called Grey Poupon, which was a French-style mustard, light brown in colour. In the early seventies, Grey Poupon was no more than a hundred-thousand-dollar-a-year business. Few people knew what it was or how it tasted, or had any particular interest in a different mustard to French's. Then one day the Heublein Company, which owned Grey Poupon, discovered something: if you gave people a mustard taste test, a significant number of people who tried Grey Poupon switched from French's yellow mustard. In the food world that almost never happens, which made Grey Poupon special.

B Heublein put Grey Poupon in a bigger jar, with a new label that made it seem French, even though it was made in Connecticut with Canadian ingredients. The company ran tasteful ads in upscale food magazines. They put the mustard in little foil packets and distributed them with meals on airlines – which was a brand-new idea at the time. Then they hired the Manhattan ad agency Lowe Marschalk to do something, on a modest budget, for television. The agency came back with an idea: A Rolls-Royce is driving down a country road. There's a man in the back seat in a suit with a plate of beef on a silver tray. He nods to the chauffeur, who hands back a jar of Grey Poupon. Another Rolls-Royce pulls up alongside. A man leans his head out the window. 'Pardon me. Would you have any Grey Poupon?'

C In the cities where the ads were shown, sales of Grey Poupon rose 40 to 50 percent. Grocery stores put Grey Poupon next to French's and by the end of the 1980s it was the most powerful brand in mustard. 'The tagline in the commercial was that this was one of life's finer pleasures,' Larry Elegant, who wrote the original Grey Poupon ad, says, 'and that, along with the Rolls-Royce, seemed to impart to people's minds that this was something truly different and superior.'

D The rise of Grey Poupon proved that the American supermarket shopper was happy to pay more for a better quality product. Furthermore, its success showed that a consumer's taste and habits were not fixed: that just because mustard had always been yellow did not mean that consumers would use only yellow mustard. It is because of Grey Poupon that the standard American supermarket today has an entire mustard section. It is also because of Grey Poupon that a man named Jim Wigon decided, several years ago, to enter the ketchup business. Jim Wigon had a simple vision: build a better ketchup – the way Grey Poupon built a better mustard – and the world will beat a path to your door. If only it were that easy.

E Wigon runs his ketchup business under the brand World's Best Ketchup. He starts with red peppers and then adds Spanish onions, garlic and a high-end tomato paste. Basil is chopped by hand rather than by machine. He uses maple syrup, not corn syrup, which gives him a quarter of the sugar of the most popular tomato ketchup brand. He then pours his ketchup into a clear glass ten-ounce jar, and sells it for three times the price of other brands.

F Wigon then travels around the country selling the product to supermarkets. At the end of one long day, Wigon had sold ninety jars but he had also got two parking tickets and had to pay for a hotel room, so he was not going home with money in his pocket. And it isn't just World's Best that is finding it difficult. In the speciality ketchup world, there is River Run and Uncle Dave's, from Vermont, and Muir Glen Organic and Mrs Tomato Head Catsup, in California, and dozens of others – and every year Heinz's huge share of the ketchup market just grows. It is possible, of course, that ketchup is waiting for its own version of that Rolls-Royce commercial – the magic formula that will satisfy an unmet need. It is also possible, however, that the rules which apply to Grey Poupon and to olive oil and salad dressing and almost everything else in the supermarket, simply do not apply to ketchup.

Writing (Task 1)

Lead-in

1 Work in pairs and discuss the questions.

1 Where do you or your family typically do your food shopping?
2 Have you or your family's food shopping habits changed over the last decade? How?
3 Do you think they will change in future? How?

Understand the task

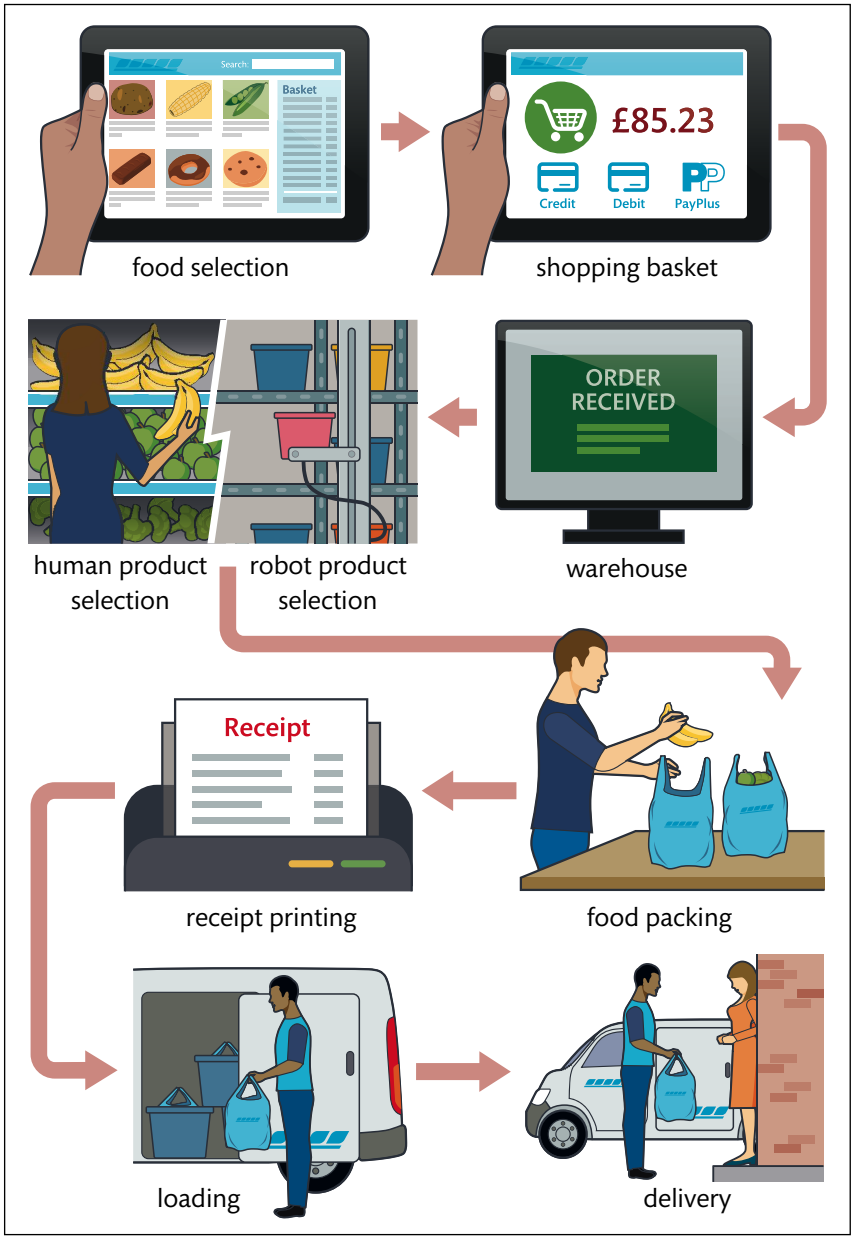
➤ EXPERT WRITING page 199

2 Read the task instructions and look at the diagram. What does it show?

You should spend about 20 minutes on this task.

The diagram illustrates the process of online food shopping. Summarise the information by selecting and reporting the main features and make comparisons where relevant.

Write at least 150 words.



Plan the task

➤ **TEST STRATEGIES** page 171

3a Read the test task. Think about your description. Put the stages (1–3) into the correct order.

1 Give an overview of the main point(s).
2 Describe the process in detail.
3 Say what the diagram shows, paraphrasing the wording in the test task.

b Use the questions to help you make a quick plan. Note down key words.

1 What does the diagram show?
2 What is the main thing we learn from this diagram?
3 What happens in each stage? Make some notes.

Language and content

4a Look at two different sentences to describe Stage 1 of the diagram on page 132. Which is better? Why?

Candidate A: First, food is chosen by the customer via the supermarket's website.
Candidate B: A customer selects food on the supermarket's website.

b Circle verbs below that you would like to use to describe the process and add them to your plan in Exercise 3b.

browse choose collect consume create deliver display give load locate pack pass pick place print purchase remove select send view

5a Correct six spelling mistakes in the sentences which describe a different process of food shopping.

Customers choose food products from the supermarket shelfs as they shop. They scan each item into a handheld machin, after which they place the goods into thier bags. The total is calculated as the shopper shops so they can see how much they will have to pay. After all the items have been choosen and scanned by the customer, the data is sent to a self-checkout till. There, the goods are payed for and a reciept is printed for the customer.

b Look back at your previous writing during the course. What kind of spelling mistakes do you make? Make a note of common spelling errors.

6 Match each statement below to the four Task 1 descriptors on page 191, e.g. *Task achievement*.

1 Uses a wide range of vocabulary (e.g. verbs) correctly with correct spelling.
2 Organises and links ideas logically.
3 Uses a mix of simple and complex sentences accurately.
4 Gives an overview and writes about the key points.

Write your description

7 Complete the test task in Exercise 2. Use your plan in Exercise 3b. Write at least 150 words. Use sequencers to describe the stages.

Assess and improve

8a Read and assess your description using the statements in Exercise 6. Then, swap your description with a partner and assess each other's.

b Give positive feedback and suggest one thing to improve.

c Rewrite your description and make improvements.

d Work in pairs and discuss the questions.

1 What did you find challenging about this task?
2 How can you improve in future?

Review

1 Choose the correct word to complete the paragraph from an essay.

I believe education is the key to a balanced **1** *diet / hunger.* If children are told about good **2** *nutritional / nutrition* at school, their food **3** *consume / consumption* is likely to be healthier and include **4** *carbohydrates / cholesterol,* protein, dairy and a **5** *variety / vary* of fruit and vegetables, but not too much fat or sugar. Such education programmes should also **6** *involve / occur* learning about the number of **7** *calories / taste* in everyday food items, the difference between naturally **8** *happening / occurring* sugar in food and refined sugar added by manufacturers, as well as how exercise affects physical **9** *health / healthy.* This knowledge will **10** *consume / generate* better choices about food and lifestyle, which will lead to a **11** *commonly / considerably* healthier population. Although it is unlikely to result in the **12** *unappearance / disappearance* of illnesses caused by poor diet, there will hopefully be fewer examples of these.

2 Complete the article with an adjective below and a prefix of your choice. You will not need all the adjectives.

agree appear effective expensive important known regular responsible usual

'Clean eating' may be a new phrase but it is not a new or **1** _____ idea. It simply describes a healthy lifestyle where you eat food as close to its natural form as possible. The result is that you do not consume **2** _____ ingredients that have been added as these can be bad for your body. Clean eating should not be confused with dieting. Trying to lose weight quickly is often **3** _____ in the long term. The weight may **4** _____ for a short time but it soon returns when you go back to your previous lifestyle. There are also many diets that medical experts think are **5** _____ and unsafe. They suggest it is much better to eat a balanced diet than it is to suddenly cut your food intake at **6** _____ times throughout the year.

3a Complete the questions with the active or passive form of the verb in brackets.

1 How _____ hunger _____ around the world in the last three decades? (reduce)
2 What advantages and disadvantages _____ fast food restaurants _____ ? (offer)
3 Should fast food companies _____ to advertise to children? (allow)
4 How differently do you think food _____ fifty years from now? (produce)
5 In what ways _____ food shopping _____ easier by new technologies in recent years? (make)
6 Do you agree that food _____ in too much plastic and cardboard? (package)
7 How likely is it that traditional food in your country _____ in future? (die out)
8 Do you think that more or less sugar _____ to food and drinks in your country in the past? (add)

b Practise answering the questions in Exercise 2a. Give reasons.

4a Which question in Exercise 3a is the speaker answering?

'I think it's very possible, actually. Recently, international restaurants have opened up all over the country and you can now get international ingredients in supermarkets. Things like pizza and pasta are now really popular – Chinese food and Indian food too. It's great to be able to eat a variety of food but it means that traditional food is becoming less popular. People no longer seem to cook the food that my grandmother cooked when I was young, so it's very possible that my grandchildren won't eat it at all.'

b Change the speaker's answer in Exercise 4a from spoken English to a paragraph from an academic essay. Start with the topic sentence: *It is possible that traditional food in my country will die out in future.* Then:

1 try to include a passive verb, a relative clause, a *that* clause and/or a complex sentence starting with *although.*
2 use more formal vocabulary where possible.
3 avoid contractions.

5 Complete each sentence with the most appropriate formal words/phrases below. Do not use the less formal synonyms.

benefit of concerned about deliver display find good thing about a household chore housework locate make ~~prepare~~ remove send show take away worried about

1 Some restaurant chefs will prepare dishes that are not on the menu if requested. *(make = less formal)*
2 Most supermarkets _____ food to your door these days.
3 For many people, cooking is a pleasure and not _____ , like cleaning.
4 There are apps that help people to _____ good restaurants.
5 The _____ organic food is the lack of chemicals used to grow it.
6 It is not always helpful for people to become too _____ the food they eat.
7 In Japan, some restaurants _____ the dishes they cook in their window.
8 Good restaurants will _____ the bones from the fish they serve.

9 Well-being

9A Training
- **Reading:** Follow a sequences of ideas (Flow chart completion)
- **Vocabulary:** Adverbs and adverbials; Collocations; Dependent prepositions; Healthcare
- **Speaking:** Use a range of structures (Part 2)
- **Listening:** Identify reference words (Section 3: Table completion; Short-answer questions)
- **Language development:** Modals of obligation
- **Writing:** Write a conclusion (Task 2: Essays)

9B Testing
- **Listening:** Section 3: Multiple choice; Short-answer questions; Notes completion
- **Language development and vocabulary:** Passive and active voice; Describe people

Lead-in

1 Work in pairs. Look at the photos. Which aspects of health do they represent?

2 According to the World Health Organization, the factors below have the greatest effect on your health. Work in pairs and discuss the questions (1–3).

income education physical environment social support (e.g. friends and family) culture genetics lifestyle choices gender age

1 How might each of these affect people's health?
2 Rank each of them according to their importance (1 = most important, 10 = least important)
3 Which of these do people have most control over? Why?
You can't control your age, but you can take steps to live healthily at any age.

Reading (Flow chart completion)

Before you read

1a What do you think are the biggest health challenges facing the world today?

b Check the meaning of the words in bold. Work in pairs and discuss the questions.

1 What is **bacteria**? How do bacteria and other **infections** affect humans and animals?
2 How can **antibiotic drugs** help?

Follow a sequence of ideas

2a Put the stages of a research report (1–4) in the order in which they usually appear.

1 conclusions
2 background to the research
3 results
4 methods

b What stages in the flow chart probably describe the methods, results and conclusions?

The end of antibiotics

The bacteria, E. coli (SHP45), was known to be carried by humans and 1 _____ .

The scientists in China were studying Colistin, which is used widely in the 2 _____ industry.

2014: Professor Liu identified a gene which controlled 3 _____ .

4 _____ also showed signs of the same bacteria and genes as in meat.

The gene was passing between different strains of bacteria.

They concluded that there will be a complete 5 _____ of a certain antibiotic in the future.

3a Look for the word *Colistin* in the passage to locate the information for item 2 and answer the questions (1–4)

1 Which paragraph is it in?
2 Does the sentence which *Colistin* appears in refer to methods or results?
3 What two industries are mentioned here?
4 Which industry uses Colistin *widely*?

b Complete the remaining items in the flow chart.

New discovery spells the end of antibiotic drugs

1 Scientists have known for some time now that antibiotics are under threat. Bacteria have been developing resistance to antibiotics for decades, meaning that the drugs are no longer as effective as they once were. Now scientists in Southern China have found evidence that bacteria could be changing faster than we thought. Their findings are sounding alarm bells around the global medical community.

2 Professor Jian-Hua Liu and his colleagues set out to better understand a type of bacteria called E. coli (SHP45). The bacteria is widespread in people and is commonly found in livestock that has been intensively farmed. Professor Liu wanted to see the effects on Colistin on the bacteria. Unlike many antibiotics, Colistin was discovered over sixty years ago but has been little used in the human pharmaceutical industry because of its toxicity. However, it has had considerable agricultural use, and so production of this antibiotic is around 12,000 tonnes per year.

3 Professor Liu and his colleagues were routinely testing animals destined for the food market between 2011 and 2014. They had identified a strain of E. coli found in a pig, and the bacteria was showing signs of resistance. After further tests on pork acquired in supermarkets across Guanzhou, they isolated more of the bacteria and found a gene in it that regulated resistance.

4 In addition to testing pork and chicken products, they also looked at bacteria found in patients who were suffering from infections at a local hospital. They found the same gene present in that bacteria, too. This was particularly significant because for the first time scientists have evidence that the gene is being readily passed between different strains of bacteria.

5 Scientists are concerned that this means that the shift from widespread resistance to total drug failure is now inevitable after looking at this evidence and may come sooner than we feared. An urgent solution is needed.

Test practice

➤ **TEST STRATEGIES** page 169

4a Look at the passage in the test task. Is it a report on one project, or a historical text about the development of something? What are the clues in the passage?

b What sequence of ideas do you expect a historical text to follow? Put the ideas below in the correct order.

1 Conclusions.
2 Introduction and why the historical feature is important.
3 The changes in time order, explaining the differences between each development.

5 Complete the test task below. In the test you have 1 to 2 minutes per question if you are going to complete the test. Try using strategies from Exercise 3a as you answer.

Complete the flow chart below.
*Write **NO MORE THAN TWO WORDS AND/OR A NUMBER** from the passage for each answer.*

The history of antibiotics

1928: Fleming noticed the effect of penicillin when he was cleaning 1 _____ .

In the late 1930s/early 1940s, the medicine was used successfully to treat infection in 2 _____ .

The name 'antibiotic' was first used in 3 _____ .

Identification of new antibiotics stopped in the 1960s because of changes in 4 _____ .

The discovery of 5 _____ led to new possibilities in the 1990s.

Task analysis

6 Work in pairs and discuss the questions.

1 Is it helpful to know how ideas are sequenced in this type of passage?
2 Which of the strategies in Exercise 3a was most helpful?

Discussion

7 Work in pairs and discuss the questions.

1 What might be the impact of the total drug resistance discussed in the first text?
2 Do you think doctors should stop using antibiotics on a regular basis?

Antibiotics Discovery: Then and Now

The discovery of antibiotics famously began by accident. On the morning of September 3rd, 1928, Professor Alexander Fleming was washing a number of glass plates, where he had been cultivating the bacteria *Staphyloccocus* as part of his research. He noticed that one of the plates had mould on it, and seemed to be free of the *Staphyloccocus*. Fleming, who had a life-long interest in bacteria, concluded that the *Staphyloccocus* had been killed off by the mould, called *Penicillium Notatum*. Ten years later, further research found that it could reverse the signs of infection when it was given to small animals, without any negative side-effects.

In 1941, a doctor, Charles Fletcher, had a patient who was near to death, and used some of the newly isolated 'penicillin' drug on the man. He died a few weeks later. However, the only reason the patient failed to recover was because Fletcher did not have enough of the drug, not that it did not work.

The term *antibiotic* didn't appear until much later. In 1928, Georges Papacostas and Jean Gate were testing the potential of other substances to restrict bacterial strains. They described a number of examples, and called the phenomenon *antibiosis*. However, it was not until 1945 that Selman Waksman formalised the name and defined an antibiotic as a chemical substance of microbial origin that possesses antibiotic powers.

In the 1940s, sulfonamids became safe for human use and were used throughout the Second World War, and they still are today. The Golden Age of antibiotic discovery had truly begun. A critical element in their success was the mobilisation of the pharmaceutical industry in the USA. More and more companies started looking for bacteria and fungi capable of producing active antibiotics.

The Golden Age came to an end in the late 1960s, as physicians throughout the world began reporting evidence that bacteria were already developing resistance to the new drugs. The drug industry made serious efforts to produce new antibiotics in response to this first crisis, but it was becoming a losing proposition. Authorities were demanding stricter regulations on the testing of drugs and the ability to meet their requirements made the research difficult to impossible.

By the late 1980s people had begun to believe that all of the potential antibiotics had been discovered. However, the arrival of gene sequencing in 1995 started a new wave of optimism. It became apparent that there were many other pharmaceutical agents available in nature.

The question is how to exploit this information and obtain compounds for investigation.

Vocabulary

Adverbs and adverbials

1a Put the words or phrases below into the correct place in the table.

across the Northern Hemisphere around the planet eventually in a lifetime in the near future later nearby outside surprisingly thoughtfully without looking without caring

Type	Adverb	Adverbial phrase
Manner	_____ , _____	_____ , _____
Place	_____ , _____	_____ , _____
Time	_____ , _____	_____ , _____

b Look at the adverbial phrases in Exercise 1a. Identify the parts of speech.

across the Northern Hemisphere = preposition + article + adjective + noun

c Underline the adverbs and adverbial phrases in the sentences below.

[1]Professor Liu and his colleagues were routinely testing animals destined for the food market between 2011 and 2014 … [2]Scientists are concerned that this means that the shift from widespread resistance to total drug failure is now inevitable after looking at this evidence.

d Complete the text with the adverbial phrases from Exercise 1a.

There is usually an outbreak of flu 1 _____ during the November to February winter months. Flu is quite serious, and adults usually only catch it a few times 2 _____ , even though we tend to use the word 'flu' 3 _____ too much about accuracy. International medical communities are working to create stronger international borders to prevent the spread of major flu viruses 4 _____ . In fact, better control measures may be possible 5 _____ .

Collocations

2a Cross out the word that does NOT usually collocate with the main adverb in bold. What do the other words have in common?

1 **newly** created, ended, discovered, established, formed
2 **commonly** associated with, begun to, called, described, known as
3 **largely** based on, ignored by, affected by, increased by, responsible for
4 **previously** believed to be, discussed, known, thought, varied
5 **relatively** alternative, few, simple, low, minor
6 **strongly** agree, disagree, influence, rise, suggest

b Complete the text with a collocation from Exercise 2a.

A pill which is being 1 _____ described as holding 'the secret of long life' is currently being tested. The 2 _____ discovered drug works inside body cells and is 3 _____ simple to produce. Researchers say you could live until 120 if you take it. In the past, research into delaying ageing has been 4 _____ based on a focus on looks. In contrast, this research looks at delaying the onset of diseases.

While it was 5 _____ thought that people living extraordinarily long lives could only happen in fiction, this drug may make that dream a reality. However, many people 6 _____ disagree that quantity is better than quality when it comes to measuring a life.

Dependent prepositions

3a Match the beginnings of sentences (1–5) with the endings (A–E).

1 Social media has a lot of **potential**
2 Doctors can sometimes be **perceived**
3 Appointment times are often not **sufficient**
4 Freely discussing health issues has **impacted**
5 However, without any **constraints**

A **as** too busy to spend time discussing illnesses.
B **on** the people who traditionally offer advice.
C **to** fully discuss health issues or concerns.
D **on** the way we understand and treat illness.
E **to** improve our understanding of health.

b Write a brief plan for the essay title below. Try to use four phrases from Exercise 3a in your plan.

Should people access health advice and medicines over the internet?

Healthcare

4a Complete the text with the words below.

allergies anxiety autism bacteria blood cancer diabetes heart disease

There are over a thousand different 1 _____ in the gut, and they have been found to have an impact on emotional states, such as 2 _____ levels, depression and other disorders. Bacteria is a factor in illnesses, such as 3 _____ , which is the abnormal growth of body cells; 4 _____ , caused by weakening heart muscles; and 5 _____ , caused by an imbalance of sugar in the 6 _____ . In studies, mice which showed signs of 7 _____ , not mixing with other mice, became better able to communicate when the chemical mix in their stomach was altered. With so many people developing 8 _____ to specific foods in recent years, this raises questions about the delicate balance of stomach and mind.

b Discuss which foods have a positive effect on you. Are there any foods that affect you badly?

Speaking (Part 2)

Use a range of structures

1 Work in pairs and discuss the questions.

1 What do you do to keep fit?
2 Describe three benefits to your health of staying fit.
3 Describe a sport that you once did. What was it? Where did you practise it? Why did you choose that sport? How did doing that sport make you feel?

2a 9.1 Listen to Giuliana. How does she begin her sentences? Is this good practice?

b 9.2 Listen to David. Tick (✓) the structures that you hear him use. How does he begin his sentences?

- comparatives
- conditionals
- functional phrases
- passives
- past tenses
- present tenses

c Are most of David's sentences simple, or complex (with more than one clause)? Do you think David would be in a higher band than Giuliana?

3a Complete the sentences (1–6) with your own ideas.

1 I always take the stairs instead of the lift, so that ...
2 People sometimes go to the sauna in my country to ...
3 Some gyms open twenty-four hours, in case ...
4 I think that walking is better ...
5 Most people like driving, despite ...
6 We as a nation spend a lot of time sitting down, even though ...

b Work in pairs. Take turns to make sentences about yourself using the prompts (1–5) and give reasons for your answers.

1 It's important for me to ...
2 Getting exercise is easy because ...
3 There's a range of different exercises that ...
4 If I had more time, I'd ...
5 Probably the best exercise to improve your health is ...

Test practice

➤ **TEST STRATEGIES** page 172

4 Work in pairs. Read the test task below and think about how to use a range of structures in your answers. Use the phrases below to help you. Take turns to complete the task. Record your answers to listen to later.

There weren't a lot of options.
There were a few alternatives.
I had no choice but to try ...
I was faced with an easy/difficult choice.
I opted for/went for the simplest ...

Describe a change you made to your habits to improve your health and fitness.
You should say:
what you did
why you decided to make the change
what effect the change had on you
and explain how you felt about making that change.

Task analysis

5a Listen to your answers. How many different structures were you able to use? Can you see any opportunities to use a wider range?

b Did you start your sentences with a variety of words?

Listening (Section 3)

Before you listen

1 Work in pairs and discuss the questions.

1 What difference has access to medicines made to how we live these days?
2 How are medicines tested in your country?

Identify reference words

2a 9.3 Listen to a student talking about medicine testing. Choose the word/phrase that the back reference in *bold* refers to.

1 them → *medical practitioners / patients*
2 that time → *centuries / 1900*
3 their work → *early reformers / medical historians*
4 they → *new drugs / medical trials*
5 they → *officials / chemists*
6 that time → *1961 / 1962*

b 9.4 Listen to a student describing a topic for her biology coursework. What is a *placebo*?

c 9.4 Listen again. What do the underlined back references refer to?

1 We have more information on one pill than <u>any other</u>.
2 … but <u>they</u> don't contain an active drug.
3 <u>These</u> have no medical effects, but …
4 … often performs as well as the real <u>one</u>.
5 … as many as <u>one in three</u> say they feel better after taking the placebo.

d Answer the questions (1–3) in no more than three words and or numbers.

1 What do placebos look like?
2 Where are placebos used today?
3 How many people report an improvement after taking a placebo?

Test practice

3a 9.5 Listen and complete the test task below.

➤ **TEST STRATEGIES** page 168

Questions 1–6.
Complete the table below.
*Write **NO MORE THAN TWO WORDS** for each answer.*

Placebo presentation:	
Equipment/resources needed	Where to get?
Laptop	1 _____
Handouts	2 _____
Photos	3 _____
Placebos	4 _____
5 _____ of brain	online
6 _____ on Parkinson's	online

b 9.6 Complete the test task, giving short answers.

Questions 7–9
*Answer the questions below in **NO MORE THAN TWO** words.*

7 According to the speakers, what do most doctors regard as the main problem with using placebos?
8 Where can claims be found that placebos work?
9 What use of placebos is now banned?

Task analysis

4 Work in pairs and discuss the questions.

1 Look at the audio script 9.5 on page 214. What did the underlined words (A–D) refer back to?
A I can bring <u>mine</u> in from home.
B I can get <u>them</u> done on the machine there.
C I thought it'd be nice to bring <u>some</u> in.
D Do you have any statistics on <u>that</u>?
2 Why is it important to understand back references to answer the questions?

Discussion

5 Do you think it's ever right for doctors to use placebos?

Language development

Modals of obligation

➤ EXPERT GRAMMAR page 181

1a Choose the correct options in *italics* to complete the sentences.

1 I think we *should / can* try and make it as visual as possible.
2 We *can't have / need* a laptop. Mine's broken at the moment.
3 I *can / must* bring mine, and we *shouldn't / can* connect it to the overhead projector.
4 We *don't have to / mustn't* forget to include some photos.
5 We *don't need to / mustn't* get anyone to sign them out.
6 I'm pretty sure we'll *have to / must* return them!

b Put the modal verbs in Exercise 1a under the correct heading.

Do it 50-50 – You choose Do not do it

2a Complete the text with the correct form of the modal verbs from Exercise 1a. Sometimes more than one option is possible.

Celebrate hand-washing!

We all know we 1 _____ wash our hands frequently, but how well do we wash them? According to the World Health Organization (WHO), hand-washing prevents illnesses from spreading, but you 2 _____ do it right. According their latest advice, you 3 _____ sing the Happy Birthday song in your head while you wash. Keep washing until you get to the end, and you 4 _____ be fine.

Finding the right song was difficult. Firstly, it 5 _____ last the right length of time – around twenty seconds. Secondly, most people know the words by heart, so they 6 _____ think about it and they 7 _____ concentrate on cleaning their hands properly. Finally, any song the WHO chooses 8 _____ be too culturally or age-specific. The Happy Birthday song is international, and even very young children 9 _____ sing it. It's a fun approach but with a serious purpose. Every day, people die from diseases that we 10 _____ prevent. Proper hand-washing could make a difference.

b Work in pairs. Think of another health problem and suggest some action we should take to solve it. Why do you think your solution could work?

3 Complete the text with the phrases below.

became a reality made it possible permitted
was necessary was prohibited

Winning the war against viruses – lessons from Ebola

When the Ebola virus was finally declared a health emergency, it looked unstoppable. But unprecedented cooperation **1** _____ to bring the illness back under control. Human contact, such as the traditional Liberian finger snap greeting, **2** _____ in order to prevent hand-to-hand spread of the disease. Controls were put in place, and in some communities, people weren't **3** _____ to leave their village. It **4** _____ to introduce untested drugs, something the World Health Organization had never supported before. Most people agree, though, that bringing the disease under control **5** _____ thanks to the work of local volunteers, going from house to house, persuading communities to accept change to their traditions.

4a Complete the sentences using the past tense of the modal verbs in brackets.

1 I strongly feel drug companies _____ (should make) their medicines available cheaply in poor countries.
2 While it is true that they _____ (have to invest) money in research to develop those drugs, they _____ (cannot justify) denying help to poorer people.
3 Factories _____ (don't need to buy) expensive ingredients to produce the medicines, as the drugs _____ (can be made) very cheaply.
4 Poor people _____ (must make) huge sacrifices to be able to buy the drugs, or even worse, they _____ (have to do) without them.
5 A lot of people died unnecessarily, which _____ (should not happen).

b Work in pairs and discuss. Do you think that companies have a right to charge everyone in the world the same price for medicines they make?

Writing (Task 2)

Write a conclusion

1a Match the essay questions (1–3) with the types of essay (A–C).

1 *Do you think that traditional medicine has a place alongside modern medicine?*
2 *How has better communication had an impact on health issues?*
3 *Although access to medicine is improving, lifestyle-related health problems exist in many countries. What might improve this situation?*

A Opinion essay B Problem-solution essay C Cause-effect essay

b Look again at the problem-solution essay question and answer the questions (1–3).

1 What are the main causes of the problem?
2 What are the effects of the problem?
3 Think of two solutions to the problem. Why might they work? What might be a disadvantage of those solutions?

Test practice

➤ TEST STRATEGIES page 171

2a Look at the essay questions in Exercise 1a again. Match the conclusion structure (1–3) with the essay type.

Essay type	1 _____	2 _____	3 _____
Sentence 1	Summarise the main points		
Sentence 2	Recommend one to three solutions.	State if the effect has been a good thing or a bad thing.	State which side of the argument has the strongest evidence.
Sentence 3	Write a sentence referring to future action.		

b Put the sentences (1–3) in the correct order to form a conclusion for Question 1 in Exercise 1a.

1 In the future, more research is needed to identify simple, affordable treatments, as these are the qualities that people look for and value in traditional medicines.
2 However, medicines that have been tested and proven to work are the safest and best option for treating the majority of illnesses.
3 Clearly there are strong arguments that traditional medicine has some benefits in promoting generally healthy lifestyles and treating common illnesses.

c Write a conclusion for Question 3 in Exercise 1a.

Task analysis

3 Check your conclusion. Did you include everything suggested in Exercise 2a?

Listening (Section 3)

Before you listen

1 Work in pairs and discuss the questions.

1 Describe your first friend at school. Are you still friends today?
2 Do you think people make friends more easily when they are adults?

2 Work in pairs. Take turns to describe how you and a friend met. Where were you? What did you think of that person when you met them? What's your friend like? How have you changed since meeting them?

Test practice

➤ **TEST STRATEGIES** page 168

3 9.7 Complete the task. Remember to listen for back references which might help you locate the answer.

➤ **HELP**

1 Remember you're listening to what **David** thinks. Some options may be mentioned by Maria.
5 Is this likely to be younger or older than the other age groups?

Task analysis

4 Look at the audio script 9.7 on page 214. Which questions used back-referencing to confirm the answers?

Questions 1–2

*Choose **TWO** letters, **A–E**.*

*What **TWO** things does David say are necessary for early friendships to form?*

A being a similar age
B sharing a physical environment
C having common hobbies
D accessing means of communication
E spending sufficient time together

Questions 3–4

Answer the questions below.

*Write **NO MORE THAN THREE WORDS AND/OR NUMBERS** for each answer.*

3 What do people who easily become friends usually associate with their first meeting?
4 What negative emotion can bring people together?

Questions 5–10

Complete the notes.

*Write **NO MORE THAN TWO WORDS** for each answer.*

How child friendships develop	How older teenage friendships develop
Level 1: Handy playmate, age 5 _____	1 People judge on 8 _____
Level 2: 6 _____ and assistance, 8–10 years	2 Make changes in 9 _____
Level 3: 7 _____ , 11–15 years	3 Look for 10 _____ they value

Language development and vocabulary

Passive and active voice

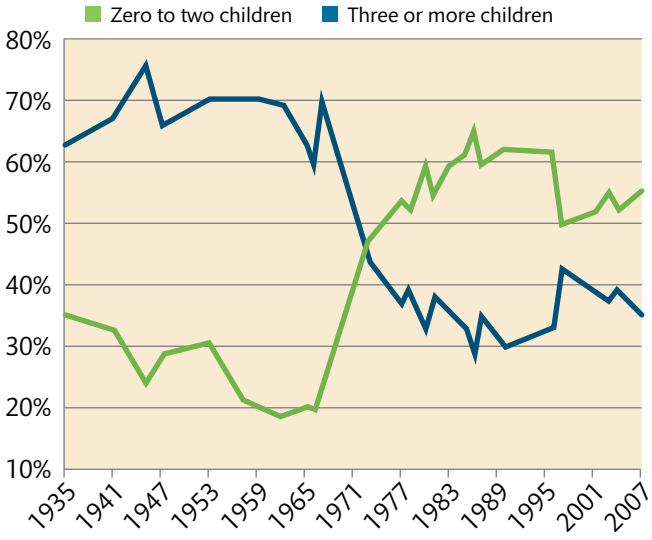
➤ EXPERT GRAMMAR page 182

1 Choose the correct form, active or passive, of the verbs in *italics* to complete the text. Think carefully about singular and plural forms and tenses.

There are common patterns to the way that friendships 1 *make / are made*. We 2 *tend / are tended* to associate how we 3 *feel / are felt* with the people around us. So, if you are in a good mood when you 4 *introduce / are introduced* to someone, you 5 *tend / are tended* to connect that feeling with the other person. The theory of Homophily 6 *suggests / is suggested* that we 7 *attract / are attracted* to people who are similar to ourselves. For example, if I 8 *consider / am considered* myself a bit geeky, and I 9 *see / am seen* another person who 10 *seems / is seems* similar, well friendship is more likely.

2 Complete the Part 1 Writing task with the active or passive form of the verbs in brackets. Remember to use the correct tense.

American's ideal family size, 1936-2011



The graph 1 shows (show) people's idea of the ideal family size in the USA over a 75-year period. As we 2 _____ (can see) from the chart, views on ideal family size 3 _____ (change) dramatically since the study began. When the study 4 _____ (begin), in 1935, around two-thirds of the people who 5 _____ (interview) said that they 6 _____ (want) three or more children. The gap between the two groups 7 _____ (increase) in the next few years. Larger family sizes 8 _____ (reach) a peak at 78 percent around 1945. However, after that point, the popularity of having three or more children 9 _____ (fall) dramatically. In the 1970s, larger families 10 _____ (overtake) by smaller families as the most popular family structure.

Describe people

3a Match the adjectives in bold in the sentences (1–6) with words with a similar meaning in sentences (A–F).

1 My brother's really **motivated**, and studies hard.
2 My dad can be a bit **grumpy** when he gets tired.
3 I'd like to be as **athletic** as my uncle, who runs marathons.
4 I think my grandmother is the most **elegant** woman I know.
5 My great-grandmother was a **talented** singer.
6 I think my boyfriend's absolutely **gorgeous**!

A Unfortunately my cousin's really **good-looking** and he knows it!
B My sister's very **stylish** and wants to be a fashion blogger.
C I admire my sister-in-law because she's really **ambitious**.
D My sister's **bad-tempered** all the time.
E My step-father's really **fit** and exercises a lot.
F Both of my sisters are **gifted** musicians.

b Which words relate to physical appearance and which ones to personal qualities?

c Work in pairs. Think of two people you know and describe them.

4a Complete the essay with the words from Exercise 3a. More than one word is possible in each gap.

I think parents have a very strong influence on their children. If parents want their children to be **1** _____ , they send them to a strict school with a lot of inspirational staff. If they value sport, they encourage them to be **2** _____ , through after schools classes, etc. Then, of course, some things are passed down from families. The child of a **3** _____ musician is likely to be musical too. However, children can also learn unintentional things from their parents. If one parent tends to be a bit **4** _____ , for example, their children often have difficulty controlling their moods too.

However, friends and the media also have an important role to play. Someone who spends all their time with **5** _____ friends probably also cares a little too much about their clothes or hair. My friends are mostly interested their grades and being smart, not being **6** _____ , so I am not under any kind of pressure to look like a model around them. Of course, that is not true of the media. For example, the media often promote the idea of tanned skin being healthy and attractive, so many pale people in my country sunbathe, even though it is dangerous. So there might be a variety of influences on any one person.

b What was the essay task given to the student?

Speaking (Part 2)

Vocabulary development

1 Work in pairs and discuss the questions. Check the meaning of the words in bold in a dictionary.

1 When are people considered **elderly** in your culture? What is life like for people who have **retired**?
2 What signs are there of a **generation gap** in your country?
3 What are some of the advantages and disadvantages of an **ageing population**?

Focus on Speaking band descriptors

2a 9.8 Listen to Pablo carrying out the Part 2 task below. Tick the things Paolo does well.

- sounds interested
- speaks for the two minutes
- uses a range of connectors well
- often uses sentences with more than one clause
- offers a clear explanation of words he does not know

b Look at the band descriptors for Speaking on page 184. Which band best matches the descriptions in Exercise 2a?

Describe an old person you admire.
You should say:
how you know that person
what that person looks like
what qualities that person has
and explain why you admire that person.

Follow-up questions:
Do other people you know like to spend time with this person?
Do you have a lot of older friends?

c Work in groups of three and follow the instructions. Take turns to take different roles.

Student 1 complete the Part 2 task.
Student 2 write down:
- the time Student 1 spent talking.
- any connectors Student 1 used.
- whether Student 1 used sentences with more than one clause most of the time.

Student 3 write down:
- whether Student 1 sounded interested or bored.
- any higher-level vocabulary Student 1 used.
- an example of describing or explaining an idea even without the exact word.

Test practice

➤ TEST STRATEGIES page 172

3 Look at the list in Exercise 2a and choose two areas to improve on. Practise the Part 2 test task. You have two minutes to prepare and you can take notes during that time. Record yourself so that you can listen later.

Describe a character that you remember well from a book or film.
You should say:
when and where this character appears
what the character looks like
what the character does in the film
and explain why you remember that character.

Follow-up questions:
Do your friends like this character too?
Do you think this character could exist in real life?

Task analysis

4a Look back at the notes you took and try to improve them (e.g. Write *However*, or examples of higher vocabulary in your notes, or draw a smiley face to remind you to sound interested).

b Repeat the activity. Do you think good notes could help you to get a higher band?

Reading (Flow chart completion; Multiple choice)

Before you read

1a Do you think it's important to keep fit? What do you do to take responsibility for your health?

b How do our lifestyle choices affect our levels of fitness?

2 What do you think were the benefits of being fit at the different periods in history below?

pre-historic times the agricultural age industrialisation modern-day societies

Test practice

➤ **TEST STRATEGIES** page 169

3 Look quickly through the passage. Is it a report on a research project, or a historical text? Remember the strategies to follow the sequence of ideas. Complete the task and time how long it takes you to.

➤ **HELP**

1 Find the words *pre-historic* and *survive* in the text. What other reason for walking long distances is given in the next sentence?

8 Find the word *India* in the text, and a synonym or antonym of *discourage*. When you think you have found the answer, quickly check that the others are definitely wrong.

Task analysis

4a How long did you take to complete the task? Did you spend longer on some questions than others?

b What strategies from page 137 did you use? Were they successful? If not, what other strategies could you try?

5 Work in pairs and answer the questions.

1 Do you think that the society you are born in affects your fitness levels?

2 Were you surprised that some men had to train regularly until sixty years old in ancient societies? Do you think older people have good fitness levels today?

Questions 1–7

Complete the flow chart below.

Write ***NO MORE THAN TWO WORDS*** *for each answer.*

Fitness throughout history

Pre-historic society: People travelled long distances for survival and 1 _____ reasons.

Ancient Chinese: Copied the movement of 2 _____ in their fitness routines.

Ancient Greece: Fitness promoted by 3 _____ who set up special training centres.

America: 1776–1860, Catherine Beecher introduced 4 _____ to women.

America during World War Two: Around 5 _____ of the recruits failed the fitness test.

1950s: Attention shifted to the poor fitness of 6 _____ in the USA.

1960s: 7 _____ of diseases became a major goal of exercise.

Questions 8–10

Choose the appropriate letters, ***A****,* ***B****,* ***C*** *or* ***D****.*

8 Exercise was discouraged in India
- A so people would take the time to appreciate the environment.
- B in favour of working on spiritual development.
- C as it was considered to be just for the wealthy.
- D in the belief that it created health risks.

9 The Roman Empire was unusual in that
- A it ignored fitness once goals were achieved.
- B it had laws that required citizens to exercise.
- C it demanded that women train as well as men.
- D it expected everyone in society to be ready to fight.

10 What does the writer say about exercise in the final paragraph?
- A It is dictated by individual choice.
- B It is more efficient if done to music.
- C It has been enhanced by new technologies.
- D It is connected to people's mental well-being.

From primitive to present times – **How fitness has come of age**

Throughout history, societies have valued physical fitness. In prehistoric times, man's efforts to maintain fitness were driven by a basic need to catch animals to survive. But that wasn't the only motivation. Our ancient ancestors thought nothing of walking 30 km to meet their social needs, gathering with neighbouring tribes. Fitness has reduced considerably since those times, but remains central to our individual well-being.

Ancient Chinese culture recognised that regular exercise could prevent certain diseases. They developed Cong Fu, a system of gymnastics where the various stances and movements were modelled after the fighting styles of different animals. They also engaged in sports such as archery and badminton, and some were accomplished dancers. Around the same time, in India, people were being dissuaded from practising any form of physical fitness because the religions of the day put a greater emphasis on spirituality. Like the pursuit of individual wealth, personal fitness was frowned upon. However, priests acknowledged the need for some kind of exercise program to maintain health, and developed yoga, a union of the body and mind. They too hoped to achieve a balance with the natural world by copying patterns of movement they observed in their environment.

In ancient Europe, a different attitude to exercise was developing. Both the Greek and Roman Empires demanded a high level of fitness through regular training of all citizens, both male and female. In Greece, the development of fitness was facilitated by medical practitioners such as Herodicus and Hippocrates, who set up gymnasiums, and even invented the 'personal trainer'. The Roman Empire went further and ordered that all its citizens maintain good physical condition. Men aged seventeen to sixty were legally required to train in activities such as running, jumping and throwing the javelin, in case they were needed in the army. This resulted in a society of strong men ready to fight, and strong women ready to produce healthy male offspring. Like many civilizations before and since, though, as soon as life became more secure for the Romans, entertainment became a higher priority than physical fitness.

By around 1700 onwards, exercise had become less of a priority and populations needed to be encouraged to stay fit. Europeans who migrated to the United States took many of their traditions and customs with them, including German and Swedish gymnastics programs. In the USA, Catherine Beecher advocated getting women involved too using a mixture of calisthenics and music, the first example of modern-day aerobics classes, which appealed to this group of the population. American leaders such as Benjamin Franklin recommended not less than two hours a day to be devoted to exercise, without exception. However, few individuals took up these challenges. After the Second World War, the consequences of industrialization and urbanization on the health of the population was increasingly clear. A combination of a rise in illnesses and the fact that the armed forces had needed to reject nearly half of all draftees or give them desk jobs due to low levels of fitness were cause for national embarrassment. The nation's attention focussed on the importance of fitness in earnest.

In the late 1950s, schoolchildren across the USA were given tests to measure their muscular strength and flexibility. Close to 60 percent of American children failed at least one of the tests, compared to only 9 percent in Europe. By the 1960s, sports programmes were in place and President Kennedy encouraged fitness and its health-related benefits for Americans of all ages. An earlier focus on the treatment of disease gave way to a new era focussing on its prevention.

What does this mean for anyone who wants to get fit today? Some of the earlier preoccupations continue to resonate with us today. One is that fitness can affect the mind and spirit, as well as the body. Another interesting concept is the inclusion of music which has been incorporated into modern-day fitness programs. Historically fitness levels have decreased as technology has advanced. We are yet to see if the new range of fitness monitors can reverse this trend.

Writing (Task 2)

Lead-in

1 Work in pairs and discuss the questions.

1 Do you use social media to keep in touch with friends? Why/Why not? How do you and your friends use social media?
2 What would be the impact on your social life if you lost your phone?

Understand the task

➤ **EXPERT WRITING** page 200

2 Look at the test task and underline the key words.

You should spend about 40 minutes on this task.
Write about the following topic:

In many countries, there is a growing gap between the technical skills of younger people and those over the age of fifty. What problems does this cause, and what solutions could minimise the problems?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.
Write at least 250 words.

Plan the task

➤ **TEST STRATEGIES** page 171

3a Work in pairs and decide how much time to spend for the stages (1–4).

1 analysing the task
2 organising your ideas
3 writing (per 50 words)
4 checking for errors

b Complete the problem-solution essay plan with ideas for the essay. Write one or two words for each one. Is the time limit you identified for 'organising your ideas' enough?

Introduction	State general problem: _____ State cause: _____ State effect: _____
Paragraph 1	Problem 1: _____ Solution: _____ Advantages: _____ Disadvantages: _____
Paragraph 2	Problem 2: _____ Solution: _____ Advantages: _____ Disadvantages: _____
(Paragraph 3)	Problem 3: _____ Solution: _____ Advantages: _____ Disadvantages: _____
Conclusion	Summarise the main points: _____ Recommend a solution: _____ Explain why this is best: _____ Refer to future action: _____

Language and content

4a Look at the language of recommendation. Complete the sentences with your own ideas.

1 One possible solution would be to _____ .
2 Some people believe that the most effective answer is to _____ .
3 Politicians have put forward several possible solutions. Chief among these is _____ .
4 _____ is a more long-term solution.
5 _____ may only be a quick fix to the problems.

b We often 'soften' recommendations with words to make opinions sound less forceful. Complete the text with a softening phrase.

despite the problems with this solution this is a complex issue
while it is true that

Some people have suggested we should concentrate our efforts on training young people. **1** _____ few retired people need technical skills for work, they may suffer as services such as banking move online. Nationwide training schemes for older people are one possible solution. Of course, **2** _____ and many older people may not be willing to attend, or enjoy the health to get to the classes. However, **3** _____ , it offers willing people a chance to catch up on the skills they are missing.

c Think of one of your solutions. Write a sentence of recommendation. Soften the language to explain what that solution may or may not achieve. Compare your sentence with a partner.

Write your answer

5 Write your answer to the test task. Remember to time yourself.

Assess and improve

6 Check the development of ideas in your essay and answer the questions.

1 Are they in the same order as your plan in Exercise 3b?
2 What are the benefits of planning before you write your essay?

7 Work in pairs and discuss the questions.

1 How long did it take you to complete the task?
2 What strategies might help you to work more quickly?
   - practise writing ten words per minute
   - brainstorm possible topics
   - practise writing one essay a day until the exam
3 Why is it important to complete Task 2?

Review

1 Complete the text with the words in the box.

associated bacterial blood cancer diabetes ignored heart disease impacted perceived previously

Many factors affect a person's health. Some issues, such as 1 _____ infection, can affect whole communities, while others are more individual. Personal choice has often been 2 _____ as the main factor, and to some extent this is true. Major illnesses such as 3 _____ and 4 _____ have been linked to diet choices and lack of exercise, as well as genetic factors, and excessive weight is clearly the most common cause of 5 _____ , an illness that stops your body from controlling the amount of sugar in your 6 _____ system. However, studies consistently show that people on low incomes are 7_____ by more serious health issues over a lifetime. Low education levels are also commonly 8 _____ with poorer health outcomes. These social causes of health have been largely 9 _____ by governments, but may be more important than they were 10 _____ believed to be.

2 Match the problems (1–8) with the solutions (A–H) and complete the solutions with suitable modal verbs.

1 Many young people suffer from anxiety at school.
2 Teenagers are growing and need more sleep.
3 Teen mental health services are struggling to meet demands.
4 Allergies are becoming very commonplace.
5 Autism is much better understood in many countries these days.
6 Heart disease is affecting younger people.
7 Sun damage is likely to cause more health problems in future.
8 A lot of young people don't use helmets on bicycles, or seat belts in cars.

A Governments _____ to train more people in this important area.
B They _____ start school so early in the morning.
C Schools _____ take sports off the curriculum.
D Governments _____ to educate employers because they _____ be concerned about taking on people with this condition.
E Schools _____ reduce the number of tests students take.
F Food manufacturers _____ label products clearly and accurately.
G Police _____ put more pressure on young people to value their well-being.
H People _____ spend hours lying in the sun.

3a Complete the Part 2 answer with synonyms of the words in bold.

Describe a person who has a strong influence on people in your country.
You should say:
who they are
what they are famous for
why people like this person
and explain why you chose this person.

'I would like to describe a very **talented** singer in my country. His name is Luis Miguel, and he's one of the most 1 _____ singers in Latin America. He's **gorgeous**, which is important for Latinos. Most singers are pretty 2 _____ , but I think that he's also a good role model for others. He's very **athletic**, and it's good for people to value being 3 _____ . He always wears very **stylish** suits, and it's also important for people to look 4 _____ . However, I think the main reason why he's popular is the style of music he sings, and his **ambitious** attitude to his work. He's very 5 _____ , and I think that sets a good example for the rest of us.'

b Practise saying the answer, paying attention to your pronunciation. Then describe a person of your own. Use a variety of language in your answer.

4a Complete the extract from an essay with the active or passive form of the verbs in brackets.

Many people believe that modern international sporting events are giving a bad message to young people. What problems have there been with international sports events, and how can these be solved?

Sport 1 encourages (encourage) people to come together and experts 2 _____ (agree) that it plays an important role in encouraging good health. However, in recent years major sporting events 3 _____ (affect) by a wide range of problems. This essay 4 _____ (consider) some of these issues and suggest measures that 5 _____ (introduce) to reduce the problems. Drug-taking in sport 6 _____ (send) a particularly bad message to young people. Young fans 7 _____ (always disappoint) to learn that their hero is a cheat. Despite this, competition for medals 8 _____ (increase), and world records 9 _____ (break) every year. For many sportspeople, the pressure is too much. Controlling banned substances 10 _____ (appear) to be almost impossible, and so a better solution is education. If young people 11 _____ (teach) about the risks to their health of taking banned substances, they might become strong enough to say no.

b Write another paragraph for this essay. Use the ideas below, or your own ideas.

the cost of hosting major events
corruption among governing bodies
bad behaviour of sports stars

10 Community

10a Training
- **Reading:** Identify information not given (*True*, *False*, *Not given*)
- **Vocabulary:** Crime and punishment; Collocations
- **Speaking:** Ask for clarification (Part 3: Discuss school rules)
- **Listening:** Follow a process (Section 4: Flow chart completion)
- **Language development:** Quantifiers
- **Writing:** Describe locations on a map (Task 1)

10b Testing
- **Listening:** Section 4: Multiple choice, Flow chart completion, Summary completion
- **Language development and vocabulary:** Second conditional; Town and city
- **Speaking:** Part 3: Discussing friends, family and community
- **Reading:** Matching headings; *True*, *False*, *Not given*
- **Writing:** Task 1: Describe a map

Lead-in

1 Work in pairs and discuss the questions.

1 The photos show different communities. What is *a community*?
2 What different communities do you belong to? How active are you in those communities?
3 What does a good member of a community do?
4 What do you think it means if a neighbourhood has *a sense of community*? Does yours have one?

2a What is important to you when choosing a place to live? Put the items below in order of importance (1 = most important, 12 = least important).

a sense of community | public transport | nightlife | safety | sport facilities | shops
good schools/colleges | housing | parking | cinema | open space

b Work in pairs and compare your lists.

1 Give reasons for your choices.
2 Agree on the top six. Put them in order of importance 1–6.

c Work with another pair and compare your lists.

1 Give reasons for your choices.
2 Agree on the top three. Put them in order of importance 1–3.
3 Share your ideas with the class.

Reading (*True, False, Not given*)

Before you read

1a Work in pairs and discuss the questions.

1 What kinds of *cybercrime* can you think of?
2 How is cybercrime different from other types of crime?

2a Read the title and first sentence of each paragraph. What is the passage about?

b Read the passage and check your ideas.

Identify information not given

3a Underline the key words in the statements (1–8).

1 A *cyber criminal* can commit a *crime* with one piece of technology.
2 In the USA in 2011, there were more victims of physical crime than *cybercrime*.
3 *Criminals* prefer to break into buildings to steal.
4 Cyber *criminals* can be discovered faster than other criminals.
5 More *criminals* should go to prison for cybercrime.
6 *Cyber criminals* tend to work alone.
7 The police are planning to do more to find *cyber criminals*.
8 People care more about their security *online* than in the real world.

b Look at the words in *italics* in each statement. Why will they not be helpful in locating the information in the passage?

c Which word or words in each statement are most likely to help you find the information in the passage? Why?

1 one piece of technology

4a Look at the statements 1 and 2 in Exercise 3a and answer the questions (1–3).

1 The information in statement 1 is *False*. It contradicts the information in the passage. Which words in the passage tell you this?
2 Some words/phrases in statement 2 are mentioned or paraphrased at the end of paragraph 1 of the passage. What are they?
3 What information in statement 2 is NOT explained in the passage (Not given)?

b Decide if the information in statements 3–8 in Exercise 3a is either *False* (contradicts the passage) or *Not given* (not in the passage).

SOCIETY

Technology provides opportunities for people to conduct crime in different ways

The development of digital technology has changed the foundation of our society. On one hand, cyberspace is a place of freedom, creativity and growth. On the other hand, people are using this space for their criminal activities. Cybercrime refers to any crime that involves a computer and a network. This technology has provided opportunities for criminals to conduct new crimes and to commit physical crime, like theft, in different ways. These criminals commit these crimes with access to countless victims, often anonymously and from anywhere in the world. In 2011 in the USA, there were approximately 5,600 bank robberies worth US$43 million whereas the cost of cybercrime for banks was approximately US$1.1 billion. The cybercrime affected a much larger number of people too.

The mode of committing crime has changed and forensic evidence is changing too. In the past, a thief had to break into an office or study and go through files to steal data and in doing this they usually left behind a clear trail of evidence. Officers used that information to identify, find and arrest the suspect. Today, the thief can simply hack into computer files in cyberspace. They do not always leave evidence that could lead to their capture, which means detectives are less likely to catch them. In fact, just one cyber criminal goes to prison for every 50,000 victims, whereas one physical bank robber will be jailed for every five victims.

Another key aspect of cybercrime is its ability to reach far and wide, with police and web users struggling to deal with this adequately. As people become more interconnected, organised crime is also becoming more interconnected and more internationally active. Many organised crime groups have direct links with organisations in other countries to conduct their operations. With the internet and mobile technology, the rate of return on investment is high and the risk is low. So the organisations take advantage of poorly regulated spaces and advanced logistics to move almost anonymously and make considerable amounts of money. Even with the best efforts, police are finding it difficult to keep up, given the resources they have. And while people in the physical world tend not to leave their doors unlocked to avoid being burgled, people in the digital world are not always so cautious, with social media full of examples of people not protecting themselves sufficiently.

Test practice

➤ **TEST STRATEGIES** page 170

5a Complete the test task. For each statement:

1 underline the key words.
2 choose one or two key words and use these to find the information in the passage.
3 decide if the information in the passage is *True*, *False* or *Not given*.
4 make sure the whole statement agrees with, contradicts or is not in the passage before choosing an answer.

b Time yourself to find out how long it takes you.

Do the following statements agree with the information given in the reading passage?

Write

TRUE *if the statement agrees with the information*

FALSE *if the statement contradicts the information*

NOT GIVEN *if there is no information on this*

1 The things people hear about computer security are usually correct.
2 Alex Stamos says that a strong password alone is insufficient.
3 You should keep a record of your passwords on your mobile device.
4 Parisa Tabriz says experts are working on a way to make computers 100 percent safe.
5 Online criminals spend a large amount of money on finding software bugs.
6 Cloud companies protect customers from individual data hacks.

Task analysis

6 Work in pairs and discuss the questions.

1 What made it difficult to decide if a statement was *False* or *Not given*?
2 How long did it take you to complete the task?
3 In the test you will have around nine minutes for six questions. What could help you do the task in this time?
   - Become better at choosing the right key word(s) to locate information
   - Scan the text more quickly to locate the information
   - Focus less on unknown words
   - Remember that the questions are in the same order as the passage and use this fact to help locate information

Discussion

7 Work in pairs and discuss the questions.

1 Do you think people care about online security enough?
2 How can people be more careful with online security?

Every day, we hear about software weaknesses, viruses and hackers that could take all of our money. Because much of this information is exaggerated and sometimes just plain untrue, it is important for us to know exactly what we should do to protect our data.

Firstly, it is important to say that cybercrime is very rare and most attacks can be prevented by having a strong password. Facebook's Chief Security Officer, Alex Stamos, has spent most of his career thinking about how attackers will find weaknesses in computer systems. He has found that there are two simple solutions for the vast majority of users: strong passwords and two-factor authentication. This means using a password program to create a new password for every service, and setting up a second level of security on your email and social media accounts – usually a text message.

A second thing to consider is our attitude to information security. If we can have a safe car, then it seems reasonable that we should be able to have a safe computer. However, Parisa Tabriz who heads Google's Chrome security team believes we should not think of information security as an exact science. She suggests it is impossible to build a completely secure system, with creators trying to make attacks too expensive for criminal hackers rather than impossible.

A third issue is the cloud; the place where we keep our emails, photos, bank documents and maybe even medical records. It is perhaps safer than many people think but it may not be the best option for everyone. A positive feature is that someone is looking after our data twenty-four hours a day, seven days a week. If a criminal tries to attack on a large scale, that person will soon notice and protect our information. However, that same person is unlikely to notice if the attack involves just one person's information. For this reason, keeping our files on personal storage at home is the best idea if we feel we need to protect it better.

Finally, ignoring software update messages allows criminals access to our computers. Updates make sure there are no weaknesses in a program so by downloading them immediately, we can be sure that we are better protected.

Vocabulary

Crime and punishment

1a Complete the gaps in the table with an appropriate word.

Crime (noun)	Person (noun)	Action (verb)
crime	criminal	carry out/1 _____ a crime
theft	thief	2 _____ a car
robbery	3 _____	rob a bank
4 _____	burglar	5 _____ a house
murder	6 _____	murder someone
7 _____	attacker	8 _____ a person

b What type of punishments do people who commit these crimes receive? What other types of punishment are there?

2a Choose the correct words in *italics* to complete the text.

Today, police can 1 *access / assume* crime data from all over the country 2 *whereas / wherever* in the past this was just not possible. Information was 3 *popularly / normally* kept in paper files, making it difficult for detectives to make 4 *relationships / links* between crimes in different areas. The 5 *consequence / end* was that a criminal was caught and found guilty of a crime in one place but his or her crimes elsewhere were not 6 *considered / identified* and went unpunished. While the 7 *attitude / authority* of some police officers was a little negative when computers were first introduced, the fact is that they have changed the face of policing. And today, they help officers solve the 8 *most / majority* of serious crimes.

b Work in pairs. In what other ways do you think technology has helped the police force?

Collocations

3 Match the beginnings of the sentences (1–6) with the endings (A–F).

1 The prevention of viruses is one **key**
2 Poor online security **provides** an
3 The **vast**
4 A poor password can **allow** a criminal
5 Poor passwords result in a **considerable**
6 Regular updates are a **positive**

A **majority** of people do not use strong passwords.
B **feature** of an online security program.
C **opportunity** for a criminal to commit cybercrime.
D **amount** of stolen data.
E **aspect** of crime prevention in online security.
F **access** to your files.

4a Work in pairs. Look at the words below. What is the meaning and part of speech of each one? Use a dictionary if necessary.

catch commit court evidence fine investigate prison punish victim

b Complete the flow chart with words from Exercise 4a. Put the verbs in the correct form.

1 A crime is _____ .
↓
2 The police are called by the _____ or a witness.
↓
3 The crime is _____ by a detective.
↓
4 The criminal is _____ and arrested.
↓
5 The suspect goes to _____ .
↓
6 A judge or jury hears the _____ .
↓
7 If guilty, the criminal is convicted and then _____ .
↓
8 He/she goes to _____ . / He/she does community service. / 9 He/she pays a _____ .

c Look at the verbs you wrote in the flow chart. Are they in the active or passive form? Why?

5a Work in pairs. Read the essay question and make a list of possible causes.

Despite high unemployment, the number of robberies and thefts in major cities worldwide has fallen in the last twenty years. What do you think are the major causes of this?

b Complete part of an answer to the essay question with words from Exercises 1–4. Change the word forms where necessary.

One possible reason is technology. Today, both police and criminals have 1 _____ to advanced technology. Police use it to store data, as well as to search for 2 _____ and find 3 _____ between criminals and their crimes. The 4 _____ of this is that more criminals are caught and put into 5 _____ where they are unable to 6 _____ more crimes. In addition, the vast 7 _____ of burglaries, robberies and thefts do not bring in much money, 8 _____ cybercrime can involve many people and bring in 9 _____ amounts of money. It is therefore possible that burglars, robbers and 10 _____ have moved from physical crime to cybercrime.

Speaking (Part 3)

Ask for clarification

1 Work in pairs and discuss the question. What rules can you think of for people in these places?

in a library on public transport at school at work

2a 10.1 Listen to an examiner asking two candidates questions. Complete each question with a word in each gap.

1 What kind of _____ do most people _____ in their _____ ?
2 _____ are _____ in our _____ _____ ?

b 10.1 Listen to the candidates. What questions do they ask the examiner? Why?

Candidate1
1 Sorry, _____ you _____ that _____ ?
2 _____ do you _____ by _____ ?

Candidate 2
3 Could you _____ the _____ , please?
4 Sorry, could you _____ it _____ _____ ?

c 10.2 Listen and repeat each question.

3 10.3 Listen to the answers the candidates give. Which one misunderstands the question? Do you think the examiner can still assess the candidate's speaking?

4a Match the errors in the sentences (1–8) with the error types below.

countable/uncountable nouns incomplete sentence
-ing/infinitive form passive form preposition
subject/verb agreement tense word order

1 The majority of people knows the rules in a library.
2 There are some rules important but some are silly.
3 I enjoy break the rules sometimes.
4 Sometimes follow the rules, sometimes not.
5 Rules are important but it depends of the situation.
6 I always told rules are important by my parents.
7 I never broke a rule in my life.
8 If we have informations about the rules, then we should follow them.

b Which type of error(s) do you think you often make? Why do you think you make them?

c Read a candidate's answer to Question 2 in Exercise 2a. Find and correct six grammar errors. What error type does the candidate commonly make?

We need rules for tell people what they can and can't do in different situation. Without these rules, most persons would do what they wanted. They would only care about their own lives. And nothing would be organised. There'd be no electricities, no schools, no hospitals. There probably wouldn't be any works either. People would work for themselves or their family. And if there were no laws, then crime would increase too. So, yes, rules are extremely important because we build our society on them. Without informations about how we should live, society can't exist.

d 10.4 Listen to Candidate 1 in Exercise 3 again. How does he avoid making mistakes?

5 Choose a typical error that you often make. With a partner, take turns to answer the question *What kind of rules do most people follow in their lives?* Try not to make this error.

Test practice

➤ **TEST STRATEGIES** page 172

6 Work in pairs. Take turns to ask and answer the questions in a random order. Record your answers so that you can listen later.

- What are some of the rules that students follow at school?
- Why do schools have rules?
- If a student breaks a rule at school, what's a suitable punishment?
- Who should make the rules at school? Why?
- Some people say there are too many rules at school. Do you agree or disagree with that? Why?

Task analysis

7 Work in pairs and discuss the questions.

1 How did you ask for clarification if you did not understand the question?
2 Did you make the typical error you focused on in Exercise 5?
3 Look at the idea for becoming more accurate. Can you think of one more?
Don't speak too quickly. Slow down and give yourself time to think.

Listening (Section 4)

Before you listen

1 Work in pairs and discuss the questions. Check the meaning of the words in bold in a dictionary if necessary.

1 What **potential risks** are involved when you have a large crowd of people together?
2 What is the **process** for assessing the risks involved in an **event** such as a **festival**?
3 How can organisers of large events in big **venues** ensure crowd safety?

Follow a process

2a 10.5 Listen to part of a lecture about crowd control at a large event. Put the stages of the process in order 1–5.

Examine the visitor's ticket. _____
Look inside the visitor's belongings. _____
Ensure visitors stand in the correct line. _____
Return the visitor's belongings. _____
Give the ticket back or leave a mark on the visitor's hand. _____

b 10.5 Listen again and complete each sentence with one word. The speaker will use different words in the recording.

1 The first _____ for staff is to encourage visitors to queue in the right place.
2 The next _____ they do is take the visitor's ticket.
3 _____ , they return the ticket or stamp each person's hand.
4 The _____ step is to check the visitor's bags.
5 Once that's done, staff then _____ the final stage in the process.

c Underline the phrases in Exercise 2b which signal the different stages of the process.

Test practice

➤ TEST STRATEGIES page 168

3a 10.6 Listen to the test task instructions. Read the instructions and try to predict the missing words or parts of speech in the flow chart.

Questions 1–8
Complete the flow chart below.
*Write **NO MORE THAN TWO WORDS** for each answer.*

Risk assessment process

1 _____ about the event location is collected.
↓
Think about the size of the crowd and their 2 _____ .
↓
A 3 _____ of risks and their impact is made.
↓
Each risk is evaluated and placed into an appropriate 4 _____ .
↓
An effective 5 _____ is found for each risk.
↓
A risk assessment 6 _____ detailing risk assessment is made available to all staff.
↓
7 _____ is given to staff so they can learn to manage problems effectively.
↓
The 8 _____ is checked again soon before the event.

b 10.7 Listen to a lecture about risk assessment. Tick the signal words you hear below.

After that ☐ Finally ☐ move onto ☐ Next ☐ Now ☐
the final stage of the process ☐ The first step ☐
The first thing ☐ the next step ☐ Then ☐

c 10.7 Listen again and complete the test task.

Task analysis

4 Work in pairs. Look at the audio script 10.7 on page 215. What words signal each stage and tell you the answer is coming?

Discussion

5 Do you think people worry too much about risk these days?

Language development

Quantifiers

➤ **EXPERT GRAMMAR** page 182

1 Look at the phrases below and complete the table with the appropriate quantifiers.

a few (people) a large number of (people)
a little (planning) a lot of (work) few (visitors)
plenty of (time)

Countable	Uncountable
many a lot of some/any a few 3 _____ 4 _____ plenty of	Much 1 _____ some/any 2 _____ little a large amount of 5 _____

2a Match the underlined words in the sentences (1–4) with the meaning A or B.

1 A few people attended the event.
2 Few children went to the festival.
3 There's little time to answer all the questions.
4 We have a little time to finish the essay.

A a small number or amount
B not enough

b Complete the text with *a few*, *few*, *a little* or *little*.

There are **1** _____ organised events where we live, but not many. Unfortunately, **2** _____ of them are for teenagers; they are almost all for children or adults. Teenagers therefore spend **3** _____ time at organised events where they would be able to have fun in a safe environment. Instead, they may gather in public places. **4** _____ of these groups of teenagers cause problems but this is a small percentage. Unfortunately it is these **5** _____ teenagers who give them all a bad name. If we all put **6** _____ effort into organising more events for teenagers and getting them involved in these, we would learn just how wonderful these young people are.

c Work in pairs. What is the main point the writer is making in Exercise 2b? Do you agree with this view? Why/Why not?

3a Complete the sentences (1–6) with a quantifier from Exercise 1a so they are true for you.

1 There are _____ fun events in the area where I live.
2 I spend _____ time on things I enjoy doing.
3 I have _____ close friends.
4 There are _____ green areas in my city/town.
5 I go to _____ concerts.
6 I watch _____ sports events.

b Work in groups. Share your sentences and justify your choices.

There are a few fun events where I live. For example, there is a music festival and a big carnival in the summer.

4a Read the essay question. In pairs, think of reasons for and against the opinion. Do the advantages outweigh the disadvantages?

Some people believe that it is good for us to spend time in a large crowd.
Do the advantages of this outweigh the disadvantages?

b Complete the essay with the quantifiers below.

a few a large amount of large number enough few
many most of us plenty too many too little

There are many occasions when we find ourselves in a large crowd. Football matches, festivals and concerts are 1 _____ examples. This essay will argue that being part of a crowd provides more benefits than disadvantages.

2 _____ enjoy spending time in crowds at some point in our lives. This is because a 3 _____ of events, such as football matches or concerts, provide a sense of community. We want to spend time with people who have the same interests and passions as us because we feel that we belong to something.

In addition to this, research shows that when we feel that we have something in common with people in a crowd, we do not notice that we have 4 _____ space around us. Instead, we think we have 5 _____ of room because we feel safe with those people.

Finally, we experience more pleasure when we share a positive event with others than when we experience it on our own. The sound of a crowd shouting and cheering can generate 6 _____ excitement so we feel happier.

In conclusion, being in a crowd can provide many advantages. It is true that some crowds can be unpleasant and create a feeling of danger, especially when there are 7 _____ people or there is not 8 _____ crowd control. However, 9 _____ organised events are like this. The majority of them bring a sense of community, the feeling that you belong and an increased feeling of excitement which 10 _____ people can enjoy.

Writing (Task 1)

Describe locations on a map

1a Draw a simple map of the neighbourhood where you live. Include five to eight features.

b Write a short description of your map. Use the phrases below to help you.

In the (north/south/east/west) of the area there is/are ...
To the (north) of (the centre), there is/are ...
In the centre of the area, you can find ...
Next to the (school/block of flats) is/are ...

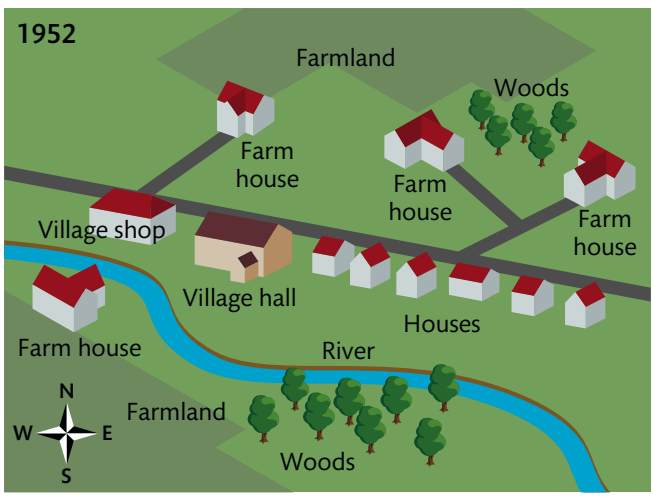
c Work in pairs. Swap your descriptions but not your maps. Take turns to draw the map and then compare it with the original map.

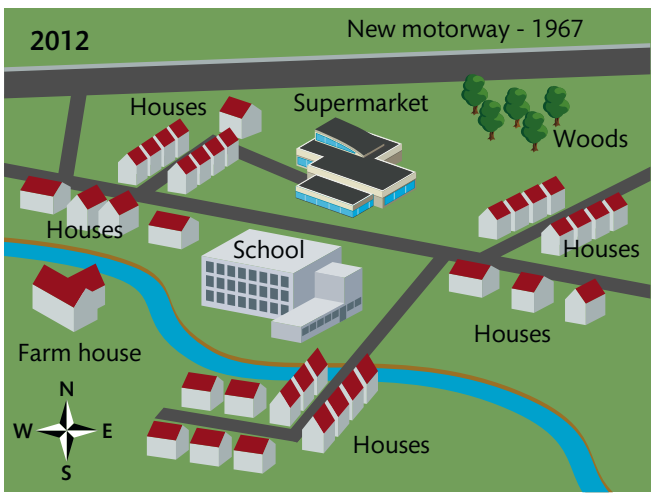
Test practice

➤ **TEST STRATEGIES** page 171

2 Look at the information in the maps below and choose the best introduction.

1 The maps show how a village changed between 1952 and 2012.
2 The maps compare and contrast two different villages in the same year.





3a Why is it important to include an overview statement in your map description? Choose two from reasons (1–3).

1 It demonstrates an ability to describe detailed information.
2 You must include it to achieve a Band 6 or higher.
3 It shows you understand the key points of a diagram.

b Complete the overview statement with the correct words below.

fewer growth main number

The 1 _____ change is the significant 2 _____ of the village which resulted in a larger 3 _____ of buildings and 4 _____ farms in the surrounding area.

c Put the sentences in the correct order to create a paragraph describing Maps 1 and 2.

1 Before 2012, the farmhouses in the north were replaced by a housing estate and a new school.
2 The farmland to the south of the village was replaced by more houses.
3 Only the woods remained.
4 However, the farmhouse to the south west was left untouched and still existed in 2012.
5 If we look at the maps in more detail, we can see that in 1952, there were both woods and farmland to the north and south of the village.

d Which tense does the writer use in Exercise 3c? Why? Why are some verbs in the passive?

4a Write a second paragraph comparing the changes in roads, school and shops. Use one or two prompts to help you.

In 1952, there was just one road in the village.
However, ...
In addition to the motorway, ...
In 1952 there was no primary school, but in the decades leading up to 2012, ...

b Read the whole description (the paragraphs from Exercises 3a to 4a). What do you think the test task was?

1 Describe each map in detail in turn and give reasons for each of these changes.
2 Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Listening (Section 4)

Before you listen

1 Work in pairs and discuss the questions. Check the meaning of the words in bold in a dictionary if necessary.

1 Do you prefer living in an **urban** area or a **rural** area? Why?
2 What do you think **an urban planner** does?
3 Whose needs are most important when designing a new public building? Local government, **residents** or businesses? Why?

Test practice

➤ **TEST STRATEGIES** page 168

2 10.8 Listen and complete the test task. Remember to listen for signal words to help you follow the lecture.

➤ **HELP**

3 What form will this verb be in? Look at the words before it.
7 Is this word singular or plural? Does it come with an article?

Task analysis

3 Work in pairs and discuss the questions.

1 What did you find most challenging about these tasks? Reading ahead, unknown vocabulary, following the lecture, spelling or something else?
2 What strategies or activities could you use to help you improve in this area?

Questions 1–2

*Choose **TWO** letters **A–H**.*

*What are the **TWO** main concerns of an urban planner?*

A appearance
B city residents
C function
D budget
E available time

Questions 3–6

Complete the flow chart.

*Write **NO MORE THAN THREE WORDS** for each answer.*

URBAN PLANNING PROCESS

The vision is identified and 3 _____ are selected.

↓

Data is gathered and interpreted. The first draft of the plan is written and then 4 _____ .

↓

Draft 2 is presented to 5 _____ and draft 3 is written.

↓

Residents voice their opinions at a consultation meeting.

↓

The final draft is written and presented to 6 _____ at the city council.

Questions 7–10

Complete the summary below.

*Write **NO MORE THAN ONE WORD** for each answer.*

Urban planning can be difficult for three key reasons. The first is that much of a town or city belongs to 7 _____ and not local government, taking control out of their hands. The second issue is the impact of 8 _____ planning decisions, such as roads which are too narrow for today's cars. Finally, a planner has to 9 _____ the needs of a future population. So, although being a planner can be 10 _____ , it is also very challenging.

Language development and vocabulary

Second conditional

➤ EXPERT GRAMMAR page 183

1 Read the questions in *italics* and answer the questions (1–3).

If you were able to make changes to your city, what would they be?
What would you do if you needed to build a new road?
How would you do this if you were a planner?

1 Is each situation real/possible or imaginary/unlikely?
2 How many clauses are in each question? Can they be moved around? When do we need to use a comma?
3 What verb forms are used in each clause?

2 Complete the text with the correct form of the verbs in brackets.

A future for my city

If I 1 _____ (can) make a change to my city, I 2 _____ (build) a big park right in the middle of my neighbourhood because it 3 _____ (create) more green space. People 4 _____ (have) somewhere to go and relax at the weekend and children 5 _____ (be able to) play there after school. In fact, if people 6 _____ (go) there regularly, their stress levels 7 _____ (probably/fall) and they 8 _____ (become) more relaxed. I think they 9 _____ (feel) happier and they 10 _____ (enjoy) life a little more too. So, if I 11 _____ (be) someone important in my city, that's the change that I 12 _____ (make).

3a Write IELTS speaking questions for your partner from the prompts.

1 What/do/if/can/make a change to your city?
2 How/make/ the transport system in your city/better?
3 If/have to move to another country/where/go?
4 What/take with you/if/move abroad?
5 If/travel around the world/who/take with you?
6 If/can build a new home/where/build it?
7 How/spend your time/if/have an extra day a week?
8 If/can meet/a famous person/who/choose?

b Work in pairs. Take turns to ask and answer the questions in random order. Give reasons for your answers.

Town and city

4a Complete the sentences (1–5) with the words below.

architecture block budget facilities inhabitants lay out local network overcrowded residents

1 The market becomes _____ at the weekend so the council should extend it. However, there is currently no _____ for such a plan.
2 There are plans to build a new apartment _____ here but local _____ aren't happy. They've asked the council to _____ their plans at a public meeting.
3 There aren't enough _____ , such as hospitals and schools, for the 143,000 _____ of the town.
4 The city's public transport _____ makes travel very convenient.
5 The _____ here is of the Roman style which is not only _____ to this area.

b Look at your answers. Which part of speech is each one?

5 Cross out the odd one out in each group. Which items can you find in your town/city?

1 roundabout staircase traffic lights crossroads
2 path street pavement pedestrian
3 vehicle underground metro subway
4 inhabitant resident citizen passenger

6a Complete the text with words from Exercises 4 and 5.

Transport in India

In Mumbai, traffic is a problem for **1** _____ . Those who own their own **2** _____ know they should not take up space on the roads and pollute the air, but buses are usually late and **3** _____ . So, one organisation has offered a solution. It has created an app and a **4** _____ of drivers who are willing to give a lift to one **5** _____ . The latter book their lift through the app and pay the driver a fee which is much lower than the cost of a ticket on **6** _____ . Already it is estimated that the amount of fuel consumed has dropped considerably.

b Work in groups. Would you participate in that kind of scheme as either a driver or passenger? Why/Why not?

Speaking (Part 3)

Vocabulary development

1 Work in pairs and discuss the questions. Check the meaning of the words in bold in a dictionary if necessary.

1 Do you have older or younger **siblings**? Or are you **an only child**?
2 Who's your favourite **relative**? Why?
3 Which people are included in your **extended family**?
4 Where did your **upbringing** take place?
5 How many **casual** friends do you have online? Have you met them face-to-face?
6 Which friend do you **look up to** the most?
7 Do most of your friends have similar **backgrounds** to you? If yes, why do you think that is?

Focus on Speaking band descriptors

2a Label each pair of questions (1–4) with the headings below.

Fluency and cohesion
Grammatical range and accuracy
Lexical resource
Pronunciation

1 _____
Does the speaker have a good enough vocabulary to answer the question clearly?
Does the speaker paraphrase when he/she doesn't know a word?

2 _____
Does the speaker extend his/her answers with repeating, hesitating or self-correcting a lot?
Does the speaker connect ideas using linkers appropriately?

3 _____
Does the speaker pronounce words clearly, without mispronunciation?
Can the listener understand the speaker?

4 _____
Does the speaker produce simple sentences accurately?
Does the speaker produce more complex sentences? Are these accurate?

b 10.9 Work in pairs, Student A and Student B. Listen to Mariana answering a question about friends and family.

Student A: Assess Mariana's fluency and cohesion and lexical resource.
Student B: Assess Mariana's grammatical accuracy and pronunciation.

c Share your assessment with your partner.

Test practice

➤ TEST STRATEGIES page 171

3 Work in groups of four. Take turns to be an interlocutor, a candidate and one of two assessors. Each interview should be 3–4 minutes.

Interlocutor: Choose one question at random and start the interview. Use two other questions to extend the interview.
Candidate: Answer the questions. Do not forget to ask for clarification if you do not understand the question.
Assessor 1: Listen and assess the candidate's fluency and coherence and lexical resource.
Assessor 2: Listen and assess the candidate's grammatical accuracy and pronunciation.

Friends and family
Who are more important to us these days, friends or family?
In what ways is it better to go on holiday with a friend rather than a family member?
Why do some young people choose to move out of the family home and live with friends?

Family life
How much does the size of a person's family influence their upbringing?
What are some advantages and disadvantages of having an older sibling?
Do you think it's better to have a large number of casual friends or one very close friend?

Communities
What are some good ways to meet new people?
What communities are important to people outside of friends and family?
How important is it to meet people from different backgrounds as a child?

Assess and improve

4a Assessors, give feedback to each candidate. Use the questions to help you.

1 What two things did the candidate do well?
2 What two areas could the candidate improve?

b Candidates, answer the questions about your feedback.

1 Do you agree with your feedback? Why/Why not?
2 Did you make any typical grammar errors or were you able to give yourself time to think about them before you spoke?

c Work with a new partner and repeat the test task. Try to improve the area you want to improve.

Reading (Matching headings; *True*, *False*, *Not given*)

Before you read

1 Work in groups and discuss the questions.

1 How many close friends would you say you have?
2 What kind of social relationships do people have in their lives (e.g. colleague, neighbour). How many social relationships do you think we can have at one time?
3 What benefits do friendships bring us? Make a list of ideas.

Test practice

➤ **TEST STRATEGIES** page 170

2 Complete the test practice. For questions 8–13, remember to check carefully whether statements are *False* or *Not given*.

➤ **HELP**

1–7 Remember that all information in the heading should represent the paragraph, not just some of it.

11 What is another way of saying overcome an *illness*?

Task analysis

3 Work in pairs and discuss the questions.

1 Which heading was the most difficult to match? Why?
2 How easy was it to identify *False* and *Not given* answers? How were they different?
3 How well did you manage your time?

Questions 1–7

The reading passage has seven paragraphs, ***A–G****.*

Choose the correct heading for each paragraphs from the list of headings below.

List of Headings

i How new friends change the way people see themselves
ii An experiment that distinguished between friends and people we do not know
iii Changing trends in how many friends people have
iv The best way to break up a friendship
v The effect that friendships have on how individuals appear to others
vi The criteria of true friendship
vii The impact of love on close friendships
viii The impact of friends on well-being
ix Why some friendships come to an end
x The ups and downs of friendships

1 Paragraph A _____
2 Paragraph B _____
3 Paragraph C _____
4 Paragraph D _____
5 Paragraph E _____
6 Paragraph F _____
7 Paragraph G _____

Do the following statements agree with the information given in the reading passage?

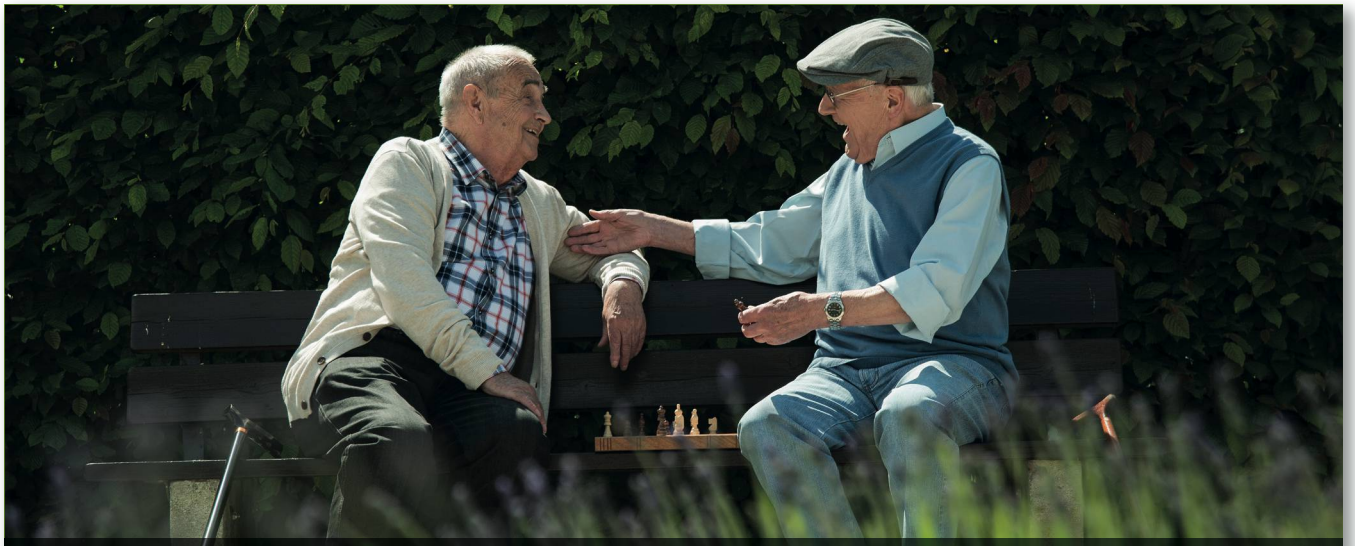
Write

TRUE *if the statement agrees with the information*

FALSE *if the statement contradicts the information*

NOT GIVEN *if there is no information on this*

8 Scientists say a good friend thinks about your well-being before their own.
9 Good-looking people appear more interesting to others when in a group.
10 People in a study reacted in the same way no matter who they believed would be hurt.
11 It is easier to overcome an illness when you have a wide network of friends.
12 We have fewer real friends today compared to the past.
13 We lose school friends when we have little in common with them.



The science behind friendships

A What's the difference between a true friend and just an acquaintance? Believe it or not, science has the answer to this question and many more about the people we call friends. Behavioural scientists and psychologists describe a close friendship as a relationship that involves a long-lasting bond of sacrifice and shared moments. A close friend puts your happiness first, never asks you to put your friendship before your principles, and you miss them when they are gone.

B So why do we have friends? In 2013, research at the University of California, San Diego, found that there is one particularly interesting reason – people look more attractive in a group than they do when they are alone. It is a phenomenon called 'hierarchical encoding', but it is more commonly known as 'the cheerleader effect'. Why does this happen? The study proposes that essentially, the more attractive people in a group make the whole group seem more attractive. The 'average' faces in the group look more attractive too.

C Friendships can make us feel more empathy too. Researchers at the University of Virginia studied the brains of participants when they threatened to give them a small electric shock. They found that when they told the participant that they or a friend would get a shock, exactly the same part of the brain lit up on the scanner. This was not true when the participant believed a stranger would get a shock. So, whether we are in danger or a friend is in danger, our brain reacts in the same way.

D Friendships can also be positive for our physical and mental health. Research suggests that a large number of friends can help to reduce our stress levels, as well as make us more able to fight disease and even to live a longer life. When you have friends who you see regularly, you become more physically active, which can help you to feel happier and to fight any depression which may come your way.

E Of course, these days, we are not only content with face-to-face friends. This has impacted on the number of friends we have at one time. In the 1980s, anthropologist Robin Dunbar estimated our cognitive limit for social relationships at one time was around 150 – known as 'Dunbar's number'. However, Dunbar has since suggested that the rise of social networks may have raised the limit by increasing our memory capacity. Nevertheless, those who maintain hundreds of friendships may do so at the expense of their closest relationships – those you turn to when you really need them. So even though it is now possible to have more friends than ever before, the fact remains that, when it comes to friendship, a few close friends is more beneficial.

F We do not always stay close to these friends, however. And a Florida university believes it knows why. It suggests that early teenage friendships are almost always broken apart by dissimilarity. According to FAU professor Brett Laursen, 'It causes conflict, it interferes with cooperative activities and shared pleasures and it create circumstances where one friend bears more costs, such as the friend who is less aggressive; or gets more benefits, such as the friend who has lower social status than the other. Dissimilarity disrupts relationship bonds.'

G Another reason for losing friends is romantic relationships. Dunbar, the anthropologist mentioned earlier, also studied the effect that romance can have on friendships. Research has revealed that, when you gain a new romantic partner, you may lose two of your closest friends. There's a simple reason for this. It takes time to make a relationship work and the time you invest in your new partner is time that is not being spent with your old friends. On average, a new partner pushes out two close friends, leaving you with a decidedly smaller inner circle. Dunbar calculated that the average person has five people to turn to in a crisis – their closest friends. However, those who are in a relationship only have four people – including their partner. So it is important to remember to nurture your friendships and remember that you need them as much as they need you.

Writing (Task 1)

Lead-in

1 Work in pairs. Think about the area where you live. How has it changed over the last decade? What do you think it was like thirty or forty years ago?

Understand the task

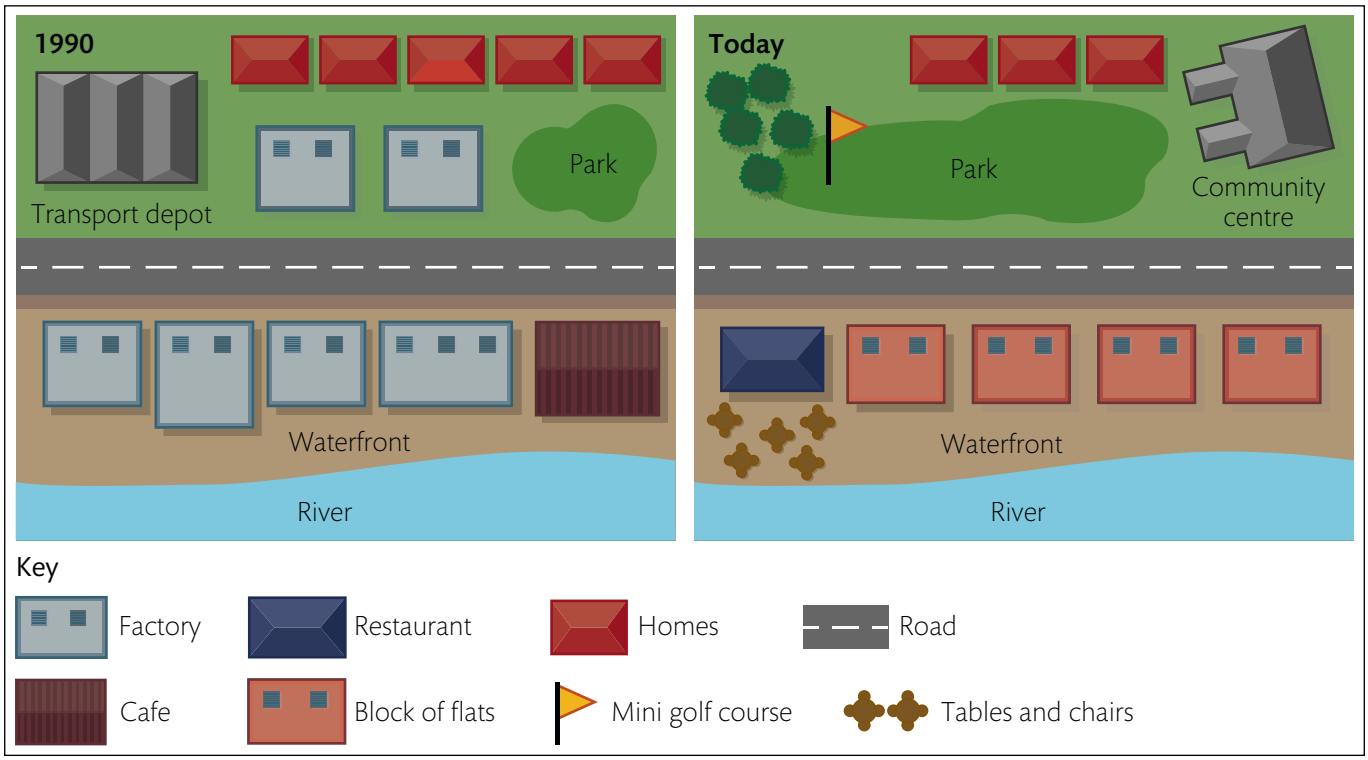
➤ EXPERT WRITING page 201

2 Read the task instructions. What do you have to write about?

You should spend about 20 minutes on this task.

The maps show the town of Wilden in 1990 and today.
Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.



Plan the task

➤ TEST STRATEGIES page 171

3a Look at the maps and plan your summary in five minutes. Write notes in the paragraph plan to help you. Remember to:

1 say what the maps show, paraphrasing words in the test task where possible.
2 write an overview of the most significant change(s).
3 describe in more detail the main differences and similarities.

b Complete the paragraph plan. Do this in five minutes.

Introduction sentence	
Overview	
Details (e.g. main differences/one or two aspects of the map)	
Details (e.g. main similarities/one or two aspects of the map)	

Language and content

4 Look at the verbs below and answer the questions.

build extend knock down locate move open place remain remove replace (with)

1 Which can you use in your summary? How? Add them to your paragraph plan.
2 Are you more likely to use them in their active or passive form?

5a Assess the paragraph using the questions (1–4). Which descriptor does each question refer to?

One difference is the restaurant. In 1990 there was no restaurant in the area but since that time one has build. It is locate near the water where one of the factories knocked down. Tables and chairs have placed outside for customers to sit on and enjoy the view while they eat their food. As several apartment blocks have build near the restaurant, it is available for the residents.

1 Does the writer provide an overview and write about the key points, not irrelevant points?
2 Does the writer organise ideas clearly in the paragraph and use connectors or referencing (e.g. *it*, *this*) to connect them?
3 Does the writer use a range of vocabulary accurately and with correct spelling?
4 Does the writer use both simple and complex sentences accurately?

b Find and correct five errors with the use of the passive in the paragraph.

c Look back at your previous writing. What typical grammar errors do you make? Make a list.

My typical errors

Write a summary

6 Complete the test task in Exercise 2. Try to do it in 13 minutes. Use your paragraph plan to help you. When you have finished, spend 2 minutes reviewing it and checking for errors. Use your error list to help you.

Assess and improve

7a Read and assess your description using the questions in Exercise 5a. Work in pairs and take turns to ask and answer the questions (1–3).

1 Did you complete the task in the time limit? What made this difficult?
2 How useful was your list of typical errors when checking your work? What was the main error type you made?
3 What one thing do you want to improve next time? How do you intend to do this?
   - Practise this task type again at home.
   - Do more timed writing tasks at home.
   - Practise writing a plan.
   - Do some grammar exercises on your typical error type.
   - Leave enough time to check for errors.

b Rewrite your summary, making improvements that you noted when self-assessing your work in Exercise 7a, Question 3.

Review

1 Complete the article with the words below.

access catch committing considerable evidence investigate majority provides punished robbed thief victim

Police exploit social media

The vast **1** _____ of police departments in the USA are now using social media to **2** _____ crimes and **3** _____ criminals. A **4** _____ amount of boasting by criminals on social media **5** _____ the police with the opportunity to solve more crimes, faster. Gary Reece was a **6** _____ who took a photo of items he'd stolen and put it online for his friends to see. Although his account was private, the police persuaded one of his friends to allow them **7** _____ to his account and they soon had the **8** _____ they needed to arrest Reece. The police were able to locate the stolen items and return them to the **9** _____ , whose house Reece had **10** _____ . The courts **11** _____ Reece for his crime and were able to stop him from **12** _____ further crimes.

2a Choose the correct quantifiers to complete the speaking test answers.

What do you like about where you live?

'I really like where I live. There are **1** *a little / plenty of* things to do there such as going to the park, the cinema or shops, so I'm never bored. There are also **2** *a few / few* museums and a couple of theatres. My city has **3** *any / some* historic attractions so a large **4** *amount / number* of tourists visit there every summer. Sometimes there are **5** *too few / too many* of them and it gets really crowded, but it means there are **6** *a little / some* fun activities like a big festival which has a huge fireworks display at the end.'

What would you like to change about where you live?

'There are **7** *many / much* things that I'd like to change but I think the traffic problem is the main thing. There are **8** *not enough / too many* cars on the road so there are traffic jams all the time and there **9** *aren't enough / isn't enough* parking for cars in my area so people have to pay **10** *a lot of / much* money to put their car in a garage. I'd use public transport but this has problems too. There are **11** *a few / too few* buses running at rush hour so they get full and you often have to wait for the next one. I don't have **12** *enough time / time enough* to stand and wait for buses all day so more buses would be great.'

b Practise answering the questions in Exercise 2a about you.

3a Put the words/phrases in order to form second conditional sentences. The first word/phrase is in bold. Add punctuation where necessary.

1 transport system / I / the mayor/ **If** / I'd / introduce / were / a better / of my city
2 would / they / social media / communicate less / **People** / if / didn't have
3 go anywhere / if / go to Australia / I / could / **I** / in the world / would
4 how to / had / I / I'd learn / my own clothes / **If** / more time / make
5 **If** / I'd / do any job / a film director / could / train to be / I
6 learn / would / they / the chance / a second language / **I think most people** / if / had

b Tick the sentences in Exercise 3a that you agree with.

4 Complete the description of a map with one word in each gap. The first letter is given.

The two maps show how a city has changed between 1983 and today. The most significant change is an increase in the number of homes for 1 i_____ *of the city, as well as improvements in the road system and public transport* 2 n_____ .

If we look closely at the maps, we can see that the city is 3 l_____ o_____ *today in a similar way to three decades ago. Shops and offices are situated in the city centre while* 4 r_____ *live in homes outside the city centre, in the suburbs. However, the* 5 a_____ *of these homes has changed, with fewer traditional houses and more modern* 6 b_____ *of flats to house an increased population.*

In the city centre, the 7 m_____ *system has become bigger, providing* 8 p_____ *with underground transport to the northeast, northwest and southeast of the city. Above ground level, the road network has been improved so that there are fewer* 9 c_____ *and more* 10 r_____ *to help traffic flow more quickly. There are also wider* 11 p_____ *for pedestrians and cycle* 12 p_____ *for cyclists.*

Listening Paper

The **Listening Paper** tests your ability to understand spoken English. The test is approximately 30 minutes with 10 minutes at the end to transfer your answers from the question paper to the answer sheet. There are four different recordings with ten questions each. There will be more than one task type for each recording. Each recording is played just once. You must write your answers in pencil. Incorrectly spelt words are marked as wrong.

General advice

DO use the time given to read any headings and the next set of questions.

DO use the questions to help you predict what the recording will be about and what the answers might be. This will help you focus on the recording when you listen.

DO listen very carefully to the introduction because it gives you more information about the context.

DON'T panic if you miss an answer. Forget that question and move straight onto the next one so you do not miss that.

DO listen carefully for signposting language so you know when the speaker is moving on to the next question.

DON'T worry if you don't understand some words. You may not need to know them to answer the question.

DON'T spend time checking answers you have already written down. You can do this when transferring your answers to the answer sheet.

DO make sure you transfer words to the answer sheet carefully so you do not lose points by writing an incorrect number, letter or word.

DO spell words correctly or your answer will be marked wrong. You can write in small letters or capital letters. If you write in capitals, make sure capitals for names, etc., are clearly bigger.

Gap-fill tasks (sentence/summary/form/notes completion) and short-answer question

In these listening tasks, you will have sentences, a summary, a form or notes with a gap that you need to complete with a word/words from the recording. With a short-answer question, you have a question and write down words from the recording to answer it.

Before you listen

- Read the instructions to find out how many words or numbers you can write in each gap e.g. *NO MORE than TWO words*.
- Read the sentence, summary, form, notes or question and try to guess the missing word(s)/answer or think about what part of speech it is, e.g. a noun, verb, etc. Think about key words you need to listen for in the recording.
- If there is a box of options given to you, look at those options and think about which words could fit which gap.

While you listen

- Follow the information you have in the sentence, summary, form, notes or questions. Listen for key words, synonyms or paraphrases. Remember to write the exact word/words that you hear on the recording in each gap on the question paper as you listen.
- Write your answer quickly and then move onto the next gap. Do not worry about spelling at this stage. Remember that the word should be **exactly** as it is on the recording and must not be changed.
- If you choose your answers from a box of options, remember that these words may appear in the recording but not all will be the correct answers.

After you listen

- Read the sentences, summary, table and notes in full to check that the meaning and grammar of the words fit correctly. Check that the words answer the short-answer question correctly.
- When the recording of the whole test has finished, write your answers on the answer sheet.
- Check your spelling because words that are misspelled are marked as wrong. You can write numbers as a number (2) or a word (two).

Multiple choice

There are three types of multiple-choice listening tasks. In the first, you read a question or sentence prompt and choose one correct answer or ending from three options, A–C. In the second, you have a question and choose one correct image such as a diagram or chart. In the third, you have a question and choose more than one answer from a set of options.

Before you listen

- Read the instructions to see how many options to choose.
- Read the question(s) or sentence prompt(s) and options and underline the key words. This will give you an idea of what the recording will be about and what to listen for.

While you listen

- Listen for a signal word from the question/stem that will signal the answer is coming. Listen for synonyms or paraphrases of the key words you underlined in the answers.
- All of the information in the options will be mentioned in the recording – these are distractors. Do not choose an option just because you have heard it. Listen carefully to the whole recording.
- Circle the option on the question paper that best fits the information you have heard.

After you listen

- When the recording of the whole test has finished, write your answers on the answer sheet.
- Check you have written the correct letter next to each number.

Matching (information, features and sentence endings)

In this listening task type you may have to match objects, places, etc., to their features or speakers to their opinions. You may also need to match the first half of a sentence to a second half. You will be given options to choose from.

Before you listen

- Underline the objects, places, speakers, etc., and key words in the options. Think about how each option differs. Use these ideas to predict the content of the recording.

While you listen

- Listen for mention of the objects, places, speakers, etc. Listen for key words, synonyms or paraphrases of the options.
- Do not stop listening simply because you hear an option mentioned in connection with one of the objects, etc., as it might be a distractor. Keep listening to be sure it is the correct answer.
- The numbered items will be in the same order as the recording. The lettered items will not.
- Write the correct letter next to each number on the question paper.

After you listen

- When the recording of the whole test has finished, write your answers on the answer sheet.
- Check you have written the correct letter next to each number.

Label a map/plan, diagram, flow chart

In this listening task type you will have either a map, plan, diagram or flow chart to complete.

Before you listen

- Read the instructions so you know how many words or numbers you can write in each gap, e.g. *NO MORE than THREE words.*
- Look at what information is in the map/plan, etc. Read the prompts and predict the missing word or part of speech. If you are given options, read them and try to guess which could fit each gap.
- Underline key words to listen for in the recording or think about location/direction words you might hear, e.g. *opposite, after that, attached to.* Look at the numbers as the information in the recording will follow these in order.

While you listen

- With a diagram or flow chart, listen for key words, synonyms or paraphrases of the information in the diagram/flow chart that you have.
- With a map or plan, make sure you listen carefully at the beginning to find out where you are currently located. Listen for language of direction (e.g. *north west, on the right*) so you know where different items are on the map/plan.
- Note down the missing word(s) as you hear them on the question paper. Remember that if you are given options, all of them will appear on the recording but only some are correct answers so listen carefully at all times.

After you listen

- When the recording of the whole test has finished, write your answers on the answer sheet.
- Check your spelling is correct and you have used capital letters where necessary.

Reading Paper

The **Academic Reading Paper** tests your ability to understand written English in an academic environment. The total time for the test is 60 minutes, and there are 40 questions you need to answer. In total, the passages are 2,000–2,750 words long, and this is spread over three different passages. There are a variety of question types, and you will have up to 4 question types for each text.

Note In the Reading Test you MUST write your answers on the answer sheet during the 60-minute time limit. Write your answers next to the correct number, and pay extra attention if you leave an answer blank.

General advice

DO allocate the right amount of time for each question – you have 40 questions and only 60 minutes. Spend about 20 minutes on each passage.

DO start with Part 1 and work through, as the passages become increasingly difficult.

DO move on if you can't find an answer in 2 minutes. Around a quarter to a half of the questions should be **impossible** for a Band 5–6 student. These may appear anywhere in the test, so guess and go back if you have time at the end.

DO start by reading the questions. These are often written in easier language, and you can get a feel for the main ideas in the text from the questions.

DON'T go back and change answers unless you are sure. Studies show test takers more often change correct answers to the wrong answers.

DON'T read everything. Even native speakers cannot read all 2,750 words carefully, and complete the tasks. Scan to locate information, then read carefully for the answer.

Gap-fill tasks (sentence/summary/table/notes completion and short-answer questions)

In this reading task type you will have sentences, a summary, a table, or notes with a gap that you need to complete, or a question that needs a short answer. They tend to test more factual information and detail. The answers usually appear in the same order as in the passage.

Before you read

- Read the instructions so that you know how many words or numbers you can use in each gap.
- Predict what kind of word might be missing. Even if you predict incorrectly, it will help you to focus your attention on the right piece of information.

While you read

- Underline the key words and then scan the text to locate where the answer might be.
- Copy the word or words directly from the text. You should not need to make any changes.
- Watch the time. If a question is taking more than 2 minutes, it might be too difficult for you.

After you read

- If you have a whole sentence, check that it makes sense and that you have respected the word limit.
- Check your spelling and check that you have used capital letters where necessary.

Multiple-choice questions and short-answer questions

In this reading task type you will have either a question or the first half of a sentence, and four possible answers or ways of continuing that sentence. These questions tend to test opinions and ideas, and may be related to a specific part of the passage, or test global understanding. The questions usually appear in the same order as the information in the passage.

Before you read

- Read the question or sentence beginning and the options quickly. Try to decide quickly what the question is asking for (e.g. main idea, inference, detailed information or someone's opinion).

While you read

- Underline key words and choose two or three that might help you to locate the correct answer in the passage.
- Remember that answers to this type of question usually appear in the same order as they appear in options.
- Read the relevant part of the passage carefully. Try to understand the main point and supporting points.
- Try to guess the meaning of the words you do not know by looking at the other words in the sentence – but only for words that are important to answer the question.

After you read

- Quickly work through the options one by one. Try to decide if each is correct or incorrect.
- When you think you have found the correct answer, read the passage again quickly to be sure you are correct. Match up sentences in the text that paraphrase the idea in the option you think is correct.
- Watch the time. Multiple-choice questions can require more reading, but are still only worth 1 mark each.

True/False/Not given, Yes/No/Not given

In this reading task type you will have statements and you have to decide if the passage says the same thing, says the opposite, or if that information is not in the passage. *True/False* statements tend to be opinions, and *Yes/No* statements tend to be factual. The answers usually appear in the same order as in the passage.

Before you read

- Underline key words in the options and choose two or three that might help you to locate the correct answer in the passage.

While you read

- Read the passage quickly to locate the answers.
- Answers to *True/False/Not given* questions appear in the same order in the questions and passage. Locate the easiest answers first, and then look before or after for more difficult answers.
- Try to guess the meaning of the words you do not know by looking at the other words in the sentence – but only for words that are important to answer the question.

After you read

- Remember that *False* means that the opposite idea is paraphrased and stated in the text. *Not given* is for anything that is unclear.
- Watch your time. Do not spend too long looking for *Not given* answers.

Matching (information/features/sentence endings)

In this reading task type you may have to match objects, ideas, historical periods, etc., to their features. You may also need to match the first half of a sentence to a second half. You will be given options to choose from in the questions.

Before you read

- Underline key words in the questions. Think about how each option differs.

While you read

- Read the passage quickly to locate the relevant parts.
- Read to see if there are any key ideas from the options that are paraphrased there.
- Look at words that show how ideas relate to each other (examples, causes, effects, contrasts, etc.). Sometimes this is tested.

After you read

- When you think you have found the correct answer, read the passage again quickly to be sure you are correct.
- If you are matching sentence beginnings and endings, re-read the sentence to make sure it makes sense grammatically.

Matching headings

In this reading task type you will be given summaries or paraphrases and you will have to match them to marked paragraphs or sections of the text.

Before you read

- Read the headings quickly. Identify the topic and the focus of each heading. For example, in a passage on shopping, there might be several headings on the topic of healthy food, but one will focus on the cost of healthy food, another on the availability of healthy food, a third on displaying healthy food, etc.
- Read the instructions carefully. Sometimes you either have to match a summary to sections, or find the section where an idea is mentioned.
- Look at the example quickly. Sometimes you can get a feel for how the particular test-writer summarises ideas.

While you read

- There are two possible ways of answering this task type:
  Quickly read each section in the passage, summarise it in your own words, then find a heading that matches your summary.
  OR Underline key words in the headings and then quickly read each section in the passage to match paraphrases of the key words.
  Experiment with both and see which suits you.
- As you match sections, make a mark next to the options you have used already.

After you read

- Guess any that you have not matched.
- Watch your time. DON'T try to read the whole text in detail.

Writing Paper

The **Academic Writing Paper** tests your ability to write academic texts. You will be required to interpret and describe visual information in Task 1 and write an essay in Task 2. The paper is one hour long, with 20 minutes recommended for Task 1 and 40 minutes recommended for Task 2. You can write in either pen or pencil.

See page 191 for the IELTS Writing assessment criteria.

General advice

DO read the questions carefully and make sure you understand them.

DO plan each task to make sure you answer all parts of the question and organise your ideas well when you write. DO NOT spend too much time on this. No more than five minutes for Task 1 and no more than ten minutes for Task 2.

DO NOT write a first draft in full and then write a second. You will not have time for this.

DO write in paragraphs.

DO use a variety of language and link your ideas with linkers such as *As a result*, *however*.

DO leave time to review your writing. Read it once to check it makes sense. Then, read it again and check your language accuracy, punctuation and spelling.

Task 1: Factual description

Task 1 is a factual description. The question might ask you to describe a chart, diagram or map. You might have more than one chart or image on a connected theme. You should write at least 150 words.

Before you write

- Study the image and the title to understand what information you have.
- Pay attention to any information in the chart. You need to include all the main points.
- Organise information into groups. Try to see connections or relationships between information.
- Identify an overview.

While you write

- Start with an introduction sentence and an overview sentence.
- Include facts and numbers from the charts to illustrate your main points.
- Highlight the main points.
- DON'T add your opinion, or try to explain why things happen. Just describe what you see.
- Use connectors to show the relationship between ideas.
- Write clearly so the examiner can read your handwriting. Write at least 150 words or you will lose marks.

After you write

- Read your description and check that it makes sense, the ideas are organised logically and correct any incorrect language, punctuation and spelling.
- Cross out any changes neatly and write the correction neatly above or below it.

Task 2: Essay

Task 2 is an academic essay. The question might ask you to discuss an opinion (opinion essay), provide solutions to a problem (problem-solution essay) or explain the causes and/or effects of something (cause-effect essay). There are usually two parts to the question and you must make sure you address both parts in the essay. You should write at least 250 words.

Before you write

- Read the question carefully and underline the key words. Identify the type of essay required.
- Generate ideas on how to answer the question and note down key words.
- Write down useful words or phrases you could use.
- Organise the ideas and words/phrases into a paragraph plan.

While you write

- Follow your paragraph plan.
- Start with an introduction which introduces the topic, gives some background information and makes a statement which the essay will discuss. Paraphrase information in the essay question.

- Start each paragraph with a topic sentence and then give supporting points. Expand your ideas where possible by giving explanations, examples or reasons.
- End with a conclusion which summarises the key points. Paraphrase rather than repeat the points you made earlier.
- Write clearly so the examiner can read your handwriting. Write at least 250 words or you will lose marks.

After you write

- Read your essay and check that it makes sense, the ideas are organised logically and correct any incorrect language, punctuation and spelling.
- Cross out any changes neatly and write the correction neatly above or below it.

Speaking Paper

The **Speaking Paper** tests your ability to communicate on a variety of topics and speak at length on a topic. The test lasts for 11–14 minutes and is divided into three parts.

See page 184 for the IELTS Speaking assessment criteria.

General advice

DO speak as much as you can. You have 12–14 minutes to show the examiner all your skills so use the best language you can throughout. Expand your answers by giving examples or reasons.

DO try to look confident even if you do not feel it. Smile, sit up in your chair and take deep breaths.

DO speak clearly and try to sound interested in the topics and questions.

DO try to speak fluently without too much hesitation.

DO use 'fillers' to give you time to think/cover hesitations.

DO speak as clearly as possible.

DO use intonation to communicate interest, surprise, disappointment, etc.

DO use a wide variety of language.

DO try to be as accurate as possible, but without disrupting fluency too much.

DO use connecting words/phrases to join ideas together.

Part 1: Introduction and general questions

Part 1 focuses on general questions about the candidate's life. It lasts 4–5 minutes. The examiner will start by asking the candidate to introduce themselves and will then ask further general questions.

Before you speak

- Listen carefully to the questions. If you do not hear the question, ask the examiner to repeat it.

While you speak

- Give yourself time to think with the use of expressions such as *That's an interesting question* or *Let me see.*
- Answer the question and then give some additional information to expand the topic. This could be two reasons why you enjoy something or a reason and an example.

Part 2: Individual long-turn

In **Part 2**, the candidate is given a task card which has a topic and specifically four points to talk about. Three of these points usually focus on describing something and the final point asks for reasons for something. The candidate has one minute to prepare and then should talk for 1–2 minutes. The examiner might then ask one or two more questions on this topic.

Before you speak

- Read the task card carefully and think about what you can talk about.
- Think about words you can use in your description in order to use a wider variety of language.
- Write down key words if it helps you.
- Make sure you use all the one-minute preparation time to plan what you want to say.

While you speak

- Start by saying what you are going to talk about, e.g. *I'd like to talk about a famous historical building in my city.*
- Follow the prompts on the card to make sure you talk about all the points on the card.
- Use a variety of language to give your description.
- Speak for at least one minute. You can expand your answer for the final point by giving several reasons and/or examples to help you keep talking.
- Listen carefully to any follow-up questions that the examiner might ask before moving onto Part 3. Give yourself time to think with phrases such as *I'm not sure about that* or *That's a good question.*

Part 3: Two-way discussion

In Part 3, the examiner asks the candidate questions on the topic in Part 2 and they have a conversation on that topic. This part is 4–5 minutes long.

Before you speak

- Listen carefully to the questions. If you do not understand, ask the examiner to repeat the question, speak more slowly or explain a word. The examiner can help you with this in Part 3.

While you speak

- Give yourself time to think with expressions such as *That's an interesting question* or *Let me see.*
- Answer the question and expand your answer as much as possible. Give reasons, explanations or examples to support your ideas. Be prepared for the examiner to ask you to explain or justify your ideas.
- Do not feel you have to speak for 4–5 minutes on just one question. The examiner will ask you follow-up questions to help you keep talking.

Module 1

Present tenses (page 13)

A Present simple

We use the present simple when we are:

1 talking about regular repeated actions, routines and habits.

Most people ***pay*** *a monthly fee for their mobile.*
The computer system ***updates*** *every Monday.*
The office ***doesn't open*** *on Wednesday afternoons.*

2 talking about a permanent situation.

This company ***offers*** *free email accounts.*
My family ***live*** *by the sea.*
My mobile plan ***doesn't give*** *free calls.*

To form the present simple we use the base form of the verb. *He/She/It* forms are different.

Positive

I/You/We/They ***like*** *pop music.*
He/She/It ***likes*** *pop music.*

Negative

I/You/We/They ***don't like*** *social media.*
He/She/It ***doesn't like*** *social media.*

Questions

We use the auxiliary verb *do* to make present simple questions.

Do *I/you/we/they* ***like*** *pop music? Yes I/you/we/they do.*
No I/you/we/they ***don't****.*
Does *he/she/it* ***like*** *pop music? Yes he/she/it does.*
No he/she/it ***doesn't****.*

B Present continuous

We use the present continuous when we are:

1 talking about actions happening now.

The manager ***is updating*** *the website.*

2 talking about temporary situations.

Dr Brown's ***working*** *on a new system this summer.*

To form the present continuous we use *be* + *-ing* form.

Positive

*I'****m****/You'****re****/He's/She's/It's/We'****re****/They'****re*** *+ -ing* form

Negative

*I'****m not****/You* ***aren't****/He* ***isn't****/She* ***isn't****/It* ***isn't****/We* ***aren't****/They* ***aren't*** *+ -ing* form

Questions

The subject and verb *be* are inverted.

Are *you* ***working*** *at the moment?*
Is *he* ***living*** *in university halls?*

C State verbs

Some verbs describe states and are not normally used in a continuous form. State verbs often:

1 describe emotions or mental states. (*agree, like, hate, prefer, want, need, mind, understand, disagree, promise, seem*)
2 describe the senses. (*feel, hear, see, smell, sound, taste*)
3 describe owning things. (*belong to, have, own*)

Past tenses (page 16)

A Past simple

We use the past simple when we are:

1 talking about an action that started and finished in the past.

The man ***sent*** *a text message.*
I finished ***work*** *early.*

2 talking about a general situation in the past.

I ***studied*** *Biology at university.*
Sending emails ***became*** *popular in the 1990s.*

We form the past simple tense as follows:
Positive: Subject + verb + *-ed* (for regular verbs)

*They film****ed*** *this show in New York.*

Negative: Subject + *didn't* + infinitive

I ***didn't see*** *the article.*

Question: *Did* + subject + infinitive

Did *you* ***finish*** *the movie?*

There are many verbs which are irregular. Here is a list of common irregular verbs.

bet–bet
bend–bent
blow–blew
deal–dealt
dream–dreamed/dreamt
drive–drove
fall–fell
find–found
forbid–forbade
forget–forgot
grow–grew
lead–led
leave–left
mean–meant
mislead–misled
rise–rose
rebuild–rebuilt
set–set
undergo–underwent
undertake–undertook

Module 2

Relative clauses (page 29)

A Defining relative clauses

1 We use defining relative clauses to identify or classify a noun/pronoun.

Happiness is an emotion ***which*** *makes us feel good.*
(= Happiness is an emotion. **It** makes us feel good.)

B Relative pronouns

1 We use a relative pronoun as the subject of a relative clause.

A bucket list is something ***which*** *can motivate us to experience new things.*
(= A bucket list is a thing. **It** can motivate us to experience new things.)

We do NOT use a subject pronoun (*he, she, it,* etc.) after a subject relative pronoun.

A person ***who*** *is stressed ~~he~~ has high blood pressure.*

2 We use a relative pronoun as the object of a relative clause.

We have to read the research report ***that*** *the professor gave us.*
(= We have to read the research report. The professor gave **it** to us).

We can omit the relative pronoun if it is an object.

Embarrassment is a feeling (that) we don't want to experience.

3 We use these pronouns in relative clauses:
which/that – things
who/that – people
whose – possessions
Sentences with *when* and *where* are not relative clauses but they act in a similar way.
where – place
when – time

A person ***whose*** *body language is negative gives a bad impression.*
Places ***where*** *people are noisy can be very stressful.*
A time ***when*** *people may feel happy is on their graduation day.*

We can use *that* instead of *which* and *who* in defining relative clauses. In more formal texts, *which* and *who* are more common.

Parts of speech (page 32)

1 Important parts of speech are nouns, verbs, adjectives, adverbs, prepositions, articles, pronouns and conjunctions.

It's important to analyse data carefully so you interpret the results correctly.

Noun = *data, results*
Verb = *'s, analyse, interpret*
Adjective = *important*
Adverb = *carefully, correctly*
Preposition = *to*
Pronoun = *it, you*
Conjunction = *so*
Article = *the*

2 A **noun** describes an object, person, thing, place or idea.

Confidence *is an important* ***quality****.*
A ***lack of confidence*** *can affect a* ***person****'s* ***career****.*

3 A verb describes an action or a state.

Some people ***speak*** *very confidently. (= action)*
We ***feel*** *confident if we look good. (=state)*

An **auxiliary verb** helps to form a tense and usually comes before another verb (main verb) which gives the main meaning of the sentence.

*I****'ve*** *gained confidence since I started my new job.*
*She****'s*** *improving her skills all the time.*

4 An **adjective** is a word which describes an object, person, thing, place or idea (a noun). It tells us what kind or how many. It comes before or after the noun.

It is ***difficult*** *to express emotions sometimes.*
Expressing emotions can be ***difficult****.*

5 An **adverb** gives us information about how, where and when. Adverbs usually come before or after a verb.

People ***often*** *keep their emotions inside.*
The percentage of people who feel happy is rising ***slowly****.*

6 A **preposition** gives us information about time and place. They usually come before a noun or number.

Looking ***at*** *art can cause strong emotions.*
Listening ***to*** *a sad song can make you feel depressed.*

7 A **pronoun** can replace a noun and includes words such as *she, they, them, ours, him, this, these.* A sentence often begins with a pronoun.

I*'m not happy with the professor.* ***He*** *shouted at* ***us*** *today.*
You*'ve made* ***me*** *feel very guilty.*

8 A **conjunction** links ideas in a sentence. They usually join two clauses.

It's good to show your emotions ***because*** *it releases stress.*
Although *it is not very good for your health, keeping your emotions inside can be better for others.*

9 An **article** is a word which comes before noun. Articles are *a, an, the.*

Fear is ***a*** *common emotion.*
There's ***an*** *interesting research report on stress here.*
The *feelings we experience can be varied.*

Module 3

Comparative forms (page 45)

A Comparative and superlative forms of adjectives and adverbs

1 One-syllable adjectives and adverbs
We add *-er* and *-est* to form the comparative and superlative of one-syllable adjectives.

The new school was ***bigger*** *than the old one.*
It's the ***fastest*** *way to learn new words.*

With adjectives that end in a vowel + consonant, we double the consonant.

big – bigger, biggest, sad – sadder, saddest

With adjectives that end in *-e*, we add *-r* and *–st.*

safe – safer, safest

2 Two-syllable adjectives and adverbs

We use *more* and *the most* with two-syllable adjectives.

The results were ***more interesting*** *than they imagined.*
Mathematics was ***the most popular*** *subject.*

With two-syllable adjectives ending in *-y*, we replace the *-y* with *-i.*

heavy – heavier, heaviest

3 Three-syllable adjectives and adverbs

We use *more* and *the most* with three-syllable adjectives or adverbs.

He ***spoke more seriously*** *than before.*
The Large Hadron Collider is ***the most important*** *project in Europe.*

4 Irregular comparative and superlative adjectives

These are the most common irregular forms:

good – better – best
bad – worse – worst
far – further – furthest

B Using comparatives with multiples

1 With *twice* or *half* we add *as* + adjective + *as.*

Sport was ***twice as popular as*** *art among primary school children.*
The other class is only ***half as big as*** *this one.*

Note We do NOT use *more* with *twice* or *half.*

The number of males was ~~twice higher~~ ***twice as high as*** *the number of females.*

2 With *three* times or more we can use either *three times* + adjective + *-er* OR *three times* + *as* + adjective + *as*

Pass rates were ***four times higher than*** *last year.*
Pass rates were ***four times as high as*** *last year.*

Verb patterns (page 48)

-ing forms

We can use the *-ing* form of the verb like a noun. We use *-ing* forms in the following situations:

A *-ing* forms as the subject or object

We use an *-ing* form when the verb is the subject or object of a sentence. We are usually talking about the action in a general way.

Banking *is less popular than it was in 2000.*
Working *and* ***studying*** *at the same time can be hard.*

B *-ing* forms after prepositions

We use an *-ing* form after a preposition.

I'm not happy about ***working*** *late.*
Brian's nervous about ***meeting*** *his boss.*

C *-ing* forms after certain verbs

We use the *-ing* form after certain verbs. These include: *avoid, prevent, someone, consider, finish, give up, imagine, involve, mind, practise, recommend, suggest, understand*

The researchers suggested ***introducing*** *higher taxes.*
The project involved ***building*** *a new centre for the homeless.*

Infinitives

An infinitive is the base form of the verb. It is usually preceded by *to*, but sometimes it is used without.

A Infinitives after adjectives

We use *to* + infinitive after many adjectives.

It's difficult ***to identify*** *the right person for the job.*
It was hard ***to remember*** *the company's name.*

B Infinitives after certain verbs

We use *to* + infinitive after certain verbs. These include: *afford, agree, appear, arrange, ask, choose, decide, expect, hope, learn, manage, offer, plan, refuse, want.*

The speakers agreed ***to disagree****.*
The results appeared ***to show*** *a difference in sales.*

C Infinitives to express purpose

We use *to* + infinitive to show purpose.

They separated into two groups ***to get*** *the work done faster.*
The figures were checked ***to make*** *sure they were correct.*

Infinitives and *-ing* forms

Some verbs can be followed by the *-ing* form or the infinitive. Sometimes there is a small difference in meaning between the *-ing* form and the infinitive. The most common verbs are: *begin, start, stop, forget, remember.*

He began ***to talk****.*
He began ***talking****.*

Module 4

Probability (page 61)

We often express probability in academic English as is it often necessary to say whether we think something is true or will be true and explain why.

A Future probability

1 We can use the following modal verbs to express probability in the future.
will definitely (*not*) + infinitive
(= I'm sure.)
will probably (*not*) + infinitive
(= I'm quite sure.)
will possibly (*not*) + infinitive
(= It's possible but I'm not sure)
might (not)/*may* (not) + infinitive
(= It's possible but I'm not sure.)

Technology ***will definitely change*** *the way we learn a foreign language.*
Our working lives ***may not be*** *so different in 2030.*
Cars ***will probably not fly*** *before 2050.*

2 We can also use other structures to express future probability. These are particularly common in academic texts because they are more formal in style.

There is a small chance *that we will all have microchips in our brains.*
(= small possibility)
There is a strong possibility *that printed books will disappear.*
(= strong possibility)
It is quite likely that *more people will own their own home.*
(= weak probability)
It is highly likely that *cities will become overcrowded.*
(= strong probability)
More people ***are likely to*** *learn computer programming at school.*
(= probability)

B Present probability

1 We use *must* + infinitive when we are sure that something is true.

The scientists ***must be*** *excited about their latest findings.*

2 We use *can't/cannot* + infinitive when we are sure that something is not possible.

Life on other planets ***cannot exist****.*

3 We use *might/may/could* + infinitive when we think that something is possible but we are not sure.

Scientists ***might be able to*** *cure some serious illnesses soon.*
Researchers ***may find*** *a cure for the common cold soon.*

Future forms (page 64)

A *will* and *going to*

1 We use *will* + infinitive to make predictions based on our thoughts or beliefs.

People ***will study*** *technology more at school.*
Researchers ***will help*** *us to understand the world better.*

2 We use *be* + *going to* + infinitive for predictions based on present evidence and for intentions.

The rain ***is going to get*** *heavier later.*
(present evidence = satellite photos)
We're ***going to do*** *an experiment into this topic.*
(intention)

B Present continuous

1 We use the present continuous for arrangements and planned events.

Experts ***are meeting*** *on Friday to present their papers.*
Dr Smith ***is giving a talk*** *on space travel next week.*

2 An arrangement is something that has been organised and agreed, e.g. an event that is in your diary. An intention is a plan but nothing has been organised or agreed yet.

The professor ***is meeting*** *with all his students this week.*
(arrangement)
The professor ***is going to tell us*** *more about his science award some time soon.*
(intention but no arrangement)

Module 5

Grammar to connect ideas (page 77)

We use the words *this*, *these*, *that*, *those*, *such* and modal verbs to connect ideas.

A *This* and *these*

1 We use *this* to replace a singular noun.

There was an ***increase*** *in numbers of visitors to the gallery.* ***This*** *was largely due to the new opening hours.*

2 We use *this* + synonym to repeat an idea.

Organisers ***decided*** *to hold the art competition every two years, rather than every year.* ***This change*** *was made to give artists more time to prepare.*

3 We use *these* to replace a plural noun.

There were a lot of ***complaints*** *about the exhibition.*
Most of ***these*** *related to just one painting.*

4 We use *these* + synonym to repeat an idea.

The number of ***teenagers*** *who regularly purchase music decreased. The availability of free music online was the main reason reported by* ***these young people****.*

B *That* and *those*

We use *that* to replace a singular noun and *those* to replace a plural noun only if:

1 the idea is distant in time or space.

Hatra contains fine examples of architecture. That region of modern-day Iran was a major centre for trade 2,000 years ago.
Michelangelo painted the Sistine Chapel from 1508–1512. At that time, it wasn't unusual for artists to be employed on such long projects.

2 they follow a comparison form or *the same as*.

Sales of paintings rose faster than those of statues and other art forms.
The statistics for art students on undergraduate programmes were the same as for those on postgraduate programmes.

C *Those who*

We use *those who* to replace *people who*.

Many people dislike visiting art galleries. However, those who enjoy going there visit regularly.
Over 10,000 women agreed to take part in the survey. They were separated into those who were in full-time work and those who were not.

D *Do so, think so* and modals

1 We use *do so* in place of *do it*.

The gallery owners decided to show a much wider range of paintings. By doing so, they attracted a wider audience.

2 We use *can/do/are* in place of repeating a whole phrase.

Many people think they can't understand art, but they can.

E *Such*

We use *such* + *a* (adjective) + noun to replace a singular countable noun and *such* + (adjective) noun to replace a plural noun or an uncountable noun.

The government decided to increase the number of hours spent on art in primary schools. Such a big decision was always going to create disagreement.
The fashion industry is worth around $1.2 trillion each year. Many people think that such large sums of money should be used for better purposes.

Participle clauses with *-ing* and *-ed* (page 80)

A Participle clauses with active verbs

We can use the present participle (*being, involving, containing*) in place of defining relative clauses if the verb is in the **active** form. We use reduced relative clauses to be able to write more ideas in a smaller space. This is particularly common in academic writing.

In active sentences, we omit the relative pronoun, and change the verb to the *-ing* form.

Note: It does not need to be a verb in the present tense.

The people ~~who practised~~ a new hobby reported feeling happier.
*The group **practising** a new hobby reported feeling happier.*
The number of people ~~who make~~ their own clothes has gone down.
*The number of people **making** their own clothes has gone down.*

B Past participles

We can use past participles (*involved, eaten, given*) in place of defining relative clauses if the verb is in the **passive** form.

In passive sentences, we omit the relative pronoun and *be*.

*The leisure centre ~~which was~~ **used** for most of the after-school activities closed down.*
*The novel ~~which was~~ **based** on true events has been made into a film.*

Module 6

Present perfect simple (page 93)

A Present perfect simple

1 We use the present perfect simple to talk about an action that started and finished in the past but the time is indefinite (unknown or not important). When we use the present perfect simple in this way, there is often a present result to the action, as it connects the past with the present.

I've been to university.
(= I went in the past but I do not say when.)
The world population has increased significantly in recent years.
(= It increased in the past but the result is now – a high population.)

2 We use the present perfect simple to talk about an action that started in the past but is not finished and is continuing now. We usually use *for* or *since*. *For* describes the length of the action. *Since* describes the starting point of the action.

Global warming has been an issue for the last two decades.
Technology has developed significantly since industrialisation.

3 We use the present perfect simple to talk about actions with *just, already, yet*. We use *yet* with negative verbs or in questions.

Scientists have just discovered water on Mars.
We've already studied this topic.
Have you completed the essay yet?

4 Other time expressions commonly use with the present perfect are: *ever, recently, so far, until now, up to now, over the last (three months).*

5 We form the present perfect simple as follows:

Positive: Subject + *have/has* + past participle
Negative: Subject + *haven't/hasn't* + past participle
Question: *Have/Has* + subject + past participle

B Past simple

1 We use the past simple to talk about an action or situation that started and finished in the past.

The company ***became*** *more energy efficient in 2015.*
Oil prices ***fell*** *last year.*

2 Time expressions commonly used with the past simple are: ***ago***, ***at*** *4 o'clock,* ***before*** *2010,* ***in*** *2016,* ***last*** *week,* ***yesterday***

3 We form the past simple as follows:

Positive: Subject + verb + *-ed*
Negative: Subject + *didn't* + infinitive
Question: *Did* + subject + infinitive
There are many irregular verbs in the positive, e.g. *had, gave, found.*

Articles and countable/uncountable nouns (page 96)

A *A/An*

1 We use *a/an* before a single, countable noun that we talk about for the first time. We use *an* before words that start with a vowel sound.

A *panda in captivity is not able to breed easily.*
There's ***an*** *animal outside that's making strange noises.*

2 We use *a/an* before a noun that describes something which is just one of many in a group.

There's ***a*** *zoo near here.*
We need ***an*** *expert to help us with this problem.*

3 We use *a/an* in some phrases e.g. ***a*** *few, take* ***an*** *exam.*

A *lot of species are in danger of becoming extinct.*
I love animals so I'm taking ***a*** *course in veterinary medicine.*

B *The*

1 We use *the* before a single, countable nouns that we have mentioned before.

We have ***a*** *lecture at 2pm. It's* ***the*** *one about GM food.*
I work for ***an*** *animal charity.* ***The*** *charity helps to protect elephants.*

2 We use *the* before uncountable nouns or plural nouns that refer to a specific thing. In this situation, the two people speaking have a shared knowledge of the thing. Compare:

You will hear ***a*** *talk about climate change.*
(= The listener does not know about the talk. It is new information).
Before you hear ***the*** *talk, you have some time to read the questions.*
(= The listener knows about the talk. The new information is time to read the questions).

C Zero article (–)

1 We use zero article (no article) before uncountable and abstract nouns when we are talking about something in general/not specific.

Research *is necessary to protect* ***wildlife****.*
(research and wildlife in general)
The ***research*** *can help us to understand the* ***wildlife*** *at the zoo better.*
(specific research/wildlife)

2 We use zero article before plural countable nouns when we make a generalisation.

Aye ayes *are unknown to many people.*
Zoos *have been popular for 150 years.*

3 We use zero article before countries, cities, towns, continents, languages and names.

Bella *studied at university in* ***Ho Chi Minh City*** *in* ***Vietnam*** *in* ***South East Asia****.*

Note: We use *the* before a small number of countries including ***the*** *USA,* ***the*** *UK* and ***the*** *UAE.*

D Countable/Uncountable nouns

1 Countable nouns are nouns which have both a singular form and a plural form, e.g. *animal/animals, plant/plants.* A singular countable noun is followed by a singular verb. A plural countable noun is followed by a plural verb.

This plant is *very rare.*
Plants are *necessary for life.*

2 Uncountable nouns are nouns which do not have a plural form, e.g. *rain, pollution.* An uncountable noun is always followed by a singular verb.

Water does *not fall in some parts of the desert.*
Air pollution causes *breathing problems for some people.*

Module 7

Zero and first conditional (page 109)

A Zero conditional

We use the zero conditional to talk about rules, things that are true or things that always happen.
If/When + subject + present simple, subject + present simple (main clause)

If you go *to China,* ***you need*** *a visa.*
People often experience *difficulties* ***when they travel****.*

B First conditional

We use the first conditional to talk about things that might happen in the future, i.e. future possibility.
If + subject + present simple, subject + *will* + infinitive (main clause)

If *I* ***have*** *time in the summer,* ***I'll go*** *to the coast.*
If *you* ***don't visit*** *the pyramids on your trip to Egypt,* ***you'll regret*** *it.*

C Punctuation in conditionals

Some conditionals need a comma. When the *if* clause comes in the first half of the sentence, we must use a comma (,) between the two clauses. When it comes in the second half, we do not need to use a comma.

If we hurry, we will be able to make the flight.
We will be able to make the flight if we hurry.

D Words to introduce conditionals

There are several words we can use instead of *if* but they often have limitations.

1 *When*

We use *when* to describe things that happen all the time. We use *when* in zero and first conditional sentences only.

The science class is better when we do practical work.
When scientists begin new projects, they usually have clear aims.

2 *Provided that*

We use *provided that* to stress that something will happen, only if another thing happens. We only use *provided that* with things that we want to happen. We use *provided that* in zero and first conditional sentences only.

If time runs out, the forest cannot be saved.
~~*Provided that time runs out, the forest cannot be saved.*~~ ✗
If the vote is positive, the new airport will be built.
Provided that the vote is positive, the new airport will be built. ✓

3 *Even if*

We use *even if* to emphasise that something will still be true if another thing happens. We use *even if* in any conditional form.

The area will benefit, even if only a few tourists come.
Even if we cut down on flights, air travel will cause pollution.

4 *Unless*

We use *unless* to mean 'if not'. However, *unless* is stronger than 'if not' and is often used to make a warning sound stronger. We use *unless* in zero and first conditionals only.

If we don't build more hotels, there will be nowhere for tourists to stay.
Unless we build more hotels, there will be nowhere for tourists to stay.

Complex noun phrases (page 112)

A Nouns and noun phrases

A noun is just one word:

The visitor was welcomed in the capital.
The tickets arrived on time.

A noun phrase is a word either with an article, an adjective before it, a relative clause after it, or a preposition + noun after it:

The foreign visitor was welcomed in the capital.
The office which gives out visas is near the main government building.
The number of people in the United States is increasing.

Note: Noun phrases do not contain main verbs. A noun phrase can be the subject or object of a sentence.

B Basic sentence order

The most common word order in an English sentence that is not a question or a command is usually:

subject *or* subject group	verb *or* verb group	object *or* object group	adverbs of manner	place	time
I	take	my phone	with me	on holiday	every year.
The number of people who travel abroad	has gone up		dramatically		since the start of the century.

C Subjects and subject groups

1 A subject is normally a noun, pronoun or noun phrase. It usually goes before the verb.

Dr Brown carried out the study.
There were a large number of differences.
The number of visitors from abroad increased in 2016.

2 We can make a subject longer by adding a relative clause or a phrase:

The journalists wanted answers.
(subject)
The journalists who worked for Time Magazine wanted answers.
(subject + defining relative clause)
The journalists from Time Magazine wanted answers.
(subject + preposition phrase)

D Objects and object groups

An object is normally a noun, pronoun or noun phrase. It usually goes after the verb in active sentences.

They looked at ***the building****.*
(object)
They looked at the building ***which was more than 200 years old****.*
(object + defining relative clause)
They looked at the building ***from their hotel window****.*
(object + preposition phrase)

E Adding more than one phrase or relative clause

Very long subject groups or objects groups are common in academic English. When noun phrases become very long, the phrases should follow the same order as full sentences (object, manner, place, time).

The man sang an ***English song****.*
The man sang an ***English song in a perfect accent at the concert last night****.*
(manner, place, time)
The scientist gave his opinion.
The scientist gave ***his opinion on the rise in air transport over the last 25 years****.*
(manner, place, time)

Module 8

The passive (page 125)

We use the passive when we want to make the action more important than the person who did the action, when the person is unknown or not important. Compare:

The farmer ***harvests*** *the crops in autumn.*
The crops ***are harvested*** *in autumn.*
The waiter ***removes*** *plates from the table.*
The plates ***are removed*** *from the table.*

A Present passive

1 We use *be* + past participle to express the present simple in the passive.

A machine ***is used*** *to clean the vegetables.*

2 We use *am/is/are being* + past participle to express the present continuous in the passive.

The potatoes ***are being checked to*** *make sure they meet quality standards.*

B Past passive

1 We use *was/were* + past participle to express the past simple in the passive.

The food ***was placed*** *on the counter.*

2 We use *was/were being* + past participle to express the past continuous in the passive.

The accident happened when the barbecue ***was being*** *lit.*

C Future passive

1 We use *will be* + past participle to express the future passive with *will.*

Food crops ***will be destroyed*** *if the storm hits the south.*

2 We use *am/is/are going to be* + past participle to express the future passive with *going to.*

The crops ***are going to be harvested*** *soon.*

D Modals verbs and the passive

The passive can be used with modals: modal verb + *be* + past participle.

Bread ***can be made*** *with a variety of crop types.*
Corn crops ***may be harvested*** *early if the fine weather continues.*

E Subject and verb agreement

1 We use singular verbs with:

Singular nouns and uncountable nouns
everyone, everybody, every
someone, somebody, some
no one, nobody, no
each
either
The amount of
An/The increase

More and more ***fast food is*** *being eaten these days.*
There has been an increase in ***the amount of*** *water which* ***is*** *being used.*

2 We use plural verbs with:

Countable plural nouns
None
All
Neither
A/The number of

None of them are *good enough to eat.*
Neither of them provide *an effective solution.*
A number of homes have *been cut off from the water supply.*

3 We can use singular and plural verbs with collective nouns such as *a group, a team, a family, a company.* If we use a singular verb, we are focusing on the group. If we use a plural verb, we imagine the people that belong to the group.

My family has *been given a new home./****My family have*** *been given a new home.*
A team of farmers has *been rewarded for their good food./****A team of farmers have*** *been rewarded for their hard work.*

Review of formal structures (page 128)

When we write in academic English, we use more formal language. This language includes more formal structures such as the passive, complex sentences and *that* clauses.

A The passive

We can use the passive when we want to focus on the action and not the person or thing that did/caused the action.

The goods ***are shipped*** *to the other side of the world. (by the shipping company)*
The fish ***are taken*** *from the sea in a net. (by a fisherman)*

See above for more information on the passive.

B Complex sentences

A complex sentence is a sentence with two clauses. One of those clauses is independent, which means that it makes sense on its own without the other clause. The second clause is a dependent clause, which means that without the other clause, it makes no sense. Remember that a clause is a part of a sentence with a subject and verb.

Although they were planted, the weather caused the crops to die.

Although they were planted is the dependent clause because it makes no sense on its own.
The weather caused the crops to die is the independent clause because it makes sense on its own.

1 We can create complex sentences with conjunctions such as *if, unless, although, while, when, even though, as* and *because.*

Because *the drought lasted so long, crops were damaged.*
While *the rain fell, the farmers tried to harvest the crops.*
Unless *food prices go down, this year's profit should be high.*

See page 178 for more information about *if* sentences and conditionals.

2 We can create complex sentences with relative clauses or participle clauses.

People who grow their own vegetables *are increasing in number.*
Those people growing their own food *are less dependent on others.*

See page 174 for more information about relative clauses and page 177 for more information about participle clauses.

C *that* clauses

A *that* clause is often used in academic writing. Verbs in a *that* clause include *believe, think, agree, state, conclude.*

I believe that *people should do more to fight the problem of hunger.*
It is agreed that *convenience food is affecting our health.*
It can be concluded *that cholesterol is both good and bad.*

In academic English we usually include *that* in the sentence even though we can leave it out and often do when we speak.

Module 9

Modals of obligation (page 141)

A Present obligation

1 We use *has/have to* + infinitive to talk about an obligation that exists because of a decision made by another person.

I ***have to stop*** *eating so much sugar.*
(My dietician told me.)
She ***has to finish*** *the report before tomorrow.*
(Her supervisor told her.)

2 We use *must* + infinitive to talk about an obligation that we think is necessary.

I ***must send*** *this invitation out today.*
(Because the event is next week.)
Children ***must spend*** *more time doing sport.*
(Because I think it is important for their health.)

3 We use *don't have to/don't need to* + infinitive to say there is no obligation.

You ***don't have to exercise*** *every day, usually three times a week is fine.*

4 We use *mustn't* + infinitive to say that something is not permitted.

You ***mustn't copy*** *material from the internet for your end-of-term paper.*

5 We use *should* + infinitive to talk about mild obligation. This is advice rather than a strong obligation.

He ***should speak*** *to his tutor if he has a problem.*

6 We use *need to* + infinitive to say something is necessary.

He ***needs to give*** *his work in by the end of the day.*

7 We use *can* + infinitive to say something is possible.

He ***can leave*** *now, if he wants.*

B Past obligation

1 We use *had to* + infinitive to talk about an obligation in the past. This is the past form of both *have to* and *must*.

I **had to stay up** *late last night to prepare for the meeting.*

2 We use *didn't have to* + infinitive to say there was no past obligation.

We **didn't have to give back** *the question paper after the test.*

C Future obligation

1 We use *will have to* + infinitive to talk about future obligation.

The company **will have to reduce** *their costs next year.*

2 We use *won't have to* + infinitive to say there is no future obligation.

Science students **won't have to attend** *the language class.*

D Other expressions of obligation

There are other ways of expressing obligation that might be tested. Here are some common phrases.

1 *make something possible*

The large donation **made** *the new health centre* **possible**.

2 *permit*

Scientists were not permitted to work on the new cure.

3 *be necessary*

It **became necessary** *to change the way people ate.*

4 *be prohibited*

Travelling without a vaccination **is prohibited**.

Passive and active voice (page 144)

A Passive voice

1 We use the passive when the action is done to the subject of the verb.

The drug **was invented** *in the 1930s.*
The patient **was given** *antibiotics.*
The meat **was tested** *for bacteria.*

2 We use the passive when we wish to focus on an event that is more important than who or what causes it to happen.

The origins of the gene **will probably never be known**.
Thousands of medicines **are tested** *every year.*

B Active voice

1 We use the active when the subject of the verb is the person or thing doing the action.

Alexander Fleming **identified** *the bacteria.*
Professor Liu **was studying** *bacteria in meat.*

2 Some verbs can only be used in the active form because they are intransitive, and cannot be followed by an object. Common intransitive verbs are: *appear, arrive, become, come, consist, cry, disappear, fall, go up, go down, happen, occur, remain, rise, work.*

The number of people who do no exercise at all **has increased**.
The popularity of regular exercise **has fallen**.

Module 10

Quantifiers (page 157)

A *Many, much, a lot of, some, any, (a) few, (a) little, a large number/amount of, plenty of*

1 With countable nouns, we can use *some, any, many, a few, few, a lot of, a large number of, plenty of*. We use *some, many, a few, few, a lot of, a large number of* and *plenty of* with positive verbs. We use *any, many* and *a lot of* with negative verbs.

Sports events, concerts and festivals are just **a few** *examples of events held in local communities.*
There aren't **many** *concerts held in this area.*
There are **plenty of** *things to do in the town.*

2 With uncountable nouns, we can use *some, any, much, a little, little, a lot of, a large amount of, plenty of*. We use *some, a little, little, a lot of, a large amount of* and *plenty of* with positive verbs. We use *any, much* and *a lot of* with negative verbs.

There's **little** *crime in this area which means the police don't have* **much** *work to do.*
People spend **a large amount of** *time helping others in this neighbourhood.*
There is **plenty of** *evidence that the park has been a success.*

3 In academic and formal written English both *many* and *much* are used in positive sentences, but in everyday spoken English *a lot of* or *lots of* is more likely to be used, especially to replace *much*.

Many *researchers suggest that the data is accurate.* (academic)
Lots of *researchers suggest the data's accurate.* (everyday spoken English)
There is **much** *evidence to support the argument.* (academic)
There's **a lot of** *evidence to support the argument.* (everyday spoken English)

B *Few* or *a few/little* or *a little*

We use *a few* and *a little* when we want to say that there is a small number or amount. It is neither positive nor negative. We use *few* and *little* when we want to say that there is not enough of something. Here the meaning is negative.

There are ***a few people*** *waiting outside.*
(There is a small number of people.)
Few people *are waiting outside.*
(There are not enough people.)
We have ***a little time*** *to organise the event.*
(There is a small amount of time.)
We have ***little time*** *to organise the event.*
(There is not enough time.)

C *Too, enough*

1 We use *too many/too much* when we want to say that there is more than we want. We use *too many* with countable nouns and *too much* with uncountable nouns.

There are ***too many risks*** *involved in this project.*
Too much work *can be bad for you.*

2 We use *too few/too little/not enough* when we want to say that there is less than we want. We use *too few* with countable nouns and *too little* with uncountable nouns. We use *not enough* with both countable and uncountable nouns.

Too few people *help others in their community.*
Not enough people *volunteered to help out with the event.*
Too little *attention is spent on building friendships.*
*There is****n't enough time*** *to find a solution to the problem.*

Second conditional (page 160)

A Use and form

We use the second conditional to talk about the result of situations that are unreal, unlikely or imaginary in the mind of the speaker.
If + subject + past simple, subject + *would* + infinitive (main clause)

If I lived *abroad,* ***I would try*** *hard to learn the local language.*
(Unlikely. I will not live abroad.)
If I were younger, I'd get *more involved in my community.*
(Unreal. I'm not younger.)
If everyone took *more* ***care*** *over their litter,* ***the town would look*** *much better.*
(Imagined. People don't take care over their litter.)

B *Was/ Were*

We can use both *was/were* in the first person. *Were* is more formal and therefore appropriate in written academic English. *Was* is more acceptable in spoken English or less formal written English.

If I ***were*** *setting up a business here, I'd insist on a faster internet connection.*
If I ***was*** *able to learn another language, I'd learn Arabic.*

C Clause order and punctuation

We can start a second conditional sentence with the *if* clause or with the main clause without changing the meaning. When the *if* clause comes in the first half of the sentence, we must use a comma (,) between the two clauses. When it comes in the second half, we don't need to use a comma.

If *everyone followed the rules, life would be much easier.*
Life would be much easier ***if*** *everyone followed the rules.*

Speaking assessment criteria

Band	Fluency and coherence	Lexical resource	Grammatical range and accuracy	Pronunciation
9	• speaks fluently with only rare repetition or self-correction; any hesitation is content related rather than to find words or grammar • speaks coherently with fully appropriate cohesive features • develops topics fully and appropriately	• uses vocabulary with full flexibility and precision in all topics • uses idiomatic language naturally and accurately	• uses a full range of structures naturally and appropriately • produces consistently accurate structures apart from 'slips' characteristic of native speaker speech	• uses a full range of pronunciation features with precision and subtlety • sustains flexible use of features throughout • is effortless to understand
8	• speaks fluently with only occasional repetition or self-correction; hesitation is usually content-related and only rarely to search for language • develops topics coherently and appropriately	• uses a wide vocabulary resource readily and flexibly to convey precise meaning • uses less common and idiomatic vocabulary skilfully, with occasional inaccuracies • uses paraphrase effectively as required	• uses a wide range of structures flexibly • produces a majority of error-free sentences with only very occasional inappropriacies or basic/non-systematic errors	• uses a wide range of pronunciation features • sustains flexible use of features, with only occasional lapses • is easy to understand throughout; L1 accent has minimal effect on intelligibility
7	• speaks at length without noticeable effort or loss of coherence • may demonstrate language-related hesitation at times, or some repetition and/or self-correction • uses a range of connectives and discourse markers with some flexibility	• uses vocabulary resource flexibly to discuss a variety of topics • uses some less common and idiomatic vocabulary and shows some awareness of style and collocation, with some inappropriate choices • uses paraphrase effectively	• uses a range of complex structures with some flexibility • frequently produces error-free sentences, though some grammatical mistakes persist	• shows all the positive features of Band 6 and some, but not all, of the positive features of Band 8
6	• is willing to speak at length, though may lose coherence at times due to occasional repetition, self-correction or hesitation • uses a range of connectives and discourse markers but not always appropriately	• has a wide enough vocabulary to discuss topics at length and make meaning clear in spite of inappropriacies • generally paraphrases successfully	• uses a mix of simple and complex structures, but with limited flexibility • may make frequent mistakes with complex structures, though these rarely cause comprehension problems	• uses a range of pronunciation features with mixed control • shows some effective use of features but this is not sustained • can generally be understood throughout, though mispronunciation of individual words or sounds reduces clarity at times
5	• usually maintains flow of speech but uses repetition, self-correction and/or slow speech to keep going • may over-use certain connectives and discourse markers • produces simple speech fluently, but more complex communication causes fluency problems	• manages to talk about familiar and unfamiliar topics but uses vocabulary with limited flexibility • attempts to use paraphrase but with mixed success	• produces basic sentence forms with reasonable accuracy • uses a limited range of more complex structures, but these usually contain errors and may cause some comprehension problems	• shows all the positive features of Band 4 and some, but not all, of the positive features of Band 6
4	• cannot respond without noticeable pauses and may speak slowly, with frequent repetition and self-correction • links basic sentences but with repetitious use of simple connectives and some breakdowns in coherence	• is able to talk about familiar topics but can only convey basic meaning on unfamiliar topics and makes frequent errors in word choice • rarely attempts paraphrase	• produces basic sentence forms and some correct simple sentences but subordinate structures are rare • errors are frequent and may lead to misunderstanding	• uses a limited range of pronunciation features • attempts to control features but lapses are frequent • mispronunciations are frequent and cause some difficulty for the listener
3	• speaks with long pauses • has limited ability to link simple sentences • gives only simple responses and is frequently unable to convey basic message	• uses simple vocabulary to convey personal information • has insufficient vocabulary for less familiar topics	• attempts basic sentence forms but with limited success, or relies on apparently memorised utterances • makes numerous errors except in memorised expressions	• shows some of the features of Band 2 and some, but not all, of the positive features of Band 4
2	• pauses lengthily before most words • little communication possible	• only produces isolated words or memorised utterances	• cannot produce basic sentence forms	• speech is often unintelligible
1	• no communication possible • no rateable language			
0	• does not attend

Test 1 (Part 1)

Before you watch

1a Work in pairs and look at the questions below. Predict what the examiner will say.

IELTS Speaking Part 1 – FAQs

1 How many questions will I need to answer?
2 How long should I speak for each question?
3 Is it better to give long answers in Part 1?
4 What should I do if I don't understand a question?
5 Can I practise the questions beforehand?
6 Why did the examiner stop me?
7 Is Part 1 assessed?

b 1.1 Listen to the examiner and check.

While you watch

2a You are going to watch a student, Nazli, doing Part 1 of the Speaking Test. Match the phrases 1–5 with the most likely topic, childhood (C) and daily routines (DR).

1 I spent time with my friends. _____
2 I have to take responsibility for my life. _____
3 There are lots of green areas. _____
4 We enjoyed getting together. _____
5 I detest getting up very early. _____

b 1.2 Watch and check your answers. Underline the key words Nazli used in these phrases that help her score for her use of vocabulary.

3 1.3 Watch the examiner talking about Nazli's performance. What does the examiner say about the questions (1–4)?

1 Does she have the right speed?
2 Does she answer all the questions correctly?
3 Does she expand ideas?
4 Does she use a good range of language to answer each question?

After you watch

4 Look at the phrases Nazli used immediately after the question was asked.

1 Where does she rephrase the question?
2 Where does she give a clear, positive response?
3 Why are these ways of answering useful?

E: Do you think there are fewer trees in your city compared to when you were younger?
N: 1 Yes, there are lots of parks in my area.

E: Do you think we should do more to protect the natural environment?
N: 2 Yes, we should take steps to protect the environment.

5 Match the Part 1 questions (1–7) with the responses (A–D). You can use the letters more than once.

Part 1

Now, let's talk about your childhood.

1 When you were a child, did you enjoy playing outside?
2 How has the environment changed in your city since you were younger?
3 Do you think there are fewer trees in your city compared to when you were younger?
4 Do you think we should do more to protect the natural environment?

Tell me about your routines.

5 Do you have a daily routine?
6 Is there anything you DISLIKE about having a daily routine?
7 Do you think that habits are a good thing or a bad thing?

A I think that the benefits are more obvious than the disadvantages, but let me think ...
B Yes, of course, I think all children love to be out in the fresh air, don't they?
C That's a hard one, because I was a bit too young to really remember a lot about that time.
D Yes, I do. I think most people do.

6 Match the Part 1 questions in Exercise 5 to the language (A–F). Give one or two examples.

A Comparatives, past tenses and present tenses, adjectives of description.
B Language of recommendation and language of reason.
C Negatives and reasons.
D Comparatives, past tenses and present tenses, language of quantity.
E Present simple tenses, and possibly language of reason.
F Past tenses.

Test 1 (Part 2)

Before you watch

1 1.4 Write any questions you have about Part 2 of the IELTS Speaking Test, then watch the examiner answer some frequently asked questions. Did she answer your questions?

While you watch

2a You are going to watch Nazli doing Part 2. Look at the task card and Nazli's notes below.

1 What does Nazli decide to describe?
2 Which part of the task does each box (A–D) in Nazli's notes refer to?

Part 2

Describe something that you borrowed.
You should say:
what you borrowed
who you borrowed it from
how you used the object
and explain why you borrowed the object.

A _____ *book* *pay £5*	B _____ *library*
C *explain why you borrowed it* *improve reading skills*	D _____ *read it outside*

b 1.5 Watch Nazli make her notes. Then make notes for yourself in the one-minute limit.

3 1.6 Watch Nazli answering the Part 2 test questions. Tick the ordering phrases that she uses.

Introducing ideas
If I had to choose one thing, I'd select a book.
The book was useful for me in several ways.
Giving reasons
I borrowed it because ...
Sometimes I prefer to borrow than buy because ...
Giving additional information
By the way, it's ...
Summing up
So, those are the main reasons why ...

4 1.7 Watch the examiner talking about Nazli's performance. What does the examiner say about:

1 her preparation?
2 how she structures her talk?

After you watch

5 Complete the description with the connectors and phrases below.

as a result of borrowing this book did I mention that
sorry, I don't mean so that that way this book

I borrowed 1 _____ six months ago from our school's library. It was a novel about romantic, 2 _____ romantic, it was a dramatic novel. The library gave me this book 3 _____ I could improve my English skills. By the way, 4 _____ it's an English book? 5 _____ , I improved my skills. Also I read this book outside, because it was more enjoyable 6 _____ .

6a Look back at your own notes in Exercise 2b. Did you include some of these things?

- adjectives of description
- a suggestion of what tenses to use
- connectors to organise the ideas
- examples of less common vocabulary
- a clear reason why you borrowed the item

b Imagine you had decided to describe borrowing a film instead. Where could you add the vocabulary below to the notes?

7 Work in pairs and take turns to practice completing the Part 2 Speaking Test in Exercise 2a. If possible, time yourself and record your performance so that you can listen back to it.

often rent/share → cheaper than buying
a friend lent it
comedy – starred my favourite action hero
got together + bunch of friends + snacks + caught up on the gossip

Test 1 (Part 3)

Before you watch

1 Look at the list (1–4). Which of these things do you need to do in Part 3 of the Speaking Test?

1 describe your own life
2 describe everyday things around you
3 offer an opinion on current events
4 justify opinions in an academic way

2 Look at that the list of frequently asked questions for Part 3. Can you answer any of them?

IELTS Speaking Part 4 – FAQs

1 Is Part 3 a discussion?
2 Why are the questions more difficult in Part 3?
3 What if I don't understand the question?
4 What if I can't think of anything to say?

While you watch

3 1.8 Watch the examiner answering the questions in Exercise 2 and check your answers.

4 1.9 You are going to watch Nazli doing Part 3. Read the questions (1–6) and then choose the view that Nazli expresses for each question.

Part 3

Borrowing/Owning objects

1 Why do people borrow objects rather than buy them?
2 What are the benefits and drawbacks of sharing items?
3 Do you think people will share things more in the future?

Public ownership/Private ownership

4 What kind of buildings are publicly owned?
5 What are the advantages and disadvantages of keeping objects in public ownership?
6 Would you rather work for a privately owned company or for the government?

1 *It's better for the environment. / It's better economically.*
2 *People may not look after things properly. / People may keep things that don't belong to them.*
3 *Sharing will increase. / People will prefer to own things.*
4 *libraries and government buildings / parks and public places.*
5 *We need to protect places for future generations. / It's important to provide spaces for young people.*
6 *You get special financial benefits working for the government. / You have better access to certain services when the government owns them.*

5 1.10 What do you think Nazli did well? Tick the areas Nazli could improve on, then watch the examiner's feedback and check your answers.

Using phrases to buy time
Offering reasons for her opinions
Giving examples to illustrate opinions
Answering all the questions
Self-correction
Using complex sentences

After you watch

6a Match the words in italics (1–5) with the ideas (A–E).

1 Borrowing rather than buying lets you *save money*.
2 It's quite good to read a *second-hand* book.
3 People might *damage* things that they borrow.
4 Kids spend too much time *playing computer games indoors*.
5 Paying to enter public places *isn't beneficial for humanity*.

A It's a good habit to *pass a good book on* to friends so that they can enjoy it too.
B I think it's good to *avoid spending* whenever you can.
C There should be places that are *accessible to the poor*.
D They need to have *space in the fresh air* to *get away from screens* all the time.
E It would be *a shame* if you didn't *get your property back in the state you lent it* out.

b Work in pairs and practise reading one of the sentences (1–5). Use your own ideas and a follow-up statement.

7 Work in pairs and look at the Part 3 questions in Exercise 4. Take turns to play the role of Students A and B.

Student A – ask a question.
Student B – say the first thing that comes into your head.
Student A – try to keep Student B talking. Ask him/her for more details, examples, reasons or the opposite opinion.

8 What three tips would you give another student answering Speaking Part 3?

Expert speaking Test 2

Test 2 (Part 1)

Before you watch

1a You are going to watch Marine complete an IELTS Speaking Test. What four things will the examiner listen for during the test?

b The examiner is going to ask questions about books and neighbours. Complete each question with the words in the box.

advantages fewer move neighbours pleasure sort

1 How well do you know your _____ ?
2 How often do you read for _____ ?
3 What are the _____ of reading books?
4 What _____ of neighbour are you?
5 Do you think people read _____ books these days?
6 Should you find out about the neighbours before you _____ into a new home?

While you watch

2a 2.1 Watch Marine complete Part 1 of the Speaking Test. Number the questions in Exercise 1b in the order the examiner asks them.

b 2.1 Watch Part 1 of the test again and assess Marine's fluency and coherence by answering these questions:

1 Does the speaker extend her answers without repeating, hesitating or self-correcting a lot?
2 Does the speaker link her ideas using connectors appropriately?
3 Which question does Marine answer incorrectly? How might this impact on her score?

c 2.2 Watch Marine answer the first three questions again. Complete the sentences with the word(s) you hear. How do these words help Marine to achieve a Band 6?

1 _____ , reading is a huge part of my life, to be _____ , (be)cause I read for pleasure _____ mostly I read for my work (be)cause I'm a writer _____ I need to be informed about different subjects ...
2 Nowadays, I think unfortunately, people read more articles on the internet than books _____ some people, like _____ old people, prefer to have contact with an object.
3 It's a _____ . There is the advantage to, like I _____ said, have a real object.

d 2.3 Listen to the examiner's assessment and answer the questions.

1 What does she say about Marine's *fluency and coherence*?
2 What does she say about her *lexical resource, grammar range and accuracy* and *pronunciation.*

3 Why does the examiner refer to these examples of things Marina said?

Like I previously said unfortunately retake the book huge

After you watch

4a Look at Marine's answer about how well she knows her neighbours. The words and phrases for linking ideas have been taken out. Add some of the words in the box to a logical place to link the ideas. Make any other necessary changes.

although and because because of this having said that however so which unfortunately

'I live in a big building in Paris. It's a big city. People there are really stressed. They are always busy. I don't really know my neighbours. I have one neighbour on my floor that I know. I invite her to come to my shows and stuff. She's really nice.'

b Work in pairs and take turns to read out your answer in Exercise 3a. Does your partner link the ideas well?

5a Work in pairs and take turns to ask and answer the questions in Exercise 1b. Speak for 4–5 minutes. Evaluate your or your partner's fluency and coherence using questions 1 and 2 in Exercise 2b.

b What is the best way to improve your fluency and/or coherence?

Test 2 (Part 2)

Before you watch

1a You are going to watch Marine complete Part 2 of the Speaking Test. What will the examiner listen for when she assesses Marine's *lexical resource*? Choose four from the options (1–6) below.

1 Correct pronunciation of sounds
2 Range of vocabulary
3 Clear meaning
4 Appropriacy of the vocabulary
5 Correct word stress
6 Ability to paraphrase

b Read the Part 2 task and take notes. You have 1 minute.

Part 2

Describe a photograph that is special to you.
You should say:
where it was taken
when it was taken
what is in the photo
and explain why it is special to you.

While you watch

2 2.4 Watch how Marine takes notes. How effective do you think her method is compared to yours?

3a 2.5 Watch Marine complete the test task and assess her *lexical resource* by answering these questions:

1 Does the speaker have a good enough vocabulary to do the task?
2 Is the speaker's meaning clear when he/she does the task?
3 Does the speaker paraphrase when he/she doesn't know a word?

b 2.6 Watch part of Marine's description again. Complete each sentence with the word(s) you hear. How do these words help her to achieve a Band 6?

1 This picture is really special because it speaks about the _____ I have with my brother and I'm really _____ to him.
2 We had some hard times, for example the _____ of my parents during my _____ .
3 This picture for me _____ something really special, really safe.

c 2.7 Watch the examiner's assessment and answer the questions.

1 What does she say about Marine's *lexical resource*?
2 What does she say about her *fluency and coherence*, *grammar range and accuracy* and *pronunciation*?
3 What does the examiner say about the language below?

protection
He's the first person I want to announce my joy
so
We had some hard times, for example the separation of my parents
hat

After you watch

4a Look at more parts of Marine's description. Improve her use of vocabulary by changing the underlined sections. You may need to guess what Marine meant.

'I was four in this picture and my brother was like a really, really little baby and we have two hats and I'm really near here and it's something happy. There is an atmosphere in this picture. I have this picture in my phone, like, every time.'

'This picture for me, like, reflects something really special, really safe, you know. It's a kind of protection between my brother and I. Our relationship is beautiful and when I have a problem I speak to him and he's the first person I want to announce my joys.'

b Work in pairs and compare your ideas.

5a With your partner, take turns to do the Part 2 task in Exercise 1b. Use your notes to help you. Speak for 1–2 minutes. Evaluate your or your partner's lexical resource using the questions in Exercise 3a.

b How can you improve your use of vocabulary? Look at the ideas below and add at least two ideas of your own. Which could help you the most? Share your ideas with your partner.

Memorise new words/phrases each day.
Use flashcards to test your memory of vocabulary.
Read more and notice new vocabulary.

Test 2 (Part 3)

Before you watch

1a You are going to watch Marine complete Part 3 of the IELTS Speaking Test. What will the examiner listen for when she assesses Marine's *grammar range and accuracy* and *pronunciation*?

b The examiner is going to ask Marine some of the questions below. Note down at least ten words or phrases you expect Marine to use when talking about the two topics.

Part 3

Photographs

Why do you think people take photographs?

Why do some people share photographs online?

Do you think people take too many photos these days? Why do you think that is?

Do you think there are any other disadvantages of putting photographs on social media?

Privacy

What are some occasions when a person's privacy is invaded?

Do you think famous people have a right to privacy?

What are the benefits of having CCTV cameras in public places? What are the disadvantages?

While you watch

2 2.8 Watch Marine complete Part 3 of the Speaking Test. How many of your words/phrases from Exercise 1 does she use to answer the questions?

3a Look at two extracts from Marine's test. Underline one example of the first conditional, the second conditional, a modal verb and a relative clause. How do these help Marine achieve a 6.0?

'In my country there is a tradition, for example for weddings, where you would probably have a professional photographer and it could be the case for your birth too.'

'I think when you're famous, most of the time, unless you're a murderer or something like that, you choose in a sense to do work which will probably make you famous.'

b Look at another extract from Marine's test. Correct four mistakes that Marine makes. What particular grammar point does she need to improve?

'There is lots of advantages and disadvantages to put too much pictures on social medias.'

c 2.9 Mark the word stress on the words below. Then watch Marine answering questions again. Which four words does she pronounce incorrectly?

1 photographs
2 photographer
3 selfies
4 addictive
5 intention
6 interesting

4a 2.8 Watch Marine again and assess her *grammar range and accuracy*, as well as her *pronunciation*. Answer these questions:

1 Does the speaker produce simple sentences accurately?
2 Does the speaker produce more complex sentences? Are these accurate?
3 Does the speaker pronounce words correctly?
4 Can the listener understand the speaker?

b 2.10 Listen to the examiner's assessment of Part 3. What does she say about Marine's:

grammar range?
accuracy and pronunciation?
fluency and coherence?
lexical resource?

After you watch

5a Work in pairs. Take turns to say the words in Exercise 3c with the correct word stress. Then practise saying the words/phrases you noted down in Exercise 1b with the correct word stress.

b Work in pairs. Take turns to do the Part 3 task in Exercise 1b. Speak for 4–5 minutes. Evaluate your or your partner's use of grammar and pronunciation using the questions in Exercise 4a.

c What grammar area(s) do you most need to work on? How can you do this?

Writing assessment criteria

TASK 1

Band	Task achievement	Coherence and cohesion	Lexical resource	Grammatical range and accuracy
7	• covers the requirements of the task • (Academic) presents a clear overview of main trends, differences or stages • (General Training) presents a clear purpose, with the tone consistent and appropriate • clearly presents and highlights key features/bullet points but could be more fully extended	• logically organises information and ideas; there is clear progression throughout • uses a range of cohesive devices appropriately although there may be some under-/over-use	• uses a sufficient range of vocabulary to allow some flexibility and precision • uses less common lexical items with some awareness of style and collocation • may produce occasional errors in word choice, spelling and/or word formation	• uses a variety of complex structures • produces frequent error-free sentences • has good control of grammar and punctuation but may make a few errors
6	• addresses the requirements of the task • (Academic) presents an overview with information appropriately selected • (General Training) presents a purpose that is generally clear; there may be inconsistencies in tone • presents and adequately highlights key features/bullet points but details may be irrelevant, inappropriate or inaccurate	• arranges information and ideas coherently and there is a clear overall progression • uses cohesive devices effectively, but cohesion within and/or between sentences may be faulty or mechanical • may not always use referencing clearly or appropriately	• uses an adequate range of vocabulary for the task • attempts to use less common vocabulary but with some inaccuracy • makes some errors in spelling and/or word formation, but they do not impede communication	• uses a mix of simple and complex sentence forms • makes some errors in grammar and punctuation but they rarely reduce communication
5	• generally addresses the task; the format may be inappropriate in places • (Academic) recounts detail mechanically with no clear overview; there may be no data to support the description • (General Training) may present a purpose for the letter that is unclear at times; the tone may be variable and sometimes inappropriate • presents, but inadequately covers, key features/bullet points; there may be a tendency to focus on detail	• presents information with some organisation but there may be a lack of overall progression • makes inadequate, inaccurate or over-use of cohesive devices • may be repetitive because of lack of referencing and substitution	• uses a limited range of vocabulary, but this is minimally adequate for the task • may make noticeable errors in spelling and/or word formation that may cause some difficulty for the reader	• uses only a limited range of structures • attempts complex sentences but these tend to be less accurate than simple sentences • may make frequent grammatical errors and punctuation may be faulty; errors can cause some difficulty for the reader

TASK 2

Band	Task response	Coherence and cohesion	Lexical resource	Grammatical range and accuracy
7	• addresses all parts of the task • presents a clear position throughout the response • presents, extends and supports main ideas, but there may be a tendency to overgeneralise and/or supporting ideas may lack focus	• logically organises information and ideas; there is clear progression throughout • uses a range of cohesive devices appropriately although there may be some under-/over-use • presents a clear central topic within each paragraph	• uses a sufficient range of vocabulary to allow some flexibility and precision • uses less common lexical items with some awareness of style and collocation • may produce occasional errors in word choice, spelling and/or word formation	• uses a variety of complex structures • produces frequent error-free sentences • has good control of grammar and punctuation but may make a few errors
6	• addresses all parts of the task although some parts may be more fully covered than others • presents a relevant position although the conclusions may become unclear or repetitive • presents relevant main ideas but some may be inadequately developed/unclear	• arranges information and ideas coherently and there is a clear overall progression • uses cohesive devices effectively, but cohesion within and/or between sentences may be faulty or mechanical • may not always use referencing clearly or appropriately • uses paragraphing, but not always logically	• uses an adequate range of vocabulary for the task • attempts to use less common vocabulary but with some inaccuracy • makes some errors in spelling and/or word formation, but they do not impede communication	• uses a mix of simple and complex sentence forms • makes some errors in grammar and punctuation but they rarely reduce communication
5	• addresses the task only partially; the format may be inappropriate in places • expresses a position but the development is not always clear and there may be no conclusions drawn • presents some main ideas but these are limited and not sufficiently developed; there may be irrelevant detail	• presents information with some organisation but there may be a lack of overall progression • makes inadequate, inaccurate or over use of cohesive devices • may be repetitive because of lack of referencing and substitution • may not write in paragraphs, or paragraphing may be inadequate	• uses a limited range of vocabulary, but this is minimally adequate for the task • may make noticeable errors in spelling and/or word formation that may cause some difficulty for the reader	• uses only a limited range of structures • attempts complex sentences but these tend to be less accurate than simple sentences • may make frequent grammatical errors and punctuation may be faulty; errors can cause some difficulty for the reader

Reproduced with permission of Cambridge English Language Assessment ©UCLES 2017

Module 1

Task 1: Describe a chart

Task

The table below shows the wages of fast food workers between 2010 and 2012.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

Pay attention to the labels so that you know what you need to compare.

Percentage of fast food workers on different pay rates 2010–2012

	Age 16–19	Age 20+
$7.25 or less	13.2	11.1
$7.26 – $10.09	70.4	68.0
$10.10 – $11.99	8.7	10.5
$12.00+	7.8	10

Look at the general trends, such as the most common wage, as well as slight differences in the age groups.

Model answer

Avoid using words from the original sentence in your introduction.

Avoid 'mechanical repetition' by organising ideas into main points.

Use specific numbers from the chart to illustrate your points.

The table shows the earnings of people employed in the fast food industry in the United States. We can see from the data that, in general, people under the age of 20 earn less than those over the age of 20.

The majority of people working in these restaurants in both age groups earn below $10 an hour. In both age groups, $7.26–$10.09 was the most common rate of pay. However, the numbers for those earning the lowest wage was slightly higher for the 16–19 age group than the 20+ age group, at 13.2% and 11.1% respectively. However, the average for both groups is somewhere around $7.26 and $10.09, with 70.4 percent of under 20s and 68 percent of over 20s in this group. Only a very small number of people in both age groups were able to earn over $12.00 an hour.

So, wages for teenagers in the fast food industry were generally lower than for older workers.

Write an overview sentence, summarising the results.

Write in paragraphs: an introduction, the main points, and a final summary sentence.

Module 2

Task 2: Opinion essay

Task

The statement of opinion.

You must say if you agree or disagree with the statement of opinion and give reasons in your essay.

Write about the following topic.

Some people believe that museums should be free to everyone and not charge an entry fee. To what extent do you agree?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

Model answer

Plan your essay before you start writing. Generate some ideas and then select the best. Organise your ideas into a paragraph plan.

Write two or three paragraphs which answer the essay task, i.e. reasons why you agree or disagree with the opinion.

Use phrases to introduce reasons and examples.

Include a conclusion that restates your opinion and reasons.

Start with an introduction. Paraphrase the question and state your opinion.

Use relative clauses where appropriate to make more complex sentences.

Use the language of opinion.

Re-read your essay. Check the ideas are organised well. Then, check your use of language and spelling.

Museums offer us the opportunity to learn about a variety of subject areas in more depth, such as history or nature. While it is possible to go to some museums for free, the majority of them require a visitor's fee. This essay will argue that all museums should be free to everyone.

One reason is that museums are an excellent source of education. They help us to understand our culture, and other people's culture, better by displaying objects from our past. For example, at the British Museum you can see objects from around the world which help us to understand world history. When museums charge people to enter, not everyone is able to pay and so fewer people have the opportunity to learn about that history.

Another reason is that when a museum charges, it only really affects people on lower incomes in society. Wealthier people will be able to afford to visit and as a result will become more educated. However, people on lower incomes will be less likely to afford a visit and will therefore not benefit from the museum in the same way. The effect of this is that not everyone has the same educational opportunities as others in our society.

In conclusion, I would suggest that free entry to museums allows everyone to learn about history and culture. However, for this to be possible, the government will have to provide funding for the museums. Without money from visitors or government funds, museums will not be able to find, buy, take care of or display historical objects.

Module 3

Task 1: Describe a chart

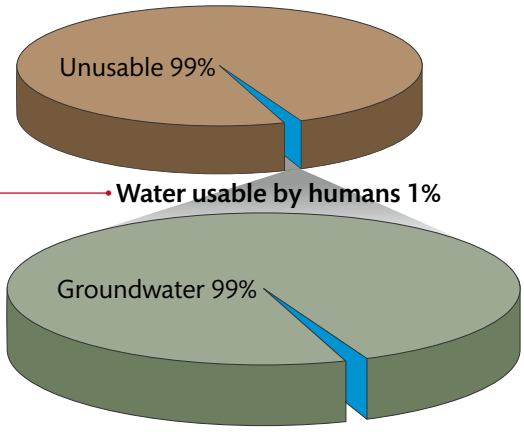
Task

The charts below give information about water availability and use in the agricultural industry.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

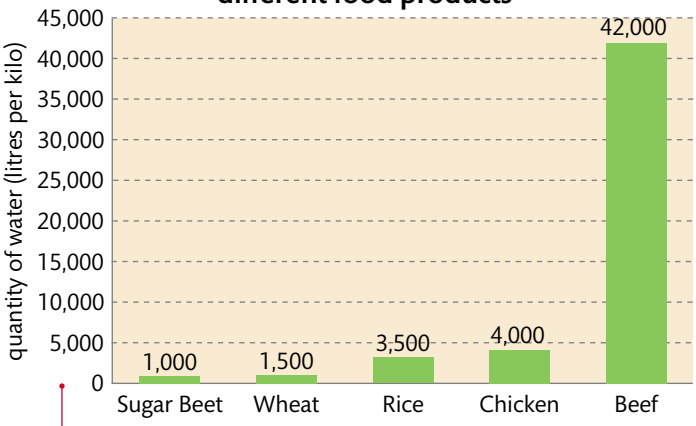
Write at least 150 words.

All water on Earth



Look for the connections between the charts.

Amount of water needed to produce one kilo of different food products



What are you measuring in the second chart?

Model answer

The pie chart and bar chart both illustrate water use. We can see from the chart that certain types of farming use less water than others.

The pie chart shows that only one percent of all the water on the planet can be used for human purposes, and the vast majority of that is in the form of groundwater. However, only one percent of that usable water can be found in rivers or lakes.

The bar chart shows that certain types of farming make more demands on the amount of water used than others. Generally, vegetable crops require lower amounts of water, around 1,000–2,000 litres of water for every kilo of food produced. Rice, however, uses about three times more, at around 3,000 litres for every kilo. The biggest difference in water consumption is in meat products. A kilo of beef needs ten times more water than a kilo of chicken, at 4,000 litres and 42,000 litres respectively.

So the charts show that food choices may impact water management.

Use paragraphs to show a clear overall progression.

Use connectors to organise ideas and show relations.

Use words like *that* to refer back to ideas.

Use *-ing* forms as nouns.

Use comparative forms to make relationships between ideas clear.

Module 4

Task 2: Opinion essay

Task

Opinion 1

Write about the following topic.

Technology has changed the way people communicate today. Some people believe this is making our relationships stronger while others believe it is harming them. Discuss both points of view and give your own opinion.

Opinion 2

You must give reasons for both statements and then give your opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

Model answer

Do NOT copy the information in the test task. Paraphrase it.

Technology has developed at a very fast rate in recent years. We are now able to communicate regularly with our friends and family using smart technology and social networking sites. While some people feel this can strengthen our relationships, others believe it has a more negative impact. This essay will discuss both these opinions.

State what the essay will say. Make sure it answers the test task.

Start paragraphs with a topic sentence to introduce the main point.

Technology allows us to maintain closer connections to our friends and family. For instance, we can send each other messages, make each other laugh and be there for each other in difficult times, even if we cannot physically be there. We no longer need to lose touch with old school friends or family members if we move away. The use of social media enables us to continue to share our lives.

Explain the main point in more detail and give examples where possible. Make sure all information is relevant.

Start a new paragraph to introduce the opposing viewpoint.

On the other hand, technology can also stop us from giving our full attention to the people we are with. Many of us check our messages regularly so we do not miss out on a piece of news. The result is that we stop listening to our friends or family in the same room as us because we are reading something else. When we ignore those people, our connections with them might become weaker and our relationships could suffer.

Give your opinion in the conclusion, summarising the reasons.

In my opinion, technology offers us fantastic opportunities for building relationships with the people we love because we maintain our connections. However, some people use it too much which means they do not spend enough time building face-to-face relationships. I therefore believe we should put our technology away when we are talking to our friends or family.

Use connectors to link ideas.

Module 5

Task 2: Compare and contrast essay

Task

Compare and contrast the use of driverless cars with the use of cars today.

Write about the following topic.

Soon it is likely we will use driverless cars to move around. How similar or different will this be to how we travel today? Do you think it will be a positive or negative development?

Say if driverless cars will be positive or negative.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

Model answer

Currently several companies are trialling driverless cars on the roads. These include technology companies and car manufacturers. As a result, people will soon travel around in driverless cars. This essay will argue that future car travel will be significantly different from now but that this change will be largely positive.

Start each paragraph with a topic sentence to state the main idea. Each paragraph deals with one question in the test task.

Travelling in a driverless car will be very different from travelling in one controlled by a driver. Firstly, the motorist will simply say or type in a destination and the car will travel there. Secondly, the car will be connected to satellite technology. While this is true of some cars today, the majority are not connected in this way. The satellite technology will ensure that vehicles and traffic signals all speak to each other.

Use the connectors of comparison.

The changes described should be a positive development. One reason is that drivers will no longer have to pay attention at all times. Instead, they will be able to do work, check emails or make phone calls safely. This will mean a more productive and less boring journey. In addition, there will be fewer accidents because safety will be controlled by the car and will not rely on the skills of the driver. The car will be able to make faster decisions to avoid hitting other vehicles or objects.

Use the language of comparison.

Use addition connectors to build strong arguments.

End with a conclusion that summarises the key points of the essay.

To sum up, driverless cars will be more interconnected than cars today. This should result in a safer and more relaxed journey for the driver. However, this technology is still in its early days and we do not yet know exactly how successful it will be. It is important that manufacturers fully test the technology to ensure the development is a positive one.

Module 6

Task 1: Describe changes over time

Read the test task carefully as it explains what the graph and diagram show.

Prepare to write about the main features, not every detail.

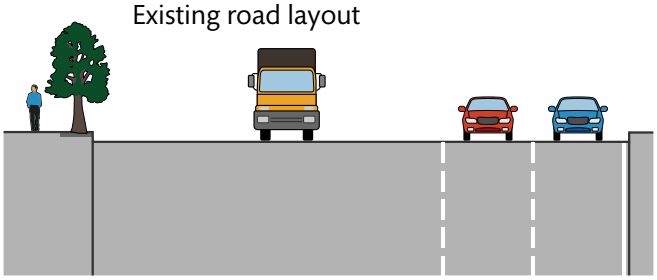
Task

The graph and diagram below give information on changes to road design in a U.S. city in 2010.

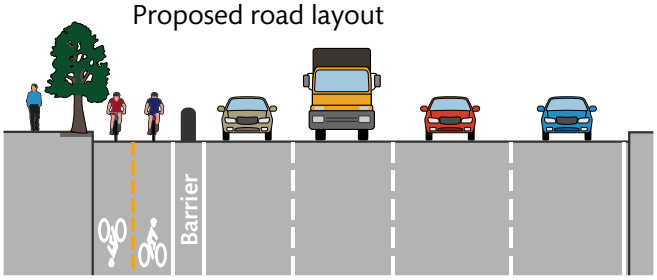
Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

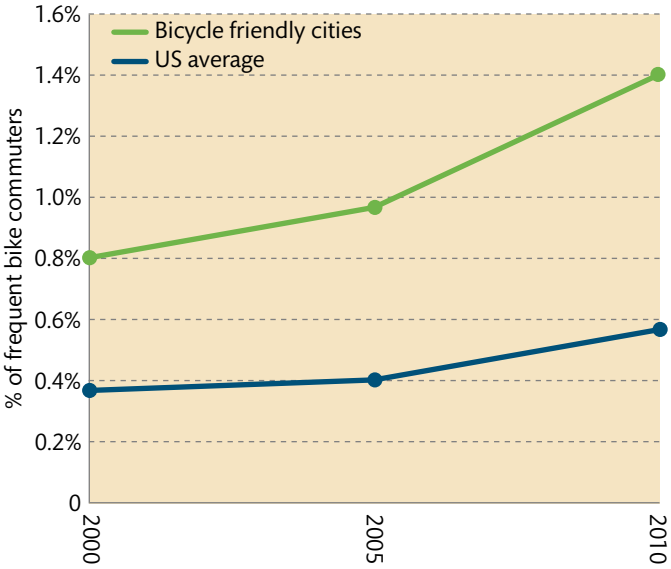
Existing road layout



Proposed road layout



US bicycle commuting growth, 2000-2010



Model answer

Start by saying what the diagram and graph show but paraphrase the test task.

The diagram and line graph give an overview of changes to approaches to travelling by bicycle. The diagram illustrates plans to separate large vehicles and cyclists, to make the roads more attractive for cyclists.

Give an overview of the main features. Do NOT include irrelevant information, e.g. the man and tree are not important.

Use verbs and adverbs to describe change or stability.

The line graph shows that, overall, the number of people cycling to work in the USA remained quite stable from 2000 to 2005, but increased slightly by 2010, when 0.5% of people chose to cycle regularly to work. However, in cities with a bicycle-friendly policy, the percentage of people who chose bicycle transport rose from 0.8% to 1.4% by the end of the period.

Use data and numbers to support your ideas.

Use the correct tenses. The diagram looks at the present and the future. The graph looks at the past.

The planned changes to the bridge approach road mainly involve increasing the number of traffic lanes from two to four. Larger vehicles will not be allowed to travel in the lane nearest to the cyclists. By decreasing the size of the lanes, they will be able to make space to add two new cycle lanes, with a barrier to separate cyclists and other motor traffic. This should make the road more attractive for both cyclists and people travelling by foot.

Use correct punctuation.

Module 7

Task 2: Cause and effect essay

Task

You should spend about 40 minutes on this task.

Write about the following topic.

An increasing number of people are choosing to watch international television shows and films. Less nationally produced entertainment is being made each year. What do you think is causing this trend and what are the potential effects for national identity?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

The trend.

This is what you must write about.

Model answer

In the early days of television, most of the programmes that appeared on our screens were made locally. Since the arrival of cable television and the internet, there has been more choice, and internationally successful shows, such as The Big Bang Theory, are enjoyed all around the world. This essay will argue that this is because of financial reasons, and suggests that we should be concerned.

End your introduction with a thesis statement.

Address the first part of the question (what is causing the trend) in one paragraph.

The main reason why national television companies buy more and more shows internationally is cost. American TV companies often insist on selling their products in packages. When a local company wants to buy the current blockbuster, they often have to buy several poorer quality shows with it. This leads to even more international content on our screens, because once the TV programmes have been paid for, it makes sense to show them. It is also much cheaper to buy ready-made television shows than to produce them.

Use the language of cause and effect.

Address the second part of the question in a new paragraph.

The impact of this is mixed. Because of high sales, a lot of American television shows have large budgets, and can afford top-quality writers, actors and special effects. However, there is a need for locally produced talent and variety, and only local television companies can produce that. Some countries have started to support their local film and television industries, and it is not uncommon now to see specialised products, such as Scandinavian thrillers, or beautiful Iranian films, in other countries.

Make sure you give an explanation and reasons for your main points.

In conclusion, the internationalisation of television and film is just part of a much larger process of globalisation. We need to find ways to build local and national talent within this new world order if we are going to enjoy all the talent around the globe.

Module 8

Task 1: Describe a process

Read the test task carefully as it explains what the diagram shows.

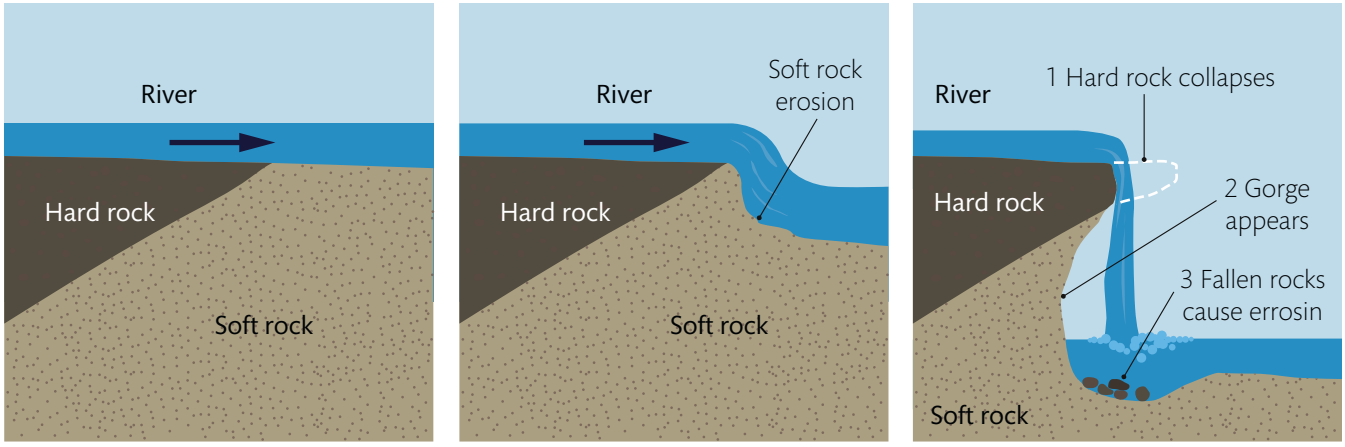
Understand what the diagram shows and plan to write about the key features.

Task

The diagram below gives information on how waterfalls form.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.



Model answer

Start by introducing the topic of the diagram but paraphrase the test task.

Give an overview of the diagram. What is the main thing you learn?

Use sequencers where appropriate to organise your ideas.

Use a variety of verbs where possible.

Use the passive form where appropriate to describe the process.

The diagram shows the process of waterfall formation over a long period of time. The waterfall is formed when water flows over hard rock which sits over soft rock.

At first, the water flows across the rock horizontally. Over time, the soft rock erodes and a cliff is formed which causes the water to move downhill. This continues until the erosion creates a much steeper cliff. The hard rock at the end of the cliff eventually falls because there is nothing to hold it and it drops into the pool below. The water no longer flows across the rock. Instead it drops over the cliff and falls straight down into the pool. The remaining water flows out of the pool and the river continues downstream.

The rocks that fell from the edge of the cliff into the pool move around with the force of the water. This results in more erosion and causes the pool to become bigger. In the final stage of the process, a gorge is formed.

Module 9

Task 2: Problem-solution essay

Task

You should spend about 40 minutes on this task.

Write about the following topic.

In many countries, the number of elderly people has increased significantly while the number of children has decreased.

What problems does this cause? What solutions could help reduce these problems?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

The problem.

What you have to write about in the essay.

Model answer

Improvements in standards of living and healthcare mean that people live longer, and families have fewer children these days. This has led to a rise in the average age of the population, which has created some economic problems. Older people often do not pay taxes, and may receive a pension from the government. This essay will suggest that multiple solutions are needed to reverse these trends.

One issue is that people are choosing to have smaller families, and encouraging parents to have bigger families may help to change this. In some countries, the government offers money to help with the cost of raising a child. These children later grow up, work and pay tax. However, family size is a complex issue and depends on many factors. This solution has had limited success so far.

Another potential solution may be to encourage older people to retire later. Sixty-year-olds today generally enjoy good health, and they can expect to live another twenty or thirty years in many countries. Delaying retirement by just five years can have a positive impact, as they will still be paying taxes, and often have a lot of expertise. However, this solution tends to be unpopular with people in their late fifties.

In conclusion, a higher number of older people in society results in higher spending and lower taxes for governments. Change is needed both in terms of encouraging a higher birth rate and changing the nature of retirement, and no one solution can address the problems. It is certainly an issue that all developed countries today are concerned about and it will affect us all.

Explain the causes and effects in the introduction.

Start your first main body paragraph by suggesting a solution to the problem.

Show that you understand the advantages and disadvantages of the first solution.

Use language to soften recommendations.

End with a conclusion that summarises the key points of the essay and makes a recommendation.

Module 10

Task 2: Describe a map

Read the test task carefully as it explains what the diagrams show. Make sure you look carefully at the date of each one.

Understand what the diagrams show and plan to write about the key features.

Task

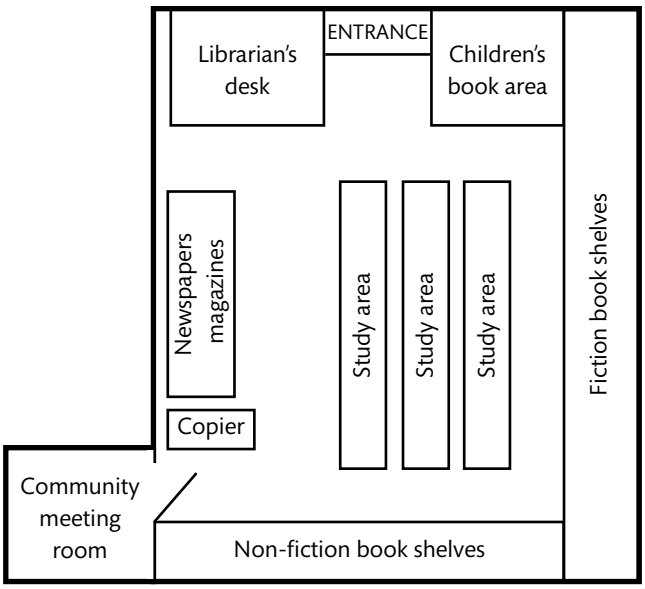
You should spend about 20 minutes on this task.

The maps show the Westerby city library in 1984 and 2014.

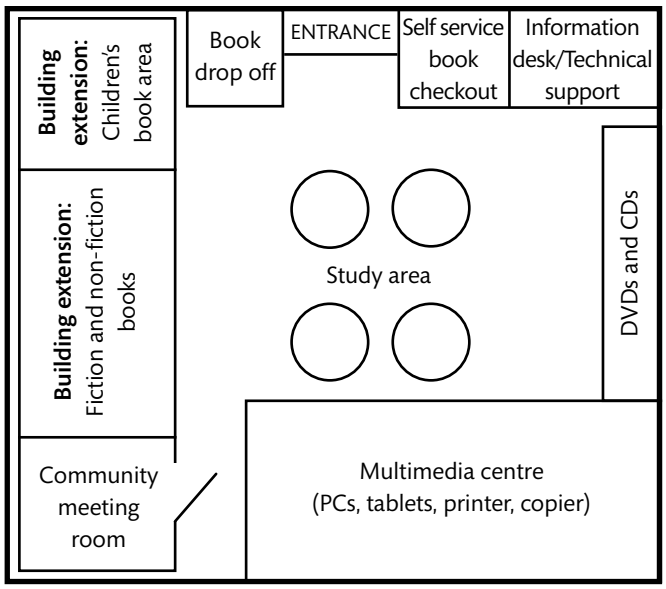
Summarise the information by selecting and reporting the main features and make comparisons where relevant.

Write at least 150 words.

1984



Today



Model answer

Start by introducing the topic of the diagram but paraphrase the test task.

Describe the maps in more detail, comparing features of both maps rather than speaking about one map and then the other.

The two maps show how the city library in Westerby has changed since 1984. Overall the maps tell us that the library has been extended to the west. It has also been modernised with technology being an important feature.

If we look more closely at the map, we can see that there were separate shelves for fiction and non-fiction books in the south and east of the library in 1984 but today they are located together in the extension. The non-fiction bookshelves to the south have been replaced by the multi-media centre and the fiction bookshelves to the east are now full of DVDs and CDs. The children's book area still exists today but, like the adult books, it has also been moved to the extension.

The librarian's desk that existed in 1984 does not exist today. Instead, visitors get help from an information desk to the north east of the library. The study area remains in the centre of the main room but is laid out in a different way. In fact, only the community meeting room is in the same location on both maps.

Give an overview of the diagram. What is the main thing you learn?

Use a range of verbs in the correct tense – check the dates on the map. Use the passive voice as it is unlikely you know who changed each item.

Use language of location to describe where things are on the map.

Module 1

1.1

A: I think they're quite different. The benefit of being with family is that you can relax completely, whereas with friends, sometimes you have to try and act cool around them.
B: It's really tough, almost impossible. I'm living away from home now, and the downside of being away is that I don't see my old friends as much as I'd like.
C: It depends on the problem. Take schoolwork, for instance, I suppose I would ask my friends because they know the subject, but for something more personal, I'd go to my family.
D: Of course! I'm sure that everyone enjoys spending time with people they know and trust. It's better than sitting alone all day.
E: You can't give a definite answer to this question. That's because different people like different things, but I guess as long as you're thoughtful, people will always want you as a friend.
F: I don't know, the usual stuff, I guess. Most of the time, we just like hanging out together, round each other's houses, and we go out at the weekend together.

1.2–1.4

SR = Sales representative C = Customer

SR: Hi, how can I help you today?
C: My phone plan's going to finish next month and I'm looking for a new contract.
SR: What kind do you want?
C: Oh, I don't know. What are the options?
SR: Well, would you like just mobile, or do you want one of our deals on mobile and home broadband services too?
C: Just the mobile one, please.
SR: OK sure. Well, we have some great mobile deals. We've got two offers at the moment. Are you a student?
C: Yes, I am.
SR: Then you probably want our Student Plan.
C: OK, what does that include?
SR: Well, you get a new Sun Nineteen phone with the student plan. It's better than our other plans, which only give new customers a Sun Seventeen phone. We're offering that for a short period of time.
C: Really? What's the minimum contract on that? Is that six or twelve months?
SR: Oh it's twelve. We never do six months.
C: OK, sounds good. What else is in the plan?
SR: You probably get more minutes for calls than you need. There are limits on the number of calls you can make – let me see, that's six hundred. But with that you also get unlimited texts, and most people use those more than calls these days.
C: And how much is that a month?
SR It's twenty-five pounds. That's cheaper than the normal price to non-students.
C: I'll have to think about it, I think. What about if I keep my old phone? Do you have a call-only plan?
SR: Yes, of course.
C: And how much is that?
SR: Let's see. We'll need you to put down a deposit before you start the plan, so it's normally ten pounds after the second month, although that depends on the amount of calls and data you use. For the first month it's fifteen pounds, and you'll get the extra five pounds back when the contract comes to an end.
C: And how many minutes do I get with that?
SR: You can make four hundred minutes of calls a month on the basic call-only plan, but most of our customers only use about 200 of that limit.
C: The basic one sounds perfect!

SR: Right, let me just take some details from you.
C: Sure.
SR What's your full name?
C: David White.
SR: Like the colour?
C: Yes, that's right.
SR: OK, and I need to take an email address, just so we can contact you if there's a problem.
C: Sure, it's Stegboy, that's S-T-E-G-B-O-Y, at student uni dot A-C dot U-K.
SR: That's great, and we have your contact phone number. Now, how much data do you want? What kind of things do you use your phone for?
C: Oh, I don't know. The usual I guess.
SR: We have a five-gigabyte plan, which we recommend for people who store games on their phone. It's also good for people with a lot photos. Or we have a three-gigabyte plan for more normal use. Do you use your phone for games regularly?
C: Well, I don't game much, but I always have a lot of videos on there. I need to record things for my media course, so I think I'll go for the larger option.
SR: Sure, that's a good idea. And how would you prefer to pay?
C: What are the options?
SR: We prefer our customers to send the money by automatic bank transfer.
C: I'd prefer to do it by cash to start. I've just started at university and I haven't opened a bank account here yet.
SR: That's no problem, just send us your bank account details when you have them. Or you can always do a monthly top-up at any shop if you prefer.
C: And where can I collect the card to get started?
SR: All you need to do is sign here and you can pick up your card at the reception desk, which you passed next to the entrance to the store. But first you need to pay at the cash desk.
C: Thanks, that's great.

1.5

N = Narrator A = Agent S = Student

N: You will hear a student enquiring about a job. Read questions one to five.

A: Good morning, can I help you?
S: Yes, I hope so. Is this the Job Centre?
A: Yes, it is, are you looking for part-time work?
S: Yes, I called earlier about a part-time job.
A: Oh, right. We've got quite a lot of work available at the moment. Can I ask what you're studying? We try and match students to jobs that will give them some experience in a field that they'll be working in in the future, where possible.
S: Yes, I'm doing a degree in Advertising. I want to work for one of the large technology companies when I finish.
A: Well, I doubt we have anything like that, but we should have something for you. What year are you in?
S: Well, I'm doing a four-year degree and I'm in the second year. I didn't want to take on any extra work in my first year, while I was settling in, but I think I'm ready now.
A: OK, well, let's see. We have a position working as a food assistant.
S: I don't think I'd be any good working as a cook in a restaurant.
A: Oh no, it's at the cinema, which is kind of media-related, but perhaps not enough. You'd need to be available evenings and weekends for that.
S: Maybe, do you have any other positions?
A: Yes, a couple of other jobs came in yesterday. The local newspaper is looking for a bright young undergraduate to work as a salesperson in the advertising department. You'd be phoning up local companies and trying to persuade them to take out adverts in the paper.
S: That sounds perfect. It'd be great experience for work, too. What hours do they want?
A: It's Wednesday and Friday afternoons, every week.
S: Oh, that's a shame. I'm free on Wednesdays, but I have lectures on Fridays, and I can't miss those.
A: OK, how about this last one? They're looking for an early morning receptionist, six until nine, but it's right next to the Marketing Department where you're based, so you'd have no problems getting to class. The position is available in the University's Media Centre. You'll get some useful experience there, too, I would imagine.
S: Perfect! I'm always up early, anyway.
A: OK, great. You'll need to go for an interview for this one, but I can set you up with that right now.
S: Oh great!

A: So, I just need to take a few personal details from you, if that's OK?
S: Sure.
A: So, what's your name?
S: Ruby Desai – that's D-E-S-A-I.

A: Can I have your student number? I can get details like your address from there.
S: Sure, here's my ID card, the student number's on the corner.
A: OK, that's great, I've got you on our computer system, now. It says here that you're staying at the High Field Halls, here on the university campus.
S: Actually, I was there last year, they haven't updated it yet. I've just moved into the Green Park Halls, it's in the city centre, next to the station, and I'm in room six-double-oh-three.
A: OK, I'll just change that here, so we have your correct address if we need to contact you. Now, what shall I put down as your main skills?
S: Erm, what kind of thing do you mean?
A: Well, did you do any graphic design on your course last year? That might be helpful for the media centre.
S: Yes, I did that in my first year. I don't know, I mean the usual stuff like language skills aren't really my thing, but I took a course on computer programming, and I did pretty well at that in my exams.
A: Great, I'll put that down. That kind of thing always comes in handy. I expect that's enough, they're not really expecting anyone very highly-qualified. Now, I have a note here saying that you need to go for an interview with the head of the department.
S: Would that be in the main marketing building?
A: Actually, she's based in the business services building, which is, let me see, on the other side of the campus. That's quite annoying. It's next to the administration building. Do you know where that is?
S: Yes, I pass it on the way in every day. When would the interview be?
A: Actually, there was an appointment on Wednesday morning, at nine o'clock, but the student that was going to go then cancelled. Does that suit you?
S: I have a lecture then, but I finish at ten o'clock.
A: OK, I'll put you in for half past ten, and that will just give thirty minutes to get there after your class.
S: That's perfect. Thank you for your help.
A: You're welcome, and good luck! I hope you get it, but if not, come back and see me, I'm sure we have something else.

1.6

E = Examiner D = Daniella

E: Now, let's talk about learning about the news. Do you read newspapers?
D: No, I don't read newspapers.
E: Why not?
D: I think that you have to buy the paper. I don't have money and I think that I can get the news another place.
E: How do you prefer to learn about news events?
D: How do I prefer to learn about the news? [Pause] I like to see the news online ... I see the website.
E: How do you share personal news with friends?
D: I like to go to social media. I go to social media because I can put photos there and because I can see what they are doing. [Pause] Because they are in another country, I can still see them.
E: Do you like hearing your friends' news?
D: Yes, I like hearing my friends' news.
E: Why?
D: Because I can see that they have had a baby, or they have got married. I like to know these things because they are important.

1.7

E = Examiner N = Nicholas

E: Now, let's talk about learning about the news. Do you read newspapers?
N: No, I don't like reading newspapers. They have a lot of stories that are not interesting for me, for example stories about politics and sport.
E: How do you prefer to learn about news events?
N: I like to watch the news on television because you can see the things that happened that day, not the day before. I don't really like the internet, because I think there is some rubbish there, and sometimes you have to pay to read a story.
E: How do you share personal news with friends?
N: I use social media, like everyone else, I guess. Sometimes I go to a café and catch up on their news, or talk things through with them.
E: Do you like hearing your friends' news?
N: Well, not always.
E: Why not?
N: You know, sometimes it's not very good content. Sometimes they want to tell you about the thing they ate for breakfast and I don't really think that's interesting.

Module 2

2.1

1: I'm going to talk about camping because this is something that always makes me happy.
2: The thing that makes me happy is having a lie-in.
3: Chocolate is something that makes me feel good, especially if I've had a bad day.
4: I love going for a walk on a cold, sunny day.
5: Spending time with my friends always makes me feel happy.
6: I love clothes so I really enjoy shopping for a bargain.

2.2

Rafael: I'm going to talk about camping because this is something that always makes me happy. By camping, I um mean er taking a tent into a quiet area and sleeping there for a couple of nights. I usually go out to the mountains about two hours from where I live. There's a large lake there where people go to do freshwater fishing, and they put up their tents next to the water. I usually go there every other weekend in the summer for a couple of nights. I also spend a week there at the end of the summer, before I go back to university. Unfortunately, it's too cold to go in winter because it snows up there. I love camping for a few different reasons. Firstly, you can escape from the worries of everyday life. There is no stress in the mountains so you can really relax. All you need to think about is starting a fire, catching a fish and cooking it. As well as that, you can look at the beautiful scenery around you – I don't think we do this when we're busy studying or working and I'm usually surrounded by buildings so it's not as pretty. Another reason is that you can breathe in fresh air and the smell of the fish when you cook it. Life is slower when you go camping and er ... so I think it's really good for your physical and er ... mental health.

2.3

Hana: The thing that makes me happy is having a lie-in. Sometimes I wake up early on a Sunday. I think it's time to get up and then I remember that it's the weekend and I don't have to! So I get back in my warm bed and go back to sleep. It doesn't happen on a Saturday though, because I work part-time in a supermarket which means I get up early on those days. And when I have lots of homework, I have to get up early on a Sunday too. But on Sundays when I don't have homework and in school holidays, I like to sleep in. [pause] It makes me happy because I have more time to sleep. Plus I have some thinking time. I think it's good to lie in bed and daydream. I think about what happened the week before. I also think about the things that are going to happen the following week. I can make plans in my head. Sometimes I make up stories too. I enjoy being creative. And I can do this in my bed, where it's peaceful and no one can disturb me.

2.4

Rafael: I love camping for a few different reasons. Firstly, you can escape from the worries of everyday life. There's no stress in the mountains so you can really relax. All you need to think about is starting a fire, catching a fish and cooking it. As well as that, you can look at the beautiful scenery around you – I don't think we do this when we're busy studying or working and I'm usually surrounded by buildings so it's not as pretty. Another reason is that you can breathe in fresh air and the smell of the fish when you cook it. Life's slower when you go camping and er ... so I think it's really good for your physical and mental health.
Hana: It makes me happy because I have more time to sleep. Plus I have some thinking time. I think it's good to lie in bed and daydream. I think about what happened the week before. I also think about the things that are going to happen the following week. I can make plans in my head. Sometimes I make up stories too. I enjoy being creative. And I can do this in my bed, where it's peaceful and no-one can disturb me.

2.5

Beauty's all around. One thing really enjoy looking [pause] rainbow. Lovely just had rain suddenly rainbow appears horizon. Don't need gold end rainbow – rainbow is gold! Rainbows important reminder something bad happens, something good come soon.

2.6

Beauty's all around us but there's one thing I really enjoy looking at and that's a rainbow. It's lovely when you've just had rain and suddenly a rainbow appears on the horizon. We don't need gold at the end of the rainbow – the rainbow is the gold! Rainbows are an important reminder that when something bad happens, something good will come soon.

2.7

1: This morning I saw a lovely sunrise.
2: My theory is that everyone loves nature.
3: For me, the view of Earth from space is beautiful.
4: We know that people see beauty differently.
5: It's worrying that people don't spend enough time outside.

2.8–2.10

N = Narrator L = Lecturer

N: You will hear a talk about beauty in our everyday lives. First you have some time to look at questions one to six.

L: I'm going to talk today about the importance of beauty in our everyday lives. Not long ago, an interesting study showed how beauty can change our everyday experiences as human beings. Two researchers in Japan conducted a study to test the relationship between the aesthetics of an object – that's how pretty or nice something looks – and how easy it is to use that object. For example, the researchers asked people to use an ATM – you know, the machine which lets you take money out of the bank – and then asked them how easy or difficult it was to use that machine. The results showed that research participants gave the nicer-looking machines a higher usability score, even though there was no difference in how the machine actually functioned. The only difference was its design.

Author Don Norman has written a lot about the design of everyday objects and he has a theory about the results of the research in Japan. He believes beautiful things change a person's emotions in a positive way, making you feel happy and less stressed. Of course, most things do seem easier when you're happier and less stressed. Machines seem clearer and simpler, for example. So, the conclusion is that things are easier to use when they are beautiful. Ugly things are less pleasing and annoy you more, they raise your stress levels and generally make your day more difficult.

Now, since most of us will not design ATMs in the future, you might wonder why I'm talking about this. Well, it's simple. We can all reduce our stress levels and ability to do things by having beauty around us. You don't have to purchase a new home or a new car. No, there are many ways to notice and include more beauty in everyday life that costs very little and I'd like to share some of these ideas with you.

Firstly, it's a good idea to pay attention to beauty. It's all around us, every day. The fields are incredibly green right now. This morning I noticed white snow on the nearby hills and the plum and cherry trees which are starting to blossom on some streets. The air was clear and the light was pretty and the clouds were constantly changing as they moved across the hills.

We shouldn't only look far away to experience beauty, though. Look at things up close, too. Look carefully at the wood on your table, or the smile of someone you're close to, for example.

Another thing we can do is add beauty to our personal spaces. We can buy flowers once a week or buy a plant like an orchid which flowers for several months a year. We can print images that we like and put them up around our house. And we can keep our homes looking tidy. But remember that beauty isn't just a visual thing. Playing beautiful music can also make you feel good. Touching silk. Smelling freshly cut grass. Or tasting a lovely piece of fruit. They're all examples of beauty.

Now, most of us go online daily, so we should think about making our computer more beautiful. Change the wallpaper to a picture you took of your favourite place, for example, or a slideshow of pretty images. Visit websites where you can see amazing photos of nature. And try to take a mental vacation at least once a day. By this I mean closing your eyes and visiting a place you choose which looks and feels beautiful and relaxing to you. Even if you're sitting somewhere that's ugly, you can enjoy beauty anytime by using your imagination. As writer Evelyn Underhill said, because we don't pay attention, we miss a thousand lovely things each day. I think it's great that research now tells us that beautiful things are important to our everyday lives because people who hear about the research might start to make an effort to see them. So, let's try to add a little beauty to our lives and the lives of those around us, so we feel good and less stressed.

2.11

N = Narrator L = Lecturer

N: You will hear a talk about body language and the effect it has on our confidence and feelings of power. Before you listen, you have thirty seconds to read questions one to ten.

L: Look at how you're sitting now. Are your arms folded? Or your legs crossed? Or are your hands by your side? When we talk about forms of communication we tend to think primarily about oral communication like face-to-face conversations, or written communication like emails. People don't immediately think about non-verbal communication like our facial expression or how we're sitting. But it's actually one of the most significant forms of communication, and it has a huge impact on how we feel and how we act. Let's take the feeling of power as an example. Our body language tells other people if we're feeling powerful or powerless. I'm sure everyone here in the audience knows that in many social situations they've been in, one person is in a more powerful position than others. A job interview is a good example of this. The interviewer can choose to hire the interviewee or not. So they're likely to feel more powerful than the interviewee. This means they stand tall, look up and generally have what we'd describe as open body language. I'm sure everyone here has watched an animal documentary where apes displayed this kind of open body language. When an ape wants to show a higher position of power, it stands tall, pushes its chest forward and holds its head up high. The other apes immediately recognise that this ape has more power than them. Well, humans do this too, all the time.

From my own personal experience of job interviews, I can tell you that most interviewees – the person who wants the job – feel powerless and this makes them want to sit low in their chair and drop their heads. They look down at the floor. Basically they want to avoid looking big and make themselves as tiny as possible. But research tells us that if that person sits tall in the chair and opens up their body, they can actually start to feel more powerful. This is because open body language produces power as well as reflects it, and this can help the interviewee to give a good impression and get the job. Open body language can result in a feeling of power, a feeling of dominance and more risk-taking due to a higher level of the chemical testosterone in our body.

Cortisol is another important chemical that the body naturally produces. In fact it's produced in times of stress, to help us deal with a challenging situation. This could be a dangerous situation, an unhappy situation or a situation where we need to succeed, like a job interview. When we use open body language, the feelings of power that result can physically lower our cortisol levels. And less cortisol means less stress.

So, what does all this mean? Well, we know that if we change our body language we can also change the way we feel. And if we feel confident then we can perform better. So I'd like to make a suggestion. I'd like you to all spend a few minutes at the beginning of every day standing tall with your chests forward and your heads high so that you can feel confident for the day ahead and become better able to work towards your goals. It will work and I've got some evidence to support this.

There was an interesting study carried out with University of Columbia students that supports this idea. sixty-six students were invited to take part in a study to test the effects of power posing – that means showing open body language. Five of the sixty-six students were not included in the results. While they finished the task, they didn't do it exactly as they were supposed to. Four of them had misunderstood the instructions and one hadn't followed them correctly, so in the end sixty-one students were included in the results.

So what did the students have to do? Well, they were asked to be interviewed for their dream job. They were given about six minutes before the interview, to write a speech that told the interviewers all about their strengths and skills and why they should get the job. While they were doing this some students were asked to adopt a high-power pose – so in other words, show open body language. The others were asked to sit and display a low-power pose, that's more closed body language. These preparation stages were filmed to make sure that the students kept the correct body language throughout the six minutes. When they'd finished, they delivered their speeches to a group of judges who listened and then made an evaluation of the participant's performance. They considered how the person presented themselves – by that I mean their ability to look confident when speaking. They also evaluated how clever the person sounded and how organised their ideas were. This is because we know from other research that interviewers look for all of these things when choosing someone to employ.

So, what were the results? Well, they showed that the judges rated the candidates who had stood in a high-power pose more. The judges thought those candidates were more enthusiastic when describing their skills, although interestingly, their body language did not affect their speech quality. This research doesn't just tell us that body language can make us feel more powerful and therefore

perform better. It also tells us that certain body language before we do a task can have the same result. And as I said earlier, this can help us all. So, next time you have a big task, stand in a power pose to gain confidence.

2.12–2.13

Aimée: I'd like to tell you about my graduation ceremony. Two years ago, after I finished university, there was a graduation ceremony for the students and their families where we got our certificates. So, I went there with my parents and my sister. It was in a huge er ... conference centre just outside the city, maybe there were over two thousand students there. Anyway, we all wore those clothes, you know, a black square hat and the black dress – I don't know the name – but you put it on top of your clothes. It was very funny to see my friends with those clothes. At first the head of the university gave an um er speech and then other people talked too. Next, I went up and I er talked, I talked for a long time and er I er I gave a speech for the students. I was absolutely terrified. I didn't want to fall on the stairs or make a mistake. My mouth was very dry but luckily I could speak and I said everything OK. After, we went – er my family – we went to a restaurant and they gave me some gifts. My parents gave me some car keys – they'd bought me a car – I didn't know so I was very surprised. They er ... And so I was very happy. My parents were very proud because I'm the first person in my family to graduate from university so it was an important day for everyone.

Huan: Last year, I took an important exam so I could go to a good university. Er ... er ... um ... the entrance exam was at the university near Shanghai. Um ... it was a difficult exam because the questions were difficult. And it was long. Er ... um ... Many students were there in the er ... big room. Um ... and ... and I felt er ... sma ... small. I felt um ... bad ... because ... I wanted to um ... um ... er ... pass the exam. After, I felt good because I could answer the questions. Er ... the exam were ... was important because only good people can go to the university. Um ... I could pass the exam and I er ... started the university in March. I was happy.

Module 3

3.1

1: In my opinion, I think that it's a waste of time including sports on the curriculum. Schools are a place to learn academic subjects.
2: As far as I know, there are a lot of playing fields around schools, and they all have things like a basketball court and a football pitch. They're all outdoor facilities, though, so when it rains, it's a real problem.
3: Well, you know, most research suggests that competition is an important lesson to learn. So I think every school curriculum should include sports lessons.

3.2

I think that schools should encourage every child to be active because there are so many problems with weight among adults these days, and also children's free-time activities tend to be very passive, sitting down all the time. I think that schools can help change this, so they should teach sport.

3.3

S1 = Student 1 S2 = Student 2

S1: I have to finish my application for university and I just can't decide which of these two universities to choose.
S2: Well, you must have some idea of which is better?
S1: That's the problem – I think that both universities have a great course programme. I'd be happy on either one.
S2: OK, well, Rugby's got a good reputation. Why not go with that one?
S1: Well, yes, but unlike Rugby, where there's no work experience, at Bartlett you can spend a year in a company getting on the job experience. I think that could be really important when you graduate.
S2: What about the optional subjects?
S1: Actually, I was surprised to see that there are the same options on both these courses, and there's plenty to choose from.
S2: So whichever you choose will be good. How about the teaching staff?
S1: Well, both have good reputations but when I went to visit last month, the teachers at Bartlett spent more time with us, and I got more out of their introduction talks.
S2: And weren't you interested in joining a rowing team?
S1: Yes, but neither university has a rowing team, so that's not a factor.
S2: I give up – why don't you just toss a coin?

3.4

W = Woman M = Man

W: OK, so I don't really understand our presentation. We have to talk about whether or not jobs are going to disappear in the future. Isn't that kind of an old argument? Lots of jobs have gone in the last few decades.
M: Well, the disappearance of jobs is nothing new, we've seen that happening for years now, but they've always been low-skilled jobs, like car factory workers, or basic administration work. Computers are changing so fast and this time, careers that people have spent thousands of pounds training for at university might start disappearing. Simply put, some university subjects are going to become less common and we need to predict which university courses are likely to disappear. I mean, some universities are still preparing students for jobs that won't exist in ten or so years' time.
W: Well, take building design and planning, for example. It's obviously not going to be taken off the curriculum any time soon. We've always needed safe homes to live in and offices to work in, and always will.
M: You're right. That's one of the courses that's least likely to go, but it's not so much because of the safety side, but more because it's a creative subject. It's exactly the same with interior design. We're still decades away from programming a computer to do anything artistic, so that subject's not likely to lose popularity in the next twenty years or so.
W: There must be some safe practical subjects, like medicine. We'll always need doctors.
M: Well, actually, it's true that both are practical, but the main difference between architecture and medicine is that there's perhaps a more creative side to architecture ...
W: ... whereas medicine is more about remembering facts, I guess.
M: Exactly, there are certain signs that indicate illness, and computers are able to identify routine illness much more accurately than a human, who just relies on memory.
W: OK, so it says in your article that we'll probably only need eighty percent of the doctors that we have today.
M: That's what some reports have suggested. Human doctors excel when someone has an illness that's quite rare but the rest of the time, a computer might actually do the job better.
W: Hmm, that's an interesting thought. We'll just have to become computer programmers instead of doctors if we want to make a difference to people's health and well-being.
M: Ah, well, neither career is safe, to be honest. A lot of computer programming is also very routine. At the moment you need specialist engineers to fix things that go wrong with computers, but a lot of computer experts are working to make it easier for people without a lot of training to program computers and so, while we'll still need programmers, there won't be anything like the number of opportunities that there are today.
W: Actually, I can look forward to that day.
M: It's really just the creative careers that are absolutely safe. Neither art nor fashion design are going to disappear for many years to come.
W: I'm not sure I agree with that. Take a look at creative writing courses. They've become more and more popular over the last few years, but with so much creative writing now freely available on the internet, people are going to have to think more carefully about studying at university. They won't be able to spend as much money on a creative writing course as they did in the past. Soon enough, there'll be enough creative writing courses available online that nobody will be willing to attend university for it anymore.
M: Right – you do know that a lot of this is not going to go down well with our audience, don't you?
W: Hmm, well, we'll have to deal with that once we're presenting.

3.5

N = Narrator T = Tutor M = Megan

N: You will hear an architecture student discussing a project on office design with her tutor. Read questions one to five.
T: Right, Megan, I've looked at your notes for the end of year project. You've got some good ideas here.
M: Thanks.
T: The diagrams are excellent and this is a really imaginative design.
M: It took me ages.
T: For the end-of-year project, you need to include a description of the project and an explanation of why you wanted to design it this way. Now I can see that your description is around one thousand three hundred words long, but the maximum we allow is eight hundred, for the display at the end, so you're going to need to cut another five hundred words from this before you hand it in.

M: OK, sure, I forgot to check the word limit.
T: Do you think you have enough time to make the changes?
M: Well, I was hoping to have everything built by the twenty-first of June, but it was difficult to get an appointment to use the university's 3D printer. In fact, I can't get on it until two days before the deadline, which is on the twenty-sixth of June. I've got it booked on the twenty-fourth, so as long as there are no technical problems, I should be OK.
T: OK, that sounds fine to me. Now, let's have a look at some of your design ideas. You haven't mentioned in your description why you chose the different features you've drawn on the plan.
M: Well, I did a lot of research on the perfect office. Most people said the biggest problem was that they notice sounds from printers and other distractions more when there are no walls in the office. Even if they don't go all the way up to the ceiling, they still help to reduce sounds. I included a lot of them in the design because studies show that open plan desks just aren't very good for encouraging quality.
T: Good point. What about this seating area over here?
M: I chose that because another study said that the most important thing was to have a lot of different spaces. That opens up more opportunity for different kinds of work, both traditional desks and big boardroom tables can discourage small-team work. The sofas allow people to sit and discuss or work problems in a more relaxed way, with a few coffee tables to put papers and things on. People do different jobs during the day, and the furniture should reflect their different needs.
T: Mmm, This that's a very clear section. Good.
M: Thanks. What we're aiming for is to give people better control. By creating smaller spaces like this we're giving people more freedom to work the way they want. They can change the temperature at their desks by opening a window or turning up individual heaters. This can be really important, because some people need a warmer or cooler office environment. It's all about getting the most out of people.

N: Now read questions six to ten.

T: OK, so what are some of the functions of offices that you addressed with your design?
M: Well, there's a lot written on the colour of working environments, and yellow, green and blue come out tops. Green helps people to feel calm, and to a lesser extent, blue can help people to understand difficult ideas, which make a more relaxing environment. However, I used yellow because I was more interested in making a space for a very specific kind of person, particularly people who work in jobs where they need to have lots of new ideas. It's very good for that. So that's why I mostly used yellow around the office.
T: I see you've also considered the artwork around the space.
M: That's right. Although there wasn't much written on the effects of pictures on office workers.
T: I'm not sure that's true. Their use has been found to have a very calming effect on staff in hospitals. There was a study that showed that people in demanding jobs, such as finance or sales, had fewer problems with depression or generally just feeling down when there were images of natural scenes around the building.
M: Can you give me the reference for that later?
T: Sure.
M: Another important thing to help people feel satisfied in their job and working environment is the objects around the room. The main difference between homes and offices is that homes often contain personal objects such as plants. Unlike homes, many offices can be very impersonal, and a lot of people dislike working in that kind of environment. A study in the UK found that allowing people to bring their own plants into their workplace made people feel more like they belonged to the company, and they worked around thirty percent more efficiently because of that. That's why I've put those in.
T: Hmm, and you've got a lot in your report on about the windows in this office.
M: Well, I was really interested in understanding this area better. There's been a lot written about natural and artificial light, but neither is perfect. A lot of studies show that working in ambient light, that's light from the sun or daylight, helped people to get more and better rest at night than those who were working in an office without windows. So, that's obviously a good thing. That's why the windows take up most of that side of the building.
T: But not everyone can sit near the windows. And it's not always a good thing. Soft lighting has been found to encourage people to come up with more solutions to problems. That's also a useful skill.
M: That's why I put the sofa area away from the windows in my design, and put smaller lamps on tables around it. It allows a lot of different kinds of work to happen.
T: Right. Well, it looks like you have all the information you need. You just have to start reducing that description.
M: Sure.

3.6

E = Examiner R = Reham

E: What kind of things do visitors to your country buy?
R: Clothes are very cheap in my country. And the shops are very beautiful and attractive. Nice shops make you want to buy things. I think that most visitors go to the shops and buy clothes.
E: You said that the shops are nice. In what way are they pleasant?
R: The shops have good lights, and good decoration. The shops have places where you can sit with your friends and have a coffee and chat. You see some clothes and you feel good, and you buy them.
E: How can shops make shopping more pleasant for their customers? Do you think they could do more to make it pleasant?
R: Yes. Well, sometimes I like to go shopping, and I don't go because there are no places in the car park. I wait a long time, maybe one hour. It is not good.

3.7

E = Examiner Z = Zhuang

E: So, Zhuang, you mentioned that older people don't enjoy going to shopping malls as much as younger people. Generally speaking, how do you think shopping habits have changed in recent years? Do you think that generally, the way we shop has changed in recent years?
Z: Well, in China in the past people used to go to the market to buy their food, or even in the countryside, I mean in the places where there are a lot of farms, people used to grow or make a lot of the things they needed, or they shared with their neighbours. So they didn't really go shopping the way we do today. But a lot of people have moved to the city these days, and as a result, people prefer to go to a nice shops, have a coffee, you know, meet friends. It's almost like a hobby.
E: So, do you agree that buying things makes people happier?
Z: Oh, definitely. For example, when you buy something new, you feel a little bit excited and if it's clothes, you want to go home and try on your new trousers or try a new piece of technology. But I don't think that feeling lasts very long. In my opinion, people need to find another way to feel happy.

Module 4

4.1–4.2

Carla: I've ... er ... got ... er ... got ... an amazing pram that I use all the time. It's a ...er...um...a pram and a scooter together. Er ... the scooter has four wheels and the ... er ... platform ... er platform where I put my foot. The pram's in ... at the front of the scooter, um ... above my foot and just in front of the er ... handle where ... where I put my hands. I use it to go shopping or ... or ... when I ... I sometimes take my daughter out for a walk. I like it ... because ... er ... I can get to the shops much faster when I use the scooter and I don't ... don't have a lot of time. Er ... um ... the movement also helps to send my daughter to sleep when she's er ... she's er ... crying. But probably the main benefit is that it's ... um ... fun for me!
Tom: Well, my favourite invention's a ping pong door. Er, I don't have one myself but my friend James does. How can I describe what it looks like? Er, it's a special kind of door made of, I guess, green plastic. You can pull down the top part of the door so it becomes a pingpong table with half the table on one side of the door and the other half on the other side of the door. We use it for table tennis matches – we're very competitive with each other. I stand in one room and James stands in the other and we hit the ball through the opening in the door. It's really useful for I guess one main reason. Because well, most people don't have space for a pingpong table in their room but with this one, you can, because it's also the door! It's not perfect, of course, but it's a good solution to the problem of space and that's why I think it's a useful invention.

4.3

E = Examiner C = Carla T = Tom

E: Carla, do other people agree with you that the pram is useful?
C: Er, I've never really thought about it before. Um, I'm not sure, actually, because I don't know anyone else who has one. Most of my friends with babies have said how fantastic it is but they haven't bought one.

Er ... so ... um ... perhaps the majority of people tend to think it's fun but not really necessary.

E: Tom, do other people agree with you that the table tennis door is useful?

T: Hmm, that's a difficult question. I know my friend James agrees with me because it's his door and he loves it but I'm not sure about his family – or his neighbours. Generally speaking, I think they find it a bit annoying because of the noise it makes!

4.4

Examiner: Do your friends also find this invention difficult to live without?

4.5

Narrator: You will hear a man giving information about an exhibition on teleportation.

4.6

Speaker: Welcome to our exhibition on teleportation here at the science museum which we proudly opened for the first time at ten this morning. I'd like to explain a little bit about what you can find here at the exhibition before leaving you to look around on your own.

4.7

The next step in teleportation is just a few years away.

4.8

1: I should explain exactly what teleportation is.
2: Scientists have already sent atoms across a room.
3: It could happen before the end of the century.
4: They can start looking at sending bigger objects.
5: We could use it to move information from one place to another.
6: It'll probably result in other fantastic inventions.

4.9

N = Narrator S = Speaker

N: You will hear a man giving information about an exhibition on teleportation.

S: Welcome to our exhibition on teleportation here at the science museum which we proudly opened for the first time at ten this morning. I'd like to explain a little bit about what you can find here at the exhibition before leaving you to look around on your own. You'll have plenty of time to see everything as the exhibition is open until 4.15 and the gift shop doesn't close until five o'clock.
I think I should explain exactly what teleportation is for those of you who are a bit unsure. It happens when one an object travels from one place to another place in the form of energy. We've all seen teleportation in science-fiction films, when someone's in New York, they press a button on their watch, they disappear and suddenly appear in Beijing seconds later.
Did you know that it is possible to use teleportation now? Scientists have already sent atoms across a room and Gallery 1 provides all the details. In fact you'll be able to see exactly what they did with a working model. It won't perform exactly the same task but it will show you how it was done. Amazing! You can also see images of the scientists and atoms in action.
Of course atoms are incredibly small and twenty-five kilometres isn't very far so the technology isn't advanced enough to move humans from one side of the planet to the other just yet. It could happen before the end of the century though. And this is the main focus of Gallery 2 – the future of teleporting. You can find information there about how the next step is just a few years away – possibly sending an atom to the moon. Then scientists can start looking at sending bigger objects, followed by animals and then humans to different places. You'll be able to watch a recorded interview with Professor Michio Kaku who says that there's a strong possibility humans will be able to travel across the universe in future but we will possibly not want to use it because of the potential dangers involved. I'm sure you'll want to find out more about this and what could go wrong.
Finally, the topic of Gallery 3 is teleportation technology and alternative ways we might use it. Humans might not use it to travel from one place to another but we could use it to move information. In the gallery you will find details of a quantum computer that scientists are creating today using teleportation technology. A quantum computer processes information using individual atoms, so it can potentially make calculations and solve problems extremely quickly. Much faster than now. In the gallery you'll be able to see a timeline of the history of processing to compare speeds in the past with those that could be possible in the future. You can also find out about how the same technology could be used to send information between computers, resulting in a superfast internet. Information will be able to go from one place to another so quickly that no-one will be able to access it or steal it before it gets to its destination. So it'll be much more secure than the web we use today.
So, we hope you enjoy finding out about teleportation here today. It really is a fascinating subject. It might not be safe for human travel but it'll probably result in other fantastic inventions that may change our lives. Now I'll leave you to find out more about this topic at your leisure.

4.10

N = Narrator S = Speaker

N: You will hear a radio programme about virtual reality technology. First read questions one to five.

S: Welcome to Consumer Weekly. Today, we're going to look at a number of virtual reality headsets on the market and think about different ways they might be used in future. Virtual reality first got its name in the 1980s. When companies started to create virtual reality products, much of it was basic and people were disappointed with the experience. It also sold at such a high cost that the average customer was unable to afford it. For this reason, consumer virtual reality disappeared until recently, although commercial technology continued to be developed for the car, medical and aviation industries.
Today the technology is smaller and cheaper so there are several headsets available. We're going to look at four of them today. Let's start with Vision Next. A student first came up with the idea of this virtual reality headset while at school. He started building his device after obtaining investment online from over eight thousand investors. His company was later bought by another company for over $100m. The device is coming onto the market next month. It works with a PC and there's no need to install software as the headset will automatically run when connected to the computer. It charges the headset then too.
Our second headset – Virtual Vista – uses the screen of a smartphone which you attach to the headset. This is different to our first headset which has its own screen, making Virtual Vista cheaper to make and buy. The phone software creates two images, one for each eye, which makes it look three dimensional. Users use a touchpad to move around the virtual world and will probably be able to use the device with apps in future.
Let's move onto Far Vu. This was an unexpected addition to the market. Instead of making a new smartwatch as experts predicted, the manufacturers announced this virtual reality headset instead. The headset comes with a handheld controller and sensors that you place around the walls so it can read your body movement. This means it's going to be more expensive than other devices but it's also going to be more powerful.
Finally, we have Iris 3D. This has the same screen resolution as Vision Next but it also has a fast frame rate. This means the image you see moves smoothly. This is important because if it isn't smooth, your brain knows that the image isn't real and your experience is negatively affected. Slow frame rates can also cause motion sickness, as if you're travelling on a boat on stormy waters.

N: Now read questions six to ten.

S: That brings me onto the subject of how exactly virtual reality headsets can be used. Well, at first they'll be used primarily for gaming. As I mentioned they're being used with mobile technology, games consoles and personal computers. However, there are other uses for it too. These devices will be able to take us away to a number of different places and allow us to explore them. This could be in a game but it might also be to a real place like a Caribbean island or the top of a mountain. I recently experienced what it's like to be a stunt pilot using virtual reality. The ride was as exciting as a real one I once had with a slightly crazy pilot friend of mine. You could have that experience from the comfort of your own home which means you're not actually putting yourself in any danger. Virtual reality offers people a chance to experience things they may not have the chance to experience in person. Imagine giving an ill person in a hospital the chance to go for a walk in their favourite park and listen to the sounds of birds singing. That's likely to help them in their recovery. People with disabilities will have freedom of movement and will be able to visit places that, in reality, they cannot reach.
Another important possibility is the chance for us to really understand situations we don't normally experience. Virtual reality will allow us to understand what it means to suffer from a disease

or experience war. We see images on TV or online these days, but actually feeling what it's like to be someone else in this situation will be a much more powerful experience. And this experience could lead to greater understanding between people from different backgrounds and us helping each other much more.

4.11

E = Examiner N = Nada

E: OK, can you start speaking now? I'll tell you when the time is up.
N: I can type quickly. This means that I type without looking at the ... er ... keyboard. I look at the ... the screen and see what I type. At school, it took me a long time to type my homework and I decided to teach myself how to type. I found a program online and I used it to learn. I practised for about twenty um no, maybe thirty minutes every day for, I guess, three months, and then I could type. I'm not perfect but I'm ... I'm quite good. How might it be useful in future? Well, I guess it will be a useful skill in my job. I want to work at bus ... er in business so I'll have to use a computer a lot. If I type quickly, work will be easier. Also, when I look at the screen, I can see my mistakes and correct it ... er them. Before, I looked at the keyboard when I typed and then later saw all my mistakes on the screen. It was very annoying! So, this skill will save me time in future.
E: Do you think other people should learn this skill?
N: Hmm, I'm not sure. If you use a computer a lot then I guess, yes, it'll be very useful for you. And most people do use a computer at work or university. But if you only use a smartphone or tablet computer than you probably don't need it because you tend to use just your er ... er ... thumbs to type. You don't need to type with all your fingers like on a PC.

4.12

Examiner: Do you think other people should learn this skill?

Module 5

5.1 and 5.2

1: I suppose that some paintings are well known, almost like a celebrity. To begin with, when a painting sells for a lot of money, they feel like they should like the painting. Also, a lot of the people who go to art galleries are tourists, not art lovers, and they go for the same reasons that they go and see the buildings. They want to take a photo, or be able to tell their friends that they were there. So that's why these paintings are really popular.
2: I think that art was easier to understand in the past. Firstly, you could see the faces and scenes and they made you feel happy or scared. These days a painting of a potato sells for a million pounds, and you need an expert to tell you why it's special. And secondly, a lot of the time they don't even make things. They just put things from the house in an art gallery and call it art. Those are the two main reasons why I think the quality of art has gone a bit downhill lately.
3: No, I think it's wrong to make people pay to go to art galleries or museums for the same reasons that we don't make people pay to go to school or to use public libraries. These places are educational. They don't exist for entertainment and parents shouldn't need to think twice before taking their child to learn about their country's past. That's why I believe that they should offer free entry to galleries.
4: I've never really thought about this before, but I guess that the price of paintings keeps going up, so the owner feels more confident that they can sell the painting for more than they paid. Then I suppose it's also much nicer to own a beautiful piece of art than just having the money in a bank account. You can look at the painting and enjoy it in your home every day. For those reasons, I think a lot of people think it's a really good thing to buy art.

5.3

I think it's OK / that we spend a lot of money / on art galleries. / I mean, / there are some objects / in a country's history / that are so important, / we need to keep them in that country.

5.4

1: Experts generally agree / that if national treasures / are in the hands / of the governments and museums, / everyone can go and see them.
2: A lot of people have suggested / that these national treasures / are essential for our culture.
3: Few people really want these objects / to end up decorating the homes / of the rich.
4: So, / I think it's important / that we use public money / to protect these objects for future generations.

5.5

Professor: Many people believe that they can't understand art, that's it's something wildly complicated, but with a few simple lessons, they can. The best place to start to understand art is with the two most basic elements – lines and shapes. Of course, colour is also essential, but we'll be looking at that in next week's talk.

5.6

Professor: Let's start by looking at lines. Can you all see this picture? OK, well, we'll start with vertical lines. There are very obvious vertical lines in the houses, the lamp posts and this very tall building at the back. The artist is using these in order to give a sense of great height to objects. It's a method that emphasises that this is an urban scene, and the humans are really very small, perhaps even unimportant in this world.
What makes this painting rather special is the feeling that, despite the setting this is actually a very relaxing image. What is the source of this contrast? Well, we have this horizontal line going across the sky towards the middle of the picture. This is a key source of calm. It's also echoed in the wider lines of cloud above. These shapes help to relax the image. Of course, we don't want it to be too relaxing, and there's still a small place for nature in this scene. The curved lines of the clouds and sun are in contrast to the straight lines of the man-made city below, and this gives a sense of movement to the picture. Without the clouds, you might feel disappointed in the painting, it would feel very still, as though nothing was happening.
It's not just the clouds that liven the scene up. The lines that really dominate the picture are the diagonal train tracks coming up from the bottom towards the middle. They're very dramatic. It's very important to have these lines because otherwise, without them, you might lose the feeling of energy in this picture. Perhaps there would be too little happening.
And it's not just the railway tracks that are important. The buildings in the foreground in this picture look a little irregular, they're not quite right. Supposing we focus just on the form of these roofs, and ignore the walls. If we follow the top lines of those into an imaginary distance. Many of these shapes are also going in the same direction as the tracks. The shapes stress a point that the artist wants to make, making us look in a certain direction.
Now, what happens if we follow all these lines to the point where they meet? It's always natural to follow lines and see where they go, and the artist is clearly using this technique to direct our attention. In this case, we can see that there's a city in the distance. That is where the excitement is. That is where this rather lonely man is going.

5.7

Professor: OK, so a lot of artists as well as engineers are looking into the possibilities of 3D printing these days. Before we look at some examples of artwork printed in 3D, I want to give you an idea of how these machines work. Now, we have a picture of a basic machine here. You start by making a computer image of what you want to print out. In order to do this, you'll need 3D design software. There are a lot of digital modelling tools out there, depending on how complex you want your model to be.
If you're not confident programming computers, you can actually buy a programme that will give you ready-made shapes. You simply can cut and paste them onto the screen to build your design, and it can be an efficient way of making a computer image. In this case, it's important to make sure that the software you use allows you to see the final object before you send it to the printer.
One of the most exciting things, I think, about 3D printing is that there is such a large variety of different objects that you can build. As well as many different shapes, there are a range of materials you can use to print from. The most obvious is polyurethane materials such as plastic, but the machines also let you print with rubber, paper and many more. Printer processes vary, but one method is common in 3D printers for home use. When the printer is told to print something, a filament – which is just a small string of the material – is squeezed through the print nozzle. As it goes through, materials like plastics or metals need to be melted bit by bit in the nozzle itself. Then the hot material is sprayed onto a platform beneath the nozzle.
To build an object, the printer makes a pass, much like a document printer does, leaving behind either a small amount of the material in little dots or a gap. However, in contrast to regular printers, it adds more layers on top of the first, and these are joined together to create the finished product.
You also need to plan ahead. Don't leave your printing to the last minute, as it's a slow process. The average printer nozzle is approximately nought point nought one millimetres thick, so supposing

you want to print even a fairly simple design, you'll actually need to give the machine a few days to complete its job. That's going to take a bit of planning!

5.8

M = Man W = Woman

M: OK, so we need to talk about how vending machines have developed over time for this presentation.
W: I know! I found a great website belonging to a guy who actually collects vending machines as a hobby.
M: Where does he keep them?
W: He's made a kind of museum in his back yard where he displays them.
M: I suppose the first vending machines were those old newspaper boxes that you see on the sidewalk in New York in old movies.
W: Actually, the earliest source of a vending-style design is much older than that. There was a machine created in the first century by a Greek engineer. It sold pure water. When you put a coin in, a kind of platform became unbalanced and released the drink into a pan below.
M: Wow. I thought they were about a hundred years old or so. Actually, I've got a website here about the first modern vending machine, a mechanical model, which is what we think of these days. In this case, it dispensed stamps at a time when the postal service was really important, and was popular in England. It was invented in 1867, and the company that made it went on to include postcards and envelopes, but that wasn't until much later, once a system had been set up to install and re-fill the machines.
W: Going back to this guy who collects vending machines, he's got some nice illustrations of how a gumball machine works. I mean, it's actually a very simple design. When the company that put the machine in place needs to fill it, there's a key that they need to open the lid at the top, and then they can pour the gumballs in.
M: Huh! It says here that the first gumball machine invented by the Thomas Adams Gum Company came shortly after the British design, but it was probably more important and more famous because it added game elements to the machine, giving people more of an incentive to buy. I think we should include that, because it's fairly easy to see how it works.
W: OK – go on. How does it work?
M: Well, the customer puts in a coin, activating this crank system inside the gumball machine. In contrast to the popular view that the correct coin is judged by size, actually, all of those early machines judged the coin by its weight. Those early gumball machines are a good example of this. The coin pushes down a small lever, which allows the person to turn the crank manually. Without the coin, the lever blocks the crank.
W: Right, I can see that on the diagram. Often those early models also had small figures that moved every time someone bought gum from the machines, and of course kids loved that.
M: Hmm, we don't have that on this image. But we do have the way that the gum was dispensed. The hopper let the gumball drop, but in order to get to the gum the customer had to turn this handle, unlocking the candy door at the bottom, which was also kind of fun.
W: Yeah, you know the best thing about those old machines, though? It says here, that the manufacturing process wasn't that accurate on the early models, and if you were lucky, multiple gum balls, rather than a single gumball used to drop down. That sounds like the best thing to me!
M: OK, so do we have any other types of vending machines, as well as the mechanical vending systems?
W: Not really, but I think that those old newspaper vending machines are worth a mention. They were easy to cheat because the customer paid, then opened the door, giving them access to all the newspapers inside. In other words, they could take all the newspapers out, leave them on the side, and block the locking mechanism so that the door stayed unlocked. That's why they were known as honour systems, because people were trusted to do the right thing and just take one paper, and put the rest back.
M: In a lot of ways, the majority of vending machines today sell the same kinds of products as gumballs. For example, products needed to be cheap, and something that wouldn't go off quickly, so that the company wouldn't have to worry about re-filling the machines regularly.
W: Mm … I don't know about that. I mean, one company in Atlanta set up the world's first car vending machine in 2013, and I know that in Japan, they sell artwork by machine in the galleries. Neither of those products is cheap. Other companies sell products with short shelf lives, like fresh milk.
M: OK – I think we should mention that things have changed. Vending machines are still mostly found in public buildings, like schools or sports centres, but it's interesting that you mention Japan because they seem to sell everything by vending machine these days.
W: You're right, they even sell hot meals there. And there's a vending machine for every twenty-three people in the country, in contrast to the United States, which is more typical, with around one for every eighty-three people.
M: Can you imagine if we get to the state when it's one machine per person?

5.9

E = Examiner A = Aisha

E: What are some of the differences between physical toys and online games?
A: I think that online games are very good for young people. They learn to play together … to co-operate. But they can be bad … bad for the health, especially if children sit down all the time. In a physical game they can move and play and that's better when they're very young.
E: How do toys and games develop children's social skills?
A: I think that toys can be very good for young children's social skills. Very young children play with their toys and they talk about what they are doing. Older children always want to play with another person, so it is only natural they will talk with those children. They also play in teams.
E: Why do some toys become more popular than others?
A: I think the popularity of toys comes from the films. They see a film like Frozen, and they want the doll, or they want the … the puzzle. You see a lot of books in the bookshop that are not interesting, but they have the character of the film on the front and so children want it.
E: In what ways can toys become educational?
A: I think any toy can be educational. Sometimes if you just give children a box, they play with it and use their imagination. Even animals play when they are young. It's how they learn to do things for real when they're older. Most toys can be educational, but of course there are some that are specifically designed to help children learn, like science sets.

5.10

Aisha: Well, in my opinion, online games are very good for young people. The main reason I believe this is because with online games, they can learn to play together and cooperate with their friends. However, it's not all good, and they can be bad for the health, especially if children sit down all the time. In a physical game they can move and play and that's better when they're very young, so I think they're both good, but for different reasons.

5.11

I do think that toys and games can develop social skills. When they play with cars, or dolls, young children usually talk about what's happening. If they play games, they have to establish rules, and decide how to judge the winners. So I think that these games are very useful.

Module 6

6.1

Marta: Because I wanted to visit a culture that's very different to my own, I went to India – New Delhi and the Taj Mahal, actually. I'd seen a documentary on TV about the Taj Mahal a few years before and so I did some research about it. The whole area looked interesting – that's why I chose to go there. I went with one of my friends from school because we're close and we like the same things so I knew we'd have fun. The first thing we did was go to the Taj Mahal. The Taj Mahal is an interesting building and its history is interesting too. In New Delhi itself, there were some interesting places where we spent our time, for example there are a lot of markets in the city which sell a lot of different things – clothes and food for example. We bought a dress each because people in India wear interesting clothes. Um … er … We … We bought some spices to take home, and we tried some of the, er, interesting food. I wanted to know if it's the same as Indian food in my country. It's not! It's much hotter! One of the things I didn't enjoy was the crowds. There were people everywhere – more than in my capital city. I didn't like walking around much – but it was still an interesting experience. We certainly had to be careful crossing the road! All in all, we had an interesting time and I would recommend it.

6.2

Marta: I'd like to tell you about my trip to India. I wanted to go somewhere very different to my country so I could learn about a different culture. I'd seen a documentary about it on TV. The whole area looked spectacular so I decided I wanted to go there. I went with one of my friends from school. We're good friends so I knew we'd have a good time together. The first thing we did was go to the Taj Mahal. The Taj Mahal is a gorgeous building and its history is fascinating too. After the Taj Mahal, we went to the capital city of India. In New Delhi there were some exciting places, for example there were a lot of markets in the city which sell a lot of different things, like clothes and food. We both decided to buy a new dress because people in India wear pretty, colourful clothes. We also bought some spices to take home and we tried some of the tasty food. It's not the same as Indian food in my country. It's much hotter or ... or ... spicier in India!
Unfortunately I didn't like the crowds very much. Wherever you went, there were people everywhere. The population is much higher than in my city. I didn't like walking around because of this but I guess it was still an interesting experience. We had to be very careful crossing the road though! All in all, we had an amazing time and I would recommend it.

6.3

Mubarak: I went to New Delhi last year with my parents. Cities in India are more crowded than cities in Al-Alain where I live. Some people say they're overcrowded but I think they're very lively and colourful. In New Delhi we went sightseeing. We saw some historic buildings. For example there was a really pretty old fort. We saw some modern buildings too, such as new shopping malls, so it was a ... a very convenient place to be. I preferred to visit the old markets there though, to see some history. I'd heard that real Indian food was amazing so I wanted to try it. Of course, I don't think that Delhi is a perfect city. Some of the buildings were old and a little unattractive. And the facilities there were sometimes quite basic. The city was full of cars, bikes and people too – which was exciting! Two or three people were on the bikes at one time – it didn't look terribly safe to me but it was OK for them. Some of the streets were narrow so it was a bit stressful to walk around with so many people. But it was an absolutely amazing place to visit and I'd quite like to go back again, maybe to a different city next time.

6.4

Lecturer: [1]When we're cold, the first thing we do is shiver which causes us to produce a greater amount of **heat**. [2]Our blood withdraws from the skin areas to the central part of the body because it needs to concentrate on keeping the really **important** parts of our body warm, like our heart, our kidneys, our liver, etc. This means our skin starts to feel cold. It also goes red as our blood vessels expand to try to keep it warm. [3]When it feels very **icy**, we begin to lose the **cells** in our fingers, toes, nose, ears and cheeks. [4]These can soon be replaced if you find warmth, but if you don't then they **quickly** die. This is called *frost bite*.
Not everyone feels temperature in the same way. [5]The difference between a woman's core body temperature and her skin temperature is **bigger** than the difference between a man's, which means a woman is more likely to have cold hands and her feet are more likely to get cold. Of course it isn't just an issue of gender, it can also be an issue of age. [6]**Recognising** differences between warm and cold weather is also more challenging for the elderly which can put them in danger.

6.5

N = Narrator L = Lecturer

N: You will hear a woman give a talk about humans adapting to cold temperatures. First, you have some time to look at questions one to six.

L: We humans are tropical animals. We aren't particularly built for the cold but we have managed to adapt so we can live in very cold areas. We survive freezing temperatures by eating the right kind of food so we have enough energy to burn and keep us warm. We also make sure we wear the right clothes. When I was young, my grandmother used to say, 'There's no such thing as bad weather, only bad clothing' and to a large degree that's true. We adapt to colder environments by covering our bodies in layers of the right material that will keep us warm such as wool. The final thing we do to survive cold temperatures is to build the right kinds of homes that we can heat and that protect us from the cold outside air.
There are people in Siberia in Russia, for example, who regularly cope with outside winter temperatures of around minus 25 degrees this way. And there are towns in that area that have recorded below minus 60 degrees in the past. I've recently been to Yakutsk and believe me, life there goes on as normal for the most part, even though it's freezing. Parents go to work and to the shops, and children go to school but of course everyone stays inside when it's particularly cold to keep warm. They don't go out for more than five or ten minutes. And when they do go outside, they wear layers of very warm clothing. In fact it can take them quarter of an hour just to get dressed! The Yakutsk people have lived in that region for around eight hundred years so they know how to prepare for and survive life in the cold.
But what about those of us who don't live in extreme places like Siberia? Well, if the temperature drops to zero, we won't be in any immediate danger, even if we're wearing only light clothing. However, for this to be true, it has to be a very still day with no moving air whatsoever, because there's something that can have a significant impact on our survival, and that's wind. The thermometer might say minus twenty-five but if the air is moving, then it'll feel far chillier. In fact, a twenty-five-mile-an-hour wind would make the temperature feel more like minus sixty-six and you'd be in danger in just seconds. So the right clothes and shelter are incredibly important, especially if a gale has just started blowing.

6.6

N = Narrator Z = Zoo worker

N: You will hear a zoo manager giving a talk about zoos. First, you have some time to look at questions one to ten.

Z: I've been invited here today to tell you a little bit about the conservation work that we do at Milton Zoo. The zoo was started by a family who first had animals in their garden, where they also grew and sold plants. The family's friends would visit just to see the animals so they decided to open a zoo to the public. The development of the zoo since then has been huge. Altogether it's around one hundred acres in size, making it one of the largest zoos in the country. We have almost ten thousand animals living here, with a total of three hundred and twenty-three different animal species. Last year we had around one million visitors in total during the year which was a record.
Our latest addition is a new baby elephant which was born just over two weeks ago. He's part of our very special breeding programme which was started at the zoo to help ensure endangered species are protected from extinction. You may have heard in the news that we were trying to breed giant pandas. Unfortunately, we weren't successful so we took them out of the programme but we are expecting a new tiger cub in the next few weeks. As tigers are dying out in the wild, this is really great news. We also donate money to a breeding centre in Kenya to help the locals try to save the black rhino. We help to protect the mountain gorilla in its natural environment too although you wouldn't see those animals if you visited Milton Zoo today.
I'm really proud of the work that we do at our zoo and some of the work that goes on in animal organisations around the world is incredible. Zoos are a fantastic source of family entertainment which also seek to educate visitors about different species. For many visitors, it's the only opportunity they'll get to see such animals in real life. Of course, the good zoos take animal welfare very seriously and the majority are charities so any profits they make are spent on conservation in the wild. As well as this, zoos can teach us about different types of wildlife through research. This would not be possible in the wild and zoos are the only place it can happen. Over the last few years we've discovered so much about these animals and now we can really provide the kind of medical assistance they need to live longer.
Having said this, zoos have been controversial since they first started. Animals which should be able to run free are stopped from doing this so I think it's important for us to, every now and then, ask ourselves if zoos are doing the right thing and whether their role is the right one. There was a study done recently that made me wonder about this. The researchers looked at the total number of animals in zoos around the world – which was around 2.6 million animals. A lot, right? It said that only a quarter of bird species are kept in zoos which means a large majority are not being protected. And more worryingly, just twenty to twenty-five percent of endangered animals are kept in zoos. Now, there may be plenty of reasons for that. An endangered animal often has difficulty breeding so it could be that zoos are unable to breed them. But we do have to be careful that we're not just keeping and protecting those species that are particularly attractive for visitors, whether that means physically cute or just of special interest in some way. Of course, we need people to come to our zoo so we can afford to keep it going, but we also have a responsibility to protect as many animal species as possible. And I do believe at Milton Zoo we are going in the right direction.

6.7

Jorge: I'm going to talk about a kind of monkey in my country. I'm er ... not sure of the name in English, maybe a er ... spider monkey. Anyway, it's quite large for a monkey and it has a very long tail. It also has long arms and legs. It's brown and er ... it has ... um ... hair, you know, animal hair, I don't know the word. It lives in the rainforest in South America. It usually lives high in the trees. I think it's a um social animal because it usually lives with other monkeys. Unfortunately the rainforest has go ... er disappeared in some areas and so sometimes the monkeys have to move. Sometimes the monkeys live in people's homes. That's not typical but some people think it's good to have a pet like a monkey. They're not easy to have because they live for a long time – over thirty-five years I think – and you have to spend a lot of time looking after them. I like these monkeys because they're lively and move around a lot. The rainforest is a beautiful area of my country and a lot of wildlife lives there. The monkeys can enjoy life there too and live together with others. Actually, I like monkeys because they're similar to humans. They live with family and friends and have fun together. I think this is a good way to live.

Module 7

7.1

1: There was one time when I went on a journey with my friends. I was in high school at the time. It was actually not that far away, but we had to go by road and by boat, rather than flying, and it took forever. It was worse on the way back because the coach broke down and we had to wait by the side of the road for two hours for another one.
2: I think something has to change with the railways in my country. The trains have become busier and busier and I get the impression that it'll soon be too much trouble to travel by rail, because they're always too full, or they're delayed. I suppose they'll have to make bigger trains, or faster trains – that would be great, actually.
3: I definitely think that travelling by plane has become more difficult and takes longer these days. I can't say for certain, but I think the main reason is that security is so much tighter, and airports are so much busier, so you have to get to the airport a long time in advance.
4: I think that the current situation with road travel in the city centre is not sustainable, I mean, you can't get anywhere, and it's difficult for shops and businesses to receive deliveries of things.
5: Hmm, things haven't changed so much, but I think the main difference between then and now is that long journeys are easier – I mean, there are usually nice restaurants along the way on very long roads, and you have computers in your car that tell you where to go when you're lost.
6: Hmm, I haven't really thought about that because I've been so busy studying, but I suppose I'd probably go to Australia. It's a really expensive trip, you know, but I think it'd be so cool to see all the animals there.

7.2

Tour guide: You can see that like many cities, it's built around this beautiful harbour. If you look at the map on the wall here, you'll see all the main tourist spots are clearly marked. We're currently here in the north west of the harbour, in the Central Business District, and this is a very modern area, but a lot of the city around the harbour is much older.

You can see on this map that to the east of here is the Old Hall. That's just behind the main government office, which is still in use today and it has spectacular views of the harbour to the south.

To the right of the Old Hall is the Market, which used to sell goods that had just arrived from abroad. These days it's used as an arts centre, and is still very popular. We're going to get on a boat once we pass the Old Hall so that we have enough time to get round the whole harbour.

Of course, today people arrive by air, but in the past, shipping was the main route into the country. Here at the mouth of the harbour to the west, there's a pier that was used as a docking point for boats going out to this small island to the south east, which was used as a prison in the past. These days you can take a boat from the pier and cross the harbour much more quickly than driving round, and that's what it's mainly used for today.

The main island is here in the centre, but many larger ships had to travel around the waters north of the island because the water on the other side was too shallow, and was the fishing area.

We'll be taking our tour today around the southern side of the harbour because to the southwest of the central island, there's a viewpoint, where you get spectacular views of the city. We'll be stopping there so you can take photos or just sit and enjoy the incredible sights. OK, so we'll get started now, unless anyone has any questions.

7.3

Tour guide: So, welcome to our tour of the old Customs House and Immigration Centre. As you can see, it's not used now, but immigration played an important part in this country's history in the eighteenth and nineteenth centuries, and so the building has been kept for historical reasons.

Let's get started. Can you all see the map? Well, as you know from your boat trip this morning, the old Customs House was located in the middle of the harbour, surrounded by the sea. You arrived here today pretty much the same way people did back then. As you can see, it's a kind of horseshoe shape, and we're on the pier, which leads us to the eastern half of the island and through the entrance that people once used.

If you look at the map on the wall here, you'll see that there's an eastern half and a western half of the immigration centre. Originally, there was just this smaller part of the island here in the east. However, it quickly became too small to cope with the increasing numbers of people who were arriving. So they increased its size by building a second extension here on the west. Our tour starts today here in the eastern section.

So, people had to get off the boat, and leave all their luggage behind. They were given a ticket with a number on it, and they had to collect their suitcases later. This was because as we move into this building here to the east, you can see that it's marked out so that people have to queue along a zigzag path to get to the desks at the front. This was the arrivals hall, and is possibly the most famous building on the island. Here, people had to go through legal checks, answering questions, such as their names, whether they were married or not, and where they planned to go in the country. It was often a long wait.

Then from there they had to go into a smaller room behind this hall, which arrivals used to refer to as the baggage room. This is where their suitcases were delivered from the boats, and so they could exchange their tickets for their luggage. Most people only had one or two bags, anyway.

After they collected their suitcases, they moved to the northern part of the island. As you can see, there's a long hallway here which functioned as the old ticket office. People were divided into groups depending on whether they were going north or south after they left the island, with different boats waiting to take them in different directions. If you wanted to go north you had to make your way around the outside of this building, and so everyone had to come down these magnificent stairs, where the lucky ones had loved ones waiting to meet them. This area just south of the stairs became known as the kissing post, because so many people were happy to be reunited with family. From there, it was a short walk to either dock to catch the boat off the island and onto the mainland.

Of course, as more people started arriving, more staff were needed to work in the Customs House and that's why this second half of the island was built onto the west, with the work completed in 1906. This was the administration block, where the lawyers and other officials worked, although much later it became used as a hospital wing. So we're going to go over there now and I know that some of you want to look through our records of your family members arriving here.

7.4

N = Narrator T = Tour Guide

N: You will hear a tour guide giving a talk on Te Papa, a museum in Wellington, New Zealand. Read questions one to six.

T: The Te Papa Museum is New Zealand's celebration of old and new culture. The building itself took four years to complete. One of the first exhibits you probably saw were the three spheres which you passed to the right of the entrance of the museum before you came in. They're made out of rock from a volcanic eruption around seventy-five thousand years ago, and they represent New Zealand's commitment to respect our land.

You'll find lots of things here that show the values of New Zealand, but before we make our way around the museum, can I ask you to leave any big coats or any large bags here in the cloakroom on the left of the main entrance hall opposite the information desk before you go on to the rest of the museum.

Now, to get from the south side to the north face of the building you need to walk through our temporary exhibition room. This is to the left of three equal-sized rooms. I can see a lot of you brought kids with you today, and you might want to turn right as you leave that room, because the visitor centre is just next door. If you're here with kids, you might want to go and have a look at the activities we have

on for the little ones today. There's also a gift shop just the other side as you walk towards the east of the building.
It's a beautiful day and I recommend our outdoor facilities to you, too. If you go out the north-east exit, there's a beautiful wall that side of the building which is decorated with images of the sea. They're really quite spectacular and shouldn't be missed.
To the south-west, as we look towards the city, we have our beautiful gardens. Here you'll find a traditional Maori cave, which is located just north of the centre of the gardens and it's well worth a visit before you leave. There's also some action going on in our fossil dig towards the south-west end of the gardens. If you find it hard to get around the gardens, though, you can always enjoy the incredible views of the gardens from our café located at the far western end of the northern building. They do a great lunch with locally cooked food. And if you have any more questions, you can find me here at the information desk all day.

N: Now read questions seven to ten.
T: So, we have a fantastic range of exhibitions here at Te Papa, but the building itself was carefully planned to reflect the history of our nation. There's a good reason why the building is divided into the two halves, both with a very different feel to them. The north face of the building is covered in light brown walls. It embraces the environment around us: The sea, hills and the sky. That's because it represents the beauty of the island, and celebrates the rich geography and traditions. The south side of the building faces the modern city and is covered with walls painted in strong, lively colours. It celebrates what we call Pakeha, or a European focus, and the square spaces are similar to the order European settlers followed and the laws they introduced. In the centre, between the two buildings on the next floor up, is the Treaty of Waitangi. It's the nation's founding document after we became independent. A special exhibition there explores what this process has meant to the people both old and new who live here.
The Marea is located on the top floor. This is the name of the special gateway, where visitors wait to be welcomed by the home people. The Marea is unique because it is controlled by different local groups at different times. Every few years, we invite a different group to take charge of our Marea here in Te Papa. The Marea is a gateway between the different cultures of New Zealand, and it's also a place where we New Zealanders can welcome visitors from overseas, too. So don't leave the museum without.

7.5

E = Examiner C = Camille

E: Do you like learning different languages?
C: Yes, I like learning different languages.
E: Why?
C: I like different languages. I think you can talk to other people. It's interesting.
E: How did you learn to speak English?
C: I learnt to speak English at school.
E: What are the benefits of learning a language in the country where it is spoken?
C: I think you can learn better in the country where a language is spoken.
E: Why?
C: I think that if you go to the country, you will speak to the people. You will learn very fast. But it is very expensive to go to another country.
E: What language would you like to learn in future?
C: I would like to learn Chinese.
E: Why?
C: I will learn Chinese. It is a very useful language. I think it is difficult but I think it is a very important language in the world today.

7.6

E = Examiner C = Chiara Z = Zhiang

E: Do you like learning different languages?
C: Yes, I enjoy learning another language. Er, ... because ... um because ... is ... useful for me and also it's very interesting for me.
E: Do you think it's easier to learn a foreign language if you live in the country where it is spoken?
C: Yes and no. I suppose I have to say that it's very difficult ... um to live in another country, even though I chose to live abroad. ... When I came to England to learn English, it was ... very complicated to understand people. ... In England they talk very fast in the streets, compared to the teachers, and I still have problems. But I hope that in the future ... I will um ... overcome this and be able to speak better than now. I hope. If I study hard.
E: What language would you like to learn in future?
C: What language would I like to learn in future? I think I will learn Arabic. Unlike Italian, a lot of people speak this language. If I learn to understand it, I can travel and learn more about art, and the um ... ancient ... the ancient peoples of that region. I think that's a good reason to um ... pick up this language.

E: Do you like learning different languages?
Z: Yes. I like learning languages very much. I learnt English. It was very hard. I think I spent about ten years studying. Yes, I studied for ten years. I still don't speak English very well. I think you can hear.
E: Do you think it's easier to learn a foreign language if you live in the country where it is spoken?
Z: I don't think so. I think it's very difficult. In China, we had a lot of help from teachers. In England I don't have help. I have friends, but all of my friends are from China. I don't practise so much.
E: What language would you like to learn in future?
Z: I think maybe Spanish is a good language. A lot of people speak English and Chinese and Spanish. I think I can speak to a large population around the world. First I need to study English. I want to study computer programming and I need to be very fluent.

Module 8

8.1

1: educate, education, educative
2: responsibility, responsible, responsibly
3: microwave, microwave, microwaveable
4: inform, information, informative
5: govern, government, governmental

8.2

Well, it's true that food labels can help to educate people. They tell us what kinds of things are in the food we buy, like the number of calories or the amount of salt so we can act more responsibly and eat a more balanced diet. Having said that, I'm not sure labels do actually result in healthier eating because most people are just too busy to look at them – I know I rarely do. For example, microwaveable meals have a lot of salt in them. While the label's there to help me choose the healthiest option, I never read it. So, although food labels can be informative, they don't actually work and I think we should look more closely at the manufacturing process. We should ask the government to create new laws about quantities of salt, sugar and fat in food products.

8.3

They tell us what kinds of things are in the food we buy, like the number of calories or the amount of salt.

8.4

1: It's true that food labels can help to educate people. / Having said that, / I'm not sure labels do actually result in healthier eating.
2: While the label's there to help me choose the healthiest option, / I never read it.
3: So, / although food labels can be very informative, / they don't actually work / and I think we should look more closely / at the manufacturing process.

8.5

1: Dr Givens. G-I-V-E-N-S.
2: Khloe. K-H-L-O-E.
3: Berkeley Road. B-E-R-K-E-L-E-Y.
4: Stephen. S-T-E-P-H-E-N.
5: Mr Mathews. M-A-T-H-E-W-S.
6: Lilli Park. L-I-double L-I.

8.6

1: Mr Freight. That's F-R-E-I-G-H-T.
2: Harringdon Road. That's H-A-double R-I-N-G-D-O-N.
3: Alexander Reis. That's R-E-I-S.
4: Warvick Street. That's spelt W-A-R-V-I-C-K.
5: Luggen Surgery. That's L-U-double G-E-N.
6: Jardine Pharmacy. You spell it J-A-R-D-I-N-E.

8.7

1: My first name's Emily and my surname's Jamieson. That's J-A-M-I-E-S-O-N.
2: I used to live in Munson Lane but now I live at 21 Croker Park. That's C-R-O-K-E-R Park.

3: I was born in a place called Gifford but moved from there when I was ten. You spell it G-I-double F-O-R-D.
4: My first job was at Utterwich Dairy. You spell that U-double T-E-R-W-I-C-H.
5: I've recently moved to Flat 3, Binnington Drive. That's B-I-double N-I-N-G-T-O-N. Before that I was living with my parents.
6: The golf course is on Fairbrice drive, just off Brightling Avenue. That's F-A-I-R-B-R-I-C-E Drive.

8.8 and 8.9

N = Narrator W = Woman M = Man

N: You will hear a conversation between two neighbours about local shops. First, you have some time to look at questions one to seven.
W: Hi Max, I wonder if you can help me.
M: Hi Olivia, sure what do you need?
W: Well, I've invited some classmates over for dinner tomorrow night and I need to get some food. I don't really know the area that well yet. Where's the best place to get good, fresh groceries?
M: Ah, right, OK. Well there aren't that many options within walking distance but actually you should be able to find what you need. Firstly, there's the big supermarket – Price U Save. That's probably the biggest and most popular shop in town.
W: Right, where's that?
M: It's on Thompson Road, just off Red Lane.
W: Is that with a P?
M: Yes. It's T-H-O-M-P-S-O-N.
W: OK, great. Would you recommend it? I mean I know it's popular but that doesn't always mean the quality's the best, does it?
M: No, that's true but actually it's not bad. They sell everything there and every day they have a number of different offers so it's very reasonable. I usually do my weekly shop there and I have no complaints.
W: OK, I'll go and have a look.
M: There's also Daisy's Delicatessen. It's named after the owner, Daisy. It's a specialty shop so it's not particularly cheap but the food's high quality. It's on Bridge Street, opposite the bank. She used to sell the best cold meats in town but not anymore as her customers tend to be vegetarian. I have to say that her salad is particularly fantastic and I'd highly recommend it but she sells other stuff too.
W: Well, two of my classmates are non-meat eaters apparently so I'll definitely check that out. Is there anywhere else?
M: Yes, there are a couple more places you could try. The first one is Eccles Corner Shop.
W: Eccles? How do you spell that?
M: E-double C – L – E – S. It's about a twenty-minute walk from here, through the park, down past the school and then right onto Rose Lane. It's recently been sold and the new owner's now selling locally grown fruit and vegetables. I think this is great because you can help local farmers to make a living. The vegetables are fresh and organic. The only problem is that the shop closes at 5p.m. so you'll have to go during the day.
The final place you can try is the food market. It's called the Bishops Street Food Market because that's where it was for a long time but actually it was relocated last year to the High Street – towards the bottom. The owners decided to keep the name because that's what everyone called it. It's confusing but hopefully it won't be moved again for some time! You can find more food there from local suppliers. You can also buy ingredients that aren't common anywhere else. I'd definitely recommend it if you're going to cook something exotic.

8.10

N = Narrator M = Manager W = Wei Liu

N: You will hear a student called Wei Liu, talking to a restaurant manager about a part-time job. First, you have some time to look at questions one to five.

M: Hello, Jobs 4 You, how can I help you?
W: Yes, I'm looking for some part-time work. Something in a restaurant, maybe.
M: Are you a student?
W: Yes, I'm in my second year at college so I'm only available in the evenings and at weekends at the moment.
M: OK, let's have a look at what we've got. Right, well, there's a position as a kitchen assistant available. It's at the Carousel Café down on Swann Street.
W: Sorry, could you spell the name?
M: Yes, it's C-A-R-O-U-S-E-L.
W: Thanks. So, when would I have to work?
M: Well, it says here that they need staff for Saturday and Sunday, so that would be OK for you, wouldn't it?
W: Yes, it would. I guess the job involves washing the dishes.
M: That's right. It says here they have a dishwasher though, so you'd load the dishes and take them out. Oh, but before you do that, you first have to clear the tables in the café and take the dishes into the kitchen for washing.
W: Fine. Is there anything else?
M: Bellamy's Restaurant is looking for waiting staff. That's not for the weekends though, that would be two evenings a week – Thursday and Friday. You do the things normally associated with that kind of job – taking orders and serving the food. There are also some cleaning duties too.
W: That sounds reasonable.
M: The final job we've got that might suit you is for a barista.
W: A what?
M: A barista, you know someone who serves coffee. This job is at a department store all day on a Saturday.
W: Oh, in Tanner's?
M: No, well, yes. Tanner's has a new owner and so the name recently changed to Millerby's. It's spelt M-I-double L-E-R-B-Y-apostrophe-S.
W: Great, thanks. What would I have to do there?
M: You'd need to make and serve hot drinks. They also sell cakes there so you'd need to bake them first thing in the morning. They're pre-prepared so you wouldn't need to be an expert – just put them into the oven.

N: Now read questions six to ten.
M: Now, the summer holidays are coming up and there are some temporary jobs available at a local ice cream factory. Would you be interested in those?
W: Oh yes, definitely. I don't have any plans. What kind of jobs?
M: Well, they're full-time jobs Monday to Friday but they're also temporary – for about six weeks. The first position is an unusual one. It's for a food taster. That's the person who checks that the ice cream has been produced correctly by the machines. It's a quality control job really. The salary's good for this kind of job at £15.30 but you'd need to take a test to make sure you have good tasting skills.
W: That sounds really interesting. I'm definitely interested in that one.
M: One of the best things about that job, I think, is the fact you can get involved in their creation programme. That's where staff experiment with different flavours to create new ice cream recipes. Wouldn't it be great if you could create a new ice cream flavour?!
W: Yes, absolutely!
M: Er ... the second job they're offering is food packer where you have to put packets of biscuits into boxes and then label each one. You need to be conscientious to do this kind of job. It pays £8.45 an hour which is obviously less than the food taster job, but if you stay for the whole six weeks, until the end of the summer, you receive extra pay. It's about one week's wages.
W: Hmm. That might be OK.
M: Finally, there's one more job and that's an office assistant. You'd need to be good with computers and a fast typist as you'd have to prepare reports. You'd also have to manage the customer database. It pays £12.50 an hour. As part of the job, you'd attend a course in health and safety. This training would be good to put on your CV and might help you find other work after the summer.
W: OK, well thank you very much. I will give it some thought.
M: Good. You can apply for the jobs directly on our website.

8.11

Yohei: I don't think they've changed a lot but there are some differences to when I was young. One thing is the TV. We have the TV on when we eat now and I don't think ... don't remember this when I was er ... little. I think we communicated more while we were eating, but now we often sit in silence and watch the TV! It's a bad habit really. Er ... another new change is cooking. When I was young, mothers stayed at home and cooked dinner but nowadays more women work so ... er ... people eat more convenience food. It's quite good in Japan as it's freshly made every day. It's not unhealthy but it's not as good as my mother's cooking.

Fatima: I think meal times will be the same as now because er ... um they don't cha ... they ... they haven't changed in the past. Er ... people eat together today and maybe they will eat together ... also in the future. It's important for our relationships. Maybe food we eat will change because ... er ... we eat ... er ... some food is different now. These days we're lazy sometimes and we eat easy food and this food isn't healthy. Some people are getting bigger now and maybe in the future we'll all get bigger. Or maybe healthy eating will be more important.

Module 9

9.1

Giuliana: I think it's important to be healthy. I try to eat a lot of fruit and vegetables. I like fruit and vegetables and it's not a problem for me. I also go running. I like to have fresh air. I prefer to exercise outside.

9.2

David: Of course, it's really important to be healthy. Well, you know, no one's perfect, but I started swimming a month ago, in order to get fit, and I feel better than I did before. It's making a huge difference. Finding the time has been hard, but if it's important enough, you'll make time.

9.3

1: Ancient medical practitioners depended on observation of patients alone to tell them if a herb or drug had worked to make them better.
2: Things changed little throughout the centuries until 1900. Around that time, the idea of testing in laboratories became common.
3: These early reformers were enthusiastic but lacked skill, as medical historians have pointed out, and their work was largely unregulated.
4: In 1938, all new drugs had to go through medical trials before they were given to patients.
5: Officials didn't state in the law exactly what tests chemists needed to do, but they had the power to stop any drug coming onto the market if they were unhappy.
6: A worldwide drug disaster in 1961 saw the introduction of new laws in 1962 bringing in much tighter controls on new medicines from that time onwards.

9.4

Man: OK, so do we have a definition of what a placebo is?
Woman: We have more information on one pill than any other and that's placebos. Placebos are substances that are made to look like medicines but they don't contain an active drug. Instead, a placebo is made of an inactive substance, such as starch or sugar. These have no medical effects, but the patient thinks they're real. Placebos are now only applied in research studies, but they're used in almost every drug test, and have proved to be very effective. Researchers have observed that in tests comparing placebos with active medicines, a placebo drug often performs almost as well as a real one, with patients reporting improvement in health. In fact, as many as one in three say that they feel better after taking the placebo.

9.5

N = Narrator W = Woman M = Man

N: You will hear two biology students talking about a presentation that they will need to give on placebos.
W: OK, so we have to do our presentation on placebos next Monday and we're still missing a lot of things. I think we should try and make it as visual as possible.
M: Definitely. It'll be more interesting that way. I've got some presentation slides sorted, but we need a laptop. Mine's broken at the moment.
W: That's fine. I can bring mine in from home, and we can connect it to the projector in the presentation room. What about handouts? I have some nice graphs that I think it'd be helpful to share, and I need to get them photocopied, but the machine in the library's broken.
M: Again? You'd think they'd get it fixed. I need to go to the department office tomorrow. If you can give me a copy before then, I can get them done on the machine there.
W: Great. OK, and we mustn't forget to include some photos in the presentation slides. I wanted to talk about Henry Beecher. He became the first to notice that placebos worked as a painkiller, after giving a mixture of salt and water to soldiers when he ran out of the real thing.
M: I heard about him last year. I expect there might be a photo online, but I know that there's a really good collection of photos in the science library. I'm sure I saw one of him in an exhibition last year. That'd be nice to include, too.
W: Definitely. I think that'd be brilliant to include in the presentation. Do you think you can get it?
M: Sure.
W: It'd also be really nice to actually have some placebos for the talk, and perhaps pass them around for people to look at. I've spoken to the administrator in the medical centre. They have a large store of placebos there. I thought it'd be nice to bring some in and, seeing as they're not actual medication, we don't need to get anyone to sign them out. They look very convincing.
M: Can we try them ourselves then?
W: No, they'll just be to look at.
M: Shame. OK, then I think we need to go into more recent studies from neuroscience. Did you find anything on that?
W: Yes, I did. Apparently, by analysing the brain, they've found that the placebo helps the brain to release natural chemicals, and this changes our brain activity. So it's not all in the mind, there's actually a physical response there. That brain activity is similar to what you would observe from the effects of the real drug.
M: Interesting. I found something similar. The brain activity that you usually associate with pain just shuts down. We should try and get samples of those brain scans.
W: I can look on the internet to see if I can find anything. There must be some research published somewhere.
M: OK – the last thing I wanted to include was something on Parkinson's disease. One of the main signs of Parkinson's is very low levels of the chemical, dopamine. But if you give a Parkinson's sufferer a placebo, the brain starts producing more dopamine in the body, and that helps to ease some of the symptoms.
W: Wow! Do you have any statistics on that? It'd make a really strong argument.
M: No, but I reckon I can get that on the internet, too.
W: Brilliant. I think this is going to work!

9.6

W = Woman M = Man

W: OK, so I think last time we met, we forgot to talk about the moral issues around placebos. The first key issue is the question of dishonesty. This is quite a shady side of medicine and a lot of doctors disapprove for that reason.
M: Yeah. The majority of doctors in one survey I read said that the whole job is about trust, and using placebos would just threaten that, so they would never use them.
W: And some doctors disagree that these drugs do anything physically. I found someone who said he found no evidence that placebos have any effect at all, unless you look at patients' reports. Then you start to see benefits showing up.
M: Hmm, that's a good point, but I think a lot of healthcare is all about making people feel better. As long as you're not ignoring a problem that's going to get worse, that's OK.
W: Well, the medical community doesn't agree with you. They've completely prohibited the use of placebos as a treatment for illness, no matter how trivial, and I think we need to mention that.

9.7

N = Narrator D = David M = Maria

N: You will hear a man named David and a woman named Maria discussing how friendships are formed in children. Read questions one to four.
D: I've just been reading an article on why we become friends with certain people and not others.
M: Was it any good for that project we have?
D: I think so. It's mostly about very young children at school, and says that there are common patterns observed in the way that friendships are formed. The main factor is close surroundings, in other words people who happen to be around. We're most likely to become friends with our neighbours, either in the sense that we live near them, or we sit near them in class or share an office. It's got little to do with pastimes or stuff like that which might come in later in life.
M: I don't know that's true anymore. I mean, even young kids are on the internet these days and make friends that way.
D: Apparently that makes little difference, at least while friendships are developing. If people hang out enough, they're able to decide if it's worth investing more there, and having a 'getting to know you' phase is still crucial.
M: But if that's true, if it's just about proximity, that's a bit weird. In most cases that kind of thing is decided by people in authority over you, like teachers. That's not really a basis for becoming best friends forever.
D: Well, no! But it's a bit more complicated than that.
M: I think there are other factors that predict how likely it is that a friendship will form. I met my best friend in my art class, and we both loved the teacher there. I read an article that suggested that we tend to relate how we feel with the people around us. So, if you're in a good mood when you're first introduced to a new person, you tend to connect that feeling with the other person you're with, and you have a much better chance of getting on together.
D: Hmm, that makes sense.

M: But that's not all, whether it's positive or negative, if you have something that unites you, you'll probably get on. The theory of 'homophily' suggests that a shared hate gives you both something to complain about and that can bring people together too.
D: Great. Have you got some notes on that?

N: Now read questions five to ten.
D: OK, so the task also requires us to compare children and teenagers' friendships.
M: I found something on children's friendships. They go through three key phases depending on their age.
D: That's interesting. I don't really remember that much about my friends from the very early days.
M: Level one is the first stage. That's when kids are four to seven years old, and is just about doing things together. They want a handy playmate at that age – someone who'll do things with them.
D: It must get a bit deeper after that.
M: It does. Around the age of eight to ten, kids start identifying a best friend. That's the second level, and at that age, it's all about trust and helping each other. Kids know they'll be the first to be invited to a sleepover, or they know their friend will come round their house, and that's an important phase.
D: I guess after that it's all about loyalty.
M: Absolutely. That's the level three stage, from about eleven years to fifteen. They want to know that if there's any trouble at school they've got someone they can count on to support them.
D: That also explains why people often change friends in the teenage years, I guess, they're testing out different people.
M: So we've been friends since we were teenagers. I'm not sure I see any of the patterns we've talked about in our friendship.
D: Well, we kind of look similar!
M: What?
D: I mean, neither of us is super trendy. When people meet, the way we look does come into it. For example, if I consider myself a bit geeky, and I see another person who seems similar, well, certain judgements are made on their appearance, and even if we don't realise it, the early phases of friendships are more likely to be initiated.
M: That makes it sound really shallow!
D: Yes and no. I mean that's how it is at the beginning, but then after that automatic rating phase, we start thinking, and we make decisions. We also adapt our behaviour a little bit to match what we think the other person expects of us.
M: So it's not all about looks? I've always thought we look for the qualities that matter to us in other people. If you value education, then you'll hang around with smart people. If it's about sense of humour, you'll look for someone who's funny.
D: That's also true. OK, let's start getting some of this typed up.

9.8

E = Examiner P = Pablo

E: You may start now.
P: An old person that I would like to describe is a lady who is a neighbour of mine. She lives in the same village, and she is really very old. I think she is … erm, how do you say? Well, she doesn't work anymore but she used to be a teacher. She's about ninety years old actually. She has a lot of lines on her face, and she has grey hair. I know her because everyone in the village knows her. She helps people, and when I was young, she used to cook for me, little things, like cakes, or biscuits. The best thing about her is that she's very kind, and she always says hello to the people as they walk past. Her memory is excellent. She remembers everybody's birthday in the village and sends a biscuit to celebrate. That's why I like spending time with her.
E: Do you have a lot of old friends?
P: No, I don't know so many, but I have a lot of aunts and uncles.
E: Do other people you know like to spend time with this person?
P: Oh yes, she's so popular. I think she's the most popular person in the village.

Module 10

10.1–10.4

E = Examiner C1 = Candidate 1 C2 = Candidate 2

E: What kind of rules do most people follow in their lives?
C1: Sorry, can you say that again?
E: What kind of rules do most people follow in their lives?
C1: What do you mean by follow?
E: I mean that you do what the rules say.
C1: Oh right, yes, well, good question. Er, well, we follow a lot of rules. Drivers have to remember and follow a lot of rules on the road. There are some rules in the areas where we live. For example, in my apartment block we have to park in only one place in the car park and we have to put our rubbish in special areas – we can get into a lot of trouble if we don't. Family has … families have rules, so in my home you have to take your shoes off before you come into the flat and we have to tidy up any mess that we make. My mum gets annoyed if we don't. I know some families has … have strict rules for teenagers about coming home in the evening and doing homework and so on. My parents were always quite relaxed with me but then I never really came home late or anything. Erm, what else? Er … There are lots of rules at school and at work. For example, when I was growing up, I had to wear a school uniform. It had to be a certain colour and the girls weren't allowed to wear trousers – just skirts. And of course you could not wear trainers or anything like that. At work, I have to look smart now too and wear a suit. And no trainers. So, we follow a lot of rules every day but we don't really think about it very much.

E: Why are rules in our society important?
C2: Could you repeat the question, please?
E: Yes, why are rules in our society important?
C2: Sorry, could you say it more slowly?
E: [Slower] Why are rules in our society important?
C2: Roles?
E: Rules.
C2: Oh OK, now I understand. Um … Well, we all have different roles in society and each person has more than one role. For example, I'm an engineer in my job and so that is one role. I have to work hard and do my job well. I also need to earn money to live. Life is expensive these days and I need money to pay for accommodation and food. Another role for me is parent. I have a small daughter so I must take care for her and teach her to be a good person. I need to teach her about the world and about society. This is probably my most important role. Er … I'm also a sister and I help my brother when he needs advice. We're both children and we take care of our parents who are getting older now. So, we call them and visit them a lot.

10.5

Typically when people enter a large ticketed event, like a festival or sports event, the process is the same. It's a simple process but one that needs to be done well and efficiently to ensure that large numbers of people can enter the venue safely. The first step for staff working at the entrance gate is to encourage visitors to queue in the right place and in an orderly way. So this might mean having rows of queues or those queues which go in a kind of zigzag like those you see at airports. The next thing they do is take the visitor's ticket and make sure it's not a fake. Then, they return the ticket or stamp each person's hand so they can re-enter the event if they later have to leave for any reason. The next step is to check the visitor's bags for any glass bottles or other items not allowed in the venue. They should do this firmly but also politely. Once that's done, staff then move onto the final stage in the process which is to hand the visitor's belongings back, send them into the venue and start the process again with the next person.

10.6

Narrator: You will hear a lecture on the topic of crowd control and risk assessment. First you have some time to look at questions one to eight.

10.7

Lecturer: You've all heard the phrase 'safety in numbers', right? But crowds pose risks too. All it takes is a few people to move in the wrong direction or run and people can quickly find themselves in danger. That's why event organisers need to plan their crowd control and have safety measures in place for anything that might go wrong. And that's where a risk assessor would come in.
The first thing an assessor should do is get lots of background information about the place where the event will be. It's really important that they know where boundaries lie, where buildings are and where exactly people will be. They should think about which areas are mostly likely to have the largest crowds too.
After that, the assessor needs to consider the crowd size. It's a good idea to plan for all eventualities so predict both few visitors and very large crowds. It's not just the size of the crowd that's important though. It's their actions too. Will they be standing, sitting or moving about? The more information the assessor has, the better the decisions they can

make so they need to leave plenty of time for this stage of the process.
Now the assessors can move onto analysing the large amount of information they have. They need to think about what might go wrong – by that I mean potential problems – and then the possible negative impact each one could have. Assessors should make a list of these. It's important here that the assessor doesn't underestimate the situation – they should make sure they consider all possibilities, because it's better to be prepared than not.
That brings me nicely onto the next step which is the evaluation stage. Each risk should be analysed carefully and then put into a category according to how serious it is – is it a high risk or a low risk, or somewhere in the middle? The assessor will then know which areas they need to worry about the most.
Next, the assessor needs to look at the risks and come up with a solution for dealing with each one and it needs to be as effective as possible so the risk is minimised. For example, if the event's organisers are expecting a large number of people to attend an event in a building, the assessor should make sure the organisers don't go over the maximum number allowed by counting each person as they arrive.
Risk assessors record their findings and make them available to all staff working at the event. It's usually in the form of a Risk Assessment Report. Staff need to become familiar with it before the event and use it as a point of reference during the event, in case of an accident or some kind of illness or emergency.
Organisers can't rely on employees reading it before the event so they need to make sure that employees are ready to deal with any problem that comes up. This is usually in the form of training which is given in person or online. The purpose is to help staff develop skills, knowledge and confidence they can apply on event day.
And that brings me to the final stage of the process. The previous stages can take several weeks if not months but during that time things can change. So a few days before the event you need to go back to the venue and give it one final check.
You can never get rid of risk completely when working with crowds but you can reduce it. It sounds like a lot of work, but remember that a little planning can go a long way. Following these stages can help risk assessors keep crowds as safe as possible.

10.8

Narrator: You will hear a professor giving a lecture on urban planning. First, you have some time to look at questions one to ten.
Lecturer: If you were able to make changes to your city, what would they be? Who would benefit from them? Who would suffer? Being an urban planner isn't an easy job. For example, you have to deal with inhabitants who disagree with your plans and fight for financial support, all of which takes time and patience. But essentially there are two key things that an urban planner does: firstly, make sure that new structures do what they're designed to do. A new block of flats should have the facilities to provide good, comfortable and safe living accommodation for instance. The second thing is to be sure that the structures are visually appealing and fit into the local surroundings.
Well, in order to make sure this happens effectively, there's a procedure that planners across the country generally follow and I'd like to talk you through that process. At first, they think about their vision – what exactly they want from this plan. And from this vision, they choose the goals that they want to achieve. These could be, for example, to reduce traffic on the inner city road network during rush hour or to build a new apartment block to provide more housing for an overcrowded area.
The next step is to collect data and then put together draft 1 of the plan. They don't actually show the first draft to anyone at this stage. Instead, the planner reads it and the content is revised. Remember that this stage of the process can take a lot of time and requires a lot of very detailed work but it's better to get things right at the beginning.
So now the planner has the second draft. Unlike draft one, this draft is given to a planning team who read it and pose a lot of questions. They also make recommendations and help the planner to get the plan just right. The plan is rewritten and the third draft is produced.
The next step of the process is to get the views of local people. They're invited to attend a consultation event where the plans are laid out. People can ask questions and give suggestions too. Or challenge the proposal if they want to. The planner then incorporates their points of view into the plan.
The last stage is for the planner to write the fourth and final draft and hand this over to the local city council where key decision-makers read it, debate it and decide whether or not it should be implemented or rejected.
Now, this all sounds fairly straightforward but, believe me, the process is not at all simple. There are many elements to planning that make it extremely challenging. One of these is the fact that a large amount of the town is not owned by local government. They own the streets and public buildings but the rest is owned by individuals. So what would you do if you needed to build a new road through the city to reduce traffic problems? How would you feel if you had to destroy fifty homes in order to do this? Planners do their best to keep everyone happy but few plans achieve this and difficult decisions have to be made.
Another issue is past planning. Urban planning isn't a new phenomenon. Most towns have grown from small villages over the last few hundred years, with thousands of people making decisions about how they should change. All of those decisions were made at a time when needs, architecture and technology were all very different. The current planner has to live with the effects of those decisions. For example, they might have to work with streets that are too narrow for large vehicles.
A final challenge is the fact that the planner has to see into the future and predict what people will want and need twenty or more years from now. For instance, what a smart home might look like. How would you do this, if you were a planner? After all, no one can really see into the future. I'm sure planners of the 1960s had no idea just what city life would be like for people today but they had to guess.
So, to sum up, urban planning is potentially very exciting – you get to change the way people live – but you also have to make, and live with, some difficult decisions.

10.9

E = Examiner M = Mariana

E: Now I'd like to ask you some questions about family and friends. Why do some young people choose to move out of the family home and live with friends?
M: Sorry, could you say that again?
E: Of course. Why do some young people choose to move out of the family home and live with friends?
M: You mean live with friends in an apartment?
E: Yes.
M: Actually, in my country it's not usual. I mean, most young people don't live with friends because very ... it's very expensive. But I know people do, in some other countries. Maybe ... Maybe some young people want to be more free and er ... um ... er ... er ... er ... be on your own and decide things on your own. When you live with friends, you can go out when you want. Also you don't have to call someone if you want to be late home. Also, you can be tidy ... er ... untidy and you can be er ... free. On the other hand, it's expensive to move away from home. You have to pay the er ... er ... for electricity and er ... gas and things. Also, another problem is that arguments with your friend and this can be a problem. It doesn't matter if you argue with your family, because they always love you. But ... it's different with a friend. Maybe you'll stop speaking to each other. Actually, I doesn't ... don't want to live with my friends. It's not good to see each other all the time ... Also, my mum washes my clothes and my friends can't ... maybe they don't want to ... do that.
